HISTORIC TRAIN VISITS COLLIERVILLE

Replica of "Best Friend" Here Wednesday Morning

The Southern depot was the setting for an interesting exhibition Wednesday morning when the "Best Friend", a replica of the original locomotive and two old-fashioned passenger cars visited here. The train arrived about eleven to be met by a large crowd of citizens and everyone wanted to see, several autos having reached the station at ten o'clock. The old train remained here 45 minutes while the crew had lunch at the Hester Hotel.

The tour, in charge of District Passenger Agent Ashby Perry, began for this division in Memphis Wednesday morning and will end at Corinth Miss. Saturday. On the train were A. White, General Road Engineer; H. L. Cogburn, the Road Foreman in charge; S. C. Cherry, Train Master; C. E. Colvin, Signal Supervisor; and the crew, W. S. Cowan, conductor; S. C. Thomas, flagman; and R. B. McCord, fireman.

As soon as the train stopped everyone was invited to go thro and inspect the equipment. Compared with the modern Southern passenger trains, the Best Friend looks like a toy. This comparison

Rev Russell Injured In Accident

While returning home from Memphis in his car Saturday afternoon, Rev B J Russell accompanied by his daughter, Miss Martha and granddaughter little Mary Lee Roberts, was painfully injured when he lost control of the car and ran into a telephone pole, a short distance from the station at Forest Hill. He had both arms broken and was cut in several places by broken glass. Miss Martha suffered two cuts on the forehead and Mary Lee was slightly injured. They were carried to the Methodist hospital in Memphis for treatment, the girls returning home Sunday, Rev Russell remaining in the hospital. He was doing nicely at last report and it is hoped he will be able to return home the last of this week.

METHODIST CHURCH

Sunday School 9:45
Regular Preaching by visiting minister at 11 o'clock
Junior League 5:30
Senior League 7:15
Prayer and Praise, Wed. 8:00
Woman's Society, Monday, 3:00

Christian Church

Sunday School 10:00 A. M.
Communion 11:00 A. M.
Preaching at 11:00 and 8:00 P. M.
Junior Endeavor 5:30 P. M.
Senior Endeavor 7:00 P. M.
The Senior Endeavor will conduct services at Kirks Chapel at 8 o'clock.
Prayer-meeting Wednesday, 8:00

"I was glad when they said unto me, let us go up unto the House of the Lord."

F A Coyle, Pastor.

Rail Birds

Tire Blows Out - - -

Magistrate Holds Court

A party of four young men from Memphis were driving home from Collierville on the afternoon of July 4th, about 6:30, when one of the tires on the car blew out. While waiting for help from a garage it seems they went into the pasture of Mr Ernest Johnson, about 5 miles from here on the Pike, and when Mr Johnson asked them not to bother his cows they became engaged in an altercation, in which Mr Johnson's son joined. Deputy Buddy Leake and Marshall Lowe were called and placed the four under arrest. They were carried to Bailey and tried before Magistrate Squire Strong and two were fined \$50 each, the other two drawing down \$25 each. They were carried to Memphis by the officers that night.

Car Wrecked Sunday Evening

A large truck belonging to R M Farris of Raines, Tenn. and driven by Mr Stewart, accompanied by two others, was wrecked on the Cordova road near town Sunday evening. Mr Stewart was badly injured and was carried to Memphis hospital for treatment, in a Hinton and Hutton ambulance. The others escaped injury. The truck was badly damaged, the wrecker of the Collierville Service Station bringing it to the shop.

"Rebuild 'Em"

A lot of us buy re-conditioned cars, rebuild cars but when a pair of shoes begin to wear out, throw them away and buy new ones. We are fortunate here in having a place where shoes are rebuilt and made as good as new even in some cases better, J L Parker makes a specialty of this line of work and maintains a Rebuilding Shoe Service in his shop. This is a line in which his ability as a workman, together with the high class of material used, makes rebuilding of shoes worth while. This week he received a large shipment of leather tanned in England. Another feature is the low cost of rebuilding. Many times for a small sum a pair of apparently worn out shoes can be made to give a lot more service.

Ford Sales

The Sales Department of Cooper Motor Co. report the following sales this week: Bryan Vick, Tudor Sedan, Ray Russell, Fordor Sedan, Rev F A Coyle, Phaeton and C R Davis, Tudor Sedan.

MICKIE SAYS—

"THE BOSS SEZ THAT IN A LONG AND ARDUOUS CAREER HE HAS BEEN BUFFETED ABOUT UNTIL HE PAYS NO MORE HEED TO A COMMON KNOCKER THAN AN ALLIGATOR. DOES TO A WOODPECKER. AND YET, SEZ HE, 'I ABSORB COMPLIMENTS LIKE A DOUGHNUT SOAKS UP COFFEE.' SO IF YOU THINK WERE GETTIN' OUT A GOOD PAPER, TELL US"

Installs Bus Line Service

And now we don't have to bother with driving our car to town, hunting up a place to park, jodging other cars and maybe having to fix a flat. We have a first class bus service daily, maintaining a convenient schedule and giving the best of service. S B Dunlap began the service last week and plans to put on one of the large busses at an early date. He is operating in conjunction with the Pickwick Greyhounds and the local station is the White Cafe. In Memphis the station is the Pickwick Terminal. Mr Dunlap is making Courtesy and Safety a feature of his Service and offers a convenient way to shop or spend the day in Memphis. He is offering a Special Rate of \$1.00 for the round trip on Saturday and Sunday, also a reduced rate on weekly trips. His schedule appears on another page in this issue.

Methodist Revival Postponed

The Methodist Meeting which was to have begun last Sunday at the Methodist church has been postponed indefinitely on account of the injury which Rev Russell received in the automobile accident. Further announcement will be made later.

Baptist Revival

The Revival Meeting for the Collierville Baptist Church will begin Sunday July 21st. Dr D A Ellis of Memphis will do the preaching. There will services both morning and evening during the meeting.

Germantown Notes

Mrs McGill of Memphis is visiting in the home of Miss Adelia Payne.

Misses Adelia and Telsta Payne were visitors in Buntyn Tuesday.

Mr Durham of Durhamville is visiting his daughter Mrs W L Drake.

Mrs W L Drake returned Saturday from a visit to her sister who has been quite ill in her home at Tupelo, Miss.

Mrs Raymond Hudson is visiting her mother Mrs H G Payne.

The W M S of the Methodist Church met Tuesday at the home of Mrs L O Collis at Mt Moriah and an interesting paper on "The Family Industry" was presented by Mrs Drake. After the business session a delicious ice course was served.

Mrs Barrett of Little Rock is spending a few days with her sister Mrs J G Faulk.

PE Gorman and wife were in Memphis Wednesday.

Mrs A E Gillum and Mrs J B Scruggs Jr spent Thursday with Mrs P E Gorman.

Work is progressing rapidly on the Methodist Church.

Mr T C Payne and family of Memphis were visitors here Tuesday.

Germantown Baptist Church

Sunday School 10:00 a.m.
Preaching by Pastor 11:00 a.m. and 8:00 p.m.

J. P. Horton, Pastor.

SHELBY COUNTY DAY AT FARMERS INSTITUTE

Many Plan to Attend Meeting. The Local Chairmen Appointed.

At least 500 Shelby County farmers and farm wives will attend the annual West Tennessee Farmers' Institute at Jackson, July 23rd, according to plans being made by W. M. Landess, county agent; Miss Jacqueline Hall, the home demonstration agent, and committees from every Shelby County community, under the chairmanship of Watson Kelsey, of Collierville, and Mrs Cecil Elliot, of Forest Hill.

The Institute will extend thru July 24 and 25, but the opening day has been designated Shelby County day, and a program of special interest to all Shelby Co. people has been prepared by President R. Y. Wellford, of Cordova and Secretary S. A. Robert, superintendent of the West Tenn. Experiment Station at Jackson.

Mr Kelsey, Mr Landess, Mrs. Elliot and Miss Hall have visited every community and appointed chairmen, Mr Sam Hinton and Mrs Chas. Dean being named for Collierville. A dinner will be served at noon and everyone planning to go should see Mrs Dean or Mr Hinton and secure a ticket. There are already about 50 planning to go from here.

The Institute is the biggest meeting of the year in West Tenn farm circles. Lecturers are secured from various states to talk on the many problems in which the district is peculiarly interested, and the institute has tours of the station, one of the best in Tenn., as one of the main features. Because of the great importance of tests being carried on in fertilization, varieties, rotations and dairy and other livestock farming, the experiment station at Jackson holds a particular appeal this year.

Farm wives will hold separate meetings, under the direction of the home demonstration agents of West Tennessee, and a formidable array of experts in the various problems of the of the farm home and country life is being assembled.

Piperton Notes.

The ladies of the Piperton Woman's club and their families spent a pleasant day the Fourth at the home of Mrs H T Ballard. Mrs Lura E Smith, County agent made a sample of three of a kind sherbert. Next month another ice cream will be demonstrated. Everybody come.

F W Piper made a trip to Jackson, Miss., the Fourth.

Mr and Mrs J F Rees of Jackson, Miss. are visiting their daughter, Mrs Frank Piper.

A L Person, wife and family and Miss Ruth Campbell visited in Mississippi the Fourth.

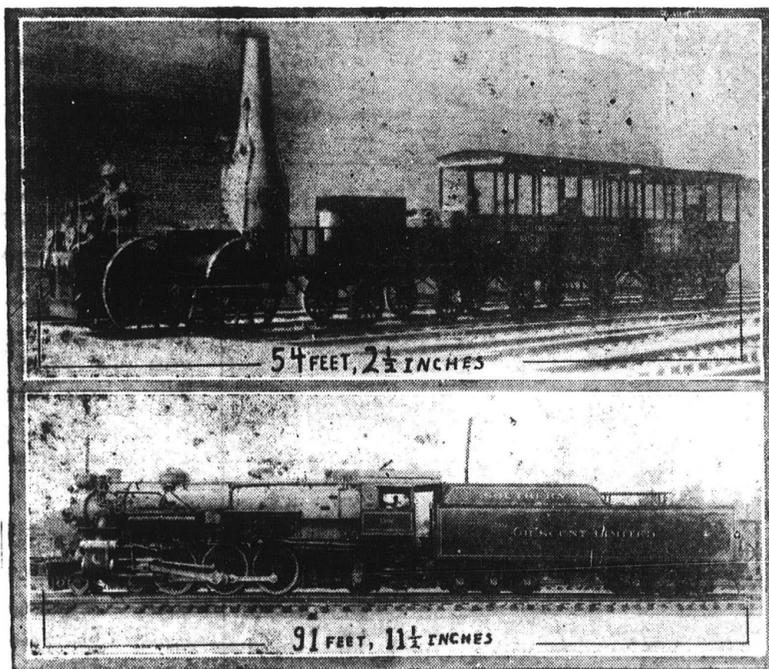

The local Sunday School enjoyed a picnic at Overton Park recently. The Zoo and Fairgrounds were visited.

