"COLLIERVILLE, THE DAIRY TOWN"

Vol. 1

Collierville, Tennessee. Friday, June 28th, 1929

TOWN NOT "TOO SMALL **BUT TOO MUCH LAW**"

Collierville is Known by Criminals as Good Place to Stav Away From

"Collierville, Tenn. got a slap in the face Saturday as a "mighty small 'Burg'" when day at Shiloh Park. W E Rumbley, 20, Paris, Tenn was questioned by Sergt W J Hendrixs in connection brother, M Baird Sunday. with his alleged check passing activities. Rumbley was so a visitor of the Baird family. arrested late Friday by De-Pilkinton. The officers report week has returned to her home in ed finding several hundred Fisherville. blank checks on him bearing Collierville I just kept on go- with relatives. ing. That 'burg' was too small to light in and try to get any money out of it", Rumbley told Sergt Hendrixs. - Evening Appeal of Saturday.

Saturday's Appeal under the don, Ark. heading "Small Collierville" We repri Given Go-by By Forger"and states his reason was "burg was too small". As a matter of fact the town is not too small as evidenced by attempted stunts of this kind in other places of this size and a few weeks stay in Searcy. even smaller, but it's just the case of "too much law" here. ty officers and Deputies and Collierville. the City Detective and Police every co operation, it is becoming known that Collierville is "mighty good place for crooks to stay away from. Recently a man appeared in town with a nice little story which sounded wrong to Marshall Lowe and that party was soon under arrest and was found to be wanted in Ark. It doesn't take many cases of this kind for the word to be passed along that a town is uphealthy place for law break ers and so it is "passed up" by this class-not account of it's size, but because of it not safe to work there. Let's continue to help our officials and make Collierville a good town in which to live but 'too small for crooks to work in."

To Have Demonstration Sale

Thru the courtesy of Chas-Dean & Son, W H Beatty of Swift and Co. will be here Saturday to conduct a demonstration sale of Swift products at the Dean Meat Market. This will be interesting and instructive, for Mr Beatty is an expert in his line . Mr J L Dean who has charge of the market, is making every effort to give his patrone the best of service and this Demonstration Sale will be an attractive feature.

Our First Community Page

In this issue of the Herald will be found the first of a series of Community Pages, which will be run from time to time, sponsored by citizens and business firms of the town. Thru these pages we hope to help create a greater spi rit of co-operation in Community work that the Herald may render a service to our territory.

May Pop Inn enjoys an enviable reputation for prompt, courtsons and efficient service and Mr Brooks

What the Well-Dressed Young Man Is Wearing

By ELMO SCOTT WATSON

ERE'S what the well-dressed young man is going to wear this summer: high-peaked, wide - brimmed sombrero; soft flannel shirt with narrow black crayat; peg-top woolen breeches; neatlywrapped spiral leggings, and sturdy marching clogs. The color scheme will be olive drab throughout. On his

shoulder he will probably be wearing an army rifle. For the well-dressed young men of the nation are putting on soldier's clothes on a larger scale than ever before since the stirring war days of 1917 and 1918.

The difference between 1917-1918 and 1929, however, is this: it's a bloodless war that this crop of youngsters is going to fight. And no mother-if one may be permitted to resurrect a phrase which was fortunately soon forgotten-can possibly say in regard to this war that she "didn't raise her boy to be a soldier." For the common enemy which they are going to overcome includes stooped shoulders, flat chests, sagging backbones, too little or too much weight and poor understanding of what American citizenship

All of which is by way of saying that at 52 citizens' military training camps, strung all the way from Ft. McKinley, Maine, to Ft. George Wright, Wash., and from Ft. Snelling, Minn., to Ft. Sam Houston, Texas, these youthful volunteers, more than 40,000 of 'em, are coming from farm and factory, from night school in the city and exclusive boys' schools, from cottage and from mansion to assemble for thirty days of camp life under the Stars and Stripes at the expense of their Uncle Sam. "Essentially schools In citizenship" former President Coolidge once characterized the C. M. T. C. For this is America's way of making her young citizens better fitted, both physically and mentally for their duties in citizenship.

The assembly of the 40,000 this year marks the peak of development of the C. M. T. C. Idea since it was started in 1921. Today more than a quarter of a million husky young Americans will testify to the benefits which they have received at the citizens' military training camps, for that is the number, say government statistics, which have attended the camps. In reality they go back to the famous old Plattsburg camps, conceived and sponsored by Col. Theodore Roosevelt and Gen, Leonard Wood, for bustness men and college students. That was back in 1915 and the value of the training given in the original camps was so soon demonstrated when the United States was drawn into the World war that congress, when enacting the National Defense Act of 1920, authorized the citizens' military training camps.

Although the words military training are a part of that name, making soldiers is by no means the primary aim of the C. M. T. C. movement. No obligation for future military service of any kind is incurred of those who enroll in the camps. The only requirements are the age limits of from seventeen to twenty-four years, good character and sound physique. Free trips to camp and return home and an abundance of wholesome food, uniforms, athletic equipment, laundry service and other necessary expenses are provided by the government. And there are no strings attached to this offer. Uncle Sam simply asks the privilege of taking over for a period of six weeks the training of his sons for the purpose of the following:

"To develop the manhood of the nation by bringing together young men of high and different types from

We Talk Faster

ARTILLERY DRILL all sections of the country on a common basis of equality and under the most favorable conditions of outdoor life. To teach them the privileges, duties, and responsibilities of American citizenship. To stimulate the in

terest of the youth of this country in the importance of military training as a benefit to the nation and the individual taking such training. To inculcate self-discipline and obedience and to develop these youngsters, physically, mentally, and morally."

He believes that in return for what he is giving his sons so freely they will repay in kind-as good citizens in times of peace and as voluntary defenders if ever war threatens him.

Elaborate preparations have been made to make this year's camps more attractive than have been the popular encampments for the past eight years. These camps offer no vacation in the sense of purposeless squandering of time in idle pursuits or useless diversions, such as indifferent youth may fancy. The camp schedule is not arduous, but for every hour there is a definite aim and occupation. Military drill fills the mornings with short intervals for rest and for the ever-welcome milk period, wisely ordained for those still fast-growing youths. Afternoons are devoted to a wide variety of sports and games, in one or more of which each candidate must take his

In the daily program he finds a means to greater physical vigor and control. Military drill brings proper carriage, quickness of response and exact co-ordination of nerve and muscle. Mass calisthenics emphasize these qualities through rythmic movement. Adequate, varied, nutritious and appetizing diet for thirty days contribute its share to a bodily growth, measured by inches of height and chest expansion and many pounds of weight. Regular hours establish a proper habit of life. Systematic medical inspection wards off any danger of undue exertion and it is supplemented by hospital care in case of

After a long day of outdoor work and play, men welcome eagerly the recreation of the evening hours. The hostess house, under the direction of sympathetic and experienced women, affords the comforts and quiet enjoyment of a home or club. Chess and checkers, billiards and card games fill many a happy hour. Dances are orpartners furnished by committees and clubs of neighboring communities. The Liberty theater offers moving pictures with professional and amateur concerts and plays. Most camps have their own citizens' military training camp band and sometimes their own orchestra and dramatic and debating clubs. From reveille to taps the program is full of earnest work and wholesome recreation, inciting each candidate to full performance of duty through the day in order better to enjoy the resulting leisure of the eve-

ALESSON

Six years have demonstrated the value of the citizens' military training camps, for which there is no better proof than the increasing desire of young men to return for a second year, coupled with the unanimous approval of parents.

Somewhat Larger

"And what is your pleasure, madam?" asked the superbly dressed shopwalker, as a little woman in black

"I want a cap for my husband." The shopwalker introduced her to a young man who knew all about headgear.

"What size does your husband wear, madam?"

