Air in First Real Test

Earl Thomas Transport Pilot of the Southern Airways of Memphis last Friday evening when he came down from the first test flight of the South ern Crane, the first built in Collierville plane, constructed by its inventor Ricardo Houstee and assisted by to have no trash on any Collierville Hugh Mann of the Manneraft Corporation. The Ship, a low wing type two passenger monoplane was brought from the hangar at 3:30 and after warming up the engine, Thomas donned his helmet and jacket and when asked if he was not going to take up his parachute, replied "No", He said he knew he would not need REV. AND MRS. HOOD INit and didn't want to be bothered with it.

The plane left the ground at about 56 feet and the first time Thomas remained in the air about 10 minutes, returning to the field he taxied the ship to the other end and again took off, this time in the opposite direction. He reached an altitude of around a thousand feet and came back to the field at a crusing speed of around 85 miles per hour.

In every test the plane came up to all expectations and Thomas said it responded well to the stick. Other tests are being made this week. Mr. Houstee plans to begin work on another ship soon and the Manncraft Corporation will begin active work at an early date. A tour of the State, visiting all the principal cities will be made by Mr. Hugh Mann and Mr. Thomas in the Southern Crane, in the near future.

COMMUNITY MEETING NEXT TUESDAY NIGHT

A Community Meeting will be held at the High School Auditorium next Tuesday night beginning at 7:45 and everyone is urged to attend. Matters pertaining the screening campaign, the clean-up campaign and other things of Community Interest will be taken up and a program under the direction of John Hall Jacobs, Miss Lena Leath and Mrs V. Leake will be given. The meeting is under the direction of the P. T. A. and every effort will be made to make the evening worth

JURED IN AUTO ACCIDENT

While driving into Memphis Tues day morning, Rev. and Mrs. R. W Hood were painfully injured in an auto accident which occured on Poplar Pike near Highland. Rev. Hood has one hand injured and is suffering from severe bruises. Mrs. Hood was more seriously injured, being badly cut about the face. They were taken to the Methodist Hospital for treatment. Rev. Hood was able to be back home Thursday. It is thought that Mrs. Hood will be in the hospital for some time.

RECOVER STOLEN CARS

Officers recovered twenty-one stolen autos near here Tuesday and two negroes were placed under arrest, charged with the theft. These cars have been stolen from the streets of Memphis, and it is thought this breaks up a ring that has been operating for the past 16 mon-

ths. City Marshall J. A. Lowe started the investigation by reporting numbers showing efforts to change them and the Dectective Bureau of Memphis, assisted by Deputy Sheriff Buddy Leake located the cars near Collierville and Cordova.

WILL IMPROVE CREAM They are stored here and quite a number of them have been identified and claimed by the owners.

Most wise craxs are just cracks.

Perhaps we would not have so many old maids and bachelors if the customs of India prevailed. The following is a United Press dispatch given out from London;

Children United to Avoid New Law in India

LONDON, April 5-Thousands of orthodox Hindu boys and girls, many still in the cradle, have been married throughout India the past few days to evade the child marriage act.

It was estimated that in the vicinity of Masulipatam alone over 1,000 were married in the last week, the dispatch said, the ages varying from 5 to 6 years.

One girl 7 years old in Vazagapaan was taken from the hospital, suffering from a broken arm, and married to a bridegroom of the same age, and then returned to the hospital.

A small boy was wondering when his grandfather was going to start playing football, because he heard his father and mother say they were going to get a new car as soon as the 'old man kicked off."

We'll bet England wishes that man Gandhi, leader of the peaceful revolution in India, would get him some guns and fight.Old John Bull knows how to exchange shots when they are coming from cannous and rifles, but when it comes to meeting ideas as put forth by this mysterious ascetic they are at a loss to know what to do.

