City Water Tests

**Exceptionally Pure** 

G W Lurry of the County Health Department was here Monday securing samples of the City water for testing. Once a month, he makes a test of all plants in the County and he says that for the past three years, Collierville City water has never shown lower than 5 Bacteria per CC, which places it in the "exceptionally pure' class. These tests are made by Mr Fulton, State Sanitary Engineer, who also highly commends the city on the water plant. Every effort is made to keep the plant equipment in the best of shape and attention is given to keeping the well and pump clean.

#### Making New Rate Map

M T Earhard of Memphis, who is with the Samborn Map Co., of New York, is here this week making a new City Insurance Map, giving the location and location of water lines. etc. This map will be used by the State Fire Board in figuring the insur ance rates.

Foreign Language Study

Of all students enrolled in about 17,000 high schools in 1928, 43.2 per cent was studying English; 24.7 per cent studying Latin; 15.3 per cent, French; 9.4 per cent, Spanish; 2 per cent, German. In 1922, and 79.5 per cent studied English; while 29.5 per cent studied Latin; 16.8 per cent, French; 11.3 per cent, Spanish; 6 per cent, German.

One can sometimes dodge a coming event by observing Its shadow.

#### LIGHTS BY GRANT of NEW YORK

Rewards

Recently I read that a Chicago gunman has been linked with so many murders that rewards for his capture total \$100,000. There are probably hundreds of detectives who make a profession of going after reward cases who are now on his trail. But some one else may capture him-a traffic policeman might arrest him for speeding, for example. And if this happens and the traffic policeman doesn't know about the rewards, he is out of luck. He might hear about the prize afterward, but in most states he could not bring suit to get the money. Not long ago in New York a taxicab chauffeur found what he thought was a string of imitation pearls. As a matter of routine he turned the pearls over to his employers, and they found the owner. The string was worth \$50,000, and a reward of \$5,000 had been posted. Since the chauffeur made no claim at the time he turned them in, he had no legal right to the \$5,000. But the overjoyed owner gave it to him anyway.

Exit Shoestringers

The Wall Street crash accomplished one good thing at any rate. It drove to cover dozens of shoestring theatrical producers. These gentlemen, for the most part inexpert in the ways of the stage, rely upon "angels" to put up the money for their ventures. They are called shoestringers, but often they spend huge amounts of some one else's money. In the old days a cloak-and-suiter felt rich enough to take a flier at the stage. But now he has retrenched, and Broadway is slightly safer for the real producers. But only slightly. It's an off season, and many real producers are taking vacations.

#### Wisecrack

There is, as is usual each season. one of those half-whimsical, halfdramatic A. A. Milne plays at the tiny Charles Hopkins theater. This time it is about two very nice people, one of whom commits bigamy. All Milne people are very nice, from Winnie the Pooh on up, and the bigamy in this case is quite the right thing to do. But I am digressing. What I wanted to tell about is a line that amused me. Edith Barrett, the wife, is trying to get the attention of Henry Hull, the husband, who is reading a book. Finally she asks:
"Is that one of those books that,

once you have picked it up, you cannot put it down?"

"No," replied Hull, "It is one of those books you cannot pick up, once you have put it down."

#### Wrong Book

The new Theatre Guild play, "Meteor," tried out in Boston recently, with Alfred Lunt and Lynn Fontanne in the principal roles. The business of the play calls for the use of a first edition of a very rare old book. To get a copy was out of the question, so another very old book was used. One day the company received a package and a letter from a Boston bookseller. The letter explained that the writer had seen the play, and had noted that the book being used did not look like the first edition of the work it was supposed to be. "It is the wrong size," he wrote. "I am sending you another old book whose general appearance and size are closer to the original."

#### New Poor

The recent stock market crash has put on the lists of charity organizations persons who never before had dreamed that they might be objects of charity. But a wrong slant on the situation might be got from a cartoon I saw recently, depicting a man accepting alms from a woman. "Poor fellow," said the benefactress. "Stock market, I suppose?" "No," replied the object of charity, "I was always a bum." The persons who are now asking for help are not investors and former big men of Wall Street, but such folk as artists who have !ost their commissions, servants who have been let out, tutors and music teachers and the like. The family that has suffered in Wall Street goes on an economy program, and the retrenchment affects the birelings. (@ by the Bell Syndicate, Inc.)

Spare Parts for Dogs

London.-The days when faithful dog friends, overtaken by infirmity, had to be taken to execution, have passed, according to the organizers of the National Dog show here. They state that dogs can now be fitted with artificial limbs, glass eyes and false

#### \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Baby Drowns Sailing Toy Boat in Bathtub

Washington. - Seventeen month-old Frank Edward Donelan's desire for more water in the bathtub in which to float his miniature sailboat caused his death. The child was found submerged in nearly a foot of water by his mother, Mrs. Melba B. Donelan, after sounds of the baby's play had ceased. The fire department rescue squad and emergency nospital physicians worked over the body for nearly an hour before Dr. M. L. Heiges pronounced the child

#### NABBED FOR MURDER AFTER 4-YEAR HUNT

Cappello Accused of Wanton Killing in Holdup.

Cambridge, Mass.-After more than four years of searching the law has reached out and fallen heavily on the shoulder of Jerry Cappello, twentyfour, of East Boston, charged with the murder of Edward C. Ross, bank messenger, at the Ward Baking company plant here in 1925.

Cappello is charged with first degree murder, for the same crime for which Jerry Gedzium, "Jerry the Pole," was electrocuted on February 28, 1928. A third man arrested in the case, Louis Lacedra, was released because of insufficient evidence.

Cappello's arrest was due to the lertness of Patrolmen Hannebury and Louisinki, who took him into custody in front of his home.

For four years the Cambridge police have been searching for Cappello, making several trips to Maine, New Hampshire and Vermont on the case during the last four years.

#### Engaged in Rum Running.

It was known in police circles that Cappello was running liquor from Canada, a fact which he admitted when arrested, and several traps were set in tiny towns near the Canadian

At one time, about a year ago, po lice lying in ambush nearly arrested Cappello at Newport, Vt., but he got away. During the last four years he has shown an uncanny knowledge of where police traps were set and circled around them.

At intervals he would make visits to East Boston haunts, where he was a familiar figure before the Cambridge murder. The police, knowing of these visits, but never being able to be at the right place at the right time, were outwitted until Cappello walked into the trap.

#### Cold Blooded Killing.

The murder of the bank messenger and theft of the \$10,000 pay roll in front of the Ward Baking company on Albany street, was one of a long series of similar crimes that terrorized Cambridge during 1924 and 1925.

· It was a needless and particularly coldblooded killing. Ross/ was at the wheel of the bank car as it drew up in front of the baking company with the weekly pay roll.

As it stopped three men stepped up with leveled guns snarling, "Put 'em up! Put 'em up!" As they spoke they opened fire and young Ross crumpled over the wheel with a bullet in his head and another in his lung.

The bandits ran to a fast car and sped away with the pay roll, amounting to \$10,275.24, which they had wrenched from Rufus A. Johnson and William H. O'Toole, bank guards.

The bandits made a clean getaway, but several witnesses got a good look at them before they disappeared. It was on the testimony of those witnesses that Jerry Gedzium, known as Jerry the Pole, was later sent to the electric chair.

#### Canada Leads World

in Production of Nickel Ottawa, Ont,-Canada is the "little giant" among the world's producing

nations. Although possessing only about onehalf of one per cent of the world's population, the Dominion produces

many important commodities in large quantities.

Canada produces 90 per cent of the world's nickel supply and 15 per cent of the world's wood pulp. Canada gives the world about 10 per cent of Its oats, 9 per cent of its wheat, and nearly 10 per cent of its gold and silver.

More than 16 per cent of the world's known coal resources are located in Canada. It has greater asbestos and nickel deposits than any other country in the world, and ranks third in the production of gold. The Dominion ranks eighth among the countries of the world as a producer of cheese and fifth as a producer of

#### Game Wardens Puzzled, Bird Flies to Doom

Provo. Utah.-Going out and stalking the elusive pheasant is one way of obtaining a meal; sitting in your kitchen and waiting for a bird to fly in your window is another, Mrs. H. S. Pyne believes the watchful waiting act is more comfortable if not just as sure as the stalking.

She had hunted pheasants a few times, but without any luck, She sat in her kitchen and a beautiful blg male bird crashed through the window and landed at her feet. She picked up the bird, plucked it and cooked it

Game wardens were at a loss how to deal with the case, as the bird was obtained out of season. None of the state laws, however, provide for the treatment of birds who crash through one's window

#### Man Carries Piece of Wire in Eye for 10 Years

Lewiston, Idaho.—An operation un-der the right eyeball of Frank Horak, disclosed a bit of wire that had been embedded there for ten years. Horak lost the sight of his right eye when struck by a wire whip ten years ago. He thought the injury had developed a tamor, and recently the spot started paining him. The operation and discovery followed.

#### TRY TO DISCOVER EFFECT OF RADIUM

Health Bureau Makes Study of Factory Workers.

Washington, D. C .- Studies to determine the effects upon workers of exposure to radium rays have been extended to the Midwest by the United States public health service.

More than 200 women clock factory employees in the vicinity of New York already have been examined by scientific investigators of the service.

Using especially developed apparatus, the investigators have subjected each worker to a searching examination that is expected after X-ray plates have been developed to disclose the slightest trace of radium.

It will require several months, Dr. L. R. Thompson, who is directing the inquiry for the health service, said, to complete study of the plates ob-tained by the field workers and prepare the results of their study for publication.