"Er-well, really I forget," admitted the little lady, with a blush; "but his collars are sixteen. I expect he'd want an eighteen or a twenty for a cap, wouldn't fie?'

Principle Forgotten

Many causes fall because men be gin by fighting for a principle and end by yearning to lick the fellows on the other side.-Capper's Weekly.

Our father's God, to Thee, author of liberty, To Thee we sing;
Long may our land be bright
With freedom's holy light,
Protect us by Thy might, great God, our
King.

"DECLARATION"

FROM THE "IMMORTAL DOCUMENT"

When, in the course of human events, it ecomes necessary for one people to dis the political bonds which have connected them with another, and to assume among the powers of the earth the separate and equal station to which the laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We, there ore, representatives of the United States of America, in General Congress assembled, appealing to the Supreme Judge of the World for the rectitude of our intention do, in the name and by the authority of the good people of these colonies, solemnly publish and declare, that these United Colonies are, and of right ought to be, Free and Independent States; that they are absolved from all allegiance to the British crown, and that all political connection between them and the State of Great Britain is, and ought to be, totally dissolved; and that, as Free and Independent States, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other acts and things which Independent States may of right do. And, for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor

ACTIVE IN AID OF CAUSE OF LIBERTY

Conrad Weiser, Pennsylvania Patriot and Long Friend of Washington.

At his home in the Tulpehocken valley, fertile in soil and rich in German tradition, a park of 25 acres is dedicated as a memorial to Conrad Weiser, of whom Washington said: "This man served the Colonies well. Posterity will not suffer him to be forgotten."

Born in Germany in 1696, Colonel Weiser left that country during the re-

ligious persecution in the Rhine valley in 1710. With several thousand Palatinate Germans, he settled first in the Schoharle section of New York. Here at the age of fourteen he lived for a time with the Indians and learned their language, which enabled him in later years to render his country inestimable service.

During the French and Indian wars Colonel Weiser rendered a service of national scope to the Colonles. Through his diplomacy he prevented the powerful Iroquois Indians from fighting against the Colonists.-Kansas City Star.

Betsy Ross Challenged Dr. George E. Hastings of the Uni-

versity of Arkansas in his book, "The Life and Works of Francis Hopkinson," credits Hopkinson, a signer of the Declaration of Independence, with having designed the Stars and Stripes. While examining the papers of the Continental congress, in the Library of Congress at Washington, Doctor Hastings found Mr. Hopkinson's bill for designing the flag, which was for designing the flag, which was adopted by the Continental congress in 1777. The claim was never paid. A board which passed on the account was of the opinion that "The public is entitled to these little assistances given by gentleman who enjoy a very considerable salary ander congress, without fee or further reward,"

"9****************** MIMI

{} Program for the Busy Girl

THERE are two little lines of worry in the rather pretty forehead of one Amelia and they're growing deep-er, day by day. She's a nice kid with a pretty good face on the whole and the two aforementioned lines aren't doing anything for her chances of an external schoolgirl complexion.

But she can't belp them. She is in a state of rush, of nervous, activity which produces the little frown, and produces with it a certain shortness of temper, and acidity of disposition which are not endearing.

She's actually a busy girl. She works, she has a certain amount to do with taking care of her own clothes -she goes out in the evenings quite a lot, she dances, plays bridge, writes letters to an ever-increasing circle of friends-in short she lives the full busy life of a normal girl.

But she has no pleasure in it. The needless tasks which are part of everyday life pile up in front of her into a big black shadow from which she cannot escape.

Her's is not an easy-going temperament. She does not meet each minute with a serene confidence. She worries in advance of a situation, worries all the way through it about something still further ahead-and wonders why she isn't getting enough out of life.

There's only one cure for the nervous fidgety type who have a certain amount of work to do every day which cannot be avoided-that is to form a program and to stick to it.

The girl who calmly and efficiently does each day what must be done is never faced with gigantic problems all of a sudden. It's the nervous hurrled Amelia type which is constantly having nervous breakdowns from over-

Amelia rushes through one task, only to pause for a good hard worry over what she's going to do to the old black dress when she gets home. She sits puzzling over this problem and bewailing her lack of money until some precious time has speeded past and she's horrified to discover that she has not even completed the work before her, let alone solved the problem yet waiting for her.

That causes more worry and the work she thereupon proceeds to do is faulty and inaccurate because her mind is too crowded with doubt and worry to permit its working clearly.

You see what I mean. That kind of frail little thing must have a program of some sort if she's to keep out of sanitariums the rest of her life.

Otherwise she will spend her days in worrying over what she has to do -and the time will slip past and she will find at the end of the day she has twice as much to do.

Luxury of Cattiness

BREATHES there a damsel with soul so dead who has never murmured to a bosom gossip, "Now for a really good low-down on our friends. and therewith plunged into a nice catty discussion of acquaintances, intimate and distant?

There are very few gals in the world who won't own up, under pressure, to a perfectly natural human desire, ever so often, to criticize what in their friends they find unpleasantand to do it thoroughly.

It doesn't seem exactly a victous practice-this little pastime of raking all one's neighbors over the coals, but honestly it's the most costly luxury any little maiden can afford.

The girl who settles herself down comfortably to tell an interested audience exactly why Dorothy isn't as nice as she's supposed to be-is indulging herself-and at what an expense.

For the sake of a few precious moments of tongue-wagging over a delectable piece of gossip-she's endanger ing her own good reputation and friendship with her hearers.

Oh. yes, she is! Not that they're all silently despising her for gossiping-as they eagerly listen and press for more details. Not that at all.

But somewhere inside them they're making a mental note: "This girl Anne CAN be darned catty if she chooses. I wonder what she'd say about me if she got half a chance." Of course, that isn't a really consclous thought with them at all. But the impression sticks, all the same.

and it breeds distrust of Anne. There aren't many high-minded young things in the crowd today who will actually refuse to listen to the low-down on somebody else. So that Anne will never receive open and violent rebuff for her story-telling proclivities. She will always be listened to with flattering interest

But she will not be trusted as a loyal friend and confidante, no matter how welt her gossip is received.

Even the Dumbest Dorn is bound to get wise to the fact that if Anne tells such interesting and dirty details about Dorothy, Anne will be able to furnish just the same amount of interesting data, on any girl to whom she takes a sudden dislike.

Therefore even the Dumbest Dora is careful not to give Anne food for conversation. She doesn't exactly avoid the little story teller, but she avoids being conspicuously friendly or unfriendly.

Tanglefoot Spray is thorough -kills insects by the roomful. None can escape—none revive.
The remarkable effectiveness of this powerful insecticide will amaze you. This one spray keeps your home free from insects the year around. You need nothing else if you buy Tanglefoot. Prices greatly reduced. Pay less and get the best.

Talkies Invade Italy

Italy has gone talkie, and sound picures are being introduced into theaters in all the large cities. A studio in Rome has been equipped for sound production, and a special sound studio s being constructed. American and English systems are being used.

Desert Place of Punctures

Kalaharl desert in Bachuanaland, Africa, is no place for autoists who dislike punctures. So declares a report of an exploring party that has just returned from there. Punctures averaged 20 a day, says the report, and this was due chiefly to stumps of dead trees, which often lie just beneath the sand with points like sharpened pencils. Indications are that plentiful supplies of good water exist, the report adds, and if these could be located by deep boring the desert could be transformed into a fine ranching

You See, He Had One

"How do you get along without a speedometer?"

"Well, when I get to driving 15 miles an hour my fenders start to rattle; at 25 the windows rattle; at 30 the motor starts knocking-and that's as fast as she'll go!"

Clean Teeth Aid Health

Have you ever tried 20 Mule Team Borax to sweeten the mouth and clean the teeth? Borax is a mild antiseptic-a perfect cleanser. Keep a cupful at hand to use regularly on the toothbrush.-Adv.

There are two sides to every storyand a lot of them should be turned.

A small boy doesn't care for a book that is instructive as well as amusing.