The veterinarians are at a great disadvantage when compared to the ordinary doctor. They can't tell the old sick cow to have her appendix emoved.

of the Clean-up Campaign of next week. The P. T. A. is co-operating with the County Board of Health in this work, and with Mrs. J. F. The evening session opened at 6.15 with a great Fellowship Banquet This part of the program was certain ly full of good things-good eatsgood fellowship good entertain-

ment-good times. After the Banquet, another session was held, the most interesting part of which was a play, "Waiting for

the Doctor." Sunday, after Sunday School, we again went to the Convention, stopping on our way for a picnic lunch. The afternoon program was again full of good things. The most im pnessive part was the talk by Mr. C C. Coulter, a Missionary to lepers. He told of the work and of the horrible conditions among these people of

The election for District Officers was held and we are proud that Miss Cleo Leake, our President, was chosen Teach Logion Superintendent. The remainder of the program was taken up with discussion of different phases of C. E. work ...

We returned home in time for our own meeting, and were proud to have the Senior Society visit us and hear our reports of our Convention. The Seniors are planning to have their good time at the Memphis Union Ban quet next Monday, April 14th, at the also for their Convention at Jackson April 36-27.

Don't be surprised if you have more than one census taker to come to your home. One bogus enumerator left a home in Chicago with \$50, 000 in jewels belonging to the occupants.

After digging up the yard to set out the Spring flowers, the ordinary citizen is thankful that he does not have to dig a Panama Canal.

We wonder what the politician is going to do now that the Literary Digest poll is showing so great a variety of opinions on the prohibition law.

A watch is that round object which a speaker sets before him as he starts to speak, and does not consult it thereafter.

That proud moment in many a man's life will come when he straight ens himself up and informs the census taker that "I am the head of the house."

According to W. K. Henderson of Radio Station WKH, something new has been found. It is a pound weigh ing exactly fourteen ounces, and was discovered in the chain stores.

Mr. Fall is convicted of taking a bribe from Mr. DoHeny. Mr. Do-Heny is declared not guilty of giving a bribe to Mr. Fall. A paradox you say? Oh, no. Mr. DoHeny is a multilimlionaire and Mr. Fall is a bankrupt. Simple, isn't it?

- 382 14 - 3082

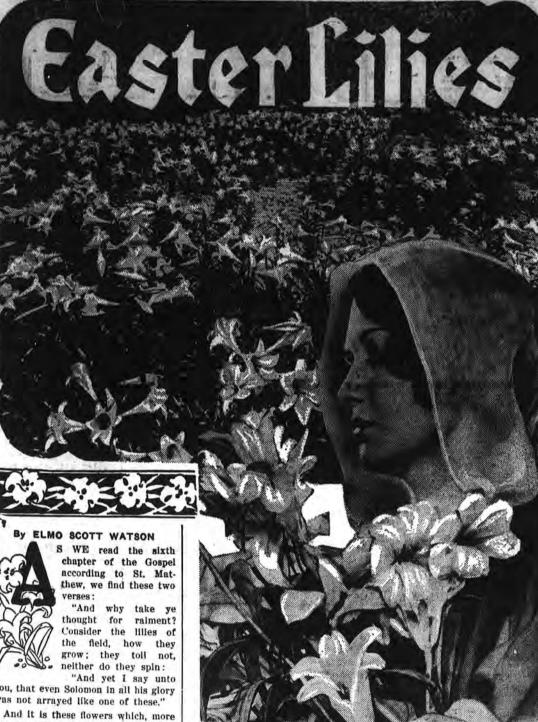

Now that he has marked his Literary Digest ballot "wet", the average American citizen can proceed with his "dry" argument.

The Literary Digest has a department headed "How Common Things Work." We suggest that they explain the American Politician.

Mr. and Mrs. J. C. McReynolds of Knoxville were the gnests of Mrs. McReynolds slater, Mrs. M. L. Woaver this week.

the officers there.

THE COLLIERVILLE HERALD

you, that even Solomon in all his glory was not arrayed like one of these."

than anything else, have become the symbols of Easter which we celebrate this year on April 20. As such a symbol the lily has a double significance. It is one of the earliest spring flowers. It typifies the rebirth of nature, after the long winter sleep. In its dry, brown bulb life lies dormant during the winter and then when spring comes, this life begins to stir. First It pushes out the tender green leaves, and then the buds appear. Finally the white blossom comes forth in all its glory as the perfect emblem of resurrected life.