Miss Irene Morton was a guest of Miss Elizabeth Piper recently.

Miss Ruth Campbell spent Sunday with Miss Elizabeth Piper.

Frank Piper made a business trip to Somerville Tuesday.

Rev Coyle and children spent Tuesday in Memphis.

made one realize more fully the the wonders of present-day travel. All appreciated this opportunity and the many courtesies shown by those in charge.

Repairing Band Stand In Park

Workmen are busy this week repairing the band stand in the Park. A new roof is being put on and new seats around the first floor. This is a needed improvement and adds much to the appearance of the Park.

"Beg Pardon"

In last week's issue of the Herald, an error was made in the Parkview Theatre ad, in which it stated "no shows on Monday and Tuesday nights" while it should have read "no shows on Monday and Thursday nights." Mr Wilson has returned to his former schedule of showing on Tuesday, Wednesday, Friday and Saturday nights. Additional fans have been installed, assuring one of comfort while he sees the good pictures that are being shown at the Parkview.

New Money Received

The new currency has been received by the local banks and is being put into circulation. The new style of bills are smaller and more attractive and will be easier handled but will be just as hard to get hold of and if you think they can't be spent as fast, just try it.

We are wondering who will be first to pay a new subscription to the Herald with new currency. To the first one who brings in a New One Dollar Bill we will send the Herald to any address they wish for one year. Who'll be first?

JUST HUMANS
By Gene Carr

"GO ON, GIVE HIM A LICK. I CAN'T STAY HERE ALL DAY!"

THE STEPS OF TIME

By DOUGLAS MALLOCH

I, TOO, once blushed about the past, I, too, once feared the future years. And then I learned the truth at last. And now how different life appears. For time is like a golden stair; How high the top I hardly care; Three steps there are that I can see And understand, and only three.

No farther back than yesterday I need to look, my faults to scan. And only then that I may play A nobler part, a better man. I cannot change the day that's done, But I can live a better one. That men can do, if men so will, And live tomorrow better still.

What lies ahead I cannot guess, Yet all that matters, after all, To me is whether I progress, Yes, higher rise or lower fall. Three steps are all that I can see, Only the moments close to me, But I, because I know I climb, Go whistling up the steps of time. (© 1929 Douglas Malloch.)

SOMETHING TO THINK ABOUT

By F. A. WALKER

CHEERFUL SOULS

WHATEVER it may be with regard to the happiness of the world at large, the cheerful soul, who through the summer heat and the winter cold continues to wear a smiling face, is a spectacle most of us like to behold.

There's the little mother with two children famed for ravenous appetites, who must be hurried out of bed in the morning, bathed, groomed and breakfasted in time for school, which she somehow manages to do without once losing her smile. And there is yet another gawky, overgrown child; the father of her family with whom she has to deal more circum-spectly, jealous of his own flesh and blood, who at times tries her sorely.

But with her natural aptitude for management she wheedles him into submission without losing her cheerfulness and thus saves the day to gladness and sunshine.

She leads the way by a look of happiness and a dozen trifling demonstrations of love, while this dour boy of hers gazes in admiration at her fine display of diplomacy and wonders in his dull brain whence came her beneficent power.

It is not impossible for him to understand his mixed emotions, but being subservient to the temperate tyranny of his wife, he yields complacently, as all good husbands learn sooner or later to do, and the cheerful soul marches forth in triumph, conscious that she is queen.

If the world would once catch this effervescent spirit of cheerfulness and appropriate it to general use, we of the grumbling sort might in a little while find ourselves in an earthly paradise of our own making.

The courts with their stern judges would be empty. The prisons would lack occupants and half of the sorrows of mankind would no more be known.

The essence of cheerfulness is kindness, nothing more nor less.

Even ailments of the body and mind, psychoanalysts will tell you, are largely influenced by the warmth of the cheering fire that is often kindled in the soul by a mere spark of faith, such as the little mother carries always within her, knowing when to use it and when to turn a deaf ear to the gray morning into a season of rapturous delight, reaching up to the glad heavens themselves. SACRIFICE RITES UPSET; "BLOOD VICTIM" KILLS 2

Ghastly Ceremony of Cult in Russia Turns Into Tragedy.

Moscow.—The story of meek Isaac on the sacrificial altar was strangely and tragically changed in a distant Russian village when a young man selected as a blood sacrifice in a religious rite suddenly seized the knife with which he was to be slain and killed two of those who had gathered to perform the bloody ceremony.

The remnants of an old sect, the followers of John Kronstadsky, have persisted to this day in the village of Tomme in the province of Uman. The village leader of the "Johnists," as they are called, was a former policeman, Skripnik, and his principal disciple was a peasant named Serednitzky.

Patience Exhausted.

Under the guidance of these two a large group lived up to the esoteric teachings of Kronstadsky. The coming of the soviet power they regarded as a visitation from God in punishment of their sins. They waited patiently for the visitation to end, mean-

Sawed Into Cache
For years John Bettis had seen an old log lying in his farmyard near Eldorado Springs, Mo. Recently he needed firewood and decided to cut the log into stove lengths. He sawed it open and revealed \$250 in gold dust hidden in a can thrust into an auger hole.—Indianapolis News.

Dishwashing Made Easy
Greasy dishes have given too many women a tired feeling. If they had used a heaping tablespoonful of 20 Mule Team Borax in the dishwasher it would have cut the grease and made the soap give 3 to 5 times more suds.—Adv.

How Fast Life Changes
An airplane honeymoon recalls the time that has elapsed since the lad assured his "Daisy," "You'll look sweet upon the seat of a bicycle built for two." A tandem bicycle was rather prosaic. Sky transportation has intensified romance.—Washington Star.

STOP THAT ITCHING
Use Blue Star Soap, then apply Blue Star Remedy for Eczema, Itch, Tetter, ringworm, poison oak, dandruff, children's sores, cracked hands, sore feet and most forms of itching skin diseases. It kills germs, stops itching, usually restoring the skin to health. Soap, 25c; Blue Star Remedy, \$1.00. Ask your druggist.—Adv.

Womanly Wife
"A neighbor of ours," writes a correspondent to Farm and Fireside, "had such a costly set of furniture covers made that she is now having a second set made to protect the best ones."

Exercise has never been denounced as thoroughly as some people would like to see it done.

For Foot Comfort
AND quick relief of hot, tired, aching, smarting feet shake Allen's Foot-Ease, the antiseptic healing powder, into your shoes. It takes the friction from the shoes and makes walking or dancing a delight. Sold everywhere.

BOILS
VANISH LIKE MAGIC
Carbolol, a specialist's salve, stops pain instantly, and rashes and boils worst boil or carbuncle often overnight. Get Carbolol today from druggist and laugh at boils. Sparlock-Neal Co., Nashville, Tenn.

Plunged It First Into Skirpsky.

while refusing to recognize the new regime. They even continued to use czarist money among themselves.

Finally their patience was exhausted. In a solemn council it was decided that "a messenger must be sent to heaven" to intercede in their behalf. A young member of the sect, Roman-shesky, was given the honor of acting as messenger. He accepted it in a saintly spirit of resignation, and preparations were made to release his soul by cutting his throat.

Pleads Self-Defense.
On an appointed day the whole sect gathered in their church. Young Roman-shesky was laid out on a table. A sharp butcher's knife was at hand for the slaughter and the leaders were intoning prayers. "I am strangely torn between the desire of my soul for heaven and the desire of my body for earth," the victim said when the prayer was over. "Please pray once more."

While they complied with his request, Roman-shesky's body apparently triumphed over his spirit. At any rate, he suddenly jumped from the table, grabbed the knife and plunged it first into Skirpsky and then into Serednitzky. They were both dead when the police arrived.

The sect has been disrupted and Roman-shesky is under arrest on a murder charge. He is pleading self-defense.

North Dakota Farmer Loses Life Saving Cat

Minot, N. D.—Concerned for the safety of a cat perched among high tension wires, Charles H. La Frenz, farmer, sacrificed his life to save that of the animal.

The cat was stranded at the top of a pole among the wires when La Frenz, donning linemen's hooks, went up the pole on his rescue mission. As he took hold of the cat, one of the metal hooks touched a ground wire on the pole, and the current, speeding through the cat, killed La Frenz. He and the cat dropped 30 feet to the ground while a small crowd of spectators stood helpless.

La Frenz was instantly killed. The cat, unconscious for several minutes, recovered and appeared none the worse for its experience.

Jealous Man Kills Wife With Baby in Her Arms

New York.—In a frenzy of jealousy, Louis Fidele shot and killed his wife, Mary, twenty-three, and Samuel Luisi, owner of a drug store below the Fidele apartment. The young wife was slain while she clutched her infant son to her breast and begged for mercy. Another son, three, saw the tragedy.

Rescues Fox Pups; Jailed
West Palms, Mo.—A thirty days' sentence was given Rev. A. H. Slaney, aged minister near here, when he rescued four small fox pups from a dog and took them home. The court held that he took fur-bearing animals out of season. After five hours' imprisonment the minister was released.

How It Started

By JEAN NEWTON

SIGNALING WITH FLAGS

FLAG language or the system of marine signaling is something that most of us have witnessed. If we have not had the opportunity to see this in operation at first hand we have seen in the "movies" the blue-jackets of one ship conversing with a vessel perhaps half a mile away by means of flags which they waved in the air according to a certain code.

The code in use is universal, so a vessel using a signal book printed in English can communicate with a vessel using a signal book printed in Italian or the language of any other maritime nation. It is of British origin and dates from 1856.

The use of flags as signals, however, is of ancient origin. The Venetians are known to have made wide use of them in this way and there is evidence that simple signals of this kind were employed in still earlier times. It was not until 1856, however, that Great Britain initiated the detailed system that is used throughout the world today.

SAWS
By Viola Brothers Shore

FOR THE GOOSE—

LOTS of times a man only begins to be real considerate to a woman when he's stopped lovin' her, as a sort of hush money for his conscience.

If you fall all by yourself, you stop cryin' much quicker.

Women ain't happy because they're good—they're good because they're happy.

FOR THE GANDER—

The only time reason ever wins over feelin' is when the feelin' ain't very strong.

The fish you catch never looks as big as the one that got away.