OPERATIONS

"I was three times under an operation and I was very weak and nervous and could not eat. suffered for ten years. I learned about Lydia E. Pinkham's Vegetable Compound and my husband bought me a bottle. I felt a little better and he bought me two more. I had the Compound in my home for two years and took it all the time. Now I feel strong and can do anything."—Mrs. A. Michalk, 5443 Mitchell Ave., Detroit, Michigan.

According to the observation of a well-known stenographic expert, with the passage of 20 years there is an increase in speech at the rate of ten words per minute, People rend more, see more, do more and are better educated than they were in the past and It has resulted in quicker thinking

MAGNIFICENT TRICKS

"Well, how about some tricks today?" asked the keeper of his pet elephant.

All the children gathered around the keeper and said to him: "Will the elephant do some tricks

today? Oh, won't that be fine! "Oh, please ask the elephant to do

some tricks, Mr. Keeper." "Well, how about it, Maggle?" asked the keeper, going into the zoo home

of his pet elephant whose name was Maggie. Maggie didn't answer, but made a tiny little noise, and taking her great

trunk knocked off the keeper's hat. All the chidiren gathered nearer and laughed, and the keeper said:

"I guess you feel like doing some tricks today, all right, Maggie," as he put his hat on once more, and no sooner had he put his hat back on his head than with another swing of her trunk and a funny little elephant chuckle, Maggle had knocked the keeper's hat off again.

"What does that mean?" asked the keeper. "I suppose you think that is a very fine trick, and so you must do It over, the way people do songs over If others have enjoyed them.

"Is that the Idea, Maggie?" Maggie said nothing, but waved her trunk from side to side as though to say, "Yes."

"Well, another trick," said the keeper, and he nudged the end of Maggie's trunk, so she knew that was the signal to stand up straight on her hind

Then she swung the keeper up, too; and then she slowly got down to the ground, let the keeper off, rolled over and then got up once more.

"Maggie means," the keeper said, "'yes,' we'll do some more tricks," So Maggie stood on her front feet, and then she knelt down while the

Straight on Her Hind Legs.

once more, very carefully stepping so as not to hurt the keeper.

Then the chidiren were allowed to give Maggie some peanuts, and they didn't see at first that Maggie was taking as many as she could, and not trying to eat them at once, for fear she would miss getting a few others. She held them in her trunk as she ok more, and if she had been able to

speak to the children she would have

"Goodness, gracious, mercy me! There is no use in having a trunk if one cannot store away things in it.

"I have no best clothes to pack away, no winter furs to store for the summer and no summer swimming sults to put away when winters comes around.

"But I can put away a peanut or two or three while I am getting a few more.'

When the children saw what the elephant was doing they were highly amused.

They fed the other elephants, too, but only when the keeper told them that night, for they knew that giving elephants or any animals all the food they wanted was not being good to the animals.

They didn't know how much food the animals had always had, so they always asked the keeper first, for they didn't want the animals to be sick.

It is not any fun to be a sick animal, any more than it is fun to be a sick person, and it is even harder for an animal as an animal cannot explain what is the matter.

An animal can't talk about his aches and pains.

So they gave just what the keeper told them they might, and they thanked Maggie most politely for doing her tricks for them, and as they thanked her, Maggle once more knocked of the keeper's hat, which the keeper said meant:

"Good-by, children, call again," And the children certainly felt they had seen some magnificent Maggle tricks.

Just Her Father

The Boy Friend-Say, who's the dumb-looking guy that drives your car around, and works in the garden? I notice he always gives me a nasty look when I come in.

The Girl Friend-Oh, don't mind him. That's just father.

Wrong Number, Little Boy, calling father at office-

Father, recognizing son's voice Little Boy-Pardou me, I got the

SCARFS AND PANELS FLUTTER; PRINTED CREPE IDEAL FABRIC

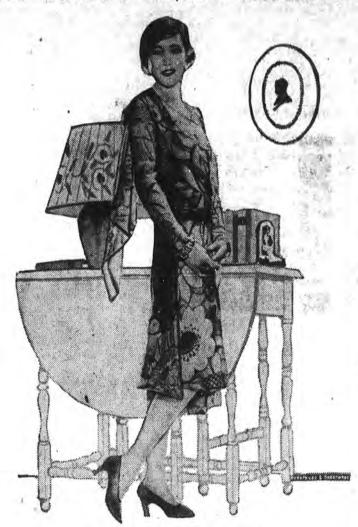

COSTUME designers have discovered that nothing so sets forth the chic and charm of sheer materials as to give them carte blanche to float and flutter at sweet will in guise of scarfs, panels and various capelets as novel and unique as genius can devise them. Wherefore the newest chiffon frocks are indulging in an orgy of shimmering airy-fairy drapes and contrivances which bespeak grace and beauty.

Yokes are especially tricky this sea-

many lovely cape and deep collar or wide scarf suggestions which so artfully serve to veil the arms in the absence of sleeves.

In the devising of these novelty soft necklines and shoulder drapes which are now so in fashion, fabric manipulation becomes a theme of supreme importance for most of them are made of self-material.

Patternings may come and patternings may go, but when it comes to polka dots they go on forever in the

Showing Capriciousness of Yokes.

son. One never can tell whether the | pathway of the mode. Just now modern yoke will remain true to its kind, or whether it will suddenly develop a "complex." Most of the new intricately designed yokes do just

The yoke in the picture is a fair example of the capriciousness of yokes. It started just like any sedate yoke being stitched flat across the front of the frock. However. when it arrives at the shoulders it assumes a dual role in that it glides into a graceful, floating scarf.

The majority of last minute styles elaborate the yoke idea in that they endow it with fantastic interpretations, such as, for instance, the tie yoke which enhances so many necklines. In looking up patterns for sum mer frocks it behooves the woman who does her own sewing to select those which exploit fanciful yokes.

Another outcome of the vogue for a soft "dressmaker" styling is the presence of cunning capes and bertha col lars. Under the magic touch of dainare now exploited, the crudities of patternings.

ing summer-day dress pictured below a turn-down collar and ends in a long Paris has gone polka-dot mad.

Even to the accessories of la l'arisienne exploit the polka-dot motif. A

ence for polka-dot themes. The strik ing summer-day dress pictured below is made of navy blue crepe de chine

Also, please notice that this partic ular crepe used for the gown shown here adopts blue and white for its color scheme, for, blue and white, be it known, are playing a leading part on fashion's fabric program, appearty, filmy, floating draperies such as as well as in floral and modernistic

The Kitchen

The little cares that fretted me, i lost them yesterday Among the fields above the sea, Among the winds at play:

Among the lowing herds,
The rustling of the trees:
Among the singing birds,
The humming of the bees.
E. B. Browning.

SEASONABLE GOOD THINGS

With small children in the home their food must be carefully selected and served. When they sit at the

same table with the grownups, It is best to serve the kind of food all may eat and enjoy. For breakfast the citrus

fruits, baked apples, prunes, figs or cooked pears, when the fresh are not obtainable. From this list the adult may find one that suits his taste. With a good cooked cereal, served with a little honey or raw sugar, buttered toast and a glass of warm milk for the child, coffee for the adult,

For dinner-stewed chicken or boiled fish, broiled steak, roast tamb, amb chops, mashed or baked potatoes, noodles or spaghetti with the chicken, spinach, cabbage shredded and served with the cream and a bit of lemon juice and sugar as dressing, stewed tomatoes, buttered parsnips, carrots or creamed onions. For dessert, fresh fruit, taploca or prune whip, floating island, junket or various custards or rice pudding.

For supper-vegetable soup, or any cream soup containing the cooked vegetable like onion, asparagus, spinach. Scrambled or codled eggs, entire wheat bread, any simple sponge cake or cooky, apple sauce, berries, fresh peaches, canned pears, and warm milk.