The study is the most exhaustive ever undertaken to determine how radium rays affect workers who come into intimate contact with them. Five New Jersey women and a number of workers elsewhere have been stricken after exposure to radium rays in clock factories and several deaths have resulted.

Doctor Thompson explained the health service has decided to expand its inquiry to Illinois in order to obtain data that will be as complete as possible. Results of the survey are expected to be of invaluable aid to science in the future.

Women workers in clock factories whom the investigation discloses to be infected with the penetrating radium rays will be removed to other employment.

Results of the study are expected also to clarify the dispute between scientists over whether radium rays are harmful.

#### Mexican Slain in Fight Over Fifty Cent Fee

Tia Juana, Mex.—Fifty cents caused the slaying of Francisco Guzman, operator of a picnic park near here, the wounding of his wife and the severe beating of their three-month-old baby.

Two men and an attractive woman started to drive from the park without paying the usual 50 cent fee after being there several hours and drinking a keg of beer.

Guzman and one of the men came to blows in the resulting argument. While they were fighting, the second man shot Guzman to death and wounded his wife in the leg. The baby in Mrs. Guzman's arms was hit several times when the mother tried to force her way between the fighters.

The three, believed to be Americans, escaped over the border into California before the affray became known.

#### Vigilante Will Permit Robbers to Go Own Way

Fond du Lac, Wis.-The Fond du Lac vigilantes organization which protects banks from roving gangsters is short one member of its original quota. When roll call was taken at the first mobilization and inspection, the absent member sent the following note

to the commanding officer: "My wife said I should leave guns alone and let bank robbers do their molesting, if any, without interference on my part. Furthermore, the good woman says that the place for

a home loving husband is at home,

not cavorting around the country looking for these bank robbers." His resignation was accepted.

#### Chinese Counterfeiters

Caught Making U. S. Coins Peiping.—The Chinese police have discovered a gang of Chinese coun-terfeiters here who were engaged in manufacturing American gold coins. Four of the leaders have been arrested, and their apparatus confiscated. The police state that the counterfeit coins were not good enough to deceive Americans, but that a number of them had been passed successfully upon Chinese banks and exchange shops.

#### Life Insurance Popular

Ottawa, Ont. - Canadians carry more life insurance than any other people in the world with the single exception of residents of the United States. Approximately \$650 worth of insurance is carried for every man, woman and child in the Dominion as against \$750 per head of population in the United States.

#### Timber Wolf Becomes Pal of Michigan Man

, Traverse City, Mich.—Mark Craw, Traverse City conserva-tion officer, has successfully tamed a young timber wolf.

The wolf, taken by Craw while a pup and nursed from a bottle, answers his master's call like a dog, and follows him about the house. It eats meat from a platter, and is glad to accept the warmth and com-fort of a pillow. Also, it is

Man has never been fortunate in his experiment with the wolf, and Craw is wondering whether his pet will prove the exception to the rule, or revert to type when it becomes older.

#### "Lucile is the Happiest Girl"

So many mothers nowadays talk about giving their children fruit jnices, as if this were a new discovery. As a matter of fact, for over fifty years, mothers have

been accomplishing results far surpassing anything you can secure from home prepared fruit juices, by using pure, wholesome Cali-fornia Fig Syrup, which is prepared under the most exacting laboratory supervision from ripe California Figs, richest of all fruits in laxative and nourishing properties.

It's marvelous to see how billous, weak, feverish, sallow, constipated, under-nourished children respond to its gentle influence; how their breath clears up, color flames in their cheeks, and they become sturdy, playful, energetic again. A Western mother, Mrs. H. J. Stoll, Valley P. O., Nebraska, says: "My little daughter, Roma Lucile, was constipated from babyhood. I became worried about her and decided to give her some California Fig Syrup. It stopped her constipation quick; and the way it improved her color and made her pick up made me realize how run-down she had been. She is so sturdy and well now, and always in such good humor that neighbors say she's the happlest girl in the West."

Like all good things, California Fig Syrup is imitated, but you can always get the genuine by looking for the name "California" on the carton.

#### Long Life on the Farm

Remarkable longevity was disclosed at the recent dinner of the Williton (England) Agricultural association. Benjamin Boalch, who headed the list of aged farm hands, was eighty-six. the other winners were eighty-five and eighty-four. All the nine entrants in the class for aged women were eighty years or more. Harriet Milton, the first prize winner, was eightyseven and one-half, and the youngest aspirant was eighty-one. The ages of the nine totaled seven hundred and fifty years.

No less a creature than Europe was going to give a great parade in honor of his guest David from the other

the Grand Stand.

make remarks about the marvelous parade that is to take place, and sometimes I will join in, too, and march with the others, coming back to the grand

stand every so of-

side of the water.

time," Europe con-

stand before the

grand stand and

"Most of the

they

shall

David was so relieved to hear that be explained to him. He would have hated it if Europe had said he was going to ask him to point out what

and whom he recognized. "I feel I should be everywhere, you know-considering I'm the Continent of Europe."

"I should say so," nodded David. "We shall call this pageant the great European parade. And it is a wonder and a marvel that such a parade could be produced on this

"But come, take your place in the grand stand."

It was situated not very far away from a part marked Cornish Coast, and in the distance he could see old fishermen, and he wished that at some time he could hear them tell stories. He felt they would be good story tellers. He was glad that in the Magic Map all the map places were marked with signs and he was glad, too, that it was all comfortably reduced in size so that it was not impossible to get about.

"There is so much to be seen on my continent," Europe told David, "and we're such a busy continent with so many countries and people, that we decided to get up as fine a parade as

we could for you.

The rivers, such as the Rhine of Germany, the Volga of Russia, which ends up with a final splash into the Casplan Sea off Asia way, and the Black Sea to the south of Russia, and the Baltic Sea, east of Sweden, and the North Sea, east of these British Isles, and the Bay of Biscay, west of France, together with the lakes and other bodies of water will not even be represented in this march.

They all sent word that if they sent anyone to represent them it might be very apt to put a damper on the parade."

"Rain is never nice on circus day,"

David remarked, "so I don't suppose Vapor will come either.

'Oh! I hear music again!" "Yes, the parade is starting."

"Are you sure they'll come this

know the line of march?"

"Perfectly certain," said Europe, "but if you have any doubts just read

David looked at an enormous sheet of paper which gave a list of all who would take part in the parade and showed them all passing in front of a grand stand which bore Da-

vid's name upon it. "There wouldn't be any chance they might change their route and go up another street -or rather another country, 18 there?" David asked.

"Not the slight-Looked at est," said Europe. **Enormous Sheet** "But just before of Paper. they get here I

must tell you where I got my suit. "When I was thinking about my costume all the countries wanted to help and they each sent a costume of different colors just as you see them in different colors on the map. I didn't want to hurt anyone's feelings so I got an enormous pair of scissors and cut up the costumes and took a little bit from each and patched together a suit for myself."

#### She Doesn't Know Yet

A mother was awakened one morn ing by her four-year-old daughter who kept calling insistently, "Mommie! Mommie!'

"What is it, dear?" she asked. "Mommie, I got to know something."

"Go to sleep," said her mother. "It's much too early to wake up." "But, mommie," persisted her daugh-

ter, "I must know, "Well," she said at last, "what must you know?"

"Mommie, I must know how does a snake sit down?"

#### Dame Fashion **Smiles** By Grace Jewett Austin

It used to be considered in school work for children the "three r's"-reading, riting and

f's" to consider-Grace J. Austin. face, form and "frizzes." The last is not a specially poetic name for hair-but it is the

only one to fit the "f" plan. Of them all, the "frizzes," or the color of the hair, and the color of the eyes have been supposed for years to set the keynote for things to be worn or let severely alone. The red-haired woman is almost sure to look her best in green, and so is in quite good luck this year. The pure blondes in pastels, which are especially emphasized in southern wear; the brown-haired in nearly every shade but gray, and the real brunette in black and gold creations find their best charm.

There is a little secret about the uneven hemline. Dame Fashion has just learned it, but it seems, highly reasonable. It is said to give illusion and rhythm in addition to being more becoming than a straight-around ankle-length gown. The uneven hemline takes away that flutter of anxious thought with which many a woman has stood on tiptoe before her mirror, questioning, "Does my dress hang straight?"

Dame Fashion not so long ago had an opportunity for observing the gowns of about 600 women who had assembled from all quarters of a large state at its capital, to spend two days in a civic and semi-political convention. In their business sessions there were many ensemble suits to be seen, with three-quarter length coats, often heavily trimmed with fur.

The governor's wife received these women at the executive mansion with an evening reception. Among the company in general, black evening gowns predominated, followed in number by red ones, and then by gold or golden tan. Lace was a favorite material, and was more in evidence than velvet. The hostess received in a gown of gold brocade, with four inset flares in the long skirt, which had a pronouncedly uneven hemline.

One of the noted political women present, holding an office in congress, wore eggshell satin and lace, studded with pearl trimming and rhinestones. The president of the convention wore a long black Tace gown, with pearls as jewels, while a national committee woman, most strikingly gowned of all, wore an evening ensemble of cloth of gold, having wide flares inset at both sides of the skirt, and her three-quarter cape of the ensemble edged with

But after all, most of us are more interested in pretty wear for the home kitchen than for a governor's drawing room. Not so many mornings ago when the day was exceedingly gray and cheerless, Dame Fashion saw a young woman come out to sweep her front walk. She wore a smock that was simply glorious for its mixed designs in brilliant color, modernistic or Chinese or whatever it may have been. It gave such a thrill of pleasure just to see it for a moment. Artists were the first to adopt the smock-but how about it? Isn't nearly every girl and women in these days an artist in life? (C. 1930, Western Newspaper Union.)