There's a lot of big givers that couldn't find their pockets in the dark. (Copyright.)

What Does Your Child Want to Know?
Answered by BARBARA BOURJAILY

HOW CAN A LOUD NOISE BREAK A WINDOW?

A sound makes air waves large and small. Loud noises make the worst, and if the waves are big enough the window panes will burst. (Copyright.)

Mother's Cook Book

Let not ambition mock their useful toil, Their homely joys and destiny obscure: Nor grandeur hear, with a disdainful smile, The short but simple annals of the poor. —Gray.

THIS AND THAT TO EAT

FRESH fish chowder is always a most enjoyable dish, but when the fresh fish are not to be obtained, salt codfish will make a most wholesome one, prepared in the same way, just dropping the soaked cod in the soup, as it will need little cooking.

Fish Chowder.
Clean and wash three pounds of fish. Place in cold water and simmer until tender. Fry one-fourth pound of salt pork until light brown, add a quart of boiling water, two cupfuls of sliced potatoes, one-fourth cupful of sliced onion, two cupfuls of any mixed vegetables or the same amount of potatoes, season well, add at the last one quart of rich milk and the cooked fish. Scald one-half dozen milk crackers, add one or two to each bowl of chowder when serving.

Orange Cup Cakes.
Cream one cupful of sugar, one-half cupful of butter, add the yolks of two eggs well beaten, one-half cupful of milk, one and one-half cupfuls of pastry flour to which one-fourth teaspoonful of salt, one and one-half teaspoonfuls of baking powder and the grated rind of an orange is added. Fold in the beaten egg whites. Mix and bake in gem pans. When cool cover with confectioner's sugar mixed with orange juice and a little rind.

Prune Nut Salad.
Take one-half pound of soaked and stewed prunes, cut from the stones lengthwise. Break one-half pound of nut meats into small pieces. Mix one-half cupful of salad oil, four tablespoonfuls of lemon juice, one-half teaspoonful of salt, a few dashes of celery salt. Serve over leaves of lettuce.

Hot Pot.
Cut two pounds of the neck of lamb into pieces, add salt, pepper and a tablespoonful of flour, roll each piece in the seasoned flour. Place a layer of potatoes in a deep dish, cover with a layer of the meat, then add a layer of shredded onion, repeating until all the meat is used. Cover with milk and bake in a slow oven for three hours.

Peanut Soup.
Take one cupful of peanut butter, one cupful of hot water, two tablespoonfuls of butter, two of flour, one teaspoonful of salt, one-half teaspoonful of pepper and six cupfuls of milk. Mix the butter and flour, add the water, cook until smooth, add milk, remove, add the peanut mixture, beat thoroughly, add seasonings and serve hot.

Fruit Cream Punch.
Take four cupfuls of sweet cream, two tablespoonfuls of lemon juice, one cupful of orange juice, four egg whites and sugar to sweeten. Let stand in a pan of ice half an hour. Fold in the whipped egg whites and serve in tall glasses. Crushed strawberry juice, cherry, or pineapple may be substituted.

Lamb Balls.
Cut the meat from a two-pound neck piece and grind in a meat grinder. Add two slices of bacon chopped, one-half cupful of bread crumbs, one tablespoonful of catsup, one teaspoonful of salt and a bit of onion. Combine ingredients, bind together with a little water to moisten and form into balls. Fry in hot bacon fat.

Dame Fashion Smiles

By Grace Jewett Austin

Have you a little capelet in your home? Those words that end in "let" are generally so nice—for instance, an omelet or a violet—and both of those, by the way, wear extremely fashionable colors. Of course, a capelet is a little cape, and it grew in the fashion designers' minds quite directly from the handkerchief scarf, which proved so astonishingly becoming. Though the cowboys of the plains had known long before "dude-ranches" were invented that a knotted red handkerchief about the neck was a ravishingly beautiful adorning, as well as a practical one.

So the little cape or the attached scarf forms a feature of many, and many a costume and coat of this year. Sometimes these little capes are so detachable that they become a separate small wrap to be worn when only a light protection is needed. Ah, shades of the great-grandmothers! Dame Fashion could bring out a brace of family albums and show dear old ladies among the portraits, wearing capelets!

There is one glorious thing about all this talk of "sun-tan." The genuine article is one of the finest badges of health. No one can gain a coat of tan without absorbing an amount of those most invigorating sun rays, which have other functions as well as browning the skin.

Dame Fashion will remember the weird tales of girls, in her childhood and earlier, who ate slate pencils, chalk, vinegar, and no one knows what all, in order to look lily-pale and fragile. So now it is quite the part of wisdom to give hearty applause to every style suggestion which brings that popular sun-tan into the bargain.

The little close hats which are so popular ought to help on the good work of sun-tanning. There was a striking sentence spoken lately in New York in regard to millinery: "Straw hats are impressive this year not so much in point of number but because of the women choosing them." If we are still clinging to felt exclusively—and it is certainly a good hat anchorage—that sentence may send us to join the "impressive" band of women wearing straw.

Just next to going to a wedding, one of the nicest things in the world is to drop into a friend's house after a wedding is over, and hear all the interesting particulars, pensively eat a piece of wedding cake and treasure a bridal rose bud. Dame Fashion did this the other day, and one of the remarks she saved for her column was, "Though she was just as lovely as she could be in her white silk dress and veil, when she came down to go away, all in tan, with everything an exact match, except just a corsage of sweet peas for contrast, we considered the thought for a time that she was prettier still."

And the consolation for a great many women will be that though their days of bridal veil and shower bouquets of lilies of the valley may be behind them, there is still plenty of opportunity for them to plan a complete ensemble in tan, which might prove to be that secret goal of every woman—"the most becoming gown you ever owned."

(©, 1929, Western Newspaper Union.)

Smart Motoring Coat Made of Camel's Hair

There is a swagger air about this winsome motoring coat fashioned of camel's hair. It is a double-breasted model, belted and cut on extremely tailored lines. With it is worn a navy blue beret and a harmonizing silk scarf.

Handkerchiefs Used to Make Attractive Frock

Five kerchiefs in an imported red and white printed pattern, with white border, were used to fashion this attractive frock. One kerchief was used for the novel collar, while two were used for the finger-tip length blouse.

Lace Trimmings Used on Fashionable Underthings

The legend that lingerie follows the mode is generally accepted in modern fashions, observes a Paris fashion writer in the Louisville Courier-Journal. Certainly it is the highest function of modern underthings to be present but not accounted for, and no matter what individual whims may be occasioned by novel outerwear styles, the fundamental purpose of lingerie is to screen its presence modestly.

Which means briefly that underthings must be made of the most gossamer of fabrics and be curtailed to an acute degree. Beyond that there is neither inhibition nor restraining dicta, and the most ingenious and often startling styles may be indulged.

One outstanding note of the newest lingerie is the use of lace as a trimming. This lace is always tinted, frequently in some old ivory tones. Sturdy laces with solid, flat or raised designs on a net background, such as Binche, Alencon or Racine, are generally employed.

One-piece combinations are still smart, and some unusual models from Worth are cut full at the skirt part and are shorter waisted than heretofore. In addition there are slip chemises with culottes to match. For evening wear the back of the neck opening is cut low and pointed. Rouff shows knickers gathered into deep lace bands narrowed in above the knees. No petticoats are used, but in many cases petticoat effects are featured on combinations as well as on culottes. The lace used is rather deep and is placed at the neck opening and at the hem. Laces with elaborate, pointed edges are chosen and are disposed upside down so that the irregular border, finely inserted into the fabric, forms an attractive design.

The same trimming is found on night-dresses that are straight and sleeveless. A very exquisite detail on these is a lace pocket placed at one side.

The principal fabrics used for these garments are washable crepe de chine and triple voile. For formal wear georgette crepe and, more particularly, crepe satin, are employed. For summer wear silk voiles and chiffons printed with pompadour motifs promise to be unusually popular.

All this lingerie is generally developed in flesh tones of pink chosen to suit the complexion, but colors such as turquoise blue, grasshopper green, mauve and apricot are also shown.

Openwork stitchings are used to trim sports combinations and step-ins, severe looking pajamas and night-gowns.

Dressing gowns are made of quilted, heavy crepes in pastel tones, embroidered in large geometric stitched designs. Others are ornamented with raised, corded designs.

Eggshell, Powder Shades Popular in New Gloves

Gloves are taking on a new importance since the advent of the sleeveless frock for summer wear. The eggshell and powder shades are at present in great favor, while many in ivory tints are to be seen, with fancy stitching in black, navy blue or other colors. The slip-on styles with ends finished with piping or even just pleated are being displayed.

For wear with a fancy chiffon dress there are gloves with cuffs made elaborate with embroidery or beading of cut-work designs, which are endorsed by some of the outstanding designers. The one-button glove fitting snugly at the wrist shows to advantage the new cuff styles and at the same time emphasizes the sleeveless effect. To wear with the long-sleeved dresses gloves of the same colors are chosen, but with simpler cuffs. For wear with sports costumes the slip-on styles take preference, in various colors and leathers.

The KITCHEN CABINET

(©, 1929, Western Newspaper Union.)

My life shall touch a dozen lives before this day is done—Leave countless marks for good or ill e'er sets this evening's sun. Shall fair or foul its imprint prove, on those my life shall hall? Shall benison my impress be, or shall a blight prevail. —Strickland Gillilan.

DRESSINGS FOR SALADS

During hot weather frozen salads and frozen dressing for well chilled salads make a strong appeal.

There is no limit to the way this idea may be developed. A tart lemon sherbet with a tablespoonful or two of peanut butter added makes a delicious dressing for a banana or a shredded cabbage salad.

With the salad well chilled and the dressing placed on it just at the time of serving, the result will be satisfactory. The flavors are better blended if the salad is moistened with a little mayonnaise or cream dressing and topped with the icy one.

Frozen Tomato Dressing.—Place one quart of tomatoes (canned will answer) in a pan with a pint of water, one stalk of celery chopped, one green or red sweet pepper sliced, a slice of onion, half a bay leaf, a few cloves and a few sprigs of parsley. Simmer for about thirty minutes, then pass through a sieve. To this tomato juice add four tablespoonfuls of lemon juice, one cupful of water, two tablespoonfuls of sugar and one teaspoonful of salt. Freeze as any sherbet. It should be soft and mushy, not too firm. When nearly finished stir in a cupful of finely chopped celery or grated apple, or an equal quantity of crushed pineapple drained from its juice. Serve with califlower or cabbage, or cheese and macaroni salad.

