FACTS and FICTION BEING A Little Bit About Anything

"Read not to Contradict, and Confine, nor to find Talk and Discourse, but to Weigh and Consider."—Francis Bacon.

Did you ever stop to think for a moment of space. What is out beyond the milky way—out there hundreds of billions of light-years away—in space? On and on past moons and stars and stars, where nebula satellites wend their distant way, and lonely comets dart to parts unknown.

What is space, and what are its limitless bounds, are questions that finite minds may never be able to answer.

Plato spoke of it as that which is not. Leucippus held that that which is not and that which is actually are. So there we are, and that's about as far as any of us have advanced, with our airplanes and telescopes we explore a little fringe of the vast sea of space about us, but man can but gaze and wonder at what is beyond.

"Al Smith to build 80 story building" says a headline. Some people seem to have a way of getting up in the world.

We don't understand why the government set up a prohibition fence that would be as effective as the tariff wall we hear so much about.

Roger Babson says the stock market boom will blow up. It seems, however, that with so much watered stock, an explosion should be prevented.

Illness in the United States cost \$10,000,000,000, or one ninth of our annual income. The average individual loses 2 per cent of his time from illness. This makes our sickness some rather high, as 2 per cent of our time takes nearly 10 per cent of our wealth.

How long has man been trying to fly? Well, his efforts go back much farther than the Wright brothers at Kitty Hawk. When the Byzantine family of Comnenus sat on the ancient throne of the Roman Empire in the east at Constantinople, a Saracen climbed to the loftiest edge of the Hippodrome, while the Emperor and the crowd looked on and with bat-like wings of cloth, made an effort to fly across the course. His artificial wings failed to work and he crashed on his head on the ground, much to the amusement of the onlookers.

It's a far cry from the unfortunate Saracen to the Graf Zep, but some one had to make the first effort.

A man was recently turned out of the prison at Charleston who had not seen the world in 53 years. Think of all the rides in T-model Fords he missed.

Raises Fine Watermelons

Our friend W F Brown proved to us this week that he could raise watermelons by bringing to this office a very fine melon. While his crop was not as large as usual, the melons were very fine and of splendid flavor. The variety is a combination of the Tom Watson and Kleckly Sweet, and Mr. Brown evidently knows how to raise watermelons.

First Built-in-Collierville Ship to be Called "Southern Crane"

Work on the first ship at the Mannercraft hangar is progressing nicely according to Messrs Hugh Mann and Ricardo Houstee. The first plane is to be known as the "Southern Crane" and is rapidly nearing completion. Of all steel construction, the plane presents an attractive appearance as it assumes shape. It will have a high speed of 105 miles per hour, a cruising speed of 90 miles and a landing speed of 35 to 40 miles. An Anzani motor, 60 h. p., six cylinder Radio type, will be used in this ship but when the factory is under way, a specially designed motor motor will be built for the Mannercraft planes. The ship will weigh 735 pounds with a payload of 350 pounds.

Much interest is shown in the venture and the public will be invited to visit the hangar as soon as the ship is ready for inspection and flight.

Young Peoples Missionary Society

The Young Peoples Missionary Society met on Saturday evening with Misses Ruth and Ann Russel. There was a splendid attendance of old members and two new names were added to the roll. Following the Scripture Reading and prayer, excellent talks were made by Miss Janie Hinton on the Centurions' Faith, and by Mrs. Mc Ferrin on the object of the Missionary Society and the Part Played in the church. Miss Margaret Pearce gave a lovely piano solo, and Marie Neely and Grace Ward Mc Ferrin rendered delightful readings.

Late in the evening a delicious food course was served.

Enlarges Pavilion

The Home Grove Pavilion, owned and operated by Mr. A R Hamner, has been remodeled and enlarged, having been closed the past two weeks. The new dance floor measures 32 by 80 feet and awning has been provided for the sides, which can be closed in bad weather, making the pavilion comfortable. Mr. Hamner will give his opening dance on Friday night, September 20th and has engaged a special orchestra for this occasion. The best music and the best of order are features of the dances given at Home Grove Pavilion. Sandwiches and cold drinks can be had and Mr. Hamner extends an invitation to his friends to visit the new pavilion.