#### An Ensemble of Tweed Is Approved by Paris

Showing a dressy ensemble in gray and mauve flecked tweed, a recent arrival from Paris. The feminine blouse and soft gray fur are practical as well as elegant,

#### Pajama Ensemble

One of the smartest of the new pajuma ensembles is a two piece affair in cut velvet of chartreuse green. The trousers are of green crepe, bordered in printed georgette, as in the coat, which is cut on princess lines.

#### Cut-Out on New Lines Is Chic and Practical

Hera is one of those little frocks that will wear and wear and wear for it has several good points, both smart and practical, says the fashion editor in Woman's Home Companion. First it emphasizes the new silhouette (but so conservatively that even the far from slender woman need not be afraid to try it), the long uneven skirt with side fullness, the smart point at the waist which comes from the normal line, the becomingly feminine cowl collar. Then if made in a dull flat crepe material it will go smartly to a Sunday night supper party or to the office. Black, brown or wine red would be very smart

#### Gay Wool Stockings Are Smart for Sports Wear

The question of what type hose to wear with the longer skirt is considered an important one, and the usual feeling is that the long lines should not be broken by a sharp contrast in hosiery, says a fashion writer in the Kansas City Star. Smart shops report interest in novelty silk and woot and silk and lisle hose for winter. these being especially well liked to complete a woolen costume, even one consisting of a light weight woolen frock.

For severe winter the gay wool sock is stanchly advocated as an appropriete accessory to the sports costume.

Those planning a wardrobe for southern wear manifest interest in complexion tints, bordering of course on suntan tones since it is reasonably certain that the sun cult will continue. Rumors of a tendency to econ omize in stockings now that long skirts make them a less conspicuous feature detail of the costume, are rife. The demand continues, however, for sheer silks or for the aforesaid novelties which, by no means, represent

saving in the initial cost at least. From Paris also comes the report that higher instep effects are conspicuous among the newer footwear offerings. Satin finished crepe is of fered in a wide variety of lovely colors. Most showings include models made of contrasting kids, lizard be ing still in high favor.

The preference for related shoes and handbags continues. For south ern wear fabrics are being cleverly introduced alone or with kid. Linen and crepe de chine, moire and brocade are among the best liked fabrics while stitching makes an unusual and often attractive decorative detail.

The formal town season finds the evening ensemble, with jacket of slightly longer coat, very much in the ascendency. Such costumes are lavishly trimmed with flattering fur and are fashioned of transparent velvet. panne, metal cloth or some of the heavier silks, such as faille or moire. There is a strong preference shown for the coarse fish net gown, this being especially well liked in black, a type of frock which, when boasting long sleeves, is termed the Sunday night frock.

#### Nets Coarse in Texture Used for Evening Wear

Lacy nets coarse in texture are seen in numerous versions of evening dresses having long sleeves, so designed for occasions when formal clothes are not de rigueur.

A shade such as russet is very attractive in this open mesh net, worn over a selftoned slip. Hemlines show a trene toward the even rather than irregular, the skirt considerably lengthened all around. Jersey net is included among the various types of net present in the mode for formal evening gowns in all black.

#### An Evening Turban Is Cap in Dull Gold Lace

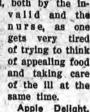

A successor to the turban of chiffon is a draped cap of dull gold lace with ends that may be wound about the head and tied as one finds most becoming. This fetching little evening accessory complements the long molder gowns and is smart with a fur or furred evening wrap.

## The KITCHEN CABINET

I do not own an inch of land,
But all I see is mine—
The orchard and the mowing-fields,
The lawns and gardens fine.
And, more magnificent than all,
My window keeps for me
A glimpse of blue immensity—
A little strip of sea.
—Lucy Larcom.

THIS AND THAT

A dainty dish to serve an invalid is always appreciated, both by the in-

-Peel and core an apple and cut it into eighths, stew until tender in a cupful of water to which has been added a pinch of salt and sugar to taste. Soften one teaspoonful of gelatin in four teaspoonfuls of cold water, add four teaspoonfuls of hot water and stir until the gelatin is dissolved. Add one teaspoonful of grapefruit juice, two tablespoonfuls of the sirup in which the apple was cooked. Place the apple in a cup and pour the prepared gelatin over it. Serve well chilled with whipped cream.

Jaune Mange.-Soften one tablespoonful of gelatin in a cupful of cold water. When softened add the juice of an orange, the yolks of two wellbeaten eggs and a tablespoonful of lemon juice. Sweeten and strain. Place over hot water and stir until the mixture becomes hot. Cool, turn into a mold and set on ice.

Chicken broth, beef or any other neat stock when jellied makes a most igreeable change of food for the ill. It may be served in cubes with a simple salad dressing on lettuce, for the convalescent, or plain for those who are quite ill.

Standing Custard.—Soften one tablespoonful of gelatin in two tablespoonfuls of cold milk. Scald one cupful of milk in a double boiler, add one beaten egg and cook until thick. Pour this custard over the softened gelatin and add sugar and flavor to taste. Pour into a small mold and chill. Serve plain or with a fruit sauce.

Eggs and Shrimps.—Prepare four hard-cooked eggs. Take one and onehalf cupfuls of shrings, one-fourth cupful of stuffed olives and four rounds of toast nicely browned. Prepare a white sauce using two table spoonfuls each of butter and flour one-half teaspoonful of salt, one cupful of milk, and a few dashes of cayenne. Cook until smooth, then add the shrimps cut into halves and the olives in slices, the egg whites in shreds. Place on the toast and top with the egg yolks forced through a sieve. Serve hot.

#### A Few Tasty Dishes.

Some one has discovered that adding a bit of vinegar, about one teaspoonful, to a pea

or bean soup that seems, too thin, thickens it at once of vinegar. Croquettes are se

much better if they are soft and creamy when served. By adding a teaspoonful of

softened gelatin to the mixture before cooling it stiffens them enough to handle, and when cooked are creamy. Dutch Sauce for Fish .- Take one cupful of liquid in which boiled fish has been cooked, add one cupful of milk. Melt two tablespoonfuls

butter, add two tablespoonfuls of flour, the liquid after the flour and butter has been mixed, a teaspoonful of lemon juice, one-half teaspoonful of salt and the lightly beaten yolks of the eggs carefully added. Fold in the stiffly beaten whites of the eggs after taking from the heat. Add a little minced parsley, if desired. Herring Baked in Paper.-Use a paper bag prepared expressly for cook-

ing or a buttered letter paper. Soak the smoked herring overnight in cold water, after removing the heads and tails. Dry well and place in bag or wrap closely in the buttered paper Place in a hot oven and bake until a nice brown. Serve in the paper.

Baked Bean Salad .- Take two cupfuls of baked beans, three-fourths cupful of diced celery and two tablespoonfuls of sour pickles finely chopped. Serve with french dressing, using three tablespoonfuls of oil to one of vinegar, two tablespoonfuls of catsup and one-fourth teaspoonful of salt. Chill and serve with strips of hard-cooked egg whites.

Lima beans make another good salad, adding celery, a little minced onion and the same dressing as above. Sprinkle with capers when serving.

Luncheon Dish .- Remove the sar dines from the box neatly and entirely (if possible). Place on a platter and surround with water cress or parsley. Cut radishes into tulips with a sharp knife, rolling back the petals to make them look like the flower. Arrange these in the cress or parsley and serve with the sardines.

The southern custom of serving a demi tasse of strong coffee, accompanied by sugar to guests in the house before they come down for breakfast, is one that is being taken up by hotels and dining car service.

Nellie Maxwell

upsets of Children

upsets. They come at unexpected times. They seem twice as serious in the dead of night. But there's one form of comfort on which a colic, or diarrhea, yields to the soothing influence of Castoria. Keep Castoria in mind, and keep mother can always rely; good old a bottle in the house—always. Give a few drops to any child Castoria. This pure vegetable preparation can't harm the tiniest infant. Yet mild as it is, it soothes a restless, fretful baby like nothing whose tongue is coated, or whose breath is bad. Continue with Castoria until the child is grown!

## Any Co

That cold may lead to something serious, if neglected. The time to do something for it is now. Don't wait until it develops into bronchitis. Take two or three tablets of Bayer Aspirin as soon as you feel a cold coming on. Or as soon as possible after it starts. Bayer Aspirin will head off or relieve the aching and feverish feeling-will stop the headache. And if your throat is affected, dissolve two or three tablets in a quarter-glassful of warm water, and gargle. This quickly soothes a sore throat and reduces inflammation and infection. Read proven directions for neuralgia, for rheumatism and other aches and pains. Genuine Bayer Aspirin is harmless to the heart.

## On the **Funny** Side

#### LITERAL TRUTH

Theatrical agents sometimes have to be rather cruel. One day a some what daded woman called to apply for the position of chorus girl. "Sorry," said the agent, tactfully;

"you're too late." The applicant burst out in abuse, ending with, "I don't believe I'm too late at all."

"Oh, yes, you are," said the agent, "About fifteen years."

#### Socks Don't Fit

"My wife and daughter have gone in for this darnfool ankle sock fad, but I have one consolation," remarked the married man.

