Gardens have been good this Spring and there has been plenty long this line. We have enjoyed beans and tomatoes as well as other varieties of garden products.

Along the Poultry and Dairy lines, we find much is being done in the way of improving herds and putting more time and work in these paying lines. The feed stores report a good business in their line and in fact all lines of business have been good. Many stores have been improved and Memphis visited her aunt, Mre Ida have added additional lines to their stocks, and things look

> "Trade at Home" and keep Collierville money in Collierville, is growing and co-operation among our business houses and people will have a lot to do with our growth and development. We have a good town, a good country and good people-- let's Boost and keep Boosting.

Mash Feeding Important in Summer

A good many people have become accustomed to feeding a Finley Sloan and wife spent good mash to the hens as means of securing winter eggs. However, many have felt that when hens get out on the range where they can catch bugs and eat green feed they no longer need a mash in order to secure satisfac. tory production.

Probably the reason for this change in feeding methods is on account of the fact that most Several from here attended the hens will give a fairly good prosplendid Childrens Day Exercis- duction during the early spring months even tho the feed may be lacking in some essential elements During the spring months Edd Polk of Memphis visited hens are like dairy cows when they first freshen. They respond to nature's demands, even at a sacrifice of body weight. As a re-Earl Vick and wife of Steele, sult, they will lay for a period of Mo., and Albert Jones and wife of time. Hens that are fed a balanced ration containing protein and minerals, during the spring months, will continue to produce at a fair rate of production after other hens have stopped laying.

More mash and less grains should form the basis of our feed ing in summer, as compared with winter feeding. In warm weather, such feeds make hens lazy and sluggish. If mash is stopped after hene are used to it they may go into a molt. It may be necessary to feed a small amount of mash in a dampened condition to stimu. late hens eating enough.

The program that many of the As we go press, the Annual is to keep the hene confined in the poultry houses until 9 or 10 o'clock in the morning. If an a-

CHAPTER IX—Continued -20-

At the ferry, Weems voiced his desires to get out again to the coast to make pictures. Fort Lee, he said, was Nothing doing in the East. In the West one could work outside all the year, and his comedies were to be all exteriors. Ere the Fort Lee will was ascended, Trent was offered the chance of becoming one of the leaders of the film industry. Weems proved it on the back of an envelope be had wrung from the reluctant Hubbard, who carefully removed the contents before he parted with it. It was difficult to judge from the back of his prospector's head just what effect his eloquence engendered.

"For the love o' Mike," he said, as Trent passed David More's little store, "say something."

"I'll think it over," he was told. "To begin with, I'd like to see how pictures are made."

Weems took this as encouragement. "You shall see everything the studio has to show," he declared. "They know me."

Weems was disappointed that Trent decided not to permit wholesale presentations. Weems grumbled about it to the girls.

"I'd have introduced him to all the big ones, whether I know 'em or not. I don't get him at all. He seems more interested in the mechanics of the game than the other parts," Weems added. "Look at him, will you?"

Trent was asking questions of a technical director when he could have talked with a star!

"He must have money," said the lead a little wistfully. Look, Horace, the studio manager is talking to him

"I had to tell the old grafter I'd got new money in," Weems said a trifle apprehensive as to his immediate future. "That release is bound to come, and then I can pay up everything. If they crowd me too much they'll lose it all.'

"So will you and me," said the lady soberly.

The studio manager merely said that if Mr. Trent had an interest in the Horace Weems Productions, would be be responsible for their financial indebtedness?

"I will not," Trent said concisely. "To begin with, Mr. Weems has stated that the company has all assets and no liabilities.

"He's behind on last week's studio rental. Here's the statement."

Trent looked over the items. He was no more anxious than another man to waste his money, but he accompanied the manager to his office and paid the accounts. He did not give the money because he felt any responsibility for Weems, and he did not aim at production. He was willing to settle the bill because he had certain definite knowledge to acquire and had given himself a week to get it in.

"I'm going down to the village," Trept told Weems. "I shall be back in half an bour."

David More was finishing a story in a magazine devoted to light fiction when Anthony Trent came in. He had read of the Deal Beach exploits, and was peculiarly interested. He thought he understood now why his client had been so anxious to learn the details he had been set to gather.

"Here's another commission," Trent said in the security of a small parlor at the rear. I want to rent for as short a term as possible a house with large grounds sunning down to the Hudson. I don't care what sort of repair the house is in or wont you have to pay. There's a place I have in mind somewhere north of Ossining which was empty when I passed through the town last. It's the kind of rundown estate not modern enough to attract the rich commuter and too expensive for middle-class purses to keep up. Here's some money for a deposit if necessary. I'll come and sign a lease when you've got a few to relect from. Remember that I must have grounds that are not overlooked. Also I must have an uninterrupted view of the river."

When Trent saw Weems again he tooked upon a different man. Now that the embargo was removed, Horace was feverishly finishing a comedy. "What picture is being made over there?" Trent asked.

"A six-reel special," Weems returned. "A crook story. Go and take n peek."

The studio manager introduced Trent to the director and stars and answered his many questions

When Trent got back to the Van Boden apartment he was possessed of a vast amount of information. He was having to pay for it, but the price would be cheap if the end be sought were attained.

Later in the evening be catled up Mrs. Kinney, spoke a little to Sutten and then talked to Mademoirelle Du"You haven't forgotten tomorrow,

"Not for a moment," she returned. "I shall be waiting at nine. It seems a shame we cannot bring poor Captain X." The names of the immured were never mentioned. "Would it not be possible?"

"It would be far too dangerous."

While this was true, Anthony Trent could not conceal from himself that he did not want a third person on the trip. Sutton was already fortunate in having Mademoiselle so close at hand.

CHAPTER X

Confessions

Trent was conscious of a certain restraint between him and Mademolselle Dupin during the first few miles of the journey. She had made up her mind that she would not add to the many obligations she was under. And yet to broach the subject seemed un gracious. But at the apartment they were so rarely alone that here, aboard. was the only opportunity.

For his part, Anthony Trent was thinking bow little he knew of this beautiful and accomplished woman

Late in the Evening He Called Up Mrs. Kinney.

and how much more he desired to learn. What, he wondered, was her early history?

The launch was a fast one, and soon overhauled a liner going through the harbor shipping at half speed.

"It's the Brabant," he exclaimed. and told the steersman to go as close to her as he could.

"I came over in her." Trent told the girl at his side, "and met a very decent sort of purser abourd. i've an idea I can use him if he is still there. She should be back here in exactly twenty days. I had a fearful quirier of an hour on that staunch ship when I left Dover." He told her of bis n terview with the inquiring purser,

"The tragedy with people like us." she said gravely, "is that there must always be the fear of such interviews.

"I know," be answered, a little gloomily. "That very thought is never far away from me. I can never be certain that some one hasn't devoted inst as much thought to getting me as I have given to evading capture. mistrust people on whom I ought to rely. I am invariably looking for mo tives. Sometimes I think I have slain the ability to enjoy people."