Rice Custard.-Bent two eggs thoroughly, add one pint of milk, onefourth teaspoonful of salt and onehalf cupful of sugar; stir in one and one-half cupfuls of cooked rice and flavor with nutmeg or cinnamon. Bake twenty to thirty minutes in a moderate oven. Serve with thin cream for the children or a hard sauce for the grownups.

Floating Island .- Put a quart of milk into the top of a double boiler. Beat the whites of three eggs until dry; put a spoonful over the top until the milk is covered. Cover and cook until the egg is set. Remove the egg white with a skimmer. When all are cooked place in a glass dish. Beat the yolks of three eggs, add one-half cupful of sugar, one-half teaspoonful each of salt and vanilla and add to the boiling milk. Cook until the egg is cooked and pour around the egg white in the dish. Chill and serve with simple cooky for dessert.

Take a pint of bash made of a cupful each of meat and mashed potato, well seasoned, doubling the amount if needed. Spread over the center of a well greased hot plank. Make small depressions with a tablespoon and fill with halved hard-cooked eggs, stuffed and covered with buttered crumbs. ing together in plaids, checks, stripes Bake with halved or sliced tomatoes around the edge, covered with a savory dressing.

Various Good Things. A simple rice dessert which is both wholesome and easy to prepare is:

Baked Rice Custard .-Take a quart of milk, a half cupful of rice. one-half cupful of sugar, a little salt and a half cupful of raisins. Mix all well, dust with cinnamon or nutmeg and place in the oven to bake for an hour and a half.

Oatmeal Ginger Cookles .- Heat one-half cupful of molasses, add two tablespoonfuls of butter, one-half cupful of brown sugar and two tablespoonfuls of milk. Sift one cupful of pustry flour, one cupful of oatmeal, one-half teaspoonful of salt, one-fourth teaspoonful of soda and one teaspoonful of ginger and add to the first mixture. Cool and roll on a floured board, cut into cookies and bake on a baking sheet fifteen minutes in a moderate oven. Many prefer to brown the oatmeal well and grind it through the meat grinder before adding.

Fruit Cup.-Take one cupful each of white grapes, orange sections and diced pineapple. Remove the skins and seeds from the grapes and the membrane from the orange sections. Mix the fruit, one-half cupful of orange juice and the same of pineapple juice, sugar to taste and a few grains of salt. Pack in a freezer until the juice begins to freeze. Serve in tall glass garnished with maraschino cherries.

Walnut Prune Whip.-Take one cupful of prune pulp (cooked prunes, seeded and put through a sieve), beat three egg whites until stiff, add three tablespoonfuls of sugar, one teaspoonful of vanilla and carefully fold in the prune pulp and one-half cupful of chopped walnut meats. Set in a pan of hot water and bake until firm in the center. Serve with whipped cream. A cold custard may be served with it if desired. Coconut instead of walnuts may be used.

To save spattering the cook book when in use cover with a glass ple plate, or keep a piece of window giass for the purpose.

Child's Best Laxative is "California Fig Syrup"

Hurry, Mother ! Even a fretful, peevish child loves the pleasant taste of "California Fig Syrup" and it never fails to open the bowels. A teaspoonful today may prevent a sick child tomorrow.

Ask your druggist for genuine "California Fig Syrup" which has directions for bables and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup.

Pigs Outwitted When pigs refuse to have their pictures taken, they can be set in position like a group of ten pins on a bowling alley. A contrivance designed by Gus Bohstedt, animal husbandman of the University of Wisconsin, provides a large frame of wood and galvanized iron with individual pens. The camera is focused in the frame and the hogs are driven into their pens. When everything is ready the pens are lifted into the air and the camera is snapped before the animals move, eliminating undesirable poses and oft-lost patience.

Willow Cane Took Root

Sixty-five years ago Increase Kendall thrust a willow stick he had cut for a cane into the ground at Fairfield, Maine, and forgot it. That was back in the days when Fairfield was known as Kendall's Mills and sawmills were its chief industry. The willow stick took root and today has grown to a tree which is twenty-four feet in circumference near its base.

SPIRIT OF FREEDOM

Hand in hand with the Spirit of Freedom travels the Spirit of Service. Freedom without service lacks much--but working together they constitute a creative force that builds communities and nations.

This tremendous force awaits the opportunity to aid us in building this community. Co-operative effort will put this Power giant to work for us--now. It is the community which serves best that profits most, and enjoys to the utmost the great spirit of freedom.

Our interest in the welfare of this community prompts us to sponsor this message to the people of Collierville and vicinity.

Congratulations and

15 Ex-Rulers of France Jobless

Presidents and Premiers Is Problem.

Paris,-France is troubled with a little problem of what to do with her ex-Presidents and ex-premiers, 15 of whom are jobless today. Her jobless ex-ministers number 100 or more, their ranks being greatly swollen two years ago, when cabinets fell like leaves during the period of financial dis-

Two former occupants of the White House are now allve-Taft and Coolidge, but in France four former occupants of the Elysee are alive and in good health - Poincare, Millerand, Emile Loubet, now aged ninety-one, and Armand Fallieres, a youngster of eighty-eight.

Loubet, now almost blind, has retired to his farm in the south of France, where except for his eyesight, he is in excellent health. Recently he fell, breaking an arm; but despite his great age the broken bone knitted rapidly and he is again able to use the limb.

"Water of Life."

Fallieres has also returned to his country estate, near Bordeaux, where he has immense vineyards. He cultivates a rich wine from which he distills eau-de-vie, which, translated, means "water of life," a highly tasty drink about twice as strong as whisky.

Fallieres and Loubet will go down in history as the two finest marksmen who ever entered the Elysee. When Loubet was President Fallieres was a minister, and they were always to be found at the Presidential hunts staged in the forest of Rambouillet, where the French government maintains a country home for its President.

Fallieres used to win all the laurels for shooting rabbits, while Loubet went in for pheasants and bagged more than any of his guests. Fallieres was a real sportsman. Even as President he used to leave the Elysee every morning for a two-hour walk.

the country he still putters around his vines, shod in the wooden sabots of the French peasants. He is still beloved of his neighbors, but both he and Loubet disappeared long ago from political life and lost all power.

With the exception of Poincare, none of the Presidents ever figured largely again in politics after leaving the Elysee. Loubet sought to serve his country again when war was declared against Germany and he organized the National Air society, but when the war ended he went back to

Millerand is still a senator, but takes very little part in parliamentary life. He is also a lawyer and has created a good fortune by practice in commercial cases.

None of the ex-Presidents are in poor or even ordinary circumstances. for all have private incomes. Poincare is probably the least wealthy and has had many acres of rich farm land in Lorraine. Fortunately they

What to Do With Former have means, for the salary of the President of France is not great and there is no pension.

Pensions for Premiers? Among the ex-premiers, Briand and Poincare figure most prominently. Poincare was premier five times, but Briand has headed nine cabinets and been minister in five others. Painleve, present minister three times and Clemencean and Berriott each twice. Barthou, Calllaux, Leygues and Francols-Marsal as well as President Doumergue and ex-Presidents Millerand and Loubet have each been premier of one cabinet.

There is now a movement to pension former premiers, but it has obtained little support. Every ex-member of parliament now receives a parliamentary pension from a fund to which every senator and deputy contributes a portion of his monthly salary. The ex-Presidents have all served in parliament, so in need could draw from

Paris Women Use Fancy Garters to Carry Drugs

Paris.-Fancy garters, worn just above the knee, are being utilized by women drug peddlers here and in other French cities in their illicit traffic. Small tubes of cocaine, morphine and other drugs have been found attached to fluffy blue and pink bands of rubbered silk.

Several women who have been arrested here in connection with the selling of such contraband declared they imported this method from Amer-They said this ruse has been worked successfully for sometime past in France, enabling elegantly dressed women to meet liners at the port and carry the drugs to various cities throughout the country.

