Proceeds of B-W Game for Stadium

Ashland Retail Board to Add to Stadium Fund by Tag Day

The Merchants' Retail Board of this city is conducting the sale of the tickets for the Ashland-Baldwin-Wallace game which is to be played Friday night. The proceeds of the game which is expected to draw the largest crowd of the season will go toward the amount necessary for the completion of the new athletic field.

The Retail Board handled the last football game last fall and realized \$550. This sum however, will not be sufficient for the complete construction of the field and an effort will be made at this time to add to the money available by the medium of the Baldwin-Wallace game.

Tickets will be sold by the representatives of the board at one dollar each and Friday will be another tag day for the new field.

Fans Will See Good Game

When the varsity tangles up with Baldwin-Wallace fans will see a game that promises to be extremely interesting.

Ashland has never yet defeated Baldwin-Wallace in an athletic contest of any kind and the Purple and Gold basketball teams are prepared to put forth a supreme effort to trounce the Berea men on the home floor on this occasion. Baldwin-Wallace administered a stinging defeat to the Murray men when the two teams clashed at Berea in the early part of the season.

This game should also present to the fans the very best that both teams have to offer of their basketball wares. Baldwin-Wallace has two forwards that will bear watching in Robinson and Tubbsing and Ashland boasts the best offense that has been developed so far.

Y. M. HOLDS ANNUAL SOCIAL IN GYMNASIUM

Games and Good Time Indulged in by Guests

GIRLS' GLEE CLUB CONTINUES GOOD WORK

Two More Splendid Concerts Given Last Week

The Girls' Glee Club of Ashland College which has been presenting a splendid program in some of the surrounding towns, added two more successful concerts to their record. On Wednesday of last week, they journeyed to Loudonville and delivered their pleasing concert to a crowded house. The people of the vicinity seemed more than pleased with the concert rendered.

The last concert was given at Smithville, a small town about 30 miles east of Ashland. The bad roads and rigorous weather prevented the assembling of a large crowd but the audience was pleased with the concert which was given. This journey was made thru considerable difficulties in the way of bad roads.

A week's itinerary for the club later in the season is still in doubt but it will probably become a reality.

A sumptuous dinner was served to the Club by the ladies of the church.

BAME DECLARES NATION NEEDS CAPABLE LEADERS

Flays Vitiating Pleasures and Claims America's Drunk With Power

Opening an address to the students in Chapel Tuesday morning Dr. Charles A. Bame declared that, "Stalwart, unflinching leadership is needed now more than ever before and will have more demands upon it in the future than the present demands."

Dr. Bame was here for a conference relative to the Forward Movement for Ashland College and accepted the opportunity to address the student body in Chapel. Dr. Bame is a forceful speaker and carries the conviction of sincerity with his speech.

The speaker frequently broke off from his narrative to illustrate his points with stories and anecdotes. He reviewed the present world situation with regard to Europe and America and Ashland's role in the world.

School Suspends When Boiler Leaks

Students Get an Impromptu Vacation Because of Cold Rooms

Classes at Ashland College were suspended Thursday and Friday of last week when the new boiler which heats Founders' Hall sprung a freak leak. The leak was discovered by the caretaker, Dad Petit, at about 11:30 Wednesday morning when it was leaking badly and threatening to extinguish his fires. He immediately called the workmen of the B. F. Donley engineering company to repair the break. They continued work until late Saturday evening when it was again declared fit for use.

"The cause of the defective section was due to the presence of core sand in the interior of the section. I cannot see how the section held up as long as it did," Mr. Bernherd, the designer of the furnace declared upon investigation Monday. His investigation revealed the fact that when the section was cast, the workmen neglected to remove the core sand and the intense heat caused this to dilate to such a degree that a crack over a foot long resulted.

Immediately upon discovery of the leak, the B. F. Donley Engineering Company began work on the similar furnace which will be used with the other one in the task of heating both the old building and the new building. The discovery of a defective section at midnight Wednesday caused them to give up all hope of repairing the furnace for school the next day and classes were forced to be suspended.

The furnace is so constructed that the break in about the middle of the machine necessitated the tearing down and rebuilding of nearly one-half of the boiler. To get to the defalcation, it was necessary to move ten sections of iron which weigh considerably over a half ton each. The task of refitting these sections after the leak was repaired was one which demanded much patience and skill. Each section had to be so perfectly fitted to the adjacent section so that not the slightest amount of water could seep through between them. Some of the sections required chipping with a chisel to make them fit snugly. The

ASHLAND TO HAVE BRAND NEW BAND SOON

College Purchases New Horn for Organization

Arrangements have been made which facilitate the organization of a college band here.

A tuba has recently been purchased by the College, making the lineup for a small band practically complete. The crew at the outset will be made up of probably not more than twelve men. More will be recruited for the aggregation as time passes.

Several players from the local High School have consented to lend their assistance. They will aid greatly in making the band successful.

The organization will function at basketball and baseball games and will be well set for the football season next fall.

Charles Mayes is to be the director for the present.

Gospel Teams to Conduct Evangelistic Service

At United Brethren Church of this City

The Gospel Teams of Ashland College will conduct the regular evening services at the United Brethren church in Ashland this Sunday evening. This service will be preparatory to the revival services of this church, which will begin the following Sunday. A typical evangelistic service, such as the team conducts everywhere they go will be the big feature of the evening. George Walton will bring the message and appeal of the evening. The subject will be "Life's Challenge." Mr. Walton is one of the most promising preachers of the seminary. Leslie Lindower will preside at the piano and Charles Mayes will lead the singing.

The team has several definite dates and several that are indefinite. Over the Easter vacation several teams will be out and at considerable distance from here. Among the churches which will be visited in the next few months are Sterling, Smithville, Fostoria, Oakville, Indiana, Pleasant Hill, Springfield Center, and Homerville. Plans

B-G Basketers Lose to Ashland

Murray Men Take Easy Game From Normalites

Ashland won easily over Bowling Green Friday night here, 41 to 37 in a fast but somewhat loosely played game. Close guarding was not in evidence as the score indicates.

McClintock opened the scoring for Ashland with a shot from under the basket, while Bachman started the Bowling Green offense in motion by a ringer from near the foul line. Ashland clearly displayed their superiority early in the first half by running up a comfortable margin. The second half the Purple continued to outplay them, although Ashland's guarding grew lax late in the period giving Bowling Green several easy baskets.

Every man that saw action in the game shared in the scoring, McClintock and Wood led in field baskets with six apiece. Wood had the best of the center battle, repeatedly outjumping his man. Captain Curry was somewhat hampered by the presence of three personal fouls to his credit on the scorebook. Kellogg was at his usual form at guard. Hastings and Miller did good while they were in.

One feature which might be said marred the game as an exhibition of good basketball, was the inability of the members of both teams to catch the ball. Probably this might have been due to the frigid atmosphere, which was undoubtedly a source of discomfort not only to players but to spectators as well. Charles Weber made his first appearance on the varsity squad. He plays a forward position and has uncanny ability to cage the ball from almost unbelievable angles.

Ashland displayed much better shooting than the normalites. Ashland made 8 out of 32 long shots and 11 out of 24 short shots. Bowling Green took more shots than Ashland. They made 7 out of 58 long shots and 5 out of 19 short shots. The upstarters had the ball out of bounds 28 times to the Purple's 17.

Lineup and summary is as follows:

Ashland—47	Bowling Green—31
Curry	rf Moscoe
McClintock	lf Premo