"Am I not to be trusted?" she asked "You are different," he answered "You can understand because you have suffered too. That is why you and I should always be good friends I know you will never go back to the

old life. Yet how many men who have fived better fives than I could you convince? Collective prejudices send in numerable men back to the crime they want to escape." "Didn't you enjoy the Grant house

party?" she asked, after a silence, "Not at first. In the beginning I felt every man was watching me suspiciously."

"We pay," she sighed, "whether in prison or out of it."

"All this isn't very cheerful, is it?" he returned. "I suggested this trip to keep you in good spirits, and we both drift into morbid moods." He reached for his glasses.

"What do you see?" she asked. "The good ship La Belle Alliance in the offing." A number of small craft passed and

repassed the stranded vessel. She lay pathetically on her side, a mass of rusty red and faded black. Apparently none of the Grant bousehold was on the private beach. "I wonder if Mrs. Grant will let me

go back," sald Mademoiselle Dupin when the launch was headed for tome.

"Surely you don't want to go back?" he cried.

"Why not?" she answered. "I cannot remain where I am any longer. I shall never cease to be grateful for what you have done. Some day I may be able to repay you. I can never forget what you rescuen me from. But you must see I cannot be a burden to you any longer.

"Burden!" he scoffed. "That is ab-Nevertheless he saw that nothing would alter her. "If you must go I cannot hold you back, but please don't go back to Deat yet. That might upset my plans and bring suspicion on you. Do me this favor. Stay on with Mrs. Kinney until my scheme for Sutton succeeds or fails You are putting me under obligations. He was morose and gloomy till you went there, and I want him at his best. Don't go back on me now," he pleaded.

"If I can believe I am helping you It is different," she said, "but I only suspect more of your generosity."

"Sometimes you have looked at me," she said, "as though you wanted to know about my past. I have felt it as strongly as if you had spoken." "You cannot imagine how much I

have wanted to know," he returned, "but I haven't any right to ask."

"I think I should like you to know My father was Russian and my mother French They died when I by the younger set-many of their was quite young. For years 1 was at a convent in Paris. My guardian was a Colonel Ogilvie, who had been fo. a time in the itussian service with my father There was very little money left from the estate. My father was suspected of liberal tend encies and his lands confiscated. Yet, when I joined Colonel Ogilvie and his friend Count von Schonbrunn in Cannes, it was given out I was an beiress. I was not yet eighteen. They took a splendid house for me, which was in reality a gambling establish ment, although I did not know it There is much money among the visitors to Cannes, Nice and Pau. and there was a vast profit in the house The police broke up the establishment at Cannes. So we moved to Nice. where there was a scandal about crooked play. And so on in other cities. You may believe me or not. but I was kept in ig.orance of this. I was convent-bred and had been taught obedience to my guardian. I married Count de Beaulieu before I was twenty. He thought I was an beiress, and my guardian and Von Schonbrung thought be was the head of the rich branch of his family. Instead, he had nothing. When it all came to light, he left me. I had news of his death while you were staying in Old Westbury."

"I remember," Frent said. It was this death which had seemed to clear the way for her marriage to Captain Monmouth, the man who had repudiated her so strangely

"After he left me, and I found out what sort of a man my guardian was. I joined the rest of them, knowing full well their way of life. I think I wanted to avenge myself oa all men I was in London for a season and then came here. You know what I was here. That is all "

Her story was very much what Trent had imagined it to be. Certain ly she had more excuse for her career than he had for his He believed her wholly when she said she had been for so long in ignorance of the men surrounding ber.

"Are there any people over here. men and women with whom you were associated in the Riviera, who might recognize you?"

(TO BE CONTINUED)

Napoleon's Task Not Finished Until 1918

Dame was alight with 10,000 softly waving candle flames and while a pope, brought from Rome to Paris, was preparing, in the presence of the most august assemblage that Errope could gather, to place an emperor's crown on Napoleon's head, Napoleon turned and whispered to his brother. "What would father say if he could see me now?" And the next moment, when the pope was ready to crown him, Napoleon firmly removed the emblem from the papar hands and placed

the crown upon his own brow. Kings and emperors are not born; you can make as great a king by artificial processes, provided you've got a brain under the crown, says W. G. Shepherd, in the Mentor. Born kings make trouble; made kings are just as good as born kings; probably better

When the great cathedral of Notre | That's what Napoleon kept arguing and trying to prove all his life. This contention made the born kings angry. The anger drove them together. They finally whipped Napoleon and sent him to St. Helena. He couldn't whip the born kings. He tried that 100 years too soon. The world didn't whip the divine-right born kings until 1918. I wonder if Napoleon knows that we polished off the job he tried to do.

Noise Costs Money

Estimates place the cost of noise in the United States at \$10,000,000 a The loss is due to inefficiency on the part of workers who can't con centrate in noisy places.

YOUNG PEOPLE AND ADULT TOP-IC-Character and Career of Daniel.

I. Daniel in Captivity (1:1-4).

His captivity took place in the third year of Jehoiakim's reign by Nenuchadnezzar, King of Babylon. While a tender youth, he was torn from home ties and made a captive in a foreign land to be trained for court service.

II. Daniel in Training (1:5-20). In order to be of the largest service in the kingdom, it was necessary that he oe taught to love the king and nation and to be detached from his own

people and religion. 1. Daily portion of the king's meat and drink appointed (v. 5). The object of this was:

(1) To gain the good will of Daniel. Such recognition would encourage him to give himself to the king's service. (2) To supply the proper food for

his physical and intellectual growth.

2. His hame changed (v. 7). He was named Beiteshazzar. The object in this change was the obliteration of national and religious connections, and his identification with the Babylonian nation. Daniel means, God is my judge. Belteshazzar means,

3. Daniel's purpose of heart (v. 8) Daniel purposed in his heart that he would not defile nimself with the king's meat and wine. He requested to be tested for ten days with the food which the law of his God allowed, agreeing to abide by the results.

4. Daniel's reward (vv. 15-20). (1) Physical health (v. 15). The king's meat and wine would have been palatable, but to have partaken would have violated his conscience.

(2) Mental growth (vv. 17-20). He was found to be ten times wiser than the magicians and astrologers. (3) Socially (v. 19). He was not

only next to the king, but president of

the college of wise men and prime minister of the empire, continuing through several dynasties (v. 21). (4) Spiritual (v. 17). God revealed to him Nebuchadnezzar's dream and gave visions stretch-

ing across the centuries. The secret of Daniel's success was:

Conscientiousness. Loyalty to God.

Decision of character.

Prayerfulness. Patience.

f. Courtesy.