Frozen Raspberry Dressing.—To one and one-half cupfuls of raspberry juice add one-half cupful of water, the juice of a lemon and one-fourth cupful of sugar. Freeze as usual and when partly frozen add a pint of whipped cream lightly sweetened with powdered sugar. Freeze to a mush, then pack down in ice and salt and let stand two hours. Serve over cubed melon and bananas, or over any fruit salad.

Frozen Cream Mayonnaise.—Fold one cupful of mayonnaise flavored with lemon juice into a cupful of whipped cream sweetened with one tablespoonful of powdered sugar. Pour into a mold, seal and pack in ice and salt and let set an hour before using.

Salads for Summer.

Summer for the housemother in many homes means just more work and worry. Try to make this summer one long vacation, with the children home from school with planning each to do his share, the mother, too, may have some of the joy of the good old summertime.

Salads, sandwiches, cold drinks may take the place of hearty meals during the warm weather, with the family feeling better for the simple foods. Today every boy and girl is called upon occasionally to prepare a dish for supper on Sunday night, or camping trips and they, if well practiced at home, are happy to share in such entertainment.

To be able to mix a tasty salad, or prepare a rarebit well is an accomplishment of which to be proud. Everybody likes a fruit salad and they are simplest of all to prepare.

Simple Fruit Salad.—Use a combination of pineapple, firm, good flavored apple, a bit of fresh or canned pear, a half dozen or more of minced marshmallows, cover with whipped cream to which a tablespoonful of any good mayonnaise dressing has been added in the proportion of one tablespoonful to a cupful of the whipped cream. Serve all well chilled.

Mixed Fruit Salad.—Take one-half cupful each of chopped pineapple, nutmeats, orange and grapefruit pulp, halved maraschino cherries, with one and one-half cupfuls of sliced bananas.

The banana when well ripened is a deep yellow flecked with brown and no sign of green at the tips. Do not be afraid to buy bananas that are quite brown, if firm, for they are best when very ripe. Nuts and bananas supply carbohydrates and proteins, pineapple has a digestive element, apples have always been known to keep the doctor away, so with this combination one may be sure to have a healthful dish. Serve with the following dressing: Take two egg yolks, one-half cupful of sugar, one-half teaspoonful of mustard, two tablespoonfuls each of butter, lemon juice, vinegar, one of olive oil, one teaspoonful of salt, one-fourth teaspoonful of paprika and three-fourths of a cupful of whipped cream. Cook egg yolks, beaten with sugar, butter and other ingredients over water, stirring constantly. Cool, add the cream and pour over the salad.

Nellie Maxwell

POST TOASTIES

The Wake-up Food gives you new energy Quick

NO wonder it's called the Wake-up Food! This crisp, good-to-eat breakfast cereal, Post Toasties, turns so quickly into fresh, abundant energy to start the new day. There's rich energy stored up in those toasted flavory flakes, energy so easy to digest that your body quickly gets this rich supply of new vigor.

And energy is just half the reason why people eat it! The flavor is so delicious. The sun-mellowed sweetness of choice white corn delicately flaked and toasted crackling-crisp.

Try it with milk and berries tomorrow morning! Don't forget—there's just one way to get the Wake-up Food. Ask your grocer for Post Toasties—in the red and yellow wax-wrapped package.

ADVANCED, modern engineering throughout the entire chassis of the new Superior Whippet is responsible for smoothness and reliability of performance, consummate ease of handling, and maximum driving safety.

Whippet's big four-wheel brakes are of the positive, mechanical type—acting quickly and surely. Both the Whippet Four and Whippet Six have considerably greater braking area than any of their competitors. Other important Whippet advantages include extra long wheelbase, oversize balloon tires, full force-feed lubrication, silent timing chain, "Finger-Tip Control," higher compression engine, invar-strut pistons, and, in the Six, a heavy seven-bearing crankshaft.

**Wash Day on the
 Old Home Farm.**

By Harry Williamson

A SHORT time ago I was shown through a modern laundry—a gigantic plant doing the work of thousands of people, and handling the washing of an entire city.

The manager explained to me the intricate workings of all the machinery, and pointed out the various steps through which the clothes passed from the time they entered in their soiled condition, to the final checkover, when they are ready to go out clean and spotless to the satisfied customers.

When we had finished the inspection and the manager had left me, and gone about his usual business, I stood for a moment and gazed back over the huge room through which we had passed. I watched with interest the whirring machinery, and the busy laborers who deftly went about their respective tasks. As I stood there, my mind went back to our old wash place on the farm.

Instead of the noisy room, the old spring place was out there before me. The huge oaks, with their limbs reaching like giant's arms, made a friendly shade in which mother and the girls did the washing. Out there a little way was the spring—a barrel sunk in the sandy clay, at the bottom of which the water slowly seeped in fluctuating in quantity as the weather was wet or dry.

The big black kettle, standing on its tripod of brickbats, was boiling away, as the particles of dead tree limbs—a part of my contribution to the day's work—were blazing briskly. The pungent odor of homemade lye soap drifted out on the summer breeze, giving a pleasing atmosphere of cleanliness to the entire surroundings.

The rub-a-dub, rub-a-dub of the clothes on the washboard rather kept time to the tune the girls were humming. With the fire freshly chunked, and the vessels filled with water, I would lie on some of the colored work clothes that were to be washed last, and gaze up through the rugged old trees, where the limbs seemed to rise tier upon tier, like ribs in a great dirigible, and watch the antics of the birds that chanced to come that way, and to listen to the druid-like noises emanating from the branches.

Out through an archway of the limbs, could be seen a hotly contested battle between a big hawk and a half dozen noisy crows. The drone and chatter of the myriad summer insects and birds had an anaesthetic effect that all but lost me to the realities of the world.

"Son, fix up the fire," Mother would say in interruption of my dreams.

On the turnip-patch fence, and low scrubby bushes around the wash place, the finished clothes were hung. There in the breeze, like so many ghosts, they would hang to dry. This added another task to my list of duties, for ever after one occasion when my dog, Frank, pulled down some of the whitest garments, and to my de-

**AMERICA'S PIONEER LOCOMOTIVE REBUILT
 FOR TOUR OVER LINES OF THE SOUTHERN**

Charleston, S. C.—The "Best Friend of Charleston," first locomotive built in America to be used in regular railroad transportation service, is riding the rails again, a reproduction of this pioneer engine, together with its toy-like train having been constructed by the Southern Railway Company to be carried under its own steam over the South for exhibition.

The "Best Friend of Charleston" was designed by C. E. Detmold and built at the West Point Foundry in New York City for the South Carolina Canal and Railroad Company, now the Charleston division of the Southern, and brought to Charleston by ship on October 23, 1830. After several trials, it made its first scheduled regular run on Christmas day of that year. Its career was brief as well as historic for on June 17, 1831, its boiler was destroyed by an explosion. A negro helper, during the temporary absence of the engineer, had tied down the safety valve, being annoyed by the sound of escaping steam. The engineer who returned just in time for the explosion and two other men were injured in the accident. Subsequently, the running parts of the "Best Friend" were used in the construction of the "Phoenix," which remained in service for many years.

Weights Only Four Tons.
 Like its prototype, the "Best Friend" of 1828 weighs only approximately four tons and has an upright boiler, resembling a bottle. Coal is used as fuel, there being no available supply of the rich pitch pine which was fed into the boiler of the original. It has four driving wheels, fifty-six inches in diameter. Two inclined cylinders with six-inch bore and sixteen-inch stroke work down inside the frame to a double crank shaft, which serves as the axle for the rear pair of drivers. Connecting rods, working outside, transmit power to the forward pair of drivers. The cylinders are at the forward part of the engine and the boiler at the rear end.

The locomotive is only 13 feet 10 1/2

inches long, but in height it vies with modern engines, measuring 14 feet 10 1/2 inches from the surface of the rail to the top of its smokestack. The original was even wider than engines of the present day, having been built on the five foot gauge which prevailed in the South up to the eighties, but it was necessary to build the reproduction on the standard gauge of 4 feet 8 1/2 inches in order to operate it on tracks now in service.

The reproduction has also been provided with a steam gauge, water glass and other safety appliances which were unknown in 1830. Like the original, it has neither whistle, bell nor light. Hand brakes have been installed on the service car, forerunner and of the modern engine tender, and the two coaches which make up the train, whereas there were no brakes of any description on the original "Best Friend," or any of the cars of its train. Locomotive builders of those days were evidently so much interested in getting their engines to run that they gave no thought to the problem of stopping them. The valve gear works automatically when moving forward, but has to be manipulated by hand for back-up movement.

Coaches of 1830 Model.
 The service car is 12 feet four inches long. The two coaches which look like omnibuses on flanged wheels are faithful reproductions of those drawn by the original "Best Friend" on its first run. They are 14 feet long, each being equipped with a double bench, running the length of the coach. Passengers on the two sides of the bench sit back to back. Doors are on the side, midway the length of each coach. There is no way for passengers to go from one side to the other or to pass between coaches without getting outside the train.

The South Carolina Canal and Railroad Company was chartered December 19, 1827. Construction work began in Charleston on January 9, 1830, six miles of track, built on trestle work and laid with strap rail were completed

that year. The road was opened to Branchville, 62 miles, in November, 1832, and to Hamburg, S. C., on the Savannah River, opposite Augusta, Ga. October 1, 1833. It was then the longest continuous railroad in the world being 136 miles in length. It was also the first railroad to carry the United States mail. Subsequently a branch was built to Columbia from Branchville, which thus became the first railway junction in the world. A branch from this branch was built from Kingville to Camden. The original line and the branches are now parts of the Southern Railway System.

The reproduction of this historic locomotive and its train by the Southern serves to call attention to the extraordinary part which the business men of Charleston played in the development of the early railroads of the South. The construction of the line to Hamburg fired other communities with the ambition to build railroads and many of them turned to Charleston for capital to carry out their plans.

Horatio Allen, one of the leading engineers of his time and one of the earliest advocates of railroads to be operated by steam power, was employed as chief engineer by the South Carolina Canal and Railroad Company and supervised the construction of both roadway and machinery.

Nicholas W. Darrell helped to set up the "Best Friend" after its arrival in Charleston and was the first man to open its throttle, thereby having good title to being the first locomotive engineer in America. He ran an engine for many years and was then promoted to master machinist in which position he served until his death in 1869.

The reproduction of the "Best Friend" was manufactured in the Finley shop of the Southern at Birmingham, Ala., and assembled in the Charleston shop. The coaches were built in the Southern's shop at Hayne, S. C., incidentally named for a Carolinian who was among the most prominent of early advocates of railway construction.

light, played with them in the sand, it was my job to "mind" the clothes, and see that they were not disturbed during the process of drying.