In the Interests of Game Preservation

The following items were handed us by Walter B. Mebane, U S Deputy Game Warden, and are interesting facts of the work being done along the line of Preservation of Game.

During the season of 1927-28 Tenn. issued 63,026 resident Hunters' license, 280 non-resident and a total of \$78,527.32. The total for the United States including Alaska was 6,450,000 license or \$9,300,000.

In the fiscal year 1929 the Bureau of Biological Survey bought and issued 249,000 bird-banding bands, and the total number of birds banded and reported was 133,884.

Time to Come Back

MISSIONARY SOCIETY

One of the best attended Bible Study classes of the Methodist Missionary Society ever held was that held Monday afternoon with Mrs J B Gunn. Every member to whom a lesson had been assigned was present, showing careful study by comments and good thoughts on their particular passages. The afternoon was truly a mark of loyalty and interest. The next meeting will be held at the parsonage, Monday afternoon, Sept. 16th. On this occasion the members of the Society are the specially invited guests of Mrs B J Russell. The regular social and program day will be observed with Mrs L P Pearce in charge of the program.

City Court Held Monday

—Three Fined

Four negroes, a pint of liquor, several empty bottles, an automatic pistol and a Nash roadster, figured prominently in City Court Monday. Marshall Lowe placed the four under arrest Sunday night about 8:30 after they had been racing the car around town and finally stopped at a filling station and proceeded to raise a rough house. As he was placing them in jail, one man escaped, running up the alley. Monday morning without any trouble Lowe located him in Memphis and notified the officers to arrest him and return him to Collierville. The three were charged with disorderly conduct and a fine of \$10 and cost were assessed against each of the three.

City Council Meets

The regular meeting of the City Council was held at the City Hall Friday night, with Mayor J. T. Patrick presiding. Routine business was disposed of and accounts allowed.

Surveyors have completed lines and data for the new City map to be made by the Volts Construction Company, Memphis. This map will show all streets, alleys and property lines. A complete survey was made of the entire City, all data carefully checked so that the new map will be ready at an early date.

The clean-up campaign this summer has been very successful. Weeds along the streets and alleys have been kept cut, and vacant lots cleaned. All low places have been kept oiled and the town has been practically free of mosquitoes all spring and summer. Everyone co-operated with the city officials in this campaign and the results have been very satisfactory.

U. D. C Meeting

The Louisa Bedford Chapter, U. D. C. met with Mrs T E Watkins on Wednesday afternoon, a large representation of the membership and a number of guests being present. The U. D. C. colors of red and white were beautifully carried out in the flowers and lights. The president, Mrs. B M Cowan, presided over the business session in which a report of the year's work was read and a financial statement given. Delegates to the State Convention to be held in Chattanooga, Oct 9-11 were elected as follows: Delegates, Mmes. Craig, Baker, Frank. Alternates, Mmes. Irby, Piper, Jones. Contributions to the Southern Scrapbook were given in. The following program was enjoyed:

Piano Solo, Esther Watkins
Clipping, Mrs W H Holden
Reading, Mildred Watkins
Clipping, Mrs S R Craig
Piano Solo, Mrs Walter Harris

After the program and during the social hour a delicious salad course was served.

To Poultrymen

Mr L H Prescott, Poultry Specialist, wishes to thank the local poultry feeders for the interest shown in his work thru the Collierville Cash Feed Store and advises us that he will be in town again Sept. 26th.

Mr Prescott is a nationally known authority on poultry husbandry and his work is purely educational, covering proper methods of poultry feeding on any feed used, also housing, ventilation, sanitation, poultry diseases and culling.

The local people should not fail to take advantage of this free poultry service.

Optometrist To Be Here Each Saturday

Dr Vance C Roy, Optometrist of Memphis, will be here each Saturday at the office of Dr McCall, where he will examine eyes and supply glasses. Dr Roy is a graduate of Los Angeles School of Optometry and has been practicing in Memphis for the past five years. He is President of the Tri State Optometrist Association and Inspector in West Tennessee, for the State Board of Optometrist. Dr Roy is well known here and his being in Collierville each Saturday, will be appreciated by our people, enabling them to have the same service, without having to go to his office in Memphis.