III. Daniel Interpreting Nebuchad-

nezzar's Dream (2:14-46). 1. The dream revealed (vv. 14-35). Nebuchadnezzar had a dream which made a tremendous impression on his mind but its content had been forgotten. He urgently demanded of the wise men that they make known the dream and its interpretation. Recause of their failure to do so the king was furious and commanded all the wise men of Babylon to be slain. Daniel sought an interview with the king and obtained time. In answer to prayer, God gave to Daniel the content of the dream. He told the king that in bis dream be had beheld a great image with a head of gold.

part of iron and part of clay. He beheld this image smitten by a stone which became a great mountain. 2. The dream interpreted (vv.

breast and arms of silver, belly and

thighs of brass, legs of Iron, and feet

36-46). (1) The head of gold represented the Chaldean monarchy, with Nebu-

chadnezzar as its head (vv. 37, 38). (2) The breast and arms of silver represented the Medo-Persian power (3) The belly and thighs of brass

represented the Grecian empire under Alexander the Great (v. 39). (4) The legs of fron represented

the Roman empire (vv. 40-43). (5) The stone cut out of the mountain (vv. 44, 45). This is the Kingdom of Heaven so graphically set forth in the New Testament.

a. The stone is Christ (Isa. 28:16: Matt. 21:42-44). b. When did the stone strike? Observe that the impact upon this man

was upon his feet (v. 34). c. The Kingdom of Heaven is brought into realization through a great catastrophe,

Accepting Christ

We urge men to accept Christ, to accept Him now, and they say, "Well, we will think about ft," or "Yes, I know it ought to be attended to." Why, you wouldn't act that way five minutes about your health or your wife's health, or your business .- Dr. Maltbie D. Bancock.

Trust the Creator

All I have seen teaches me to trust he Creator for all I have not seen .-

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready. always safe to use; in emergencies, or for everyday allments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletchers CASTORIA

"Before My Baby Came"

"Lydia E. Pinkham's Vege-table Compound puts new life into me and makes my work in the store and in the house easier. I took several bottles before my baby came and am always singing its praises to my friends. I recommend it for girls and women of all ages. It nakes me feel like life is worth living, my nerves are better and I have gained pep and feel well and strong."—Mrs. A. R. Smith, 808 S. Lansing Street, St. Johns, Michigan.

"Of course, situated as I am in this fine position in the hall," said the hall clock, "I hear a great deal that is going on. I see the people coming in."

"You see them going out," said the living room clock.

"Bright clock, bright clock, ticktock," said the hall clock, "Well, shall I continue my story?"

"By all means. I won't interrupt again." said the living room clock, not far off.

"I hear the people talk, grown ups and children. How some of them can

"My! But they talk and they talk and they talk!"

"Well, let them," said the living room clock. "Don't we tick and tock, tick and tock, tick and tock, all the fime?"

"That's a wise speech," said the hall clock, "and I'll forgive you this time for interrupting." "I didn't think about it." said the

living room clock, "I forgot I was interrupting again." "I cannot say that I object to the people talking so much," continued

the half clock. "Of course, if I did object to it I don't suppose I could do anything

about if. "I might stop and get run down, but that wouldn't do any good.

"It's always so foolish to run down and get out of order. It takes such a long time to get fixed again."

"One would think," said the living room clock, "that you were a doctor

"I'd Like to Be Thinner."

or a trained nurse or something like that, instead of being a hail clock." "Why?" asked the hall clock.

"Well, all that chatter about getting run down and out of order." said the living room clock, "sounded to me like a doctor or a trained nurse or a person giving advice."

"That's all because you hear the people talking about their sicknesses to the living room," said the hall

"I spoke in the correct way for a clock to speak. But I must tell you what strikes me as being funny."

"Oh. yes," said the living room clock, "you must tell me. We don't want to end off talking about something different from that with which we started.

"Well, it wouldn't have mattered so much if we had finished it right away and then gone on to talk of some thing else.

"We have finished the first thing we were talking about," said the hall clock.

"It strikes me as being very funny when I hear the people talk about their figures. It seems that each person has only one figure and a figure pieans a person's shape.

"A little girl will come in and say, Oh, dear, I wish I weren't so fat. I'd tike to be thinner.' And a grown-up lady will say:

"I wish I could put on more weight. My figure is not what it

"Or some one will tell a child to stand up straight and not have a crooked figure. "It strikes me as being very funny,"

said the hall clock, "Because each person has only one figure-whereas we have figures all over our faces.

"I have figures in twelve places and they are all right and just as they should be.

"Yes, it does seem funny to hear people talk about their one figure when a clock has so many figures and never has to worry about any of them

"It makes me feel very proud, indepit "

Would Hurt His Shoes

Little Richard hau a pair of light shoes which were always getting dirty, so his mother told him one day that she was going to have them dyed.

A little later she found him off by himself, crying like his heart would When she asked him what was the trouble, he replied, between sobs, "I don't want my shoes killed!"

Improve Peanut Ration for Hogs

Value of Tankage Studied in Series of Tests Made at Beltsville. CAUSE OF LOSSES

(Prepared by the United States Department of Agriculture.)

Protect Pullets From Para-Pennuts are used to a considerable extent in hog feeding in the peanutgrowing areas of the United States, says the United States Department of Agriculture, and are usually fed alone or with mineral supplements only. Young pullets will develop into effi-The efficiency of peanuts for growing clent egg machines if precautions are plgs is very materially increased, howtaken to protect them from parasites ever, according to the department, and diseases during the summer when tankage is included in the ramonths and if proper feed is supplied tion as a protein supplement.

Tests at Beltsville. This conclusion is the result of a series of feeding tests recently completed at Beltsville, Md., by O. G. Hankins and J. H. Zeller, of the animal husbandry division of the bureau of animal industry, and conducted in connection with the study of peanuts in the soft-pork problem.

Because many young pigs are commonly fed peanuts without protein supplements, the question arose as to whether the prevailing method of feeding was producing the best possible results. Three experiments were undertaken in which different rations were compared. In the first experiment, the investigators fed two lots of pigs shelled peanuts and minerals. one lot with tankage and the other without. In the second experiment the rations were the same as in the first except that the peanuts were unshelled. The third experiment was similar to the second except for a change in minerals.

The results are noteworthy in showing the value of tankage as a supplement to peanuts and minerals in the ration for young pigs, and are discussed in Technical Bulletin 110-T, entitled "Correcting the Inefficiency of Peanuts for Growth In Pigs," just issued by the United States Department of Agriculture.

Results Summarized.

As an average of all the exper!ments, say the authors in summarizing the results, the feed cost of 100 pounds of gain, not including minerals, was \$9.92 for the tankage-fed pigs and \$17.86 when no tankage was fed. The cost of the minerals did not exceed 35 cents per 100 pounds gain for either group.

The results also show that peanuts with only mineral supplements are not efficient for pigs in the early stages of growth. The addition of tankage more than doubled the daily gain of the pigs in the experiments.

The amount of each nutrient consumed per unit of gain was also much ss for the tankage-fed pigs than for those not receiving tankage.