The old wash place is gone. The sand has long since covered the barrel from which we dipped the water, and the old oaks had too much good lumber in them to withstand the needs of an industrialized world. Those who made up our group on such occasions are scattered, and some of them are gone to a final rest.

"Laundry man!" I hear someone yelling at my front door now. Its washday in the good year 1929.

—The Progressive Farmer

LOCALS & PERSONALS

Mr and Mrs M W Wooten and little daughter were in Memphis, Thursday.

Mr and Mrs Alec Agee of Greenwood, Miss. are visiting their parents this week.

E C Cooper spent the week end in Hot Springs, returning home Tuesday.

Thomas Moore accidentally shot his foot Tuesday while playing with a target gun. The wound is not serious.

Misses Ruth and Frances Piper were in Memphis on business Tuesday.

Mesdames Burkam and V. Leake and Tannie Leake were in Memphis Tuesday.

Mr and Mrs W W McGinnis visited Dr and Mrs Anderson in Eads Tuesday.

Mr and Mrs W P Life, of St. Louis are the guests of Mrs Floy C Linderman.

G W Hughes, of St. Louis, is with the Moore Barber shop. He says he likes Collierville with its friendly folk.

Mr and Mrs Howard Jameson of Memphis spent last week end with their parents, Mr and Mrs T B Jameson.

Mr and Mrs T B Jameson, Mr and Mrs Howard Jameson and Mr and Mrs Luther Caruth spent Sunday in Jackson with relatives.

Dr J F Williamson of Pleasant Grove, Miss., is here this week.

Mr and Mrs E R Harris and daughter, Miss Mabel Lee of San Antonio, Texas, were the guests last week of Mr. and Mrs Walter H Harris.

Miss Eva Jennings of Portales, Mexico, is the guest of Mrs M L Weaver.

Ridgeway Notes

Mr and Mrs Charley Shannon are spending the summer at their country home.

Mrs Massey visited friends in Germantown Thursday and Friday.

The Fourth of July was very quietly celebrated.

Miss Pattie Williams of Germantown was here Sunday.

Miss Anne May went to Memphis Sunday.

Mrs Allen Fisher gave a Fourth of July picnic on her lawn Thursday.

Mrs W T Harrell of Memphis visited Mrs Massey recently.

Mrs Joe Corne has moved and Mr Ramsey of Memphis will occupy her home.

Mrs Rehse of Germantown was a visitor here Friday.

Rocky Point News

Mrs Louise Redditt had as her guests Sunday her brother and family Mr Roy Harrie.

Mr and Mrs Walter W. Walls were the guests of Mr and Mrs J R Loury Wednesday.

We are glad to say Lucille Redditt, who has been quite ill, is up again.

Mr Nebhut Pleasants visited his sister Mrs Maud Redditt Sunday.

We are sorry to say Mrs Ware is on the sick list again.

Curriest Leath was a pleasant visitor here Saturday.

Everyone enjoyed the ice cream supper given by Mr and Mrs Rush Redditt.

We are sorry to say Miss Callie Redditt and baby brother are on the sick list.

Mr and Mrs C A Redditt had as their guests Sunday Mr and Mrs J R Mayo of Eilersdale.

Mr and Mrs Sam Callicut had as their guests the week end P H Callicut and wife and Lee Thompson and wife of Cayce.

Mr and Mrs E L McVey will leave Friday for New York.

Mr James Starks and children visited Mr and Mrs Edward Bass Sunday.

Mrs Lonnie Johnson from Vincent, Ark. is visiting her sister Mrs Louise Redditt.

Mr and Mrs Garner Pybus visited his sister Mrs Eula Lowry Tuesday.

Mrs Sam Jones is visiting her sister Mrs Louise Redditt.

Cordova Notes

Mr and Mrs Thomas J Wright and family of Birmingham, Ala., visited their sister, Mrs R D Perry last week.

Miss Kathryn McDouald is the guest of Miss Marjorie Ramsey.

Mr and Mrs Oscar Hall from Blytheville, Ark., visited J E Bazmore Sunday.

S B Goodloe spent Thursday in Whiteville.

After two weeks visit with Mrs W T Sanderlin, Mrs D A Webber has returned home.

Misses Grace and Lorena Week of Memphis spent the week end here with homefolks.

Mr and Mrs Preston Yates have moved into their new bungalow.

Miss Hazel Perry entertained her cousins, the Misses Wright, of Birmingham, with a lawn party. Iced watermelon was served.

A number of the young people enjoyed a hayride and picnic supper at Riverside Park, July 4.

Members of the Junior Farm Bureau, with Miss Ellen Latting as sponsor, enjoyed a drive in the City and a show on the Fourth.

Bert Perry who has been employed in Memphis since the close of school spent the week end at home.

More War Time Horrors to Be Razed

Another Washington "hang over" from the hectic days of 1918, the so-called Government Hotels, built in the Union Station plaza to house temporary war workers, is soon to be razed. The buildings are of frame and stucco construction and have been called an eye sore for years.

South America Now Breathes Easy

Settlement of Tacna Dispute Ends Fifty-Year War Threat.

Santiago, Chile.—The announcement of the settlement of the long standing boundary dispute over Tacna and Arica, often called the Alsace-Lorraine of South America, ends a fifty year threat of war that many times has imperiled the peace of South America.

The dispute had its beginning in the war of the Pacific, or the nitrate war, as it is more latterly called which began in 1879 when Chile invaded the Bolivian province of Atacama on the pretext of broken treaty rights.

Prior to this war much Chilean capital was invested in the nitrate plants of Atacama, but Chile never vigorously pressed its doubtful claim to the province as long as Bolivia did not attempt to tax Chilean capital invested there.

Whether, as charged by Chile, for the purpose of inciting war or for revenue, Bolivia broke its treaty with Chile and began taxing Chilean nitrate interests. Without waiting to declare war Chile seized the city of Antofagasta.

Chile Wins.

Two weeks later Bolivia formally declared war and called upon Peru to assist her. The Chileans charge that Bolivia and Peru had an offensive and defensive treaty against Chile. The war ended in 1881 when Chilean troops seized the city of Lima.

The treaty of Ancon was signed in 1881. Bolivia handed over to Chile the province of Atacama, and thereby lost its entire seaboard and a world monopoly of nitrate of soda. Peru ceded the province of Tarapaca and handed over Tacna and Arica for ten years, when a plebiscite was to have been held.

The plebiscite was never held, as the Peruvians will explain, because Chile feared she would not win, and, as the Chileans will explain, because Peru believed she would lose.

The fact of the matter is, the plebiscite was never held for the very

good reason that Chile fought two nations in 1879 to obtain the province, and as long as the veterans of that war dominated the politics of the nation she stood ready every minute to fight again to hold it.

Matter of History.

Like the veterans of the American Civil war, the veterans have now passed from the political picture, and for several years Tacna and Arica has been only a matter of the history books for the present generation of Chileans. Thus it was that the way was paved for the announcement of the present settlement.

In recent years the disputed province has been a convenient tool for politicians. If President Leguia became involved in internal dissension he had only to raise the question of Tacna and Arica to divert public attention.

Likewise, in Chile, when the army was going to revolt in 1920 the politicians raised the cry of war with Peru and rushed 20,000 soldiers to the northern frontier to defend the nation against a mythical army of their own fabrication.

Although Bolivia was left out in the cold in the present settlement, there is no doubt that she has not given up her hopes for an outlet to the sea and many persons believe that Peru will sell her share of the settlement to Bolivia after the completion of the port. The province is worth little or

He's Wed All Right, But Who's His Wife?

Memphis, Tenn.—Matrimonial problems of Lloyd P. Powell have "stumped" Memphis courts.

According to Powell, he was sentenced to prison for bigamy when he was not a bigamist. He is legally married to his second wife, although he is not lawfully divorced from his first, and can't have his second marriage annulled until his first divorce decree is set aside, and if set aside he becomes a bigamist.

nothing to Peru, outside of the honor involved.

By the treaty of 1903 Bolivia waived all claims against Chile upon the latter's promise to build the Arica-La Paz railroad and upon the payment of a large indemnity. This treaty was definitely discharged last year when Chile turned over the Bolivian section of the railroad to Bolivia.

While it is pointed out in some quarters here that the United States and Great Britain could never have afforded to permit Chile and Peru to go to war, all South America has breathed a sigh of relief over the settlement, because the province was long a potential tinder box of an all South America conflagration.

Noodles by Mile

Bakersfield, Calif.—"The old noodle" is about to bring fame and fortune to W. P. Agnew, Bakersfield machinist. He has invented a simplified machine that turns out noodles at the rate of 20 miles an hour; 21,728 noodles a minute.

Largest Old Glory on the Capitol

View of the largest American flag in the world as it was displayed across the front of the United States Capitol where flag exercises were conducted by the United States Flag association. The flag is 100 feet long and 90 feet wide. It was sent to Washington from Detroit.

Horse Routs Bear From His Pasture

Middleton, N. Y.—While a horse was feeding in a pasture near Hortonville, Sullivan county, a big black bear came leaping into the field.

The moment the horse caught sight of Bruin he decided the newcomer was not one with whom he desired to associate and forthwith went for the bear, kicking and biting the animal. When last seen the bear was making haste for the woods.

FRISCO'S TELEGRAPH HILL SOON WILL BE BEAUTIFIED

Famous Place Played Important Part in Early History of California.

San Francisco.—Telegraph hill, which played an important part in California's early history and in its latter days became a retreat of the intelligentsia, is about to dress up and be formal.

Looking over San Francisco bay from its lofty perch above the Italian district, Telegraph hill long has been a spot of intense local interest.

It was from the crest of the hill, that the then new "whispering wires" of telegraph carried the first message across the continent. But before that—back in the pioneer days when gun totting editors wrote of local happenings—Telegraph hill was the signal point from which ships were guided through Golden Gate.

In latter years, because of its seclusion, writers, artists and the intelligentsia in general selected the bayward side of the hill for their tiny cabin abodes.

Now the hill is to become formal, carrying with the change the danger that another of old San Francisco's distinctions is to pass. The North Beach Business Men's association is sponsoring a beautification contest and improvements, long spurned, are likely to be made.

This beautification idea, following the construction of a winding road up the hill, is in recognition of the lure the old hill has for tourists. Already boys in the Italian district line the streets and for a dime show motorists up the winding roadway to the crest of the hill and point down the side where, in the heart of a great city, nestle numerous cabins of the mountain type.