"Yeah? What's that?" asked his bachelor friend. "My socks are too large and too full

of holes for them to ever want to swipe," he replied.

#### Lot in Their Favor

Blinks-How are you going to like your new neighbors?

Jinks-All right, I think. My wife watched the moving vans unload and there wasn't a sign of a plano, radio, phonograph or a saxophone case among their belongings.

#### COOKBOOK FOR 2 NEEDED

Young Husband-Emma, the food doesn't taste right. Why don't you make use of the cookbook I gave you yesterday?

Young Wife-My dear boy! I can't do that. You see, there are only the two of us and all the dishes described are calculated to serve six persons.

#### Cling to Old Customs

The language spoken in the Chan nel islands is not modern French, but a dialect of Norman-French, which varies from one Island to another There are many curious survivals of feudal customs and ceremonles of government, which are proudly and carefully observed. The Islands have their own flag, the flag of Normandy. with three lions in white and scar-

#### Most Costly Bible

With its cover encrusted with diamonds and emeralds, a Bible recently offered for sale in London is stated to be the most costly in the world. It came from the Russian imperial palace at Tsarskoye Selo.

#### There Are Others

## Thoughtfulness Always Helps

Consider your mail carrier. Redn or shine, he must make his daily rounds and deliver mail at the door of his patrons. His bur-den, during this season of bad roads and rainy weather, is unusally beavy and patrons can do many things to lighten his load, See that your mail bux is conveniently placed so that he can deliver your mail from his car and should the road man fall to do score that the road leading to your mail box is kept in good the most accommodating people we know, Taey are paid for their services, of course, but do much more than they are paid for.

Colored Industrial Jr. High School Notes By M A Sloan

The following men and boys nummoo ruo ni erenniw edi erew ity cotton growing contest 1929:

Name	Acres in Test	Yield per Ac
Juo Spears	3	1450 lbs
Arthur Craig	g 4	1377
J 8 Fowler	8	1288
E Bills	3 _	1270
Earnest Gree	n 5	1146
	Boys	
Robert Scott	1	1963
Luther Crai	g 1	1634
Bob Lee Craven 1		1605
Robert Malone 1		1450
Frazier Humphrey 1		1398

The above figures plainly show the value of improved practices over the old way of growing cotton. Land that will not make 800 pounds of seed ootton should not be planted in cotton.

#### Strictly American Foods

Maize or Indian corn, a certain type of pear, and a small variety of tomato are regarded as the foods originally found in and indigenous to Amer-

#### Complicated Relations

The marriage of a young man to his grandmother is reported from Zwolle, Holland. In a second marriage a man married a girl of twenty whose mother was forty-five. By his first marriage this man had a son, and this son fell in love with and married the mother of his father's second wife. The son thus not only becomes the husband of his step-grandmother, but also stepfather to his own father.

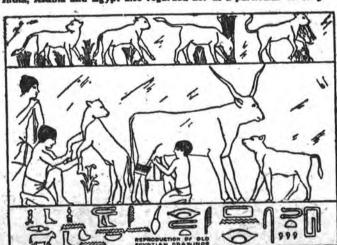

#### Not Rice-Eating Nation

Rice-enting Chinese are limited to only certain parts of China. In large portions of the republic the people hardly know what rice is. The National Geographic society estimates that at least 150,000,000 people in China depend upon wheat as their chief food. North China, especially Manchuria, is one of the world's great wheat sections.

### AKE BETTER CROPS

The coming year rounds out an even century since the first use of Chilean Nitrate of Soda in the

Andrew Jackson, famous "Old Elickery", of Tennessee, was President of the United States in 1830 when the first carge of this altreges fertilism errived by sailing vessel from far-off Chile. That was years before we had the telephone, the telegraph.

TO-DAY—On sheer merit alone ... strict-ly on the basis of the good it has done, Chilean Nitrate to-day is the standard nitrogen fertilizer. Last year more than \$00,000 farmers used it to make more money from their erops. Every cotton champion in the South . . . and every corn champion . . . made his winning erop with Chilean Nitrate.

For nearly half a century, Experiment Stations have proved the value of Chilean Nitrate. In Pennsylvania, for instance, experiments have been conducted continuously since 18811 The success obtained by farmers who use it, leads many more each year to follow their example. Chilean Missets pays back its small cost many times over.

Do not confuse Chilean Nitrate with other fortilizers. It is the world's only natural aftrace nitrogen. Not synthetic, but the real thing, mined and refined in Chile and nowhere else. It will pay you to insist on Chilean Mitrate. It is quick-acti food for almost every crop that grees ... pre by 100 years of use.

Our new 64-page illustrated book "How to Fer-tilize Your Crops" gives all the information year need. Free. Ask for Book No. 1 or tour out this ad and mail it with your name and address and the margin.

#### CHAPTER VIII—Continued

-15-But the sparkle had gone from their merry plans, and it was a relief when Eddy started the motor for the ride

back to town,
"Won't you come along, Alex?" invited Ginger pointedly. "We an take one more."

"Oh, no, thanks. Mirlam promised to take me in berself along about midnight. My doctor prescribed more Pay Dirt for me."

At the end of the driveway, they looked sack. Mirlam sat on the high gate, Alexander Murdock steadying her with one hand, while he swung the gate beneath her with the other. Their father smiling, waved farewell.

"Poor father," mourned Ginger.
"What would you call it but preacher's luck, to lose his eyes just when there's the most to see?"

A dull supper at the parsonage, followed by the usual evening service at the church.

Tub Andrews hurried up to them after the service, offering himself as an escort home-a mere formality for those few safe intervening feet.

"I don't think we ought to," objected Marjory. "You see, the minister is staying with us—and I think we ought -I don't think it would look well for us to go off and leave him-

"Ginger can take him," suggested Tub generously. "She can give him pointers on running a church-Ginger can give pointers on running anything.

"But Ginger is so young," stammered Marjory. "I feel that I am rather the bead of the house now,

Hiram Buckworth bimself appeared at that moment. "Girls, if you will excuse me," he said gravely, "I will walk over with Mr. Westbury. We are discussing some church business."

"Hurray for Jop," chimed Tub, "that suits me to a T. We've got some church business of our own to talk about."

Hiram besitated a moment, biting his lip as though he felt annoyance, but nodded at tast, and went away. not without reluctance. And Marjory yielded her smiles to Tub Andrews, clinging meanwhile to Ginger to ensure her accompaniment, as they walked slowly homeward. On the familiar old veranda. Tub started at once, cheerfully, in the direction of

"You can't stay tonight, Tub," said soften her dismissal. "I have to send you right straight nome. I have been under the weather for a day or two. and Miss Jenkins didn't want me to go to church at all. She has ordered me to bed."

Tub, complaining loudly, submitted perforce to this ejection, and sauntered away, whistling lugubriously.

Marjory still clung to ber sister's hand.

"Ginger, waft a minute. Sh! Don't let him hear you. Let's sit in the hammock a while."

They sat down, huddled together, and waited in silence until the sound of Tub's footsteps, and Tub's whistling, subsided into the darkness. "Ginger. I want to ask you something. Will you just sit here with me. and talk until-Mr. Buckworth comes home? And Ginger, if he comes over, and sits down-he always does, you knowwould you mind-would you just as You wouldn't mind, would liefyou-"

"Go to bed. you mean?" "Well you see, dinger, I want to

ask him about something."

"I see. I'm to talk my head off uncil · he gets here, and then I'm to go to bed."

Marjory squeezed her arm about her sister's waist.

"You see- Well, you see, Ginger it is like this. You remember that night when you crept downstairsnow long ago it seems!-- and he had his 4rm around me. Well, Ginger, 1 didn't care a bit because you saw it. It didn't make any difference to me. But I think it embarrassed him, or made him angry, or something, for he hasn't so much as looked at .ne since." "I see," said Ginger dully.

"I want to tell him that you-you didn't think a thing of it-a little thing like that. I think maybe be

thinks I feel tad about it."
"You don't do you?"
"No." Marjory's folce sank to a
whisper: "Not a ble I tike him." So the two girls sat, and waited. and presently from the church. heard the two men, coming slowly, taiking as they walked Marjory clung to Ginger's hand, and held her breath At the end of the flagsione path they stood for a walle before they said

and night and parted
"Y-roo talk," whispered Marjory.
Ginger talked. "I think-it's such

a stily name for a farm," seid Ginger. "Just like Eddy Jackson. Who else would do such a dumb thing? Pay Dirt. Everybody knows a farm is nothing but dirt, and if it didn't pay, nobody would farm it. Oh, hello, Mr. Buckworth, Home so soon? It's lovely tonight. Won't you come and talk to us?"

"Not tonight, thanks, I am tired. Pleasant dreams." And he passed in-

The girls sat very still for a moment. They heard him say good night to Miss Jenkins, and go up the stairs. Marjory's tense arm about Ginger's walst relaxed suddenly. Her quivering breath was more a sob than a sigh. Her shoulders rose convulsively.

"You-can go now. Thanks, Ginger. I'll sh here a minute, and listen to the night,"

Ginger went in without a word. She was a stricken soul. She climbed to the studio, and counted her store of dimes. She looked at her complicated page of multiplication and addition. She sat for a long time. figuring, thinking.

Obviously, Marjory and the richness of a wealthy husband were to be denied them as succor. Marjory was forever lost to her plans for the All the years of washing future. dishes for the sake of Marjory's hands had been in vain. All ber dreams of a romantic figure breezing mysteriously into their commonplace circle were dissipated into thin air.