It is estimated that enough phials of drugs can be carried in these garters to supply the demands of a popular oplum den for several weeks. The facility with which the tubes can be detached also makes the sale of dope to transient buyers extremely easy.

Wins Post of Mayor in Oratorical Contest

Dresden .- A rhetorical battle was fought in the town of Eubin, Saxony. This community, which numbers about 1,500 tohabitants, was to choose a mayor. More than 200 applianswered the advertisement in the State Gazette, and as the city fathers could not reach a decision they sorted out a dozen of the most likely candidates, invited them to their town hall and had each of them deliver an oration. The victory was unanimiusly accorded to a administration from Reichenbach.

Lover Doubts Sweetie;

Judge Fines Him \$10 Co'umbus, Ohio.—It cost Nic-ola Smith \$10 and costs to test his girl's love. Disguising his voice, Smith called her on the phone, gave an assumed name, and made a "date."

Later he asked for one the down, whereupon he hit her in the face. Alberta Alexander, the girl friend, had Smith arrested and the judge admin-Istered a counter sock to the doubtful lover's pocketbook.

Do Women Make Good as Flyers? Flyers Differ

East St. Louis, Ill,-Do women make good flyers?

Chief Instructor Clyde E. Brayton of Parke Air college says "No." Lady Mary Heath, British avlatrix, says "Yes," and makes it clear she doesn't mean maybe.

When Lady Mary Heath was here recently to address the student body of the air school, students looked forward to an argument-for Brayton had put himself publicly on record in a newspaper interview as believing that "women as a class" were incapable of learning to fly.

Brayton failed to show up. But Lady Mary stated her case as follows: "I quite disagree with him-naturally. We have found in England that women who are athletic, who have trained the eye and hand with tennis, rowing and other sports, are ideal flying material and learn to handle a ship quite as well as a man.

"On the other hand, it's true, as Mr. Brayton says, that women who haven't that background are poor material for flying pilots. But so would the men be if they had no training."

Salmon to Mount

Dams by Elevators London.-Mr. and Mrs. Salmon

have joined the deluxe class of the fish family. It has been practically decided that they shall have electric elevators to assist them in negotiating high river dams.

This scheme was brought forward in the house of lords when it was pointed out that the salmon could not jump over the proposed 100 foot dam to be built in the Farrar river, Scotland.

If the salmon want to get over the dam they merely swim into a targe box and are automatically tifted to the top of the dam and dumped on the other side. The electric elevator works day and night and will be of sufficient capacity to care for all the salmon who wish to be transferred over the dam.

Hunters Plan to Kill Whales by Electricity

Oslo, Norway.-The method of electrocution is to be applied to whale hunting during the coming season in the Antarctic. The new method provides for a metal line attached to the rope which connects the harpoon with the whale ship. A strong electric current is sent along the line.

Lesson for June 30

REVIEW: PROPHETS AND KINGS OF JUDAH'S DECLINE

GOLDEN TEXT-I have leved the with an everlasting love, therefore with loving kindness have I draws

PRIMARY TOPIC-Stories Retold. JUNIOR TOPIC-Learning to Serve

INTERMEDIATE AND SENIOR TOP-C-True and False Leader. YOUNG PEOPLE AND ADULT TOP--God's True Prophets.

The quarterly review always brings its problems. No set method can be prescribed. The grade, the aptitude of the pupils and the genius of the teacher are determining factors of the problem. For seniors and adults, two methods are suggested.

I. Character Study of the Kings and Prophets of the Period.

Biography is always fascinating and profitable. In the use of this method, assignments should be made week ahead. As to the kings of this period, a study should be made of their strong and weak points, and suitable tessons be drawn from them. As to the prophets, the nature of the ministry of each should be studied. II. The Summary Method.

This method involves the terse statement of the salient facts of each lesson with its central teaching. This method, to be effective, calls for as signments to be made a week in advance. Different minds will greatly vary. The following statements are offered as suggestions: Lesson for April 7.

Either at the beginning of Isalah's ministry or later when called to a deeper experience, he had a vision of the majesty and holiness of the living God. The leading lesson is that a real sight of the living God discloses the sinfulness of man.

Lesson for April 14.

In lending the people back to God Hezekiah proclaimed a passover. The passover was a memorial of the na tion's deliverance through the shed ding of the blood of a sacrificial lamb The lamb typified Christ. The only way for a sinning and divided people to get back to God and be united is around the crucified Lord.

Lesson for April 21.

Isaiah sought to comfort the peo ple by assuring them that the Lord God as the Messiah was coming to reign over the earth, and deliver them from bondage, and shepherd them. The only possible deliverance from the world is the coming of Jesus Christ and the establishment of His Kingdom.

Lesson for April 28.

Salvation of God's people was to be ecomplished through the suffering of their Messiah. At Christ's first com ing He suffered the penalty of our sin His suffering resulted in a spiritual progeny. Life out of death is the law governing the universe-natural and spiritual

Lesson for May 5. While the temple was in process of renovation, the law of God was found and read to the king. This brought great disturbance to his mind as he realized the enormity of the nation's sins. God's Word has power to con vict of sin and effect a revival.

Lesson for May 12. God called Jeremiah before he was born, overcame his timidity, and sent

him to warn his people of coming judgment. Though violently opposed and persecuted, God delivered him. Lesson for May 19.

Jeremiah called the people to obedi ence to God's Word. The only way to avert God's judgment is to return

unto Him and render obedience Lesson for May 26.

God will restore Israel to Palestine Israel will return and possess the land. Jesus Christ will then come and enter into a new covenant, writing the law of God in their hearts.

Lesson for June 2. Because Jeremiah faithfully de-

clared God's law, he was hated and ast Into a dungeon. Those who faith fully declare God's law shall suffer. Lesson for June 9.

The Rechabites out of filial loyalty to their father abstained from the use of wine. Jeremiah gave them a public test as an example to Judah. Obedience to earthly fathers brings blessings, but obedience to God brings greater blessings. Lesson for June 16.

Judah went into captivity according

to God's Word, which cannot fall. Lesson for June 23 Psalm 103 is entirely devoted to

praise to God. Those who have ex erienced the life of God in the soul will bless Him with all their being.

God Knows All

TURKEYS RAISED IN CONFINEMENT

Better Results Secured Than Where Poults Are Free.

In times past many people felt that turkeys could not be raised in confinement but that they should have a large area over which to range. This contention has changed now, however, and in several localities turkeys have been raised in confinement with great deal of success.

The Minnesota and Nebraska experiment stations have been among the leaders in investigational work in turkey production, in recent years, with some such work being done at other experiment stations in various parts of the country. At both of the stations mentioned it was found that better results could be secured if the poults were raised in confinement than if they were allowed to range over a large area, the method once followed in turkey production. In view of these findings, those who wish to go into turkey production, either on a small or large scale, are no doubt interested in the practices to be adhered to in this method of turkey

The United States Depar ment of Agriculture has found that turkey production has declined consistently since 1890, in the face of an increase in the production of all other lines of poultry and live stock. This decrease in production cannot be attributed to a decrease in demand, for the demand has always exceeded the production, or at least, there has never been a surplus of turkeys on the market with which to contend.

This decline in turkey production can be explained almost altogether by the fact that farmers have always felt that turkeys should have unlimited range. Because of following this method of production the turkeys came in contact with the chicken yards, to the detriment of the turkey business. The disease problem among turkeys which come in contact with chickens is great enough that it has tended to cut down on production among farmers and farmers' wives who have, in the past, raised turkeys and chickens together on the same range.

In the Nebraska investigations it was found that the old method of raising the turkeys on the open range with natural hatching and brooding by turkey hens was not successful. On the other hand, artificial brooding and hatching, by means of which feed and environment could be kept under the control of the producer, was found to yield very good results.