Its other significance is a religious one, its snow-white purity being emblematic of the flawless life of Christ whose resurrection from the tomb we commemorate on Easter day. In fact, no other flower has a place in the religious life and literature of the Christian world to compare to the lily. Yet Its glory is not so new as Christianity, ancient though the beginnings of that religion may seem to us.

The Greeks and the Romans prized it above all flowers and in their ear-Her civilizations it had already come to symbolize purity and virtue. It was because of the place lilles had won in the popular esteem that they found

common vegetables are in reality

There is asparagus, for instance, that is bought in the market tied up in bundles of many stalks, each exactly like the other. There is nothing about this asparagus in this form that would indicate that it is a lily. Asparagus tips are but young plants just coming through the ground. If they were allowed to grow they would throw out tall, lily-like stalks and crown them with six-tipped flowers that any observer would be able to identify as lilles.

The presence of this commonplace asparagus in an idling family is rather a let down to its pretensions. This, however, is not the worst. If the truth must be told, the onion is a lily. The onion is a lily that has been bred through centuries for the devel

Lesson for April 13

THE CHILD AND THE KINGDOM LESSON TEXT-Matthew 18:1-14; 19: 13-15

GOLDEN TEXT-Suffer little chil-dren, and forbid them not to come unto Me: for of such is the kingdom of

PRIMARY TOPIC-Jesus, the Chil-JUNIOR TOPIC-Jesus the Friend of

JUNIOR TOPIC-Jesus the Friend of Girls and Boya. INTERMEDIATE AND SENIOR TOP-IC.-Growing in the Kingdom, YOUNG PEOPLE AND ADULT TOP-IC.-The Sin of Neglecting and Mis-guiding Children.

I. The Greatest in the Kingdom of Heaven (vv. 1-4).

1. The disciples' question (v. 1). The prominence given to Peter in connection with the announcement of Christ's purpose to build the church and the payment of tribute with the money in the fish's mouth, provoked jealousy on the part of the other disciples. The transfiguration scene revealed the divine person and the program of His kingdom. Seeing that the kingdom was to come to realization despite the tragedy of the cross, disciples wished to know their place of rank in the kingdom.

2. Jesus' answer (vv. 2-4).

He taught them by placing a little child in their midst.

(1) Condition of entrance into the kingdom (v. 3). The great question was as to whether they were really in the kingdom. Their behavior revealed the fact that they needed conversion Before they could even see, much less enter into, the kingdom, they must be born from above (John 3:3, 5). (2) Whosoever possesses childlike humility is the greatest (v. 4). The child is dependent, lowly and modest. Those who have been born again, or converted, have these characteristics.

II. The Lord's Identification With His Believing Ones (vv. 5-9). 1. Receiving the bellever in Christ's

name is receiving Christ (v. 5). Through faith in Christ we become God's children and so completely is

our life interwoven with His that He regards treatment of us as treatment of Himself.

2. The peril of causing a believer to stumble (vv. 6-9).

To cause to stumble means to give occasion for a moral fall. The particular reference was to the carnality and selfishness which were expressing themselves in their contention for preeminence. Their behavior was not only an injury, but a stumbling block to others. Everything causing one to stumble, though it be as vital as hands and feet, should be removed.

III. Believers Are Specially Cared for by the Heavenly Father (vv. 10-14). 1. They are under angelic guardian-

ship (v. 10). So precious is the believer in God's sight that angelic messengers are provided (Heb. 1:10). These angelic messengers have access to the very throne of God, even beholding His

(Interjection by Judge Harry A. Lewis-Oh, come now, there is a limit face. So high is the honor bestowed to credulity). believers that the highest (Mrs Johnson-I

Women pause to reflect-when they see a mirror.

"just as good" oil. No says lubrication expert

In every line of endeavor there is always a leader-and countless followers. The field of household lubrication is no exception. Unfortunately the general public doesn't always appreclate the difference between the real thing and the "just as good"but household experts do.