"Ginger, What Do You Mean? Is Marjory Engaged, or Isn't She?"

Ginger was practical enough to admit defeat when she met it, and Marjory was her Waterloo. Marjory, beautiful peach-bloom Marjory would marry a minister, and her future would be that of catering to a Methodist church, and a parsonage minimum of three.

In that hour, Ginger Ella rose to great heights of renunciation. She relinquished ail her dreams of fortune, of fame, of social supremacy for her beautiful sister. She would be satisfied to see her merely happy. She smiled. She went down the wabbly ladder without a moment's pause, for her decision was made. She knocked at the door of her father's room, now occupied by Hiram Buckworth.

Silence prevailed within. Ginger knocked again.

"Who is it, please? Just a minute." He opened the door with one hand as he struggled into bis cont with the other. Ginger, all uninvited, stepped inside, and closed the door behind

"Mr. Buckworth," she began gently "I was just going to bed," he in terrupted rudely.

"You misunderstood what I told you," she persisted patiently. "I didn't say Marjory was engagedexactly-"

"No. You merely said it was understood."

"But I didn't mean a man. I meant money."

"Money?" He was entirely puzzled. "Yes. You see, we have always been so very hard up. Father dld not go to seminary as you did-he didn't even go to college. He only gets about as much money now after, all these years as you will get at the very start. And it takes so much for his eyes, and the furniture is simply falling to pieces, and you can see

yourself we haven't any clothes."
"Yes, I know, Ginger." he said not without sympathy. "But what has that to do with-her?"

"She is so beautiful. So we nat-

marry a millionaire. You must ad mit she's got the looks for it." "Ginger, what do you mean? Is

Marjory engaged, or isn't she?" "Not engaged-not exactly. But it was all understood-we talked it over and we all agreed-we girls did, that is, father just laughed at us-that Margie should marry money, lots of money, millions-"

"And she's not engaged to that-fat young Andrews—or snybody else—"
"Certainly not. There's no man
mixed up in it at ail. Just money."

If tooks could slay, the career of Ellen Tolliver would have ended at that moment.

"Why, you little devil!" he ejaculated trreverently, and flung her roughly out of his way. "She's still in the hammock," called

Ginger meekly. Then she went immediately to bed. She wept for a while, sufily, for it is natural that youth should abandon its dreams and its expectations of great riches with reluctance. But in the end she smiled, and stiffened her slim little shoulders beneath the white sheets. Very well, then. Plainly the future of the entire household de-

volved upon her, and her alone. "Selah," she whispered into the darkness.

#### **CHAPTER IX**

A great peace, a sort of subdued grandeur, descended upon the turbulent spirit of Ginger Ella, for she had schooled herself to accept life as it is, and mold it to her own pattern as opportunity came. That the opportunity would never come now, as concerned Marjory, she was well aware, but without resentment. After all, perhaps one had no right to attempt to mold human lives, free souls. like berself. As for Miriam and the grocery clerk, she yet had hopes Alexander Murdock was leaving on this very day, and Ginger did not for a moment believe that the sensible twin was so deeply interested as to disqualify her for interest in more intriguing figures-granted the appearance of such figures.

Get her away-that was the best method. Ginger was adjusting herself to a new impression of the sensible twin. So still she had always seemed, so subtly impenetrable, that in contrast with Mariory's radiance she had appeared more of a liability than anything else. But there was something strange about Mirlam. Ginger did not understand it. She remembered how Tub Andrews, even in the gorgeous oresence of Marjory arrayed for the beauty pageant, had succumbed to Miriam's stillness. She remembered how Alexander Murdock, a mere grocer, of course, but still no doubt possessive of the usual male inclinations, had passed over Marjory with a passing cordiality, to plant bimself immovably at the un-dancing feet of Miriam. Strange about her! Strange about everything, Ginger thought.

"The world," she concluded largely. it all gone seebee feebee. The grocers grovel to brains, and the preachers pick beauty. It's all wrong."

But perhaps when the twins found themselves away from the confining familiarities of Red Thrush, away among strangers, at the normal school -with clothes that became girls of their profession, and their looksclothes paid for from contributions to the home for the blind- But another annoying thought arose to disturb the even tenor of her plans.

At the normal school they would meet only teachers-primary teachers, teachers of geography, teachers of Latin, English and algebra. Ginger sighed. It was unfortunate, but it was the best they could manage this year-what with the operation. and the retirement on pension. Besides, it an embryonic teacher could supplant the can grocer in Mirlam's heart, no doubt a little later on, the new conqueror could also be conquered by, say, an embryonic tinan cier. She must hope for the best. As for Marjory-Marjory, whose beauty, and whose married fortune were now forever denied them, why should they, from their limited funds. provide the money to send Marjory to normal to study to be a teacher, when she would be no teacher? Why tearn pedagogy, when all her future held was the accommodation of her person to missionary societies, and ladles aids, and the minimum of three?

The finger of releatless togic pointed in another way. Let Marjory prepare herself for keeping a parsonage by keeping a parsonage-their own She could take Mirlam's place as servitor to their father, thus leaving Ginger free for her own further schooling and for the conduct of her favorite charity

#### urally decided that she had better (TO BE CONTINUED)

#### Stonehenge Mystery to Students of the Past Ancient and mysterious Stonehenge

is located some nine miles from Salis bury, and gear the little town of Amesbury, in Wiltshire, England. This circular formation of stones encloses what is commonly called the Altar stone. What its origin or purpose is time of research has not revealed, but it is obviously connected with some form of observation of the sun, possibly sun worship It is generally belleved to have been erected some 4,000 years ago, possibly by the tribe from the Continent which brought the idea of cultivation of land to England to the Bronze age. To the east of the Stone circle is the Hele stone or Friar's beel, over which at dawn on June 21—camely, at the summer sol-

stice-the sun rises when viewed from the Altur stone. Other pointed stones mark the rise of the sun at the winter solstice and sunset at midsummer. At few places in England can the thoughts run riot to such an extent as in this circle of immense stones standing in solitude overlooking Salisbury plain. Pictures of human sacrifice and heathen rites spring readily to the Imagination.

#### Record Bone

Some idea of the immense size of prehistoric roptiles can be gathered from the fact that it took stateen men to lift a bone of one discovered to

STANDARDS OF THE KINGDOM

TEXT-Matthew 5:1-48 CPTINT VV. 3-9, 17-20, 43-48).

GOLDEN TEXT—Blessed are the pure in heart for they shall see God.

PRIMARY TOPIC — How Jesus
Teaches Us to Live.

JUNIOR TOPIC—Jesus' Standard of Life and Service.

INTERMEDIATE AND SENIOR TOP-IC—Accepting and Following the High-est Ideals. YOUNG PEOPLE AND ADULT TOP-IC-A Christian According to Christ.

I. The Characteristics of the Sub-Jects of the Kingdom (vv. 1-12). These characteristics are set forth in the nine beatitudes.

1. The consciousness of spiritual poverty (v. 3).

"Poor in spirit" means to come to the end of self in a state of spiritual beggary.

2. A profound grief because of the spiritual insolvency (v. 4). The mourning here is because of the keen consciousness of guilt before a

holy God. 3. A humble submission to God's will (v. 5).

This is the outgrowth of mourning over spiritual insolvency.

4. An intense longing to conform to the laws of the kingdom (v. 6).

The one who has received the rightcousness of Christ as a free gift follows after the purity of character which expresses itself in deeds of righteousness.

5. Merciful (v. 7).

The subjects of the kingdom now take on the character of the King. Because of the mercifulness of Christ, His followers will be merciful.

6. Purity of heart (v. 8).

Since the King is absolutely pure, the subjects who enjoy fellowship with Him must have heart purity. 7. Peacemakers (v. 9).

The subjects of His kingdom not only have peace, but follow after that which makes for peace.

8. Suffering for Christ's sake (v. 10). The world hated Christ, the King; therefore those who reflect His spirit in their lives shall suffer persecution (II Tim. 3:12).

9. Suffer reproach (v. 11).

To have all manner of evil spoken against us for Christ's sake is an occasion for glorying.

II. The Responsibilities of the Sub-Jects of the Kingdom (vv. 13-16). The world is in utter darkness be-

cause of its corruption. The subjects of the kingdom are to live such lives as to purify and enlighten. Their responsibilities are set forth under the figures of salt and light. 1. Ye are the salt of the earth (v.

The properties of salt are (1) Penetrating, (2) Purifying, (3) Preserving. Since salt only preserves and purifies in the measure that it penetrates, so Christians only as they enter into the life of the world can preserve it from

decay. 2. Ye are the light of the world (v. 14).

This world is cold and dark. In this darkness the devil has set many pitfalls, and the subjects of the kingdom should so live as to prevent the unwary from stumbling. III. The Laws of the Kingdom (vv.

1. As to deeds of righteousness (v. 20). The deeds of the subjects of the kingdom must spring from Christlike natures.

20-48).

2. As to sanctity of life (vv. 21-26). The duty of the subject of the kingdom is to conserve and sustain his own life and the life of others. Rash anger is heart murder (v. 22).

3. As to organized life (vv. 27-32). The family is the unit of society. The two awful sins against the family are (1) Adultery, (2) Divorce.

4. As to oaths (vv. 33-37). Whatever is more than the simple form of affirmation or denial comes of

5. As to behavior toward those who do not recognize the laws of the king-

dom (vv. 38-48).