A copy of the bulletin may be obtained free as long as the supply tasts, by writing to the office of information. United States Department of Agriculture, Washington, D. C.

carbon. It is prepared by heating Early Cutting of Soy Beans Most Profitable

When soy bean hay is cut too early the yield is reduced but when cut too late it is hard to cure. The best time to cut soy bean hay is after the beans have become well formed, but before the beans have reached the stage

Any impurities that charcoal might known as half-grown. With most forage crops the later you cut them the easier they are to cure. It is not so with soy beans because as soy beans mature the proportion of beans in the hay increases. Early cut soy bean hay is much more Into Premature Laying palatable to the stock than the late It is usually considered better not cut bay. Early cutting means reduced yield. The greatest yield is by feeding large quantities of mash. obtained at maturity when the leaves Instead, limit the mash until pullets have begun to turn yellow. are quite ready to lay and, by feeding

Mechanical Corn Picker

Reduces Number of Men-Under ordinary conditions, farmers an profitably own a mechanical corn picker if they plant and harvest 100 acres or more, yielding 50 bushels of corn per acre, according to Prof. F. C. Fenton, Kansas State Agricultural college.

The mechanical picker reduces the number of men required to harvest and reduces the cost of harvesting in some instances to about half. Professor Fenton says. It also relieves the farmer of one of the most disagreeable and monotonous farm tases.

Nests for Hens

Poultry specialists recommend one nest for every five birds. If there are sufficient nests, all hens are insured of a laying place and the eggs are more likely to be clean and of high quality. In the well-planned house, nests can be removed easily and conveniently for cleaning. Metal nests have an advantage in this respect because they are easier to keep sanitary not been the year before, they will not and they harbor fewer mites and bed bugs.

Success With Hogs

The successful hog raiser has come to appreciate sunshine more and more. Modern hog house plans provide for admission of plenty of sunlight to the pens. Hogs require an abundance of fresh, pure air, which should be furnished without subjecting them to inlurious drafts. They suffer much in a close, confining, poorly ventilated place. Sunlight should sweep all parts of the floor each day, to destroy disease breeding organisms which may be present

Keep Poultry Yards Clean and Sanitary

Parasites Undermine Health and Sap Vigor of Birds.

(Prepared by the United States Department of Agriculture.) Care exercised in keeping poultry yards clean and in sanitary condition has a double function in keeping the flock clear of parasites that undermine

the health and sap the vigor of the birds. The injury by mites, lice, fleas, and other parasitic organisms is sometimes obvious, but it also happens that some insects and other small creatures are carriers or intermediate hosts of some of the internal , parasites of poultry.

For example, according to specialists in the United States Department of Agriculture, one variety of roundworm must develop for one stage of its life outside the poultry it affects. The roundworm lays its eggs within the chicken and they are eliminated in the droppings. They will not mature if picked up by a fowl. They do mature if a water flea picks up the eggs. Then if a hen takes in the water flea with her drinking water the round-worn parasite of the flea develops into a poultry parasite.

Many similar examples are known, and others are suspected. The grasshopper, for instance, has recently been shown to transmit at least one impor tant parasite of domestic poultry.

Sanitation and cleanliness which prevents such insects from having access to the droppings may thus break a cycle through which infestation reaches the flock. The insects in themselves may not be harmful to poultry, but if they have had an opportunity to feed on contaminated droppings they may be the means of spreading these particular parasites.

Factor in Increasing

Production of Crops Last year farmers bought more fer tilizers than in many years. This increased use of fertilizer was a large factor in increasing crop production. The American farmer is learning gradually the lesson offered by the European farmer who spends more on fertilizer per acre than any other farmer in the world. Holland is continually enriching its soil, which makes possible the intensive methods of the country and puts it at the head of the list of nations in the crop yield per Where the American farmer was inclined formerly to plant over a wide area of land of questionable fertility, he is coming to realize that with more intensive methods, proper

Soy Beans Are Popular as Protein Supplement

fertilization, and greater attention to

the culture of his fields, he can make

more money with less labor and acre-

age and undergo less anxiety from

plant diseases and frosts.

Soy beans are proving a popular protein supplement in Indiana. Twenty-one of the twenty-four members of the Howard-Miami Dairy Herd Improvement association are feeding soy beans to their herds, according to I. O. Holliday.

The demand for tinseed oil meal such pro comes more fully realized the demand looze through. for such by-products in dairy districts will continue to increase Some other source of protein must be secured. Present Indications are that the soy bean may play an important part in the solution of this important

Disk Before Plowing Is

Advantageous Practice It has been pretty definitely proved that pulverizing the top layer of the soil with disk harrow before plowing is done is a very advantageous practice. When the furrow is furned over the pulverized soil breaks away from the furrow and helps till up the furrow bottom much more effectively than when the solid furrow is turned over. In the latter case large openings are often left which cause the soil to dry out rapidly and become too hard to work down well

When using a disk for this purpose, do not angle it too much. Let it run rather straight and it will do satisfactory work.

************************* Agricultural Hints

Give the hens plenty of water,

Hog lots and pastures used year after year are one of the causes of runty

There is no such thing as too much sweet corn. Don't be stingy with your planting.

tered into the regular cropping system on a very large number of farms. The manure pile is a fertile source

In recent years the soy bean has en-

of danger through providing a breeding place for flies, but it is also the most valuable single adjunct a mixed farmer can have.

Sweet clover hay should be cut before the stalks get too large to be good for hay. It is also talled get very in bot sweet clover before the stalks get very in bot coarse in order to prevent killing it.

JTTLE MILK IS NEEDED FOR CALF

Youngster Is Early Taught to Eat Hay and Grain.

Although whole milk is often marketed leaving little skim-milk for feeding, it is no longer necessary to be handicapped in raising at least enough calves on dairy farms to take care of replacements in the herd.

For feeders and animal husbandmen have found that they can raise thrifty calves successfully and use only about 375 pounds of salable whole milk in doing it.

The general method of feeding calves is practically the same for all dairy breeds, reports I. W. Rupel, in charge of the work at the Wisconsin College of Agriculture. The calf is given a start on whole milk for a few weeks and during this time is taught to eat hay and concentrates. Thrifty calves are then gradually taken off the milk and continued on concentrates, hay, water and salt,

But, in their experiments, Rupel and his associates have also found that one schedule was most success ful for Holsteins and Brown Swiss. while another schedule had to be worked out for Ayrshires, Guernseys and Jerseys.

The method the workers found best for the Holsteins and Brown Swiss was to leave the calf with the mother for three days and then to pail feed whole milk by gradually getting the calf to take, by the end of the first week, nine pounds until it was six weeks old, and then the allowance was gradually reduced until, at the end of the seventh week, no milk was fed.

The process for the other three breeds was slightly more complicated. The calves were left with the mother for three to four days and then were pail fed at the rate of six pounds daily for two weeks, when the amount was increased to seven pounds daily for five weeks. After the calves were seven weeks old, the milk was reduced gradually until at nine weeks no milk was fed.