Indications Are that Cotton Crop Will Be a Little Short

The cotton has been coming in steadily this week, indications are that the crop will be a little short of first reports, due to lack of rain and cool weather. However, due to larger acreage the yield will not be short of last year. Account of installing electric motors in the Davis Gin at Bailey it is not running but Mr Davis hopes to open for business Saturday and says the crop outlook there is good.

Up to Thursday noon the following number of bales had been ginned;

| | |
|---------------|----|
| H W Mann | 77 |
| Swift and Co. | 15 |
| Forest Hill | 25 |
| Harry Piner | 35 |
| Frank Piper | 40 |
| Cayce | 46 |
| Rossville | 23 |
| Mt Pleasant | 50 |

Treadwell-Roach

The marriage of Mr Timmons Lewis Treadwell, Jr, and Miss Ruby Jewel Roach was quietly solemnized at the Baptist parsonage at 8:30, Saturday evening, September 7th, in the presence of only a few relatives and friends, with Rev J P Horton, officiating; Mrs Treadwell, the daughter of Mrs Ella Roach, was lovely in a beautiful ensemble of dark blue velvet. Mr Treadwell, the son of Mr and Mrs T L Treadwell, is employed at the Ford plant, Memphis. Immediately after the ceremony the young couple motored to Memphis where they will make their home. Their many friends wish for them every happiness.

MICKIE SAYS—

PEOPLE HAVE A HABIT OF TRADING WITH THEIR FRIENDS WHO ARE IN BUSINESS—BUT HOW ARE YOU GOING TO BE FRIENDS WITH PEOPLE YOU DON'T KNOW? EASY! ADVERTISE—TALK TO THEM IN THE HOME PAPER—MAKE 'EM FAMILIAR WITH YOUR NAME AND YOUR STORE, AND THEY'LL BE IN

P. T. A. Officers Make Plans for Membership Drive

The Executive Board of the Collierville Parent-Teacher Association held its first meeting Monday afternoon, September 9th. The Board includes besides Mrs. Chas. Dean, President: Mrs W. Jones, 1st Vice-Pres. J. F. Dudley, 2nd " " J. K. Hinton, 3rd " " H. F. Kelsey, 4th " " V. Leake, 5th " " J. B. McFerrin, 6th " " V. M. Carrington, 7th " " S. C. Fleming, Recording Sec. Mary McGinnis, Corres. Sec. Miss Dossie Hinton, Treas. Miss Louise Williams, Asst. "

The meeting was called by the president to plan the year's work. More members are needed to help "put over" the work planned. A membership drive will be put on immediately and those of you who are not members, think wisely and do not fail to sign that membership card when presented to you. The P. T. A. needs you.

The lunch room, already begun must be finished—equipped with necessary articles. So one and all be ready soon to donate to the "lunch room shower". You will be called upon for something. It will be a great thing for our children. Another special feature of the year's plans is the "Mothers Chorus" to be organized at an early date with Miss Leath, director. Every mother that can sing should join this chorus.

The Jubilee Spirit must not die. Plans are instituted for the work that the P. T. A. wants to carry out so that next Jubilee Day bigger and better results may be shown.

To Have Diphtheria Clinic, Sep

Do you dread Diphtheria that have children in your In New York City alone during the first half of 1924, there were 5,948 cases, with 441 deaths. Practically every one of these might have been prevented, if the children had been given Toxin-Antitoxin.

Dr. C. W. Polk, Director of Child Hygiene for Shelby county will hold a Diphtheria Clinic here in Collierville September 23rd, at the School building, beginning at 9 a.m.

It is urgently requested that all children be brought to the school building on the 23rd. Let's make Collierville immune from the dread Diphtheria germ.

Children of both school and pre-school age may be given the treatment. It is all free.

Sunday School 9:45
Preaching at 11 a.m. and 7:30 p.m.
Junior League 5:30
Senior League 7:15
Woman's Society, Monday, 3:00
Prayer Service, Wednesday, 7:30

The subject at 11 o'clock "The Authority of Jesus" and at 7:30 "A Crown of Life". Come and worship with us. Come to Sunday School also likewise.