They know an oil intended for general household lubrication should clean and protect as well as lubricate. 3-in-One Oil does these three things. because it is a scientific compound of three high grade products-animal. mineral and vegetable oils. It is distinctly in a class by itself.

3-in-One costs more to make than ordinary oil, but less to use. If you want the best possible service from your sewing machine, vacuum cleaner, lawn mower, washer, electric fan and other household devices, insist on the old reliable 3-in-One Oil. At good stores everywhere, in 15c and 30c sizes. For your protection, look for the trade mark "3-in-One" printed in Red on every package.

Instead of trying to patch up an old quarrel, some people would rather make a brand new one.

DISTRESSING cold in chest or D throat-that so often leads to something serious-generally responds to good old Musterole with the first ap-plication. Should be more effective if

used once every hour for five hours. Working like the trained hands of a masseur, this famous blend of oil of mustard, camphor, menthol and other helpful ingredients brings relief natur-ally. It penetrates and stimulates blood circulation, helps to draw out infection and pain. Used by millions for 20 years. Recommended by doctors and nurses. Keep Musterole handy-jars and tubes.

"lilles."

place in	the	early	painting	8 01	the

picted c	arryli	ng then	n in ann	uncla	tion
pictures	and	It is be	cause of	this	that
the mos	t bes	utiful	of these	flow	ers,
Lillum c	ondid	am, me	ost used a	t Eas	ster,
is called	the	madon	na lily.		

Although this trumpet-like blossom is the best known of all the members of the lily family, there are others which are very interesting even though they do not have such significance for us as the madonna lily. In the high Himalayas in Asia grows a great lily ten feet tall. Agents of the United States government found a magnificent specimen of lily in China a generation ago-a lily of the madonna type, but hardier-and brought it to America and they have been offering it to citizens to plant from coast to coast.

Most of the lilles that are native to America are radiant with color. There is the turk's cap, for instance, that flaunts the deep yellow of its many blooms through the waste stretches of parts of New England. Great, stalwart stalks, sometimes nine feet tall. has the turk's cap. It may have half a dozen orange blooms at its top, but those who have tamed this plant and given it care have induced it to provide as many as 40 blossoms.

A quite different American flower is the little trout lily which likes to grow along the streams or in the deep woods. With the nourishment it has saved up in its bulb it starts growing in the early spring and is likely to have bloomed before the leaves of the trees have grown to the stage of making shade to interfere with it. A radiant yellow, the trout lily stands out vividly against its background of green

The blue flag running to purple is another American lily that has found itself a home in many gardens. The mottled tiger lily has been a favorite for many generations. In California the "leopard lily lights the heather dun," and the late shorn meadow is often red with their bloom.

The red lilles of New England, however, outshine them all and have inspired many a poet of that region. Lucy Larcom spoke of them as "red lilies blazing out of the thicket." Paul Hamilton Hayne thought that the red Hiy "stands from all her sister flow-ers apart."

What Logos in this loam,
hat the Celestial Beauty here revealed Should thus be struggling to its lost home?
Vhence was the radiant storm, The still up-rushing song,
hat built of formless earth this heavenly form,
Redeeming with art, the world's blind wrong.
nlocking everywhere
The spirit's Wintry prison,
and whispering from the grave, "Not here! Not here!
He is not dead. The Light you seek is risen!"?
-Alfred Noyes in the Washington Star.

Probably the most remarkable llly in the world is the yucca, or spanish bayonet, of the arid plains of the Southwest. There the Illy becomes a plant that is quite treelike and lives for years. The lily leaves become harsh, dagger-tipped implements to serve the purpose of repelling attack. These may slt close to the ground or, again, they may stand as high as a man on horseback.

From the cluster of leaf armor there springs now and again a tall stalk that may reach like a flagpole into the desert sunshine. At the top of this staff there forms and finally breaks into bloom such an assemblage of pure white, bell-like, richlyperfumed, and in every way perfect lilles as nature produces nowhere else in a single cluster. It is given to the desert to grow the greatest of all the lily-bearing plants despite the fact that the chief habitat of the breed seems to be the marsh.