(1) Not revengeful (vv. 39, 40). Turning the other cheek after being smitten, means, after one insult, permit another without revenge. (2) Willingness to do more than is required (v. 41). If compelled to go one mile, go two miles with the one thus compelling you. (3) Be charitable (v. 42). Our hearts should always be open, ready to give to all. (4) Love enemies (vv. 45-48). Love to them consists in: a. Blessing them that curse us. b. Doing good to them that bate us. c. Pray-

Consciousness of Duty

ing for those who despitefully use us.

In every heart there is a consciousness of some duty or other required of it; that is the will of God. He that would be saved must get up and do that will-if it be but to sweep a room or make an apology, or pay a debt .-George MacDonald.

Entering Heaven's Gates Heaven's gates are not so highly

arched as kings' palaces; they that en-

#### \*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Why Joe Lacked Efficiency

By FRANK H. WILLIAMS Copyright.)

JOE HENDERSON fell for Minnie, along with all the rest of the boys, with a squashy thud which indicated a heart completely flattened like unto the well known and justly famous pancake.

Joe mooned around over his work in the office of the Acme Manufacturing company and filed the right papers and documents in the wrong places and the wrong papers and documents in the right places, and otherwise gummed up the works of the plant.

The general manager of the Acme company finally had it out with Joe in the inner sanctum of the managerial office.

"See here, Joe," said the manager, "you're : pretty good fellow, and you were doing well until you went balmy over this girl. Now you aren't worth the overhead involved in dusting you up and putting you in the ashcan. For the sake of double-x, dyed-in-the wool, 100 per cent efficiency why don't

you marry the girl?" "Marry the girl?" queried Joe. "Good-night! Not a chance—she can pick and choose who she wants. She'll end up by marrying some millionaire

-that's what she'll do." The manager look at Joe with a faraway, speculative look in his cold blue eyes.

"She must be a pippin!"

"You articulated something!" Joe replied soulfully. "Well," said the manager hesitantly.

"try to brace up, Joe. And I-I'll see what I can do about it." The next day when Joe was hang-

ing around in front of the Velvettex Candy factory, where Minnie was employed as a stenographer, and tipping his hat very respectfully to Minnie and hoping a miracle would happen and that she'd ride home with him in his flivver, the manager of the Acme Manufacturing company drew up to the curb near Joe in his big car.

What an impressive appearance the manager made-big, fine-looking, prosperous, and with a naughty little gleam in his eyes.

"Introduce me," urged the manager, as Minnie came smiling toward them. And introduce him Joe did.

Here was a pretty kettle of fish, a fine jar of pickles and a heck of a situation, to put it mildly. What chance in the world was there left for Joe now? He could see just exactly what was going to bappen-wedding bells would ring, his own heart would be wrung, and Minnie would be Mrs. Jennings. What a life!

Everything that transpired during the next few days seemed to bear out Joe's idea of the situation, too.

For instance, Jennings was surprised by Joe in earnest conversation with Minnie on several occasions.

How far had the affair between Minnie and Jennings gone anyway? Were they spending their evenings together? Certainly Minnie wasn't spending her evenings with Joe, because, at best, it was only once in a long while that Joe ever got up enough courage to ask her to accompany him to a movie or to the theater, and since Jennings' arrival on the scene Joe had not done one each acking

By nature Joe wasn't a snooper. But love's young fream and the greeneyed monster of jealousy had considerably diverted his normal nature

from its accustomed course. So it was that in the dark of the moon one night Joe pussy-footed his way to the boarding house where Minnie resided.

Minnie lived in a first floor room, and there was a light in her room and the window was open. What was going on in the room? Hating himself for being such a spy. Joe nevertheless climbed upon the veranda and peeked in. And what a startling thing met his eyes. Minnie was packing up! At once the thought of an elopement popped into Joe's head. She was going to elope with Jennings. And as that thought came to him, there came, too, a surge of manhood and determination which sent him flying across the veranda into the boarding house.

and right smack into Minnie's room. "I won't stand for it, Minnie!" Joe told her. "It would drive me crazy to have you do it!"

"Do what?" demanded Minnie. "Elope with Jennings!" cried Joe. "I don't care whether you're crazy about him or not. You're going to

marry me!" With a wild leap be had her in his arms. Then from the louse down to his flivver he ran with her and bustled her straight to the minister's. And, had he been less intent on what he was doing, he would have noticed that for a girl who was planning an elopement with another man, Minnie was strangely quiet and acquiescent,

Some little time later Joe folded her in his arms.

"But, Joe," said Minnle, "there's something I should tell you. I wasn't going to elope with Mr. Jennings. He's been telling me as a friend that I should either marry you or get out of town so you could settle down and make the big success at business he says you can make. So I was getting ready to leave town-because-be-cause I thought you would be better off. Mr. Jennings never wanted to

marry me at all!"

"Applesance! the believe that!" believe that!" And be never will. But it's a fact. And be never will. But it's a fact. atheless. Husiness must be off-

## Clean Kidneys By Drinking Lots of Water

Take Salts to Flush Kidneys If Bladder Bothers og Back Hurte

Eating too much rich food may produce kidney trouble in some form, says a well-known authority, because the acids created excite the kidneys, Then they become overworked, get sluggish, clog up and cause all sorts of distress, particularly backache and misery in the kidney region, rheu-matic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, begin drinking lots of good water and also get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush clogged kidneys and stimulate them to activity; also to neutralize the acids in the system so that they no longer irritate, thus often relieving bladder disorders.

Jad Salts cannot injure anyone; makes a delightful effervescent lithiawater drink which millions of men and women take now and then to help keep the kidneys and urinary organs clean, thus often avoiding serious kidney disorders.

#### To Cool a Burn Use HANFORD'S Balsam of Myrrh All dealers are authorized to relead your maney for the first bottle if not saited.

Wasted Energy

Yeggs who were either too stupid or too excited to read wasted a lot of futile effort on a safe at Norristown, Pa. They dragged the heavy safe from the office and lugged it into an alley, where, with chisels, they attacked the combination. Eventually they got it open, to find it empty. In plain view, fastened to the door of the safe, was a card giving exact instruc-tions how to open it.

#### Is Your Rest Disturbed?

Deal Promptly with Kidney

Irregularities. IF bothered with bladder irritations, getting up at night and constant backache, don't take chances. Help your kidneys with Doan's Pills. Used for more than 40 years. Endorsed the world over. Sold by dealers everywhere.

50,000 Users Endorse Doan's: John Greener, 29 N. Sheridan Ave., indianapolis, Ind., says: "I was troubled with headaches. The kidney secretions burned and contained sediment. I felt tired out and had no energy. Doan's Fills put me in good shape and I have used them several times with good results."

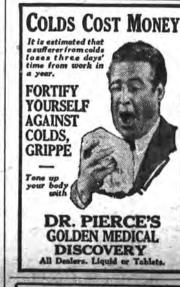

His Kind "He is the most undiplomatic boob

I ever met." "Yes, he's the kind of a nut who will start bragging about what a wonderful place Florida is the minute he

Exactly

lands in California."

Teacher-Try this sentence: "Take the cow out of the lot." What mood? Pupil-The cow.

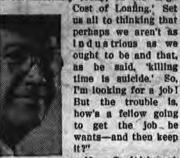

#### AKE IT Frank H. FROM DAD

How to Get the Job You Want and Keep It

at our assembly today, on the 'High Cost of Loanng.' Set us all to thinking that

Mr. Smithhough laughed outright, "Bob, I hope your streak of industry has come to stay. I think myself it's about time you began to cash some of your spare time both from the standpoint of learning to work, which is a very real accomplishment, as well as from the standpoint of financial return. College days are not so far away, and boy, they do take cash. Undoubtedly, one of the outstanding characteristics of successful men is that somewhere, sometime, they learned to work. These days we hear a good deal about 'lucky breaks' and 'pull' and all the rest but let me tell you one thing now; things in this world never just happen. There is always a reason for everything; so with successful accomplishment. It is not the result of lucky breaks; it is not a thing of chance except in the movies. It comes to men only because they work hard and intelligently for it and along legitimate lines.

"Now, as I understand it, you want to know what your prospects are; how to get a truly desirable job, and then how to keep it. Well, as you know. I have some rather definite convictions along those very lines and I don't mind in the least sharing them with you-not by way of advice, however, but by way of observationsthen you go to it and try them out for yourself. However, let me say positively that it is tremendously important that you do some thinking about jobs in general before you set out to hunt one in particular. Bear in mind that it is the potentiality of your job which should make it attractive, not necessarily the pay check. What are you learning while you are earning is the important point. Many men pay mighty dearly for their pay checks in what they learn in bad morals and wrong attitudes.

"The second point I'd like to get fixed in your mind is that if possible there should be some definite connection between the work you seek and the thing you are aiming at doing ultimately. One would not be going to an engineering school to learn to become a doctor nor working in a hospltal if he hoped to become a great mechanical engineer. There must be some consistency.