Through the years Telegraph hill

has defied the age of stucco and retained much of its natural beauty. The Italian district has crowded around the base on three sides while on the other ships tie up and commerce flourishes. A memorial to the first cross country telegraph line adorns the peak and between it and the bay are the artistic cabins, wild flowers, trees and a profusion of natural bush growth, almost burying the small homes with their rocky steps, ledges and winding paths.

The beautification and improvement plan is generally accepted as a threat that the city, hemmed in by water on three sides, at last is going to swell up over the sides of the hill, wiping out a unique mountain-like fastness which is within sight and hearing of the noisy roar of Market street.

Finches Parked Driver

Lowell, Mass.—While sitting in his parked automobile, the engine of which was not running, Michael Lewdon was arrested on a drunken driving charge. In court he was given a two-months' jail sentence.

Young Dewberry Promising Crop

Plant Is Favored Because of Its Resistance to Many Diseases.

(Prepared by the United States Department of Agriculture.)

The Young dewberry, named for B. M. Young of Louisiana, who originated it more than twenty years ago, is now becoming an important sort in both the eastern and western parts of southern United States, according to George M. Darrow of the United States Department of Agriculture, whose trials with this dewberry a few years ago showed it to be promising for the South.

Centers of Production.

The largest centers of production at present, he says, are in southern Alabama and southern California, though there are extensive plantings near Wilmington, N. C., and Houston, Texas. Evidence at hand indicates that it is hardy from Norfolk, Va., south and west to include eastern North Carolina, South Carolina, Georgia, and the states west of Texas, including Arkansas and parts of Tennessee and Oklahoma. In California, Oregon and Washington it is apparently adapted to a somewhat greater range of conditions than is the loganberry.

Resists Disease.

The Young dewberry is favored because of its resistance to anthracnose and leaf-spot diseases, the vigor and productiveness of the plants, and the high desert quality of its fruit. Recent tests indicate that the fruit is well adapted to freezing for sale in the winter season, and its usefulness after freezing for preserves, pies, and the table suggests this outlet as one of the most important for this berry.

No planting stock is available from the department, Mr. Darrow says, but prospective growers will find the Young dewberry listed for sale by a number of Southern nursery establishments.

Equipment Needed for Creosoting Fence Posts

The only equipment needed for the open tank method of creosoting fence posts is a tank which can be heated. A good outfit is a galvanized iron tank three feet in diameter and four feet high. The creosote may be heated over an open fire with the tank on a temporary foundation. The posts should be thoroughly seasoned before treatment. The lower half of the post should remain in hot creosote (190 degrees F.) for a period of two to four hours. The posts should then be allowed to remain in the creosote as it cools. The tops of the posts such as cottonwood and willow should be dipped in the creosote for a few minutes. A penetration of one-half inch in the portion of the post coming in contact with the ground will give good protection.

Increase Continues in Production of Oats

Oats production continues to increase in the United States despite the fact that the number of horses and mules on the country's farms is declining. That the demand for oats has been adversely affected by the substitution of mechanical power for animal labor on farms is indicated by the post-war trend in oats prices. Oats since the war have brought prices about on a level with those prevailing before the war. In comparison with the price position of other feed grains and most other agricultural commodities, this is an extremely unfavorable situation. Farm commodity prices generally have averaged about 40 per cent higher since the war than before.

Agricultural Hints

Rape pasture taints cows' milk.

Co-operation is not a sentiment—it is an economic necessity.

If conditions are favorable, rape will make a good pasture crop five weeks after seeding.

On soils containing sufficient lime the most productive grazing crop known today is sweet clover.

The home gardener may extend his growing season in the fall by the use of hotbeds and cold frames.

By treating their seed carefully grain growers can save hundreds of thousands of dollars, which are lost annually through plant diseases.

Lime can be spread and disked in ahead of oats, corn or soy beans, or it can be applied after the corn or soy beans come through the ground.

Sudan grass belongs to the sorghum family and for that reason is a hot weather plant. It should not be seeded till the ground is well warmed up.

Prepare for the control of insects by having on hand spraying and dusting equipment together with such insecticides as arsenate of lead, nicotine dust, and nicotine sulphate.

Besides conserving moisture and keeping down weeds, cultivation tends to break up the harbors of mice, add plant food to the soil, and make more available the plant food already in the soil.

DAIRY

STERILIZATION OF DAIRY UTENSILS

Thorough Cleaning to Destroy Bacteria Important.

(By C. K. JOHNS)
Of the various sources of contamination to which milk is subject, the dairy utensils have been definitely established as one of the most serious, capable of contributing a high percentage of the bacteria found in milk. Consequently the sterilization of cans, pails or other containers cannot be neglected if milk containing few bacteria is to be produced. Thorough cleaning is essential, but in itself is insufficient. Steps must be taken to destroy as many as possible of the bacteria still remaining if the keeping quality of milk is to be improved.

For sterilizing, steam under pressure, the most satisfactory agent, is seldom available. In its absence, a sufficient quantity of boiling water gives good results. Pails, strainers, etc., after washing are scalded by pouring a pint of boiling water over the entire inner surface; cans are best treated by pouring in a quart of boiling water, replacing the lid, and rolling the can along the floor to ensure thorough scalding of the inner surface. As the temperature of the water drops over 50 degrees Fahrenheit during this operation a fresh quantity must be provided for each utensil.

Because of the saving in time and fuel, chlorine solutions are being used in some districts to replace the scalding treatment, and where used intelligently have equal or superior sterilizing efficiency. Cans and pails are carefully rinsed with chlorine solution as in the scalding treatment, or immersed for one minute in a tank containing the solution. Either is satisfactory, provided the utensils are well washed and the chlorine solution is up to strength.

Feeding Cows Grain in Summer Is Profitable

There are some splendid lessons to be learned from cow testing associations because of the records they keep. One herd of eight cows that as fed an average of three pounds of grain per day during June and July last year produced 3,550 pounds more milk and 186 pounds more fat than the same cows produced during the corresponding two months the year before, when no grain was fed to supplement the pasture. Valuing the grain mixture at \$30 a ton, the extra feed cost \$22.50. If we assume that the 186 pounds of butterfat had a value of 40 cents a pound, the increase in the gross income was \$74.40. The net profit from grain feeding during those two months, therefore, amounted to \$52, or \$3.25 per cow per month. As a rule the better the cows the larger will be the returns from grain feeding on pasture.

Dairy Cow Production Shows Large Increase

Great changes have taken place in the past few years in the dairy industry. For one thing, the average production of our cows has increased greatly. The census figures in 1920 show that there were 23,750,000 dairy cows in this country and they produced a total of \$9,500,000,000 pounds of milk.

In 1926, the total number of cows in this country had dropped to 22,166,000, but they produced a total of 120,750,000,000 pounds of milk.

That's 7 per cent fewer cows, and they gave 34.7 per cent more milk, quite a remarkable change in a few years time. This change is a tribute to the value of educational endeavor promoting better breeding, better feeding, and better care of dairy cows, but especially better feeding.

Increase in Number of Cows Tested in Country

Cow testing associations in the United States showed a remarkable growth during 1928. There was a 15 per cent increase in associations, with a total of 465,804 cows under test.

California leads in the total number of cows under test and also in the percentage of cows which are being tested. There are four states that beat California in the number of herds under test, as most of her herds were large. Wisconsin stands second in total number of cows under test and first in number of herds. Minnesota ranks third in number of cows and Iowa fourth. Iowa now has 2.7 per cent of her dairy cattle under test.

Valuable Cow Feed

Beet tops are a valuable feed for cows although as they contain only about ten pounds of dry matter per 100 they should form but a part of the roughage ration. In feeding value they are worth about half as much as the same weight of good corn silage. Beet tops are readily preserved in a silo of any kind. In Germany where enormous quantities are used for feed the trench silo is in general use. If put in as cut they carry too much water.

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Surprising the Waiter

"For the first time since I've dined at this restaurant the charge is reasonable," said the guest.

"Reasonable?" echoed the waiter, surprised. "I had better have another look at the bill. There must be some mistake."—Inverness Courier.

For Barbed Wire Cuts Hanford's Balsam of Myrrh

Money back for first bottle if not suited. All dealers.

Carried a Spare

Mrs. Fatleigh (at the beach)—My chin is getting all sunburnt.

Her Friend—What do you care? You've got another.—Smith's Weekly.

Children's Clothes

Mothers often find it difficult to keep children's clothes clean but 20 Mule Team Borax solves the problem. When clothes are put to soak, always add Borax; it loosens the dirt. When washing use Borax with soap.—Adv.

Mount McKinley National park was created chiefly to protect herds of caribou and mountain sheep which were in danger of extermination.

Makes Life Sweeter

Next time a coated tongue, fetid breath, or acid skin gives evidence of sour stomach—try Phillips Milk of Magnesia!

Get acquainted with this perfect anti-acid that helps the system keep sound and sweet. That every stomach needs at times. Take it whenever a hearty meal brings any discomfort.

Phillips Milk of Magnesia has won medical endorsement. And convinced millions of men and women they didn't have "indigestion." Don't diet, and don't suffer; just remember Phillips Pleasant to take, and always effective.

The name Phillips is important; it identifies the genuine product. "Milk of Magnesia" has been the U. S. registered trade mark of the Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips since 1875.

PHILLIPS Milk of Magnesia

NASH AGENCY FOR SALE
Prosperous Tennessee City, doing large volume; A-1 loc.; other business complete. Price \$20,000. Refer File G-100.

Kill All Flies! THEY SPREAD DISEASE
Daisy Fly Killer. Kills flies, mosquitoes and all other annoying insects. Guaranteed.

MADE IN U.S.A. HAROLD SOMERS, BROOKLYN, N. Y.

Daddy's Evening Fairy Tale

By Mary Graham Bonner

A RARE CREATURE

"It was funny," Mrs. Indian Elephant used to say, as she told the other zoo animals about the experiences she had had in a circus, "but I would think to myself:

"Now, in this town we're coming to surely there will be no children. Surely some towns won't have a supply of them."

"But there always were children, in every single town.

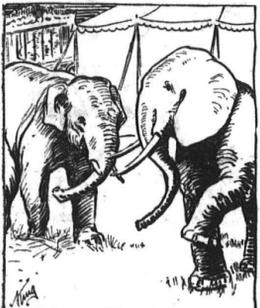

"Yes, friends," Mrs. Elephant would say, "I have never been in a town where there weren't children.

"I imagine a town must be rare, very, very rare, and ready to be put into a museum, where there were no children.

"I don't really believe there is such a place. It wouldn't be worth visiting—I know that much.

"Why, no one would want to perform in a circus if children weren't there, for children know enough to appreciate a circus—and while grown-ups may, too—well, they don't like to laugh right out loud just as much as children do."