B. J. Russell, Pastor.

Receives Carload Shipments

A carload of Purina Feeds was received this week by the Hinton and Hutton Company, local dealers in Purina. They have been among the leaders in selling their quota of Purina Feeds in this sales district and are generally at the top. A carload of coal was also received by them this week.

Charming Fabrics for Fall Dresses

Metallic Cloths, Flowered Satin, Lames Are Among Favored Goods.

Since fabrics are of primary importance in autumn collections they might well be studied by women who were never able to sew even a doll's dress without getting the sleeves in backward, as well as by those home dressmakers who can turn out a decent copy of a Vionnet with nothing but a few yards of silk and a mouthful of pins, observes a fashion writer in the New York World.

Any one who places her ear to the ground in the hope of catching rumblings of the autumn mode will be impressed at once by the importance of the lames. For formal evening wear the supple lames and lame chiffons are of great interest, and the newest inspiration of the designers for reducing your bank balance is the verdict that a lame gown must be accompanied by a wrap with matching lining. This principle, which is all too familiar for street wear, is a new and extravagant idea after dark.

Metallic Cloths Popular.
Some prominent dealers are showing a real fervor over the new metallic cloths which they are urging for formal sports wear as well as for evening occasions. They are selling miles of metallic chiffon and other interesting fabrics of plain metal with a pattern printed on the wrong side and allowed to show through. The process, if you are at all interested, is known as underprinting. In almost all of the lames the patterns are abstractions of small floral themes.

Other important fabrics of the glittery type include flowered satin brocades, and a very curious and intricate cloth with some metal woven into the fabric and more overlaid in a print effect, the whole giving an interesting double appearance. These lustrous fabrics will be combined with plain crepes for the tea-time dresses which are recovering their importance, and also for spectator sports.

Plaids and checks, which traveled in record time the past spring, winning the Ford Fashion cup of the year, will again have the temerity to appear in the high places of the fashion world. But they will be well modified and can be distinguished by the most astigmatic from the creations of last year. For instance, Cheney has designed a plaid crepe which combines four tones of the same shade in a serpentine pattern undreamt of by the Highland clans. They also show checks with a new irregularity which combines rectangles with small squares and otherwise discourages manufacturers from using up last year's fabrics.

In these crepes, designed for daytime use, you will find that the colors are gayer than before and that they will be recklessly used in combinations suggested by the gaudier of the tropical birds. The capucine shades will be in evidence, but will usually be darkened into the terra cotta shades, and dark mahogany and plum browns will both be excellent. Reds of all degrees of brightness, blues of a lighter shade than navy, bottle greens and their combinations with black and white will all be important.

Moire in Fine Patterns.
Among the other silks which will be seen about is moire, which will appear with the fine floral patterns of last year and also printed in a modified plaid effect. Moire will be used for

One Side of Skirt Is Trimmed With Inserted Irregular Panels.

de luxe linings, in combinations with woollens for daytime wear and in those evening bouffant creations which should only be worn by women who could make their living on the musical comedy stage. Foille, plain and faconne, will also be of importance in the evening mode and heavy, printed satin will be used more often than printed velvet. Flat crepes, velveteen, lace, tulle, brocades, stiff chiffon and the cre fabrics will all be good in their plain, unprinted versions.

Among the newer daytime fabrics is frost crepe, a sort of canton weave, which will be much used for the sort of dresses that stand up well under office routine, and the entire line of Jacquard tie silks. This latter group is costly and generally imported: the Paris couturiers, who favor their compatriots as much as possible, will undoubtedly stress it in the fall collections.

Other daytime fabrics will include printed velvet, printed jersey, marocain, faille and crepe satin; unprinted crepe de chine, flat crepe, tweed, broadcloth, duvetyne, tussanum, velvet, velveteen, and all of those deceptive silks that resemble woollens and woollens which their own mother sheep would disown.

If you are determined to recover your waistline, which has probably escaped you during the corsetless decade, you will find several energetic firms eager to help you out.

One mecca for young women in search of bodily agility is the studio which specializes in "rebuilding girls." It is here that the more adept musical comedy dancers receive their train-

Spirally Disposed Irregular Flounce Forms Basque Effect.

ing and you may pick up such useful accomplishments as clogging and doing the split while you regain your svelte contours.