"The third point is this: Success and wealth are not one and the same thing. In past years we have had a perfect deluge of success literature and it has left an entirely wrong impression. Every normal man of course desires to make a good living-that is entirely legitimate, but let's make a good life first-useful, creative, in some realm and dedicated to the improvement of mankind. No other sort of a life is legitimate. Get a definite purpose established. Bob. and then set out to make school and job and reading and travel and friends and contacts all help you accomplish that purpose. Apparently your work is going to be some sort of human engineering -you enjoy people rather than things. You seem to be dominated with altruistic motives. So let's find a job that will cast you with folks; meeting people; serving people in some capacity rather than cleaning machinery or keeping books or driving a car, One of the cardinal principles of finding the right job and keeping it lies in finding work which interests you. Having found a job that fits into your scheme of things and that Interests and challenges you, then give it the

very best you have. "Of course you will have to begin at the bottom. Don't expect to be made vice president of the concern in a week merely because you're good looking! Determination, loyalty, integrity and perseverance are the factors in holding a desirable job after you get one. The same stuff it takes to get a desirable job it takes to hold one,

"Never work for any man to whom you cannot be loyal, personally, and to the standards of his business as well. To be efficient you must maintain always your own self-respect.

"Give full hours and an extra good measure always. The minute you begin working by the clock you join that vast army of folks who have no future in anything because they are 'getters" instead of 'givers.' Besides, the most common type of dishonesty today is 'stealing time.' When you make another contract with yourself to do better than is necessary, then you will love your work and your work will prosper amazingly.

"Now, Bob, about finding the jobthat's up to you; a test of your own ingenuity and perseverance.

"In other words, Dad, it's strictly up to me, eh-all I get from you is some sound advice and your moral

"That's it, boy, what more do you want, being a Smithbough?"

HATCHABILITY OF EGGS INHERITED

Low Rate Causes Heavy Losses to Industry Yearly.

(Prepared by the United States Department of Agriculture.) Forty per cent, or 800,000,000 of the 2,000,000,000 eggs incubated annually fall to produce live chicks, according to the United States Department of Agriculture. Such a low rate of hatching ability causes heavy losses to the industry annually. Solution of the problem is one of the important undertakings of the poultry specialists at present.

While many factors, such as breeding, feeding, and management, have an important bearing on the hatchability of the eggs produced, heredity is also a factor. It is now known that some hens lay eggs of a higher hatchability than others and that this characteristic can be transmitted from sire to daughter. In fact, the studies already made by department poultrymen indi-cate that strains which will produce eggs with a very high hatching power may be developed by trap nesting, pedigree hatching, and selection of hens producing a high percentage of livable

At the department's poultry experiment farm at Beltsville, Md., breeding work is being conducted to develop strains of high hatching ability. Some progress has already been made. Records of one hen with an average of 90 per cent hatchable eggs show that she has transmitted this characteristic in a large degree to her progeny. She has two daughters and seven granddaughters with records of hatchability ranging from 78 to 95 per cent, or an average of 86 per cent hatchability.

Department poultrymen are of the opinion that such records as these will prove of interest to the poultry breeder or commercial poultryman because they are evidence that a pedigree, showing number of eggs alone and no evidence of their hatchability, is greatly lacking in completeness.

#### Sunlight Is Important

as Source of Vitamine D Sunlight is without an equal to furnish the necessary vitamine D to laying hens, says Prof. J. E. Dougherty of the poultry husbandry division of the University of California.

While it is more valuable than any other agency, says Dougherty, the quartz mercury vapor lamp will give good results, and where sunlight is not available, it may be used.

Either sunlight or the lamp excel cod-liver oil in this respect, although where sunlight is lacking and the quartz mercury vapor lamp is not available, the cod-liver oil will be far better than nothing.

"Sunlight is cheap where it is at all available," says Professor Dougherty, "and where it is possible poultry should be exposed to the direct rays of the sun as much as possible."

#### Watch Shipping Days to Get Higher Hen Prices

"There is a right time to ship poultry. Shipment should be made so it will reach the market Tuesday, Wednesday, or Thursday according to observations by many experienced shippers. The market is often overloaded toward the end of the week, resulting in selling at reduced prices to avoid a carryover to the next week," says W. D.

Termohlen of Iowa State college. It is also a smart plan to compare local prices with terminal market prices because, in many cases, the difference is not worth the extra costs connected with shipping.

#### Confining Turkeys

It is generally considered unwise to closely confine turkeys for any length of time; hence, the crate feeding method practiced in finishing chickens is not employed with turkeys. However, it is considered advisable to somewhat restrict range during the finishing period. An empty barn, shed or similar shelter with a limited yard range can serve admirably for finishing quarters if in proper sanitary condition.

Mites Eat Feathers There are several reasons for the loss of feathers on the head and neck of a fowl, but it is usually due to the fowls themselves in scratching and breaking the feathers off with their claws. This is apparently caused by a mite, thought to be the same as that causing scaly leg, and which gets under the skin, causing irritation. Application of carbolated grease into which has been worked a little sulphur will be found helpful for this trouble.

#### Poultry Paralysis

Poultry paralysis is so far an incurable disease, the cause of which is unknown, says the Oregon experiment station. Where the disease is present, the station urges rigid sanitation in rearing next year's young stock as possible preventive measures. Important factors to bear in mind in this connection are brooding on con-crete or wire, and removing the fowls immediately after the brooding period to land not previously used for poul-

#### Vegetables for Family Garden

Each Crop Should Be Planted According to Its Climatic Needs.

Timeliness, or planting the garden crop according to its season, is one of the very satisfactory ways of having good garden.

"This means planting each crop according to its climatic requirements," says E. B. Morrow, extension horticulturist at State college. "Such crops as English peas, radishes, spinach, and lettuce require cool weather for their best development. Don't make the mistake of planting head lettuce so late that the plants will go to seed nstead of producing heads.

Lettuce Wants Food. "Lettuce also likes plenty of plant food, and if heads are wanted, the soil must be rich. Side dress the crop with readily available nitrogen, such as nitrate of soda, as soon as the plants have become established. This is also a good practice for early cabbage and most of the other leafy vege tables."

Those who have never grown carrots should make a small planting this year, says Mr. Morrow. The seed are planted at the same time as the beets and the Chantenay variety is well sulted to Carolina conditions. The Long Season is probably one of the best varieties of beets. It remains sweet and tender over a long period and is primarlly a home garden type.

Ventilation Important. Ventilating the hot bed on the bright sunny days is important. Mr. Morrow says that where the hot bed has only-poor ventilation, the plants will likely damp off at the ground or tail leggy plants will be produced. Vigorous, stocky plants are best for setting. Where the tomato plants have begun to crowd in the hot bed, transfer them to the cold frame. Set them four inches apart and keep the frame covered at night and on cold days.

Early and thorough preparation of the soll also means much in getting the cantaloupes and watermelons off to a good start. Both of these crops respond to heavy applications of stable manure. Three or four tons of manure per acre and a handful of superphosphate to each hill will give good results, says Mr. Morrow.

#### Soys Should Fill Mows With Good Protein Hay

Many farmers are turning to the favorite of the Orient-the soy bean crop-to help them in cutting their 1930 feed bill.

"Yields of from one to four tons per acre of soy bean hay, worth 90 per cent as much as alfalfa, save many farmer's pocketbook from expenditures for protein feeds," says George M. Briggs, one of the agronomists at the college of agriculture of the state university.

When hay crops fall, a full hay mow can be had by using soy beans as an emergency hay crop. The soys can be planted as late as July 1, alone or in combination with corn. The crop is adaptable to many kinds of soil.

There are many things to be said in favor of soy beans as a substitute for alfalfa and other legumes. They can be grown after a crop of peas or other hay been taken from a field. No special tools are required to handle the crop.

"Some farmers believe soy bean hay is not very good because it is hard to cure and often looks poor," Briggs stated, "but it is often relished far more than what appears to be a better grade of hay.'

A strong point for soy beans is that they contain a high percentage of protein which makes it unnecessary to supplement the hay with a large amount of expensive grain supple-

#### Extremely Sharp Plows

Not Materially Faster

Tests conducted at the Iowa State college indicate that extreme sharpness of plowshares has very little effect on plow draft in ordinary plowing. In tough sod, however, dull shares do increase draft very much, where the average draft of a 14-inch plow, working 5 inches deep, was 740 pounds, while with the edge duiled to one-eighth inch, but with other conditions the same, the draft was increased to 881 pounds. This is an increase of 19 per cent, due to dull shares, in alfalfa sod. It was also found that a sharp share helped the plow greatly to penetrate hard ground. Hence, for ordinary spring plowing, only the point need be kept sharp, while for plowing sod or in hard soil, it is important that both point and share be kept sharp.

#### Efficient Repairs Cut

Cost of Farm Machinery

In a recent survey of the life and service of farm machinery the Iowa station found that efficient repairing was a big factor in cost reduction. If allowed to go unattended a minor defect grows until the owner is forced to go to considerable expense to repair it, but with annual overhauling, the implement in question will remain in almost perfect condition for many

When tools are stored in the fall, there is seldom time to overhaul them immediately, and farmers generally prefer to put them in shape later in the winter when the pressure of other work is not great.

#### Consumption of Milk Gradually Increasing

Accompanied Campaign to Eradicate Tuberculosis.

(Prepared by the United States Department of Agriculture.)
A gradual increase in milk consump-

tion in the United States in recent years has accompanied the campaign to eradicate bovine tuberculosis. The estimated increase has amounted to more than 50 quarts per capita since 1920, when the campaign was well under way. This interesting sidelight on tuberculosis eradication is seen in a chart prepared by the bureau of anlmal industry, United States Department of Agriculture.

In the work of eradicating the disease, approximately 70 per cent of all cattle tuberculin tested have been dairy cows and helfers over two years old. Dr. A. E. Wight, who has charge of tuberculosis eradication in the bureau of animal industry, explains that in the four-year period 1920 to 1924 only 5,000,000 cows and helfers over two years old of about 23,000,000 in the country had been tuberculin tested. By 1926 the number tested had reached 10,000,000, while to date the number has exceeded 16,000,000.