Because the calves must get along without milk, it was found that it is necessary that the feeds given be highly palatable and nutritious. The protein supply must be especially liberal, and so the concentrates need to carry a high proportion of protein rich feeds. The experts also found that the hay needs to be of the highest quality obtainable, preferably clover or alfalfa.

Dehorning Calves Best

Done While Still Young are about one week old.

and cottonseed meat is increasing hair over and around them, then take voke its aid for their children. It is a a stick of caustic notash, moisten It

The stick of potash should be wrapped in paper at one end so that the hands of the operator are not infured and only a small amount of water should be used so that it will not run down over the calf's head. If the water from the stick of caustic or from the horns is allowed to run, it will either injure the eyes or take off the hair. If a small amount of vaseline is rubbed around the bair surrounding the buttons it will aid in preventing any injury to the skin adjacent to the horns.

Calves should be kept in stanchlons or separated from other calves while they are being treated and for a few days afterwards. Then any remaining caustic may be washed off and the place greased with oil.

Inefficient Separator

Is Extravagant Waste An inefficient cream separator is an

extravagant waste. Separators normally lose about .03 of 1 per cent of butterfat into the skim milk, but when the loss amounts to as much as 15 per cent, this excess makes itself sharply felt in the cream check. In a herd of twenty 400-pound cows, a separator out of adjustment to this extent would bring about a loss of something like 225 pounds of butterfat annually. Figure this at the prevalling prices for butterfat and the total is not to be sneezed at.

Through frequent tests of the separator this loss may be controlled. It is by stopping the small leaks that the dalryman can boost his margin of profit,

Withholding Salt

At the Wisconsin experiment station some milk cows, well fed otherwise, were given no salt for periods as long as a year. After two or three weeks the cows showed abnormal appetites for salt, but the health of the cows was not noticeably influenced for a much longer time. But finally a complete breakdown occurred, accompanied with complete loss of apfor hay. It is also important to cut petite, rough coat, and a rapid decline in both weight and amount of milk

My, Yes! "I hear that saxophonist pald \$100

LOLA IN THE LAKE

T WAS not terribly cold in the win-ter time where Lola lived, but still it was cold.

They did not have the severe winter storms, nor the heavy snowfalls, nor the ice, but it was sharp, cold weather just the same.

The wind blew hard at this time of the year, harder and colder than at other times just to show that it was winter time here, too.

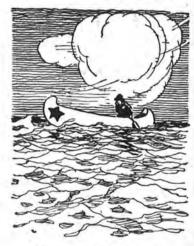

Lola had gone canoeing. It was a cold, raw day, but she loved to go on the lake at all times.

A wind was blowing hard. It made the lake full of little squalls.

It was hard to manage a boat when the lake was like that.

But Lola was used to the lake and its winds.

Now and again one got the better of her, but not often. She was very

Her Arms Began to Ache.

strong and she was a very good swimmer, too.

It had looked today a little as though it might rain. For that reason Lola had worn her raincoat.

"I might as well be prepared," she had said wisely enough.

How Lola did enjoy the rough water and the wind and the wild look of the day.

Only it became harder to paddle the canoe than she had ever known it to be, and she had gone much further up the lake than she had intended.

* It had been so easy going up the lake. The wind had been with her and she had gone further than she

THE WHY of

SUPERSTITIONS

By H. IRVING KING

THE HAZEL

THE hazel in this country has not

Europe for all-round magical proper-

ties. But it has not entirely lost its

mystic character even if on this side

of the Atlantic it is only a shrub and

on the other side it grows into a small

tree. In this country it is in high re-

pute as material for divining rods and

in some sections children play at con-

juring vith hazel wands. In Germany

as in this country, it is thought that

no wood is so good for divining rods

as hazel and the German peasant cuts

a twig of hazel in the spring for use

as a lightning protector for the rest

The reputation of the bazel comes

from the fact that it is one of Thor's

plants and is supposed to have sprung

from the lightning itself. In many

parts of Europe it is supposed to be a

great aid to fruitfulness and, also is

Just why the hazel is a "lightning

plant" is not apparent. It emerges in

this condition from the far, dim clouds

of Norse mythology and continues as

such today. Some authorities think

that the ancient Norsemen regarded

the hazel as an embodiment of the

lightning and as such worshiped it.

In some parts of this country there

may still lurk other superstitions re-

garding the hazel allied to those so

Severe Royal Decrees

The curfew and forest laws of Eng-

land originated in the reign of Wil

liam the Conqueror, 1066, All fires

must be covered or put out by a cer-

tain time each night, under heavy pen

alties, and all lighting of forest fires

was at one time punishable by death.

common in Europe.

much used in love divinations

of the summer.

nearly the reputation it has in

had intended before she

hard. Her arms began to ache. She felt she just couldn't keep on paddling, and yet she was so strong. But this time the wind was getting the better of her.

It was coming back that was so

If only she could stop and rest for Just one second. But she had to watch out for the squalls-coming in all directions, making it so hard to manage as well as to work so hard.

Then came two breezes from opposite directions and the wind began to blow harder than ever. How her arms ached.

Just for a second's rest! Oh, Just for a second's rest, she kept thinking

over and over again. She missed one stroke with her paddle. She 'couldn't help it, and a flurry of wind toppled the canoe right

Lola was in the lake. She was quite a long distance from shore and the water was very cold with little cold streams from the surrounding hills making it very, very cold in some

But Lola was a good swimmer and she was not afraid. She almost liked the rest from paddling, too.

Of course she kept the canoe with her. She wouldn't have gone off swimming without that, for she knew that would be dangerous, and she didn't take foolish chances

She swam and she swam and she swam, one arm over the cance, the other using the side-stroke. She swam with all her clothes on

and the raincoat as well.

She reached home safely. Oh, how relieved her family were when they knew she was safe, for they had worried about her on the lake in such a storm. They had not known until afterwar1 that she had been in the

But the raincoat shrunk. It was too small now for her in the sleeves, it looked quite absurd.

It was too short for her and it was too tight across the shoulders and did not fit at all,

But she had to wear it. How badly she did feel about it. If only she had taken it off and let it go in the lake no one would have minded so long as she was safe and they would have realized how hard it would have been to swim with it on.

But she had kept it on and it had shrunk and she was safe anyway. She still had to wear the raincoat What a great, great pity it did seem!

••••••••• Why We Do What We Do

WHY SOME PEOPLE WALK IN THEIR SLEEP

A PERSON who walks in his sleep somnambulists perform rather complicated acts, such as doing the ordinary chores of the day, climbing ladders, walking on the edge of a roof, and even taking a long swim without waking. They usually go back to bed and finish out their night's sleep without recalling a thing when they wake up in the morning.