Lilles all grow from bulbs. This bulb-making capacity of the lily family is one of its dominant traits. It and the six petals to all lily blooms are marks of the tribe. Tullos, daffodils, hyacinths, crocuses, all are actually, because they spring from bulbs, members of the lily family.

But beautiful as are these members of the lily family, there are others which are utilitarian rather than purely ornamental and which, although like the "lilles of the field which toll not," do furnish mankind with edible crops. Surprising though it may be, botanists will tell you that some of

opment of its bulb and the suppresdon of its top. So it has come about that the bulb may be three inches cross and the top so insignificant that, when it has dried up, it hardly appears at all. Yet when this top is growing and flowering it is like those delicate plants of the window sills which sometimes are called tube roses, but which actually are a delicate, refined and fragrant lily that comes out of the Orlent.

Onions came from the Near East and in ancient days furnished a staple food for the rural inhabitants of Greece and Italy. Not only was garlic a food, but it was reputed to have medicinal value and to be helpful to the stomach in its functions.

These two bulb vegetables, the Cinderellas of the plant food world, ride about the earth in trainloads and shiploads. The material service they render is greater than that of all the other lilles put together. One would have to look far in all the relationships of nature to find a contrast more striking than that of the Easter lily and the garlic of the Mediterranean.

Even though the lily is the one perfect symbol of Easter, there are two others which through the centuries have become so closely associated with this red-letter day in our calendars that we think of them almost as quickly, in thinking of Easter, as we do of the llly. They are the rabbit and the egg.

The association of the rabbit or have with Easter has its foundations in the ancient belief in European and Asiatic countries that the hare is the symbol for the moon. In fact, the Chinese represent the moon as a rabbit pounding rice in a mortar, while Hinds and Japanese artists paint the hare across the face of the moon. As the time of the Easter festival is governed by the phases of the moon this may be an explanation of their connection.

Since the Resurrection of Christ occurred in the spring, it is easy to see how the symbols of the egg and all revived life in the springtime came to be associated with this event in the history of Christianity. The egg as a symbol was taken over by the Hebrews as an emblem of their delivery from bondage and next the early Christians took it over as their sym bol of the resurrection.

angels are sent to guard them

upon

2. The Son came especially to save such from their lost condition (vv. 11-14).

The Heavenly Father does not will that any one of these should perish. They are objects of the Father's seek ing love. The salvation of the humhle believer has been secured by the incarnation and the sacrifice of the Good Shepherd.

IV. Jesus Receiving Little Children (Matt. 19:13-15),

We should carefully note the setting of this text. Jesus had been speaking of the sanctity of marriage, which is the bulwark of the home. Into the sacred enclosure of the home comes childhood to complete and ennoble it. 1. Children brought to Jesus (v. 13).

Doubtless they were brought by their parents. Many parents today who are careless as to themselves, desire to bring their children into touch with Jesus Christ.

2. Rebuked by the disciples (v. 13). They regarded children as too insignificant to engage the Lord's attention. Christ places high value upon children.

3. The disciples rebuked by Christ (v. 14).

These words uttered by the Lord have placed a peculiar dignity upon the child. It is Christlike to care for children and no service in the world pays such large dividends.

4. Christ laid His hands upon the children (v. 15).

For More Peace on Earth Less chestiness and more bowed knees make for more peace on earth. -Christian Monitor.

Condemning Others

There is nothing more delicately dangerous in the whole Christian life than the condemnation of others .- G. D, Watson.

Unless, of course, there was allmony. There wasn't.

Gangster Slain; Trapped

Gunman Then Kills Self

New York .- Gangsters armed with submachine and sawed-off shotguns

put Frankle Dunn, former Hoboken millionaire beer king, "on the spot" less than a block and a half from Hoboken's city hall.

One of them, cornered by the police, committed suicide rather than be captured. Two others fled in a stolen car after wounding a patrolman. Their machine careened along a main street through the crowds and knocked down three children.