But one day Mrs. Indian Elephant was feeling quite sad. She had been thinking of something else, and thought later on she cheered up and forgot about it; I must tell you what she said

It Does Seem a Pity.

"It does seem a pity," she said sadly.

"What seems a pity?" the others asked her. "Tell us, Mrs. Indian Elephant, what seems a pity?"

"It seems a pity," said Mrs. Indian Elephant, "that we aren't appreciated. That is, we aren't so interesting as the Mr. Indian Elephants, and we aren't so interesting as the African Elephants, but we would like to be thought so just the same.

"Yes, we would like to be thought just as interesting. We most certainly would.

"And it seems a pity that they don't care for us so much. They think we're very common and usual. And so we are.

"But it's a pity they think it, yes, it's a pity we don't fool the keepers better."

"It is a pity," said Miss Indian Elephant. "It is a pity" she said, waving her trunk.

"But it's the truth," said Mr. Indian Elephant.

"There, there, don't rub it in," said Mrs. Indian Elephant.

"I'm not rubbing anything in," said Mr. Indian Elephant.

"I mean," said Mrs. Indian Elephant, "that it's rubbing the truth in when you say it is the truth, and I know it is, but I don't like to have people think so—and yet they do!"

"Oh, I see," said Mr. Indian Elephant.

"That's a fine way of looking at things," said Mr. African Elephant.

"Now, be kind, be kind," said Mrs. Indian Elephant, "for you're a rare creature and a fine creature, and I hate to admit it, I do."

For the African Elephant was so much more rare a creature—and he knew it and they all knew it!

CONUNDRUMS

What railroad accident is an everyday occurrence? Running over frogs.

Why is an egg too lightly boiled like one boiled too much? Because it is hardly done.

What does an envelope say when it is licked? Just shuts up and says nothing about it.

Why is a whisper like a forged banknote? Because it is uttered but not aloud (allowed).

What street in London puts you in mind of a tooth which has pained you for a long time? Long Acre.

Why can you never expect a fisherman to be generous? Because his business makes him sell-fish.

Why is a policeman on his beat like an Irishman rolling down a hill? Because he's patrolling (Pat-rolling).

What is a penniless state of things the cause of rejoicing in a poor man's family? When bread is a penny less a loaf.

Why are duds no longer imported into this country from England? Because a Yankee dude'll do (Yankee doodle do).

Improved Uniform International Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean Moody Bible Institute of Chicago.) (©, 1929, Western Newspaper Union.)

Lesson for July 14

EZEKIEL TEACHES PERSONAL RESPONSIBILITY

LESSON TEXT—Ezekiel 33:1-20. GOLDEN TEXT—Every one of us shall give an account of himself to God.

PRIMARY TOPIC—Ezekiel's Message of Warning. JUNIOR TOPIC—Ezekiel's Message of Warning.

INTERMEDIATE AND SENIOR TOPIC—Does God Take Note of My Life? YOUNG PEOPLE AND ADULT TOPIC—Individual Accountability to God.

I. Ezekiel's Responsibility (vv. 1-9).

The commission of the prophet is now renewed. Hitherto his utterances were mainly of a threatening character, having as their objective the turning of the people from their wicked ways. They refused to heed the prophet's words, the result of which was the falling of God's judgment upon them in their complete captivity and the destruction of Jerusalem. When it became clear that the people would not heed God's warnings through the prophet, the prophet was to be silent—dumb. This tragic situation was portrayed through the death of Ezekiel's wife. Awful as this blow was, he was to desist from weeping, showing that even natural sorrow was not to be expressed at the time of God's awful judgment.

After the renewal of the prophet's commission, his messages were mainly consolatory. His responsibility is set forth under the figure of a watchman. God gave him this position. Every minister and Sunday School teacher is a watchman. Indeed, upon every believer has been imposed certain responsibilities. Two things are required of a watchman.

1. To hear the word at God's mouth (v. 7).

The source of the message of every minister and Sunday school teacher is God's Holy Word. As the prophet did not originate his message but received it at God's mouth, so should it be with every minister.

2. To sound the warning (v. 7).

After hearing God's message he was to proclaim it to the people. The watchman's duty is both to hear and to speak. The people are to be warned of the impending danger. Failure to sound the alarm makes the watchman guilty of the blood of the sinner (v. 8). After the warning the sinner carries his own guilt (v. 9).

II. God's Attitude Toward the Sinner (vv. 10, 11).

God had declared in His word that unfaithfulness on the part of His people would cause them to "perish among the heathen," to "pine away in their iniquity" (Lev. 26:38, 39).

In view of this pronouncement, some were disposed to say that their case was hopeless. To meet this attitude of despair, the prophet assured them that God had no pleasure in the death of the wicked, but that his sincere desire was for the wicked to turn from his way and live. Regardless of what their past had been He assured them that the future was bright, but God's command and plea is, "Turn ye from your evil ways, for why will ye die, O house of Israel?"

III. The Sinner's Personal Responsibility (vv. 12-20).

God has created the members of the race as volitional beings, possessing freedom of choice. They have moral discernment, enabling them to distinguish between right and wrong. The following principles govern the sinner and the watchman:

1. Past righteousness will not avail for present sins (v. 12).

When a righteous man turns to do iniquity, his past seeming righteousness will be of no avail.

2. Past sins do not make impossible present acceptance with God (vv. 12-14).

By virtue of the law of habit, every sinful act makes it harder for the sinner to repent, but God's mercy and enabling grace are such that if the sinner repents, God will restore.

3. Restitution required (vv. 15, 16).

The proof of penitence is that so far as possible the sinner makes amends for wrongs done. There is no merit in the act of restitution, but such act helps the individual to overcome his besetting sin.

4. God's ways are equal (vv. 17, 20).

God holds man responsible for his own deeds. The child is not condemned because of the deeds of its father. This does not do away with the law of heredity. Regardless of what one's past life has been, God's grace in Jesus Christ blots out his record and he stands accepted in the Beloved.

On the Job

While Moses was caring for the sheep God's great commission came to him. If God has any great thing for us to do, we need not fear that He will miss us because we are busy with our common tasks.

Belief in Jesus Christ

The condition of salvation is that kind of belief in Jesus Christ which authenticates itself in repentance for the past and in amendments of life for the future.—L. L. Noble.

THE RETURN of ANTHONY TRENT

By WYNDHAM MARTYN

Copyright by Barse & Hopkins

CHAPTER VIII—Continued

As for Thorpe, Anthony Trent had declared that out of the mists of night a ship would come bringing him the poisoner of the dogs he loved. Thorpe strained his eyes until they ached. Then, nebulous, vast and menacing, some great form had materialized itself from the mist and borne down upon him. A leap of amazing agility saved him from being sacrificed on the concrete floor of the bathing pavilion. The ship, aided by the deep water, came on as though the land were equally her sphere.

It was when the crew, dazed by the flashing of lights and the shouts of armed men, tried to leap into safety, that Regan and his allies lost their trepidations and sprang to pleasing action.

Pierre Redlich, alone of the men aboard, was not yet anxious to give himself up to unknown authority. There were too many men with searchlights for him to assume it was an accidental gathering. His first aim was to secrete the jewels. Then he made his way on deck and ran forward. The moon was, for the moment, free of clouds. The outline of the big white house, the configuration of the gardens, and the depth of the water inshore all pointed to the present danger of his situation. Pierre Redlich shrank back from the rails. He knew of no possible way to turn this unbelievable situation to his own advantage.

When he turned away from the sight that disturbed him, he saw what he supposed was the Evil One himself standing behind him with folded arms. It was a being of great stature, clad from head to heel in black. On its head was the curious cap he had seen so many carnival devils wear. Pierre Redlich was superstitious at heart and he knew, in that moment, there were no acts of good to be found in his life which would help him. His arms dropped to his sides helplessly.

"It is Fate," he murmured, his courage gone.

The thing in black advanced a step and gripped him by the arm. It was a grip of numbing strength.

"You can call it anything you like," said Anthony Trent. Pierre Redlich made no resistance when his opponent searched him for the booty he had so lately hidden. Nor did he offer to struggle. He knew too well the feel of a weapon pressed against his body.

"Come and show me where you've put them," said Trent. "If you try any tricks I shall shoot. I think I'd prefer to shoot, so don't hesitate to cut and run."

"What!" Redlich cried, confounded to discover that the man he had sneered at, had by some extraordinary means, brought ruin upon him. "You would kill me?"

"I'm afraid you are not going to give me the chance," said Anthony Trent sincerely.

CHAPTER IX

The Terrors by Night.

Mr. Gimbert had not been kindly used. When Redlich commanded him to sit alone in the darkness of the hall, and shoot any fleeing robbers he accepted the mission with joy. But he was old, and felt the chill of the night winds. When half an hour had gone by he determined to go to his room and get a heavy coat.

He reached his suite in time to see Mr. Yeatman holding up Gimbert's diamond ring to the light. It was plain the detective had made a thorough search of the rooms. Redlich made a flying leap for Gimbert's legs. Gimbert's head struck the side of a bureau in falling.

When consciousness dawned upon him he was tied, and his jaws ached from the violence with which the gag had been used. So stirred by rage was the old fighter at the indignity that he struggled to free himself with tremendous efforts. The rope was proof against his strength. He had better luck with the gag. After a time he found himself able to use his voice. Into the night he sent yell after yell. The corridors of the silent house echoed his shouts and brought terror to all who heard.

Mrs. Strauss, sleeping in the next room, sat up in bed and listened horrified. Snoring in a twin-bed, her husband slept on. Mrs. Strauss switched on the lights and padded across the floor to the jewel box which, for all its silver beauty, was steel lined and had a combination lock. Nothing of value remained to her.

Natica Grant heard the weird shouts and was instantly awake. She burst into her husband's room and shook him, with difficulty, to a state of comprehension. The yells horrified him.

"Oh, Payson," she cried, "What can it be?"

She called up Thorpe. There was no answer. At the garage all was silent.

"They've cut the wires," Grant whispered. He was aflame with fear. In his mind there was only one explanation, Frank Sutton.

"There's some one outside," Natica whispered.

"Don't go," he exclaimed, holding her arm. The sentence in Sutton's letter, "It may be tonight. . . . I may be behind any door you open," inspired him with extravagant terrors. "Frank is out there waiting for the door to open."

"I can't wait here while some of my guests may be murdered," she declared. Natica broke from his grasp and came to the door.

"Who is it?" she demanded.

"Me," said a voice, "Mr. Strauss talking."

When they let him in his talk was of missing jewels, burglars and the shrieks coming from Gimbert's room.