The sleep walker does many remarkable things without the use of all of his faculties, but it is not true, as many believe, that he never comes to grief. He does. Sometimes he awakens in the midst of some sleep activity and is terribly frightened. It is a great nervous shock. Such a person should never be awakened, but led back gently and quietly. They are also liable to fall or otherwise

injure themselves. Sleep walking is not a healthy condition. It usually indicates at least some minor nervous disorder, if not worse. It frequently occurs in hysteria, epilepsy and the kindred nervous diseases. As a rule it is confined to young people. Sometimes it is the result of indigestion.

The sleep walker acts out his dream. The explanation for talking in one's sleep applies to walking in one's sleep except that instead of linking up the speech centers with his thought centers, the somnambulist connects the motor centers with the thought centers. This occurs less frequently than in the case of sleep talking, for most of us will awake when so much of our brain is active.

Sleep walking is a form of dreaming in which the ideas that shoot through the mind in dreams get hooked up with their corresponding motor neurons. In the ordinary dream the motor centers are disconnected from the thought centers during the sleeping period.

(@ by McClure Newspaper Syndicate.) Water Not "Drawn" by Sun The weather bureau says that the sun does not pull water vapor toward sun does not pull water vapor toward itself. Water is just evaporated by heat and thus made a portion of the sir. In speaking of the sun drawing water, reference is to the common phenomenon of seeing rays of light from the sun to the earth, which is merely due to dust particles floating in the nir, being made visible when the sun shines between cisuds.

For Meditation 000000 By LEONARD A. BARRETT

By LEUNAN OF MASS THE PERILS OF MASS **PRODUCTION**

Before a parked car, Johnny, with considerable pride, called his chum's

Leonard A. Barrett whole day's work,

for five days in the week, Johnny's father drove that rivet; and he will continue to do so until a mechanical device is invented which can do it as well, if not better than Johnny's father.

Three perils have developed from mass production. Human labor has become so mechanical that in many cases men have become mere machines, with the inevitable danger that monotonous labor may leave both mind and heart with little or no desire to take advantage of the leisure which the five-day week affords. Another peril is supplanting man-labormachines-thus throwing out of employment many persons who must seek labor in less remunerative fields because their capacity had been limited to the performance of one particular act. An equally serious peril is the possibility of an oversupplied market

The chairman of the Federal Trade Commission in a recent address, suggested that "government price control may be the penalty of industry's failure to solve the problem of over-production." The man who labors in the shop, as well as the slockholder, must be given a fair return for service rendered, otherwise prosperity is in serious peril. Labor is no longer content with a mere living wage, but demands a reasonable share of the prosperity it helps to produce.

"STOLEN" BRIDE IS FOUND SAFE AND ALL'S WELL

Panicky Bridegroom Calls Police Reserves, Find Wife in Bed.

Newark, N. J.-Mr. and Mrs. Harry Thomas drove up to their home at 16 Shanley avenue, Newark, early recently. They had been to a party.

"Now, dear, you wait on the porch," Mr. Thomas said. "All right, dear," Mrs. Thomas said, but hurry, as I am frightened being

alone here." "I'll be right back," he said. "I just want to put the car in the garage." "All right, dear."

Thomas put his car in the garage and hurried around to the porch. His wife was not there. Thomas trembled in fright. He aroused the family on the first floor.

Telephone Police.

"My wife," he said. "She's miss-She's disappeared-just now; ing. just this minute. She was standing on the porch-"

They telephoned the police, called neighbors. Men and women in night clothes, flapping about ghostlike in pathrobes, searched the vicinity of the

Motor cars loaded with police reserves and detectives burst upon the scene. The detectives aroused more neighbors, searched the neighborhood "They've kldnaped her," Thomas sald. "I'm sure they've kidnaped

"Who? Who did?" a detective asked. "I don't know," Thomas said.
"Well, now," the detective said.

we've got to have a motive. Every crime must have a metive, be it wife

Mr. Thomas Turned and Said: "Two Weeks. Why?"

stealing or chicken stealing. The latter," the detective said, "is less prevalent in Newark nowadays than the

"What'll we do?" cried Thomas. Let's Talk It Over.

"My suggestion," the detective said stopping to light a cigar, which a neighbor had given bim, "is that we go indoors and talk the situation over. Life is very peculiar, especially at this bour of the day."

They went inside. Thomas led the way upstairs. As he opened the door to his apartment a voice murmured: 'Is that you, Harry?"

"Elizabeth!" Thomas said. He ran in and took her in his arms, bugged and kissed her. The detective leaned against the door, smoked his cigar,

looked at his fingernails, yawned. "How long have you two been married?" he asked wearily. Mrs. Thomas blushed.

Mr. Thomas turned and said: "Two

weeks. Why?" "Oh, nothing. I was just asking,"

the detective said. "Now me. I've been married fourteeen years. I never lose my wife."

To Solve Mystery See

Other Side of Window Indianapolis.-Never hang your pants near a window,

That lesson has been imprinted up on the mind of William R. Grady of Indianapolis, and there is little danger of him forgetting it. Hanging his trousers near a win

dow. Grady arose to find that \$40 was missing from his roll of \$70. Again Grady bung the pantaloons near the same window and a \$20 bill was missing with a \$1 bill in its place when he awoke. The pants are not hanging by the

window now.

Forced to Act as Pilot in First Airplane Trip

Galveston, Texas.-Taking her first flight in an airplane, Mrs. I A Jung of this city, was forced to act as pilot while her brother, the regulapilot, hung beneath the machine. work ing desperately to repair a strut that was damaged in the take-off

MEDICINAL

ed, Alpaca for at, Train Wear

Choice May Be Had in ilady's Apparel for Vacation Days.

Those unfortunate women who must ravel by train will find the difficulty of looking smart en route greatly complicated by smudges of soot and need no warning to avoid light colors and crushable fabrics, says a fashion correspondent in the New York World. Ladies who travel by the more elegant means of airplane, motor or boat have a far wider range of choice for their wardrobe.

The heavy tweed suit with its seven-eighths or three-quarter-length coat is an excellent choice for those pedestrian voyagers who count their laps around the promenade deck and scorn the glass enclosure. One smart costume designed for them is of a heavy tweed in beige, black and green in a zig-zag pattern. The plain wraparound skirt is worn outside a blouse of white flat crepe, which fastens with businesslike buttons covered in woven leather of several colors.

A woven leather belt accents the high waistline. Over this suit is worn a three-quarter unlined coat of the tweed with the conventional patch pockets, throw-back scarf collar and a belt in the front only.

One item which forms a necessary part of the wardrobe of any woman who travels either by motor or ship is the full-length coat of tweed or homespun, which may be thrown over

Loosely Woven Tweed in Beige and Brown, With Collar of Raccoon.

the lighter sports ensemble beneath. For shipboard, such coats are provided with long luxurious fur collars that extend to the hem; for motoring, the collars are usually shorter. The trimming on these coats is reduced to the minimum and consists, besides the collar, of a little stitching, strategically applied to reduce the bulky appearance of the figure. Lynx, wolf, raccoon and such inexpensive furs are usually used.