Dunn, who recently announced his "reformation," was shot twice and died a few hours later. Patrolman John O'Toole had three fingers of his left hand shot off in a battle with the gangsters.

An automobile license found in the pocket of the dead gangster was made out in the name of Frank kelly of Hoboken. A short time after the battle two men in a coupe similar to that in which the fleeing gunmen escaped were captured in Jersey City. They said they were Frank Loreno and Alfred Orlando.

Hangman's Rope Used to Chase Evil Spirits

Paris .- For years a small piece of

hangman's rope has been the talisman with which Senora Mercedes has warded off sickness, bad luck, and other ills. Now she has lost the bit of hemp, which is regarded all over Europe as a very potent charm, and although she has offered a reward of 1,000 francs for another such piece she has been unable to find one,

To Mothers-Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

A woman can make a fool of almost any man if nature doesn't get its work in ahead of her.

To "Point - Up" Appetite **Just Stimulate Bowels**

Whenever the end of the day finds you out-of-sorts; food doesn't tempt you and won't digest; breath is bad; tongue coated, just chew a candy tablet before bedtime. Tomorrow you'll be a new person!

A candy Cascaret clears up a billous, gassy, headache condition every time. Puts appetite on edge. Helps digestion. Activates bowels.

Cascarets are made from cascara. which authorities say actually strengthens bowel muscles. So, take these delightful tablets as often as you please; or give them freely to children. All drug stores sell Cascarets for a dime, and no dollar preparation could do better work.

GRAHAM BONNER

THE WIGGLES

"There is one thing extremely nice about the snake family," said Mrs. Wiggle Snake, "and that is we don't always wear the same clothes.

"How often .we see the same creatures who never seem to change their costumes-dogs and cats.

"Now we have new suits quite often."

"We have to put up with hardships in order to get it, though," said Mr. Wiggle Snake. "It doesn't all come so easily.

"Perhaps other creatures don't care so much for something new as we do. "We show how much we care about

it when we go to such a lot of bother." "You see every spring, when the snake families awaken from their winter naps, they all change their

skins "While they are waiting for the new skin to be grown upon themfor they have to wait for their new

"I Am Sure I Will Like Mine."

suits just as people who go to tailors or dressmakers have to wait for their suits-they are quite blind.

"Yes, that is what snakes put up with in order to get new suits.

"After they have shed their old skins they become blind and for two weeks while their new skins are becoming perfect they can not see at all.

"They feel their way about with their forked tongues which are especially sharp and excellent at just this time.

"Their new skins have been growing under the old ones, but when they have dropped their old ones, the new skins have to have a chance to become just right in every detail.

"You can imagine that a snake is almost as fussy to have a suit fit as is a grown-up. Therefore they are willing to wait two weeks every spring. And they are willing to be blind for that time."

So the snakes talked.

"How do you think you will like your new suit?" asked Mrs. Wiggle Snake. "I can't see how I will like it," said

Mr. Wiggle, "but I feel as though I would, and as though it were going to be all right." "I am sure I will like mine," said

Wiggle

It's an old proverb to say, "haste makes waste." but it is quite a new

and up-to-date truth that "waists make haste" in these days-haste to consult the looking glass to see if one has a possibility of wearing "normal the new waistline" dresses; haste in many cases to obtain the corsets of days

gone by; haste to Grace J. Austin. declare, if one is perhaps a little stout, that certainly the normal waistline is as impossible for many of this soft-living generation as to obtain perpetual motion.

Dame Fashion delights to hear statements that Paris is reviving the wearing of clusters of artificial flowers on evening dresses, after a period when they were decided not to be in the mode. Once back in her early housekeeping days a statement was read that if an unusually busy morning were ahead, to pin a flower-of course meaning a natural one-on the front of the dress would give substantial aid. Dame Fashion is here to testify that she has tried this many times with genuine success.