Even those who do not require such radical measures will still find it advisable to resurrect the old habit of wearing a corset. It is improbable that the antediluvian type which required long laces and a capstan to be put on will ever return to favor in this athletic age. Indeed, the newest corset models do not provide laces for even the most outside of their customers, and rubber elastic is put in only in judicious strips and godets.

Corset Molded to Figure.
One firm is very, very proud of its corset department and stresses imported, lace-covered fronzies. One of their recent offerings is a French creation which combines as many functions as a room in one of those appalling efficiency apartments that are scattered throughout the country.

The corset itself is finely molded to the figure and is entirely covered with a long flounce of net applied in a lace pattern. An uplift brassiere runs across the top and a little strap converts the whole, if you wish, into a chemise. There is that low back which is shown on every self-respecting model of the season, and the body of the corset itself is formed of taffeta with insets of a hard-woven silk elastic.

Another of these elegant contraptions uses double-faced satin with a flounce of Alencon lace. The corsets of this all-encompassing variety have side openings, and all of them are refitted to your figure before you are allowed to give the charge address.

One interesting device stressed by the same house is the double elastic corset, which has the great advantage of not riding up when the customer, as customers will, takes it into her mind to sit down. There is an inner belt which is quite separate from the outer layer and a double control arrangement on the garters which introduce the principles of modern engineering into this frivolous field. The model in some of its more elaborate forms includes an attached brassiere of lace and satin and would be a good addition to your fall wardrobe.

The flimsy contraptions known as garter belts are becoming of minor importance, since even the flapper has ceased to scoff at the full-length corset. A few garter belts will probably be demanded for sports wear by women of comely proportions, and they will find that the same fragile and feminine type is still being stressed.

Cravat Collars Favored by French Designers

The importance of neckties is one of the new developments of style in Paris.

Cravats lend their form as well as fabric to fashion. Some of the most expensive silks are called necktie or cravat silk.

Cravat collars, which means necklines terminating in two tabs that are worn tied, or untied, are used by nearly all designers.

The Kitchen Cabinet

(© 1929, Western Newspaper Union.)

Not what we have, but what we use,
Not what we see, but what we choose—
These are the things that mar or bless
The sum of human happiness.

Not as we take, but as we give,
Not as we pray, but as we live—
These are the things that make
For peace

Both now and after time shall cease.

THIS AND THAT

In the South guava jelly is much used as a garnish for various dishes, as a breakfast jelly and for many dainty dishes. The crab apple jelly made from the fall crab apples is just as delightful and to many a more agreeable flavor than the guava. Serve it as the southern people do, and enjoy the same dishes.

One in particular is cheese (the cream or cottage) formed into a ball and served on a crisp lettuce leaf with a spoonful of jelly as a garnish. This makes a dainty salad and one quickly prepared.

Balls of cottage cheese, pressed in at the top to form a cavity and filled with the crab apple jelly is a nice finish for dinner with a cracker and demitasse of coffee.

Few of our housewives appreciate the food value of dates. Stuffed with nuts or cream cheese they serve as a delicious dessert and one that will not strain the family purse or the energy of the cook. Sometime when pressed for ideas try this: Slice stoned dates into small glass serving dishes, sprinkle with a few pecans and top with lightly flavored whipped cream. The dates are sweet enough to not need sugar.

When serving tea for the afternoon bridge club make very small baking powder biscuit, not more than an inch across. Split while hot, spread with butter and fresh raspberry jam or any other well-liked jam. These are so good with tea—but make plenty.

Melville Cookies.—Cream one cupful of butter, add one and one-half cupfuls of sugar gradually and three eggs well beaten. Dissolve one-fourth teaspoonful of soda in a tablespoonful of hot water and add to the mixture. Sift three and one-half cupfuls of flour with four teaspoonfuls of baking powder, three-fourths teaspoonful of salt and one teaspoonful of cinnamon. To part of the flour add three-fourths of a cupful of raisins and the grated rind of an orange. Add the orange juice and one cupful of nuts to the mixture, then mix all together. Drop by spoonfuls on baking sheets and bake in a hot oven.