"The increase in the estimated per capita consumption of milk indicates," Dr. Wight believes, "that the public's taste for milk has in no wise been diminished by this extensive co-operative work to suppress tuberculosis among cattle. Any influence that the tuberculin testing work may have had is favorable rather than repressive, according to the chart. However, a large number of factors other than the health of cattle undoubtedly have been responsible for the increased use of

"The campaign against tuberculosis," he adds, "had a direct influence in checking the dairymen's losses by detecting and eliminating tuberculous cows which usually are unprofitable, besides being a menace to the rest of the herds.

#### Destructive Seed Corn

Diseases Are Treated

Chemical dust treatments for seed corn; of which there are a number on the market under trade names, have produced net returns at the rate of about 1,000 per cent on the investment, according to Dr. Benjamin Koehler, crop pathologist, University of Illinois. In co-operative tests made by the university and the United States Department of Agriculture, the better of these seed treatments paid the cost of treatment, labor of applying and labor of husking the extra corn and still gave the net return of the investment, on basis of present corn prices.

There are at least five serious and destructive seed corn diseases, and no seed corn is entirely free from all of them, states Koehler. Without seed treatment these diseases operate to reduce the stand of corn or weaken some of the plants that do come up. thereby cutting yields.

All of the chemical dust treatments now on the market are applied to the dry, shelled corn at the rate of about two ounces to the bushel of seed. The chief requirement is that mixing of the dust and seed must be so thorough that it cannot be done with a shovel, but must be performed either with a homemade or commercial mixing machine.

#### Heat in Silos Found

to Be Only Temporary

When corn is placed in the silo that near the surface, where it is exposed to the air, becomes hot. This has led to a somewhat general belief that the whole mass of silage becomes hot. However, such is not the case. Thermometers buried at various places in the sllage show a maximum temperature of 100 degrees F., which would be termed only lukewarm. Usually the sliage reaches its maximum temperature in ten days or less, after which it gradually cools. The silage keeps, not because it is hot, but because of the exclusion of air and the action of the acids in it.

#### \*\*\*\*\*\*\*\*\*\*

Agricultural Notes \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\* Now is the time to list your seed

requirements for next spring; use

only adapted varieties. Experience proves that good soil is

important in early plant growing. Soil or manure composts provide excellent material for this purpose. The amount of moisture in the seed

bed at seeding time has an important bearing on the amount of wheat that will be harvested the following year. From the standpoint of feed production, the pasture is commonly the most important field on the farm.

Don't overlook the permanent pasture when applying this winter's manure. Soy beans are recommended by specialists as an excellent emergency hay crop. The soy bean is tolerant of acid soils and produces a hay of high

protein content and feeding value com-

parable to alfalfa. Plows scour most easily in soils that have plenty of humus. A starch condition of soils can be corrected by bringing the percentage of organic material up to 4 per cent using calclum carbonate for soil acidity.

WINTER FEEDING FOR DAIRY COWS

Hardest Working Animal on Farm Needs Best Ration.

The milking cow is the hardest working animal on the farm, a fact which explains the importance of good feeding for dairy cows. A cow giving 85 pounds of milk a day produces in that milk what is known as 10.4 therms of energy. To produce the same number of therms in the form of useful work, a team of two 1,500-pound horses would have to work steadily for eight hours. As the only way a cow can obtain

energy to put into her milk is through the feed she eats, her feed must be highly nutritious and fed in sufficient quantities so that her body requirements as well as her full needs for maximum milk production are met. The successful dairy farmer bases his winter feeding program on an abundance of legume roughage such as alfalfa or other legume hay, and corn silage. So that he may be sure to have these roughages available next winter he is already making his plans for a substantial "creage in alfalfa or one of the other legumes for hay this spring. An acre for each cow in milk will grow enough alfalfa hay to keep these cows well supplied with the very best dry roughage from late fall to early spring. The growing of about one acre and a half of the other legumes will be required to keep a milking cow well supplied with hay during the same period. Now is the time to plan for next winter.

In winter feeding, hay is usually fed at the rate of 1 to 11/2 pounds for each 100 pounds the cow weighs. Silage is generally fed at the rate of 21/2 to 31/2 pounds for each 100 pounds of the animal's weight. Grain should always be fed according to the cow's milk production. The larger breeds, such as the Ayreshire, Brown 3wise and Holstein, are fed one pound of grain to each 31/2 to 4 pounds of milk produced daily. The smaller breeds, as the Guernseys and Jerseys are usually fed grain at the rate of 1 pound to each 3 pounds of milk produced daily.

#### Many Dairymen Overlook

Water Supply in Winter The average dairyman overlooks the water supply for his cows during the winter months, and in doing so he overlooks a nice profit and lowers the production of his cows. The dairy cow will drink 100 pounds of water daily if it is located where she can get It at least twice dally and it is not too cold. A fresh cow will drink three or four times as much as a stripper or dry cow. In cold winter weather a cow will not drink that much water if turned out but once a day and she has to walk to a pond or tank to drink. Furthermore, when a large amount of cold water is drunk in cold weather it must be raised to the body temperature of the cow, and to do this the cow burns the feed nutrients which were intended to produce milk and maintain her body.

#### Small Slender Silos Are Now Coming Into Style

If there was any such thing as styles in silo building, it would be appropriate to say that the slender figure in silos is coming into style. The tendency seems to be toward less diameter and more height, and if a large amount of silage is needed to build two small ones rather than one silo of great diameter.

Eight, ten and twelve-foot silos are each year becoming more common. These small structures make a silo a practical investment for herds of ten or more dairy cows, or for two or three loads of beef steers. Ten cows, for example, will eat about two inches of sliage per day from an eight-foot silo and about one and one-third inches from a silo ten feet in diameter.

#### Cow Stanchions Should

Be Properly Adjusted The stanchions should be so adjust-

ed that the cows deposit their droppings in the gutter and not on the platform. Clean, dustless bedding should be provided daily. The flanks of the cows should be clipped to keep the hair short so that the cows may be easily cleaned with a stiff brush. Brushing should be done as often as possible. Diseased cows should be isolated from the healthy ones. A constant inspection should be maintained to locate new diseases. Every dairyman should make it a point to become acquainted with common cow allments. Milk from diseased cattle should never be sold.

Dipping for Lice

Lice cause great annoyance to calves and may seriously retard growth if present in large numbers. They are difficult to control, but about the most satisfactory treatment is dipping or washing with a coal tar dip solution, This method cannot be used during cold weather but should be used the first warm, still spring day. In a week or ten days the treatment should be repeated to get the young lice which have hatched out in the mean-

Mrs. Green's Pathetic

S. O. S. Over Telephone Mrs. Green had announced cheer-

fully that she was having a table of bridge the next evening while Mr. G. went to a business dinner. Her husband looked at her with the cold eye of an unblased critic.

"Do you mean to tell me you have the nerve to invite people here to play bridge? Why, you can't play."

"But, Fred dear, I can," Mrs. G. replied proudly, "Mrs. Thomas gave me a lesson yesterday." What Mr. Green had to say about

a one-lesson bridge player was sufficient. It accounted for Mrs. Green's telephone call to her brother next day. "Oh, Bob," she wailed. "You've got to help me out. Just bring any one you please and pretend to drop in unexpectedly tonight. Anything to break

neglect a COLD

DISTRESSING cold in chest or throat—that so often leads to something serious—generally responds to good old Musterole with the first application. Should be more effective if used once every hour for five hours.

Working like the trained hands of a masseur, this famous blend of oil of mustard, camphor, menthol and other helpful ingredients brings relief naturally. It penetrates and stimulates blood circulation, helps to draw out infection and pain. Used by millions for 20 years. Recommended by doctors and nurses. Keep Musterole handy—jars and tubes. To Mothers—Musterole is also throat—that so often leads to

To Mothers—Musterole is also made in milder form for babies and small children. Ask for Chil-dren's Musterole.

A northern reporter, interviewing Governor-elect Pollard of Virginia,

"What do you suppose would have happened if the Pilgrims had landed down in your part of the country?"

"According to the English geography of the time," smiled Doctor Pollard, "the name Virginia was applied to the region that became New England and that is the name used by the Mayflower company in referring to the new country.

"If the Pilgrims hadn't thought they were in Virginia, they never would have stayed in New England."

THE BREAD OF LIFE

rising flour contain more of the cones tinle of the balanced diet than bread made of any other flour. This is Mr and Mre N M Carpenter had proved by a recent experiment con-

> Birty per cent of the experimental diet was bread—self-rising floor bis-cuits made with water, self-rising flour biscuits made with whole milk yeast brend made with water, year bread made with whole milk, commercial white bread and commercia whole wheat bread.

The increase in weight of the sub jects used in the experiment greatest with self-rising flour made with whole milk; second, self rising flour biscuits made with water and on down in the following order commercial white bread, yeast bread made with whole milk, commercial whole wheat bread, and yeast bread

made with water.

The balanced diet demands three main elements: the right kind of proteins, vitamins A to F, and certain
minerals. Of the minerals, the following nine are necessary: sodium, cal sium, phosphorous, sulphur, potassium

nagnesium, fron, todine and chlorine Three of them, sodium, calcium and phosphorus, are introduced into sof wheat by the millers at the time of milling. The resultant flour, self-ris ing flour, therefore, contains these three important mineral agents for bone development and growth, in far greater proportion than other flours in commercial use.