But a pretty natural flower cluster is not always at hand. The wearing of such, with daytime as well as party frocks, is accepted at this time as quite an approved custom. There is just a hint in the air that flowers may return to hats before the summer is over, if it is only to peep out from beneath the brim. That was a favored fashion of Civil war days, and so might as well be expected to return, with other looking-back styles. Both gloves and shoes are obtainable in colors. The bride who longs for "all accessories to match" in her going away apparel will have no difficulties ahead. But this generation has good judgment, for the prefer-

ence for slip-on gloves remains. Dame Fashion can well remember how women used to have to toil with that pesky article, the glove-buttoner.

Hats have never been more delightful than at present-at least, that is the way they seem to Dame Fashlon. So many of them seem to look like wise, guarding friends. From one or both sides they drop down soft little arms of protection, with a caressing look, as if they said, "I like this pretty girl or woman, and you must, too."

The hat well off the forehead gives its wearer a remarkably innocent and sweet expression. Dame Fashion has noticed young women whom she knew to be watchful mothers of their ohlldren, and yet in their new hats they had quite the modest, engaging look of a girl in her first year at boarding school.

Pink has always been called a color of happiness, and this will be a great summer for pink. There are pink articles to be found in almost every possible article for the wearing and adornment of women and girls. The pink color started with little pink ripples, to herald the on-coming tide of the rosy hue. There have been pink

A charming travel suit with plain lines is of blue covert cloth that is smartly tailored for one so young. It is not dissimilar in style from the travel suit her mother wears.

Suit Gets Approval for

Women's Spring Outfit Enthusiasts on the subject of the suit advocate it, even though it may be necessary to supplement it by a top coat. Lightweight woolens and some of the mannish suitings which are in this category make such supple suits that they may readily be interchangeable with dress of a tailored type.

It is interesting to note that while suits are highlighted for street wear at the Paris openings, the one-piece woolen dress is by no means ignored. several chic examples of this type of costume being made of jersey.

Among the newer color effects in novelty woolens may be mentioned those with a yellowish cast and others which are faintly mauve-red. Black and white mixtures, although not new, are important, as are gray with either black or white. Rumors of gray persist.

The hat to complete the tailleur has heretofore been felt-without a question. Other fabrics present themselves this spring. Hats are frequently made of panamalaque with or without another material and of a variety of straw fabrics, not forgetting tweed or linen. Cloche shapes are being revived and one-sided effects are liked, or off the face models are another alternative. Trimmings continue to be minimized, the silhouette being the important thing. Bow trims are liked, and jeweled ornaments, clasps especially, make an appeal. The usual effective contrast of shiny ribbon on a dull surface or the other way about is employed.

High Shoes for Street

THE COLLIERVILLE HERALD

The Kitchen Cabinet (@, 1930, Western Newspaper Union.)

"Having it clearly in your heart that all men are equal, and in your head that the exterior distinguishes them, you can get on very well in the world".

FRENCH DISHES

The French cook is gifted in being able to make very delightful dishes from the most simple materials.

Choux a la Creme.-Put a tablespoonful of butter in saucepan with a cupful of water, a teaspoonful of sugar, a piece of lemon peel and a little salt. Boll well to-

gether, stir in two tablespoonfuls of flour, and cook until thick. Allow this paste to cool, then work into it two eggs and sufficient milk to make a drop batter. Heat a kettle of lard or use a deep frying pan, drop the paste from a spoon into the hot fat, making lumps about the size of an egg. When slightly brown and well puffed remove and drain them. When cool scoop out a little from the top of each and fill with sweetened and flavored whipped cream. Jelly or preserves may be used in place of the cream if preferred.

Boeuf a la Mode .- Take the under part of a round steak, place in a deep earthen dish and pour over it spiced vinegar. Let the meat remain in this several hours, then lard it with strips of salt pork. Make incisions a few inches apart and stuff with seasoned bread crumbs. Use pepper, onion, thyme and marjoram. Blnd the beef into shape and dredge with flour.

Cut two onions and one-half of a turnip and a small carrot and fry in a little fat. Brown the meat all over. place on a trivet in a pan and add boiling water, a bag of herbs, vegetables, and simmer until the meat is tender. Take out, remove the strings and herbs, place on a large hot platter, surround with the vegetables and potato balls and onlons.