The woman traveling by train will find that a smart little black chiffon becomes a limp rag after two hours of crossing the plains and that a zephyr-weight jersey feels like the perfect costume in which to brave the Arctic circle.

The one fabric which seems ideal for train travel is alpaca, which is cool, does not crush and has a chic thoroughly adaptable to this season's vagaries. A cardigan and skirt of black or navy alpaca, worn with the most gossamer of sweater blouses, makes a costume in which the traveler may emerge smiling at her station,

New Pink Shades Are in Dainty Lingerie Silk

Cherub pink is a lovely new color for lingerie silks, with the delicate effect of cream over peaches and exceptionally charming when contrasted with handsome lace that is tinted a medium ecru. Lingerie sets for the bride's trousseau are shown in this color, of firm silk crepe. Chemise. night robe and slip are cut to mold the figure and are given fullness by means of fine cluster plaits, unstitched in the French manner. Or, in lieu of a chemise there are pantie and bandeau garments. Foundations in the same color but of heavier silk accompany these

Beads Strung Hit or

Miss Is Paris Fashion Mixed coral and jade, or their imitation, are among the recent Paris necklace fads. It is considered more chic to string beads hit or miss than to put first a pink and then a green.

Women are picking up stray beads in antique and Oriental shops with a view to stringing their necklaces according to their own ideas. Odd sizes as well as mixed colors are in voque.

Clouded amber and clear amber are in demand to combine for choker strings. Ivery beads and amber are another combination in use.

ON REARING CHILDREN from

CRIB TO COLLEGE ompiled by the Editors of "CHILDREN, THE PARENTS' MAGAZINE"

"It seems to me," writes Louis Bromfield in the Parents' Magazine, "that in the relationship of child and parent, the parent has few rights and only a colossal responsibility. He is responsible for the very existence of the child. How many times is heard the tragic-comic cry, 'I didn't ask to be born!' The child is utterly helpless and the prey to every sort of stupidity, selfishness, cruelty and ignorance. A child has every right to be treated with respect and awe and with what is more important, with sympathy and understanding."

What is the sane and sensible way to dress a baby? The answer is very definite and simple. Summer and winter, rain or shine, the baby wears:

A flannel band, which should be replaced after the first, month by a cotton and wool or silk and wool-knitted band with shoulder straps.

A diaper, which should be folded oblong rather than triangular and fied or pinned at the sides and then tled or pinned to the flannel band at sides and front, thus making a pointlike garment. It is more comfortable and less bungling when applied in this manner.

A knitted shirt with sleeves, either slik and wool or cotton and wool. All wool is much less desirable.

A thin cotton dress. The old-fashloned "long" and "short" clothes are no longer used. If the baby's dress is made amply large and about twenty-two inches long the child will grow to it and by the time he is six months old it will be plenty short enough.

Have a complete set of clean clothes every day, and dress the baby only once, when he has his bath in the

During the summer months boys and girls need:

Simple outdoor life away from crowds, "movies," noise, trains, etc. Opportunity to learn to perform simple duties that contribute to the welfare of a home, because in winter

there is not time to include this training in the school day. Chance to tramp, fish, collect, canoe, etc., because winter sports are chief-

ly indoors. Opportunity to have the joy of earning money, for which there is not much time during the school year. Opportunity to play with other chil-

dren, as some children are inclined to clan almost entirely by themselves. A bowl of goldfish placed in a sick

room always pleases the small patient

when his head is just too heavy to

raise for any other amusement.

"Occasionally we take our five-yearold girl with us when dining out." writes one of the readers of the Parents' Magazine, "At such times I always carry along a small amount of modeling clay, and this has never failed to keep her entertained and quiet while the grown-ups are busy visiting with each other."

Printed Linen Is Used for Popular Beach Coat

The neck is cut out a little and Binding folded once and pressed goes on quickly. Stitch it first only good to look at but most fasty on the right side of the coat; then Top with cream and chopped nuts. roll it over the edge and stitch again. if the binding laps a shade more on the wrong side of the coat than on the right side the second stitching may cupful of boiling grape juice, add the be run on the right side. The coat is grated rind of half a lemon and half shown in printed linen but there are an orange with all the juice of a lemever so many attractive materials for on and orange, and sugar to taste beach use. Willow-weave which Chill and when it begins to thicken shows a colored print on a plain basket-weave background is a cotton especially suitable for beach coats. Eponge, while not a new material, comes in a series of colorful prints fitting smartly into the summer mode. For a warmer coat flannel is practical, With this material silk makes the nextest binding and is easy to put on.

The Kitchen Cabinet

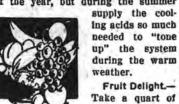

"You have to believe in happiness-It isn't an outward thing. The spring never makes the song,

i guess,
As much as the song the spring.
Aye, many a heart could find con-

If it saw the joy on the road it went, The joy ahead when it had to

grieve.
For the joy is there—but you have to believe."

ALL KINDS OF GOOD THINGS Fruit desserts are welcome any time of the year, but during the summer

weather. Fruit Delight. Take a quart of

raspberry juice, a pine of pineapple juice, heated separately. Add two envelopes of gelatin to the raspberry and one to the pineapple. Cover the bottom of the mold with raspberry juice; when set add the pineapple jelly whipped to a sponge and mixed with one-half cupful of cherries (candied). When firm pour in the raspberry juice and set away to mold.

Rice Parfait .- Take one pint each of raspberry and orange jelly. Pour twothirds of the raspberry jelly into a mold and when firm cover with the orange and a layer of finely cut orange pulp. Mix one cupful of boiled rice with one cupful of boiling water and one envelope of gelatin, one-half cupful of sugar and a tenspoonful of orange flavor. When cool stir in one cupful of cream, whipped. Cover the layer in the mold, and finish with what is left of the raspberry jelly.

Spiced Tomato Salad,-Cook one plut of tomato juice with one-fourth teaspoonful each of mace, cloves, allspice, ginger and paprika. Add onehalf teaspoonful each of mustard and salt, a bay leaf and one-half an onion. Cook ten minutes. Strain, add two tablespoonfuls of vinegar, one envelope of gelatin. Mix cooked green peas in the jelly and arrange in a mold. When set, cover with the remainder of the jelly and when firm serve with mayonnaise, garnished with chopped egg white and parsley.

Spinach Jelly Salad .- Season one cupful of boiled spinach with salt and lemon juice. Put on ice. Dissolve two envelopes of gelatin in one cupful of hot water, add one-half cupful of vinegar, one-half teaspoonful of celery salt, the same of mustard, a dash of cayenne, then add two cupfuls of bolling water. Pour one inch of felly into molds. When set arrange strips of pimento, shredded cabbage in design and add more more jelly. Put the spinach in the mold, pour in more jelly and garnish with watercress.