Electric Brooders Are

Clean and Convenient

The New York experiment station found electric brooders very satisfactory except in extremely cold weather, when this type of heat did not warm up the space in the house away from the brooder. Like electric incubators, brooders heated by electricity are clean, easy to regulate and very convenient.

Individual farm light plants extend the advantages of this electrical equipment to farms which are not located on an electric "high line." Because many farm plants are equipped with both generator and battery power, the supply of current for the incubator or brooder is constant and reliable.

Aylesbury Duck Meets

Favor as Market Fowl

The Aylesbury duck comes from the Vale of Aylesbury, from which fact it derives its name. It is the market duck of England. 'It has a long body, deep keel, and legs placed a little behind the center of the body.

The Pekin is Chinese, and is the most popular market duck in America, Its legs are set far back, giving an upright carriage.

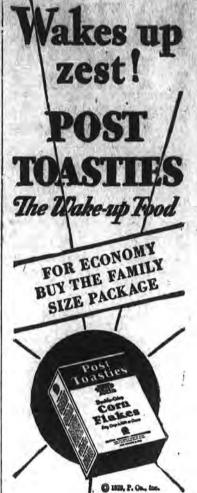

While the Indian Runner is not a popular market duck on account of its small size, Its flesh is tender and palatable, and its foraging habits give it a game quality that will make it in demand with epicures.

Watch Young Birds

Watch young and delicate birds very closely as they are most susceptible to the deadly roup germs. The same is true of fowls suffering from common cold or catarrh. The throat and nasal passages, being already sore and inflamed, are easily infected. Sick birds should always be isolated. They can be much more effectively treated when away from the flock and they cannot contaminate the healthier ones if the disease should prove to be contaglous.

Don't Hurry Pullets

into heavy production. Allow them to come into production normally without feeding highly stimulating feeds. Fewer "blow outs" will occur when production is not forced on the start, Feed two parts of grain to one part of mash. The puliets will continue to gain in weight and still receive enough protein to encourage the en-organs to function without interfering with growth. Any change in feed is

GENTLE BULL IS EVER DANGEROUS

Animals With Bad Reputations Closely Watched.

"All bulls must be regarded as dangerous," says H. A. Hopper of the New York State College of Agriculture. "It is the gentle bull, not the vicious one, that most certainly kills or maims his victim. Those with bad reputations are more closely watched."

Since improvement in dairy herds comes slowly, promising bulls should be kept in service long enough to determine the worth of their daughters. With proper care, bulls may give satisfactory service until fourteen or sixteen years old.

The chief reasons for frequent changes of bulls as indicated by owners, are: Sold for beef, changed to another breed, his calves were mostly bulls, his daughters lacked type and were poorly marked, sold for beef to avoid inbreeding, lacked arrangements for exercise and safety, he was often neglected, became useless as a breeder and was killed, he killed his keeper.

The first four reasons are, in part, valid; under certain circumstances they might justify the disposal of a bull, Professor Hopper says. The last four causes turn upon inadequate facilities for housing, for controlling, and for maintaining the health of the bull and a more serious cause.

Professor Hopper is the author of a bulletin just Issued by the New York State College of Agriculture on "The Housing and Handling of Bulls," E 177. In it he says that bulls respond to care and training. The author describes the bull stall, the safety bull pen, handling the bull, trimming the feet, ringing, and dehorning. The publication will be sent free upon request made to the office of publication, Roberts Hall, Ithaca, N. Y.

Excellent Plan to Keep

Calf Little Bit Hungry A calf fed three times daily can assimilate more food than when it is fed after it has finished drinking its milk. Milk fed to young calves should be at about body temperature. Cool milk should be warmed to a temperature of 95 degrees Fahrenhelt by setting the pail in a vessel of bot water before being fed. One cannot depend upon guesswork-be sure to use a thermometer! Cold milk will almost always

cause digestive troubles, resulting in scours which tend to stop the calf's growth and hinder its getting a good No one can accurately estimate with the eye the quantity of milk in a pail. Milk scales are very convenient for

this purpose Clean feeding palls are absolutely essential to successful calf raising. They should be washed after each feeding as carefully as milk utensils and sterilized if possible. Dirty pails invariably cause digestive troubles. All mangers and feed boxes should be kept scrupulously clean. Plenty of bedding, straw, corn stover or shavings should be used, especially in the winter, to insure the calves always being on dry litter and not on the cold

Contamination of Water Will Lead to Disorders

The water supply of dairy farms should be carefully examined and its purity established. The farmer owes this protection to his own family, to his business interests, and to those who use milk that comes from his dairy. Contamination of water may lead to typhold fever. All water on the farm, even that to which only the cattle have access, should be shove suspicion as to its purity. If cows wade in polluted water, disease bacteria may adhere to their bodies and later fall into the milk pails. Especial attention should be paid to the purity of the water in which milk pails and other utensils are washed.

Dairy Stable Equipment Makes Much Difference

The equipment of a dairy barn makes a great deal of difference in the labor of caring for the cows. Good concrete floors with gutters and drainage makes it possible to keep the cows clean and minimizes the labor of caring for the stable. Swinging stanchions which allow the cows considerable freedom have met with approval. When cows are confined by stanchions they require less space, less bedding and may be handled with less labor than by either leaving the cows loose or in box stalls. Dirt floors are not good in a dairy stable as they cannot be kept clean,

Cows for Cream

The number of cows that can profitably be kept for cream production on any farm is dependent upon the quantity of pasture, roughage and labor available. However, on most farms this number should range from five to ten head. The income from these cows will usually take care of the operating expense of the average farm and make it possible for the farmer to bank the returns from his cash crops rather than pay old debts with

by Fertilizing

Plants Need Long Season and Right Aids to Hurry Their Growth.

"Fertilize tomatoes to hasten their maturity," advises F. O. Underwood, of the vegetable gardening department of the state college of agriculture at Ithaca, N. Y. "The tomato," he points out, "requires a long seato mature a full crop, so that anything a grower can do to ripen them is apt to mean a bigger total yield."

Professor Underwood says that many points have to be considered in fertilizing the crop, such as type of farming and soil, previous crop grown and fertilizer used, money returns, and the cost of the fertilizing materials.

Plant Food Needed.

Tomatoes need some of all the plant foods for their best development. Nitrogen is needed early in the season to help develop a good vine to carry the fruit; though too much nitrogen may produce too rank a leaf growth at the expense of fruit. Some potash is also needed, but phosphorus is particularly needed to get large yields and ripen the fruit before frosts in the fall. .

"If a grower," says Professor Underwood, "is applying manure liberally, say at the rate of twelve or twenty tons an acre, he is probably supplying enough nitrogen and potash but additional phosphorus will probably pay. Phosphorus increases the fruit and seed parts of plants, and acid phosphate is the best source. Applied at the rate of from five hundred to a thousand pounds, to the acre, it should give good yields.

"On sandy soils, or on other soils where little or no manure is used. complete fertilizers usually pay. The 4-12-4 or 5-10-5 are both good; the former on the heavier types, while the 5-10-5 makes a good mixture for soils less well stocked with nitrogen and potash. Though the 2-S-10 is often used, a 4-12-4 seems better for the crop. The 2 per cent of ammonia in the former mixture is probably derived from some organic chemical which will be slowly available to the tomatoes. Tomatoes need nitrogen early in the season, and not when the fruit is forming

Fertilizer Pays.

"Exact amounts will depend upon Individual soils and cash returns, but the tomato crop will usually pay for additional fertilizer up to 1,600 pounds to the acre, although good crops are grown with less.

In addition to proper fertilizers, however, the plants must be wellgrown, and must be set at the proper time. Soil and weather conditions also play their part,"

Supply Farrowing Pens

With Needful Fenders Every farrowing pen should be supplied with fenders to protect the little pigs during and after farrowing. These consist of 2 by 8 inch planks fastened as shelves about eight inches from the floor, along both sides of the corner in which the sow makes her bed. This largely prevents the sow from squeezing the pigs against the wall or lying on them while they are small. If the farrowing pen has a concrete floor, a board overlay in the nest corner makes the sow's bed warmer, drier and cleaner.