Within a few moments Mrs. Grant learned that almost every one of her friends had been robbed. Investigation showed that her own rubies had been taken.

While the company stood in the main corridor, herded together for company in their fears, the alarming news of the wrecking of the bathing pavilion was brought to them by the winds from the sea. Then came the savage shouting of men, the mysterious lighting of lights and the noise of indescribable confusion.

They all started when a voice in the lower hall was heard. It was Mr. Brewster. He had called in the local police.

"They'll be here right away," he said. There was now an air of the fighting male about him. "Come on down, folks."

But Brewster lost something of his courage when the sounds of men's loud voices came near. It was too soon for the police to have come.

Thorpe the butler entered first. There was a bruise on his face, but the man he was leading had fared even worse. Redlich had a blackening eye and a swelling nose. Not for years had Thorpe enjoyed himself so much.

"Yeatman!" Payson Grant exclaimed. It was the first time he had opened his mouth.

Then came the footmen and chauffeurs, each with his prisoner. It was difficult to understand what these uncouth looking men were doing in Deal Beach.

To the guests, straining their eyes to see the last comer, it seemed that the devil was ascending the marble steps carrying a suitcase. When it was opened the suitcase revealed not only all that had been taken from the Guggensohn mansion, but also the spoils of other homes.

Payson Grant found none of the prisoners looked in the least like Frank Sutton. He took heart and joined Anthony Trent in a hot toddy.

"Let's hear all about it," he exclaimed. He found himself in a better humor now, for it seemed plain that Yeatman had planted these letters from Captain Sutton. He was glad when Brewster informed him the local police force had been summoned. His one aim now was to rid himself of the menace which pursued him. Natica's social ambitions were of little account when his very life was endangered. Sutton had undoubtedly planted Yeatman in his position. All that would have to come out in evidence.

The police interrogation was not a lengthy or very severe one. Trent was glad. He had not yet made up his mind just how much of his suspicions of Yeatman he would unburden to the magistrate at the hearing. And he could not be sure that the notoriety he had achieved would be worth while. Redlich kept staring at him as though he suspected him. In truth, Pierre Redlich was astounded at the manner in which a single man had taken command of La Belle Alliance and landed him and his gang of toughs where armed men were drawn up for their reception. He knew, of course, that the Anthony Trent whose qualities he had comprehended too late had deliberately set out to give him a poor opinion of him so that he might work unhindered. It was rather too professional an affair even for the luckiest amateur.

But Pierre was dragged away to a lock-up before he could determine what to do. He preserved silence. It was not until he had discarded

his Annette Kellerman and had drunk the hot toddy that Trent satisfied inquiries.

"What made me suspect him first? I'll tell you. I noticed that he used to go down to the bathing pavilion and make curious signals with a flashlight. They were answered with a flashlight, much bigger than any I've ever seen as close in. I swam around her one night when you all thought I was writing letters in my room. I made out her name and port of registry. Then I observed that she steamed north just before dawn. It wasn't hard to find her in the shipping columns of the morning papers. I motored to the Highlands one day and saw her lying at anchor with the Swedish flag flying astern. An old sailor told me she was waiting for orders from her owner."

"But why tonight?" Natica demanded.

"Many reasons. One was that he has been worrying about this calm weather breaking up. Tomorrow no ship as big as La Belle Alliance will be able to come in close. He had to do it tonight or else give up that way of escape. He was under a great nervous strain, as I saw. Also I followed him out there this evening, and saw him signaling again.

"I played with luck as a partner. The lookout, with whom I thought I was going to have all sorts of trouble, sneaked below to make sure he wasn't cheated of his share in the plunder."

It was seven o'clock when Grant and his wife had seen the last of their guests to their rooms.

"Thank God I can sleep now," he said, going to his own room. "I'm certain it was Yeatman who put those notes under my door."

Natica frowned at the mention of the detective. She had always thought herself a good judge of character.

After appearing at the preliminary hearing of Redlich and his crew, Trent bade his hosts good-by and motored to New York. Although he was anxious to go to Central Park, West, he remembered his new social obligations, and went to the Van Boden apartment, where a Japanese servant welcomed his honorable employer.

Weld had tried twice to get him on the telephone. Trent was glad to hear it. He designed to make use of Weld's friendliness to enlist his aid in a new enterprise. He called up Switkin at his club and made a luncheon appointment for the next day. Then he rang up the Central Park apartment. It was always Mrs. Kinney who answered the telephone. He told her he would be with them that evening at nine. Although he felt oddly anxious to hear Mademoiselle Dupin's voice again, he did not ask to speak to her. She was disappointed when she learned this from the housekeeper. She told herself that his glimpse of tenderness in the gardens of the Grant home was an evidence merely of his sympathy, and not a symptom of any deeper regard.

For the first time in his life Anthony Trent beheld himself honored on the first pages of the evening papers. There was a photograph of himself in polo kit taken with Grant's Deal Beach Four. Another showed La Belle Alliance stranded at the foot of the Grant gardens. She was lying high above the low-water mark. None would have recognized Trent from the cut. Under the polo helmet his face looked black. An almost every story the name of Mr. and Mrs. George Bixel stood out. The average reader would swear that the Bixels and Grants had long been bosom friends. Natica's handwork, he supposed. The women writers were particularly nice to her.

Trent was not wholly free from nervousness as he climbed the stairs to his apartment. Mademoiselle Dupin would always be to him one of the most remarkable of women. As the "Countess" she had thrilled him. When she called herself Madame de Beaulieu he had admired her beauty and grace. And as simple Mademoiselle Dupin he had had proof of her courage and a more intimate notion of her essential quality.

(TO BE CONTINUED.)

Religious Faith No Secret in Jerusalem

In Jerusalem, the little city of great things, religious observances play a part in daily life unknown in other capitals. Since it is the center of three great faiths and all their subdivisions, can it be wondered at if each faith and branch thereof jealously guards rights and rites acquired throughout centuries, often through famine, siege and untold hardship?

In a modern city, one meets people daily for years without knowing their religious beliefs. This is impossible in Jerusalem. Be he occidental or oriental, every man's religion is known to all and also the fidelity with which he carries out the obligations imposed by his faith.

The religious festivals bring their own pageantry to the city. There are Moslems with their adherents from northern Africa, India, Afghanistan, Bokhara, Arabia, and the Sudan;

Christians of all denominations; Latins, including many of the religious orders and the Uniate churches which acknowledge the supremacy of the pope; the eastern churches, which comprise the Orthodox, the Armenian, and Syriac, Copts, and Abyssinians; the Anglican church; the Jews, divided into Ashkenazim, Sephardim, Karaites, Yemenites, Georgians, and Bokharans. — National Geographic Magazine.

Fault Not His

"We don't understand some of the things you said in that speech of yours," remarked a constituent to the member of the legislature. "Then," replied the member gently, "you should not find fault with me. What you do not thoroughly understand you cannot intelligently disapprove of!"

MOTHER!

Child's Best Laxative is "California Fig Syrup"

Hurry Mother! A teaspoonful of "California Fig Syrup" now will thoroughly clean the little bowels and in a few hours you have a well, playful child again. Even if cross, feverish, bilious, constipated or full of cold, children love its pleasant taste. Tell your druggist you want only the genuine "California Fig Syrup" which has directions for babies and children of all ages printed on bottle. Mother, you must say "California." Refuse any imitation.

Naturally

"How did you discover the secret in her closet?" "Why, the skeleton key."

DR. CALDWELL'S THREE RULES

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation is a mild vegetable compound. It can not harm the most delicate system and is not habit forming. The Doctor never did approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. Use Syrup Pepsin for yourself and members of the family in constipation, biliousness, sour and crampy stomach, bad breath, no appetite, headaches, and to break up fevers and colds. Get a bottle today, at any drugstore and observe these three rules of health: Keep the head cool, the feet warm, the bowels open. For a free trial bottle, just write "Syrup Pepsin," Dept. BB, Monticello, Illinois.

Chinese writers state that in the Third century B. C. China had wide highways lined with shade trees spaced at intervals of 30 feet.

Leaves no insect alive

Tanglefoot Spray solves the household insect problem. It kills wholesale—leaves no insect alive—no stragglers to revive. Use it for combating all kinds of household insects. Its powerful strength kills them all. Prices greatly reduced. Pay less and get the best.

TANGLEFOOT SPRAY

From Youth to Age

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

Society Notes

Dorothy Glenn, Editor. Phone 166.

Mrs Claud Norris and Miss Ruth Piper were the charming hostesses of a beautifully planned shower on Tuesday evening, in compliment to Mrs Norris' sister Miss Lois Leake, who sometime this month will become the bride of Mr John Starks of Somerville. Six games of hearts were enjoyed, with Miss Linnie Thomas winning high score. Following the games, the honoree was presented with a huge white basket of gifts. Miss Leake, beautifully gowned in a yellow georgette, opened the many interesting packages while seated in a chair that was decorated in white.

A delicious ice course was served at the close of the evening.

Miss Pauline Earnhart had as her dinner guests on Wednesday evening Misses Lois Leake, Elise and Lois Farley, Rebecca Smythe Dorothy Glenn and Sara Jones.

Mr and Mrs M V Kirk delightfully entertained the Young Matrons Bridge Club members and their husbands at Bridge in their lovely home on last Wednesday evening. After four interesting games a delicious ice course was served.

On last Friday evening, Mrs. J. B. McFerrin entertained in special compliment to Mesdames Sam Fleming and Paul Baker for their birthday celebration. The guest list included besides the honorees Misses Tommy Thornton, Maggie Ella May and Bertie Fleming, and Mrs Karr Hinton. Their places at the beautiful table laid in the sun parlor of the lovely home of the hostess, were marked with unique cards. Tiny gum drop corsages were placed for each guest with larger ones for the honorees who received also dainty gifts from Mrs McFerrin.

After the delicious four course the guests entered the livingroom where they enjoyed old photographs.

Mesdames Paul Hughes and Warren Clay were the charming hostesses at a Bridge party Tuesday afternoon at the home of Mrs Clay, complimenting their sister, Mrs Ben Cowar of Dexter, Mo.

Twelve guests enjoyed the four games of bridge, with Miss Ruth Weinstein winning the high score prize and Miss Fannie Weinstein, the consolation. The honoree was given dainty lingerie.

Misses Elise and Lois Farley entertained Monday evening with a bunking party. Among the many diversions for the twenty young guests was that of dancing, with Nolan Lowery furnishing good music.

Miss Mary Frances Leake was the charming young hostess at a bunking party Friday night. At one o'clock the guests enjoyed sandwiches and drinks followed by dancing and talking.

LOCALS & PERSONALS