Coffee Recipes.

As coffee is such a universally liked drink, the flavor, too, is enjoyed in other combinations.

Coffee Custard.—Scald two cupfuls of milk with two tablespoonfuls of ground coffee, and strain. Beat four eggs lightly and add one-fourth cupful of sugar, one-eighth teaspoonful of salt, and the milk.

Strain into cups set in hot water and bake until firm.

Coffee Tapioca.—Soak two tablespoonfuls of pearl tapioca overnight in water to cover. Drain off the water and add three cupfuls of strong coffee infusion. Add one-half cupful of sugar, a pinch of salt and bake or cook in a double boiler until clear. Serve with sugar and cream.

Coffee Cream.—Soften one tablespoonful of gelatin in two tablespoonfuls of cold water and add one-third cupful of boiling water. Add one-quarter cupful of sugar and one cupful of strong coffee infusion. Fill eight individual molds half-full of this jelly. Meanwhile soften two teaspoonfuls of gelatin in a tablespoonful of cold water. Beat one egg slightly, add two tablespoonfuls of sugar and one-quarter cupful of coffee infusion. Cook over hot water until thickened, then add the gelatin and stir until well dissolved. When thickened fold in two-thirds of a cupful of whipped cream which has been flavored with a few drops of vanilla. Fill the molds with this mixture. Set on ice to chill. Unmold to serve.

Malted Coffee.—Take two cupfuls of strong coffee infusion, six tablespoonfuls of malted milk, one and one-half cupfuls of milk, one-half cupful of cream. Add the coffee to the malted milk, stirring until well blended, or beat with an egg beater. Add a pinch of salt and sugar, if needed. Chill, add milk and cream and serve with ice as a cold drink, or heated, for a hot stimulating drink.

Coffee Sirup.—Make two cupfuls of extra strong coffee, add after straining, three and one-half pounds of sugar, boil three minutes, then bottle. Seal and keep in a cool place. This sirup may be used in various ways.

Coffee Egg Nog.—Take three tablespoonfuls of the coffee sirup, three-fourths cupful of rich milk, one egg yolk and white, beaten separately. Vanilla, if wished. Add coffee sirup to milk, then beaten egg yolk, a pinch of salt, fold in the stiffly-beaten white, chill and serve.

Nellie Maxwell

Traffic cop gets summons

Even he can't get away with it

"DON'T try to put anything over on Nature," is the way a cop would express it. "Sooner or later she'll get you. Give you a ticket and lay you up in a place where you'd rather not be. Even cops can't get away with it. Like everyone else, if they don't pay attention to the warnings they get a summons that lands them in the doctor's office."

"What the doctor advises is Nujol. Says Nujol will regulate you just like you regulate traffic. Keep things from getting in a jam. And the doctor is right. Just ask the healthiest men on the force. If they need Nujol—with all the exercise they get—what about the fellows that roll by in their cars?"

"Just take a tip from me. You may have the best intentions in the world. But everybody gets tied up at times. Nature can't always take care of things without help."

"Our Medical Chief tells me that Nujol isn't a medicine. It contains absolutely nothing in the way of medicine or drugs. It's simply a pure natural substance (perfected by the Nujol Laboratories, 2 Park Avenue, New York), that keeps things func-

tioning at all times as Nature intends them to. Normally, Regularly. It not only keeps an excess of body poisons from forming (we all have them), but aids in their removal."

Start Nujol today. It won't cost you much—not more than the price of some smokes. Worth a try, isn't it?

You'll find Nujol at all drugstores. Sold only in sealed packages. Get some on your way home today.

Why Not A Factory Here?

The story in last week's Herald of the manufacturing of airplanes in Collierville created much talk and speculation. Many comments were heard and already our people are showing much interest in the project. Why not a factory in Collierville? Why not several factories, assembling plants and other industries? We offer an ideal location for almost any kind of a plant. We have plenty of space, electricity, water, railroad facilities, location, in fact almost any industry could find a profitable location here. How much money goes from the South to the North each year for manufactured articles that could be produced in the South?