Molded Vegetables .- I'ut a bunch of cooked carrots through a ricer, season with stock, salt and a tablespoonful of worcestersbire sauce, one tablespoon ful of chili sauce. Add to one package of lemon gelatin and pour into a ring mold. Sprinkle a few flowerets of cauliflower and peas through the jelly When firm fill the center with pickled beets and serve on lettuce

Summer Food.

With bass, pickerel, and fresh-water fish as well as the seafish, one has large variety from which to choose for the summer meal. Shrimps lend themselves to many dainty

dishes, creamed escalloped. in salad combina tions or served on lettuce with a good

french dressing and a dash of worcestershire, they are especially appe Any good white-meated fish stuffed

with a snappy filling and served with a piquaint sauce is a welcome main dish for the summer table. Here are some good sauces to list in your card index, and serve with tish dinners: Gherkin Sauce.—Cook together two tablespoonfuls of butter with one

tablespoonful of flour, add three fourths of a cupful of bolling water two large chopped gherkins, one table spoonful of vinegar, salt and pepper to taste. Cook ten minutes and serve in a saucehoat with pickerel which has been boiled in acidulated water until

Peach ice cream, frozen with finely cut marrons (chestnuts preserved in lemon strup), topped with whipped cream, is another delightful concoc tion.

Chocolate sauce poured over temor ice cream, tinted a light yellow, is not

Grapefruit Parfait,-Dissolve one tablespoonful of gelatin in one-fourth cupful of cold water, then add one peat until light and fold in two cup fuls of whipped cream Serve in tall glasses, garnish with whole grapes Use grape leaves as dollies for the plates, if possible. Small castor bean leaves will look most appropriate if

lazy, hot weather feeling. Energy that is quickly released to the body, it's so easy to digest.

And how those crunchy flakes tempt the appetite! Delicate flakes from the tender hearts of selected white corn, toasted golden crisp and seasoned to flavory goodness! Every member of the family votes for this quick-energy breakfast the Wake-up Food,

And don't forget -there's just one way to get the Wake-up Food. Ask your grocer for Post Toasties in the red and yellow, wax-wrapped package.

Western Newspaper Union

Fifteen-Year 6% Convertible Gold Debentures

Due August 1, 1944

Interest payable February 1 and August 1 without deduction for normal Federal income tax not exceeding 2%. The Company will agree to refund to holders, upon proper application, any State income tax not exceeding 5% per annum, and in Massachusetts not exceeding 6% per annum, and personal property and security taxes in certain States as provided in the Trust Indenture. Redeemable at any time as a whole or in part on 60 days' published notice at 105 and accrued interest. Coupon Debentures in interchangeable denominations of \$1,000 and \$500 registerable as to principal only. Central Hanover Bank and Trust Company, Trustee,

Debentures will be convertible, at the option of the holder, at any time prior to maturity, or up to five days prior to earlier redemption, into Common Stock at the rate of 40 shares for each \$1,000 principal amount.

H. H. Fish, Esq., President of the Company, summarizes from his letter to us as follows:

BUSINESS

Western Newspaper Union, successor to a company of the same name and a business founded in 1865, serves more than 10,000 daily and weekly country newspapers, maintaining fully equipped plants in 36 key cities of the United States from California to Massachusetts.

The Company supplies these newspapers with ready printed inside pages or with columns of prepared plate, containing various feature stories, serials and special articles selected by the newspaper publishers; places national advertising in their papers and prepares cuts and copy for local advertising campaigns.

The Company also does a large volume of commercial printing, prints in their entirety various magazines and trade journals and is responsible for the mechanical production of many of the feature services of The Associated Press.

FINANCIAL

During the past 20 years net profits of Western Newspaper Union, after all charges including depreciation, but before Federal taxes, averaged more than \$680,000 annually, and in no single year were such net profits less than \$450,000.

Net profits after depreciation, but before Federal taxes, for the past 4 years, as certified by Messrs. Arthur Andersen & Co., after eliminating operations of the paper mill, which is being sold coincident with this financing and after other adjustments arising from the reorganization as stated in their certificate, were as follows:

1925..... \$741,336 1926. 955,383 1927. 571,249 1928. 765,825

Such net profits as above have averaged about \$758,448 annually, and for the year ended December 31, 1928, amounted to \$765,825, equivalent to more than 3 times the annual Debenture interest requirement.

After deducting from such net profits in 1928 Debenture interest requirements, Federal Taxes (parent company) at 12% and Preferred Stock dividends, the balance amounted to over \$352,000, or about \$2.35 per share on the 150,000 shares of Common Stock to be presently outstanding.

The net assets of the Company, available for these Debentures, based on the balance sheet, as at April 30, 1929, adjusted to give effect to the present financing, including the sale of the paper mill, were in excess of \$8,500,000.

MANAGEMENT

Since the death in 1916 of the former owner, George A. Joslyn, his widow and other heirs have owned the majority of the Common Stock of Western Newspaper Union, control of which is now being acquired by the executives who have been responsible for its successful operation during the past 13 years.

All legal details will be passed upon by Messrs. Tenney, Harding, Sherman & Rogers of Chicago and by Messrs. White & Case of New York.

Society Notes

Dorothy Glenn, Editor. Phone 166.

A lovely dance, sponsored by the Young Men's Club of Coll ierville, was given at the home of Mre M V Dunn with Mr Nat Dunn as the genial host, Saturday night frem nine to one o'clock.

The out-of-town guests were Miss Mary Walker Mahan, of Holly Springs, Mississippi, her house guest, Miss Gennette Left-rich, and Mr Claud Brown who is the guest of Mr Herbert Hihton: Good music was furnished by

five piece orchestra.

lin and Morris McGinnis.

Those of Collierville who atended the dance given at the Elk's Club in Holly Springs last Thursday evening were Misses
Doris Dudney, Lillian Morris,
Dorothy Glenn, and Messrs Nat
Dunn, Boggan Carrington, John
E Leake, Earl Brooks, Willie Hill Orville Carringion, Hugh Sande-

Mrs David Cartwright e tertained her little daughter, Virginia, with a birthday party on Satur day afternoon. Sixteen little boys and girls were included in the guest list. After many games that brought much merriment to little friends ice cream and cake were served.

Miss Lillian Morris was the charming hostess at a beautifully planned Bridge party on Monday afternoon complimenting her house guest, Miss Louise Perry of Clarksville.

After four interesting games, the sixteen guests enjoyed a love ly salad course. Mise Morris was assisted in entertaining by her sieters, Mrs. M. V. Kirk and Miss Elizabeth Morris.

A new kind of comfort in a low-priced car

"WHAT kind of shock absorbers?" is one of the first questions you should think about in selecting a new car. For nothing means so much to your joy of motoring as easy-riding comfort.

When you buy the new Ford you get four Houdaille hydraulic two-way shock absorbers-two front and two rear. That's the kind of quality that has been built into every part of this great new car.