Recommend Apple Spray

When Pink Buds Appear Summer spray for apples, usually known as the cluster bud or pink spray, is most effective when applied as soon as the pink buds appear in the blossom clusters, says L. C. Williams, extension horticulturist, Kansas State Agricultural college. The cluster bud spray consists of one and one-half gallons of liquid limesulphur and one and one-half pounds of arsenate of lead to each fifty gallons of spray. Dry lime-sulphur may

?******* Agricultural Hints

used instead of liquid material.

African millet is regarded as one of our most drouth-resistant crops. It is a good forage and hay crop. Grading of farm products is a vital

factor in the profits of the farmer and promises to become even more so. Grasses and weeds growing along roadsides and fence rows offer a perfect winter haven for many insect

. . . Maintain the fertility of your garden and truck crop soils by the use of green manures, barnyard manures and proper crop rotation.

Co-operative marketing has been getting on a sounder basis in recent years, and farmers will probably find it so important way of safeguarding their interests in the future.

Per Capita Potato Yield Right Guide

Price Trend Upward When Production Is Low.

Per capita production of potatoes In the country, as a whole, is as good a guide as any, when the grower is trying to decide whether he should store his crop in hope of higher prices that prevail at harvesting time, or sell them for the market price when they are dug, according to C. R. Arnold of the rural economics department of the Ohio State university at Columbus.

Arnold reports that the bureau of agricultural economics of the United State Department of Agriculture has been studying records for the past 27 years, and finds that when the national production has exceeded 3.8 bushels per capita, the price has tended downward during the ensuing season. The trend has usually been upward when the production has been less than 3.2 bushels per capita.

Only when the indicated crop was not much more than three bushels per capita was the grower usually, justified in holding his potatoes other years the chance of profit was too uncertain to balance extra cost of risk, storage and shrinkage.

Production in the late potato states, according to the federal investigators, is the most important factor in determining the season's price level.

Cleanest Culture Helps

Strawberry Leaf Spot The Ohio station gives the following advice about handling leaf spot of

strawberries: "Plant resistant varieties; the mafority of present-day commercial varieties are somewhat resistant.

"Set plantations where both air and water drainage are good. When setting out plants remove and destroy the diseased leaves; do not leave them about the patch. Practice the cleanest culture possible.

"Rotate strawberries with other crops frequently. It is rarely profitable to truit a strawberry planting more than two years, due in part to the accumulation of fungous pests. Many plantations should be plowed under after one crop has been secured.

"In renovating a plantation to be fruited the second time, destroy all diseased leaves. The fungi causing the leaf spots over winter on affected leaves. Mowing off the old leaves and burning over the plantation is advisable when a planting is badly infected.

"If these recommendations are followed closely spraying will not usually be necessary. However, one to three applications per season of 4-4-50 Bordeaux spray may be profitable in controlling unexpected attacks."

Pigs at Weaning Time Should Be Given Grain

Pigs at weaning time should be getting all the grain they will eat. The ration should include tankage or skim milk. With a good pasture on which to run, pigs should be getting a good start for market weight. Pigs which are doing well should make a pound a day gain in weight. Selffeeders are a convenient means for feeding corn and tankage, and the use of self-feeders results in as good and often better gains than the handfeeding method. A self-feeder should keep the feed dry, keep feed before the pigs at all times, and prevent

Treating Potato Seed

Increases Usual Yield

Seed potatoes treated three or four weeks ahead of planting will show no delay in sprouting as is often the case with seed treated to kill disease organisms it may be carrying. Treating seed that is coming out of dormancy may cause ft to become somewhat dormant again. Early treating gives the seed time to come out of dormancy and be ready to grow as soon as planted. Treating seed potatoes has increased the average yield 22 bushels per acre in the test plots conducted for the past eight years in

Dusters Satisfactory in

Fields for Killing Bugs

Dusters are fairly satisfactory in potato fields, for killing bugs. However, under most Nebraska conditions they are not nearly as satsfactory as they are in regions farther east. To be used most advantageously the dust should be put on when the plants are damp with dew and when there is little wind. It is not at all advisable to try to use a duster on a windy day. Consequently it is very desirable to dust the plants in the early portion of the day before the wind comes up. -H. O. Werner, University of Ne-

Grinding Feed Does Not

Increase Digestibility

For feeding dairy cattle, the grinding of a roughage will not increase its digestibility nor its value as a feed. Grinding coarse feeds may reduce waste by eliminating the coarse parts of the feed and may make the feed more palatable. When feed is high in price, grinding may prove advantageous. Grinding coarse feed will not make the feed into a concentrated feed. Neither will grinding dry, coarse roughage make the feed as good as when put in the sile.

CHAPTER VIII—Continued

-17-It was not easy for him, tonight, to give his attention to the dancing. The hours passed with intolerable slow-He knew that not until every guest had gone, and those staying in the house were asleep, would the dangerous Pierre Redlich evolve from the somber, square-shouldered detective.

The Bixels did not stay late. In 9 sense their going broke up the party They were so socially pre-eminent that the lesser lights did not care to remain. At two the last motor had rolled down the drive. By three there was not a light in any window. The men had become tired and the women knew the value of sleep.

Redlich had abandoned his resemblance to a rugged guardian of the law. He was crafty, creeping and sinuous. Tonight he was determined to take no risks. He wanted to make certain that Anthony Trent had gone to bed and was not about to patrol the exterior of the house. But he assumed the Yeatman carriage as he knocked upon Trent's door.

After a pause a sleepy voice bade him enter. Redlich saw that Trent had been compelled to rise from his bed, assume a dressing gown and come into the sitting room of his suite. He was not in his customary good temper.

"You are the third," he began crossly, "who has tried to prevent me from sleeping. First, Mr. Gimbert wanted me to share sentry go with him. Secondly, Payson Grant thought I ought to be out there on the wet grass looking for burglars in every bush. And now you come. What's your especial grievance?"

"Merely to suggest that you might desire to patrol the grounds with me." Redlich was smiling amiably. "I am going now."

"Then you go alone," said Anthony Trent irritably. "What's this conspiracy to make me a martyl for another man's house and tot?"

Then he paused as though struck by a sudden perplexing thought. "What's it to do with you? Why

should an accountant figure in a thing like this?" "The time is come," said the other impressively, "to tell you the truth. I am a detective engaged by Mrs. Grant

to protect her guests." He was gratified at the astonish

ment he had produced. Redlich had never liked Trent. He could see that over this young man they thought so bold and debonair fear

was creeping.

"Is there any danger, do you sup "We" hope not," Redlich answered. "but I shall not sleep tonight. I shall watch particularly this floor, because it is here that they will come for the jewels. I shall not ask any lurking creature what his business is. I shall

It was plain that Anthony Trent did not relish danger so close at hand.

"I'm going to lock my door," he said firmly, "and that's a thing I never do." When he had closed Trent's door and heard the key turn in the lock Redlich made a gesture of vulgar de rision at the bolted door.

On his side of it, Anthony Trent was chuckling softly. What infernal impudence for a crook like Redlich to think he could outwit or outgame the man who had been the master criminul!

He did not waste much time in aughing. Pulling the shades down be took from a locked trunk the second of the bathing suits he had bought that afternoon.

It was a guit of knitted wool, black in color, which covered him from neck to toe. The sleeves were wrist length. On his head be put an aviator's casque; to this he straped an automatic pistol.

When the lights were put out, the shades raised and the window softly opened, he drew on the same heavy gloves he had used to climb the lightning rod, and lowered himself to the marble terrace. He had noticed from his window that the white masthead light of the steamer was oscil lating far more markedly than on the previous night. It was a symptom of the sea, which was growing rougher.