We believe with the proper co-operation industries could be interested in Collierville as a location and it would mean much to our town. The Dairy Industry is well started, growing rapidly and paying well. Poultry is being made to pay also. These two industries have added much to income of this section during the past two years. Now let's go after more industries.

A factory here for manufacturing airplanes would mean a weekly pay roll. The bringing of more families here to live. Bringing the town into prominence throughout the United States.

And all these things can be brought about by Co-operation. There is something for everyone to do and by everyone during his part the task is made lighter and the seemingly impossible thing becomes possible.

Letters to the Editor

Dear Mr. Editor,
Your indulgence tempts me to offer another letter for your columns. May I say that I have experienced a definite shaping of an idea and it is this, that a newspaper man must have a genuine love for his fellowmen and must commit himself to their service.
This might suggest self-denial but it is not. Rather it is responding to the urge to free one's self from prejudice and get in line for loving service. When we think of the march of progress and improvement that ought to be brought about and that are so dependent on good will and Co-operation, we get some idea of the good influence a newspaper may have. Then each week's paper may carry to your reader, messages of hope and good cheer. There are always a number of fellows who are not making the success they might, if they realized that the rest of us care.
Sincerely,
Reginald.

So True to Life

Many a woman who marries in hopes that her ship will come in gets nothing but a raft of kids.—Pathfinder Magazine.

Only One Bird Condemned

Practically all birds do more good than harm, or no harm at all, but according to the United States Department of Agriculture there is one really bad actor with feathers. This is the bob-tailed grackle of the southeastern United States.

Birthplace of Icebergs

The source of probably all the icebergs of the Arctic and sub-Arctic is Greenland. Most of the icebergs are formed on the western slope and are larger than those that are formed on the eastern slope. They drift across the entrance of Baffin bay and Davis strait to the Labrador coast. Here they are caught by the Labrador current and drift slowly southward.

Plenty of ICE

KEEPS FOOD GOOD

It is Real Economy to use plenty of ice during the summer to protect your food stuffs.

HAVE YOU TRIED "STANDARD" improved GASOLINE

IF YOU are using straight gasoline in your car and not a premium fuel, there is a treat in store for you in the way of improved performance from your car at no added cost.

Drive to the nearest "Standard" Dealer and have your tank filled with "Standard" improved Gasoline. When that is gone, try another tankful and we believe you will see a marked improvement in the performance of your car—in the way it starts; in the pick-up; in the power and speed it develops; in the quietness with which it runs; in the reduction of vibration and fuel knocks.

Although specially improved to get better performance from the modern, high-speed, high-compression motors, "Standard" improved Gasoline gets better performance from all cars—old and new. There is no "bunk" about it. Give it a trial—no premium.

"Standard" Motor Oil makes motors run smoother and costs run lower. These two companion products—"Standard" improved Gasoline and "Standard" Motor Oil—are hard to beat for efficiency and value.

Right
Lives of many great men remind us Now we stop to think of it. We should never leave behind us Letters we should not have ritt!

High Criticism
"How do you like the show, Gabe?" a village loafer who had dropped in at a rehearsal for a home talent performance was asked.
"Well," was the reply, "if I wasn't sittin' down, I'd feel like I was wastin' time."—Associated Magazine.

A Fair Warning
Miss Oblivious—If I should lose all my money would you love me just the same?
Seadhunter—Just the same, my dear. Only I'd be so busy earning my living you wouldn't be able to notice it.

We Moderns
"Do stop for tea, Mrs. Browne. You've had such a hard day visiting."
"Sorry, I have just one more call to make, then I'm through, I'm going to drop in at my husband's, then go home!"—Boston Transcript.

Lava Takes Long to Cool
Small lava streams no more than 15 or 20 feet thick are said to require a year to cool.

Growena made the difference!

LAST year there were pullets that hadn't laid an egg up to January—nothing more than profit takers. There were others that averaged 45 eggs—in every way profit making. Growena made the difference. This year feed your pullets Growena and Intermediate Hen Chow to get them fit for the job. You'll get the extra 45 eggs per pullet while others are still paying out good money for the so-called "just as good" feeds. Order Growena and Intermediate now. Feed to get the extra 45 eggs. You'll be money ahead!