When he came near the bathing houses Trent could at first detect nothing. Then his straining eyes made out, just beyond the white fringe of surt, a boat rising and falling in the tide. He could see, every now and then, that a man at the oars had to work to keep the boat in the same position. Plainly he was waiting midway between shore and ship. And Trent guessed shrewdly that he was waiting for Pierre Redlich.

Anthony Trent hoped itedlich would eucceed. He had two principal ac-counts against him. The first was use realtreatment of Mademoiselle Duple. The other was the poisoning of the

The man in the boat, leaning on his oars and dreaming of the case Redtich's work would bring him, did not see anything at which to be alarmed during his vigil. He wished his leader would make haste. These summer storms along the Jersey coast had an almost tropical violence at times.

So fixed were his eyes on the spot where the signals would flash that he had no idea a swimmer passed a few yards from him. The men on the tramp were leaning anxiously over the vessel's side when the black-clad swimmer clambered up the anchor chains got a grip of the hawse-hole opening. and pulled himself on deck. Merging into the black night he crept to the unoccupied bridge and climbed to the top of the little deckhouse. where no light shone on him, none would look for invaders.

Although Redlich's launch was wamped he clambered safely aboard the broad-beamed rowboat and was pulled to the side of La Belle Alliance. The captain, cheered at the news of complete success, took the wheel, sig-

Behind the Weapon Was a Most Sur prising Being.

naled his orders, put the vessel into the teeth of the wind and stood out to sea. In the cabin Redlich was describ ing his exploits.

The sense of achievement led to much boasting. He described, with scornful laughter, the kind of people he had lived among for the past week and had fooled so neatly. And in his leers he remembered, with special

emphasis, Anthony Trent. The men about him made him re neat how he had won his victories. They laughed particularly at Gimbert. who had finally been beaten and robbed of a diamond of five carats which Redlich flashed before them.

No person in the Grant household had been more puzzled than Thorpe the butler when, during the dancing, Trent drew bim aside.

"Thorpe," said Trent, "I'm on the track of the man who poisoned those two dogs. I take it you'd like to be in at the death."

Thorpe breathed beavily. "I hope I'll get the chance.' "I'm going to give it to you. Now

pay great attention to what I say." Thorpe listened wide-eyed with as tonishment when he heard.

"It's like a book, sir," said Thorpe, "it's like the sort of book I fancy. something red-blooded."

"Books don't all have happy endings," Trent reminded bim. "I'm not too sure of this. Remember all of you must be armed and all of you must

have flashlights. There'll possibly be no need to shoot, but every man of bunch must be captured or I shall be branded as the prize fool. You understand," he said as the music stopped. "that one incautious move on the part of you and your men, the lighting of one match or the smell of tobacco smoke, may rob you of all this fun. As for me, well I don't want to think of what they'll say to me if anything goes wrong."

The captain of the tramp steamer La Belle Alliance was reflecting on the perils of the sea and the unfortunate accidents which often occur. and associating Pierre Redlich with some of the most deadly, when he stared into the mouth of a blue-black barrel. Behind the weapon was a most surprising being. In the dim light it looked as though some strange creature of the sea had risen from his kingdom to invade that of man. Tall, dripping wet, and crested in an inhuman manner, this apparition advanced closer until the captain gasped with a certain emotion of relief when he saw he had to do with a man.

But a man with a loaded pistol may not be welcomed as a friend in situations of this sort. There was menace in the eyes that stared into those of the captain.

"I've taken charge," sald Anthony Trent, "and if I near anything from you you go back the way I came."

He made a free and sweeping gesture toward the open sea. Keeping his weapon pointed to the sailor, Trent stooped and picked up a small coil of rope. Hardly resisting, the captain was bound hand and foot, Then he was shoved into a corner and Trent took the wheel.

The wind was freshening from the east. The storm long expected was

'Only the captain knew that the madman at the wheel was altering the course of the vessel.

On shore Thorpe, the footman, and the four men from the garage were waiting in states of varying excitement. Thorpe would tell them no more than there was danger ahead. and probably, monetary reward for it.

In his struggle to gain the very position he now occupied, Trent had somewhat lost sight of the ending of the adventure. He was doing a foolhardy trick, and it might cost him a great deal. Incidentally it might cost him his life. There was no moon to show him the landmarks on which he relied. He signaled half-speed-ahead, and strained his eyes to see. Presently the white line of breakers showed ahead. And then, lifting Itself above the waterside mist, he saw the white Italian palace Guggensohn had

Now that he was sure of his direction, and knew he was headed for the abandoned harbor, he signaled fullspeed-ahead. It was one of the most thrilling moments of his life when be saw La Belle Alliance dart forward and begin to climb the private beach. A wave lifted ber so high at the last that her blunt old bow smashed the ornamental bathing-houses and came to a shuddering rest among the splintered wood. It would have been im possible to have a prettier landing. Piled up on a beach, and not for the

first time, lay La Belle Alliance. At least, Trent thought, there need be no loss by drowning through his exploit. Eight men came swarming up on deck having no idea where they were. They wasted no time in cursing an unskillful captain. They say the shining sands and they heard the breakers behind them, and they leaped ashore.

Thorpe's instructions, while concise had not been explanatory. He had been bidden gather his six men and keep them hidden in an unlighted garage until the moment came. The particular moment was to be indicated by Mr. Yeatman himself, who would act all unconsciously. The amazing news was that this Yeatman, so far from being a detective, was a burglar, and a dangerous one. Should Yeatman discover Thorpe spying upon him Trent thought he would shoot the butler, unless the butler was quicker with the gun.

It had been a moment of the utmost tenseness when Yeatman passed withing five feet of the watching butler. and even stopped for a moment as though listening.

Thorpe's six men, denied the little knowledge of the matter he possessed, kept silence admirably. They were conscious of a certain mysterious sense of imminent danger. Crouched on the damp sand they waited for some terror to creep upon them from

the deep.
(TO BE CONTINUED.)

Beds of Clay Reveal the Passage of Time

Geologists can follow the tracks of | the sun and tell the time, year by year, in geological ages-so ancient that even by millions of years they are hard to count.

Not far from Stockholm there are some remarkable beds of clay, regularly arranged in alternating bands of sand and clay. These turn out to be the layers deposited by the melting glaciers of the Ice age, each one laid down in the spring and summer when the sun was hottest. And as there was a freeze-up each winter and melting each summer, the layers become almost as accurate an index to the antiquity of the Ice age as the annual rings of a tree are to the age

of the tree. Moreover, the same system of measaring geological time has now been extended over all Scandinavia, and parts of India and South America. Everywhere the layers appear to correspond so closely in the variations of their thickness, year by year, that there seems no doubt they were laid down in corresponding years .- Baron Gerard de Geer.

Drama of Astronomy

Astronomy is marked by a drama of life and hope that no other human activity has approximated. The first complete system was formulated by the Greeks, who conceived the stars as fixed in a spherical shell which rotated once daily about the axis of the universe. This shell, beyond the orbit of the planets, they thought was the visible boundary of the universe.

And a Great Improvement

Kids outurally believe in evolution, anyway. They think they're an im-provement on the old folk.—Kokome

Service Service

On Poplar Pike

To Our Friends and Patrons,

At the close of our first year in business here, we wish to take this opportunity to thank everyone for the business given us and the many courtesies shown us during the past year. It has ever been our ain to serve you to the best of our ability and it has been through your co operation that we have been able to render this service.

As we go into another year, we ask this same consideration and again promise our best efforts in serving you and our community. May we ask that you come to us with your problems, whether in our particular line or another, that we may belo in any way we can.

On Saturday, June 29th, we shall have completed our first year and invite you to be with us to help us celebrate our First Birthday Party.

Again thanking you for favors shown us, we are

Yours sincerely,