Salad Romaine .- Put crisp leaves of lettuce in a salad bowl that has been rubbed with a cut onion. Make the following dressing: Take one hardcooked egg, mash it with a fork, adding salt, paprika, half a teaspoonful of mustard, a teaspoonful of hashed chives, the same of fresh tarragon, two tablespoonfuls of olive oil and one of vinegar. Toss well so that the romaine is well covered.

Reast Duck With Orange Sauce .-Baste wild duck while roasting with butter and lemon juice and serve with a sauce prepared thus: Shred very fine the rind of two oranges and parboll in a little water. Melt two tablespoonfuls of butter and add a tablespoonful of flour; when well blended add a little water, cook, adding the juice of the two oranges, season with pepper and salt and add the orange peel. Serve hot.

GOOD THINGS FOR THE TABLE

The use of lemon juice instead of vinegar except in making pickles, is

ways do. I love a new skin so." "And we love ours," said the other

snakes.

"We must have a good meal soon," said Mrs. Wiggle. "It is just three months since we have had our breakfast."

For the snakes eat every once in awhile-but when they eat, they eat a great deal, and then they sleep. So they decided they would have a family dinner as soon as they had their new skins.

In the meantime they went crawling around, feeling with their forked tongues, and hissing delightedly about their new skins which were growing so well, and of the meal they had had three months ago.

And also of the one they would have so soon now. They were getting up splendid appetites!

Seals Learn to Swim How seals learn to swim is described in the Sydney Bulletin.

On the outlying islets south of Stewart Island they congregate in the breeding season. On one islet hundreds of them gather round a large rock pond which apparently has been used for generations as a swimming school for the infant seals. When the time arrives for a baby seal to learn to swim the mother conducts her unwilling offspring to the brink, and, supporting him on her flipper, swims round the pool. The youngster, unused to the ky water, protests loudly ail the time, and makes off directly he reaches land. After a while his mother will seek him again and drag him, whimpering, to the water. The protests go on for several days, until the youngster can swim and dive, by which time he spends most of his time in the pool swimming nursery handicaps.

Just Try Itl

Of course, you all know how to make ordinary paper darts, don't you? Here is a little bint that will make them glide so gracefully. Make your dart fairly large, out of stiff paper, and when it is finished push a wire paper fastener over the end, so that it is weighted slightly. Now you will find that when you

throw your dart high up into the air It will glide down ever so gracefully.

Now comes a suggestion that pink and white dotted swiss gowns may be come the mode. And for sweet mod esty, for that true "feminine spirit" that we have heard of as returning, what can equal dotted swiss? (@ 1930, Western Newspaper Union.)

Bolero Effect Is Noted in the Boulevard Frock

The Boulevard frock emphasizes the bolero effect in crossed-over blouse and accents skirt plait with long tab which laps over the walst. Worn for a morning's shopping, a day at the office or an informal day at home. Made of lightweight wool with slik or cotton pique collar and cuffs. -- Woman's Home Companion.

Wear New Paris Fashion

Skirt lengths have cast their shadows in the form of high shoes for street wear, put out in the new collection of one of the leading designers. The last word in footwear, available only to the exclusive few so far, is a patent leather version of grandma's galter boots.

It reaches three inches above the ankle bone and forms a glove-like covering, all neat and shining and decidedly different.

The fastening of the new high shoes is located on the instep of the foot, instead of stop the instep. A strap and button on the outer side define the top and provide a teat finish. High shoes, according to the man

who designs them, are part of the changed requirements since skirts lengthened.

Evening styles have already made it difficult to sell dance shoes with straps. he asserts. Unbroken lines, neatness and ability to make the foot look small are required of evening shoes.

Mother-of-Pearl Petals

Make New Paris Chapeau Straight from Paris comes a new evening hat which is a cross between a mermald's cavern and a South Sea thatched roof. .t is a mere cap made up of rather long petals, the petals being mother-of-pearl. Since the petals are rather stiff, each one stands out just a trifle from its neighbors. lending the shaggy, thatched effect which goes pleasantly with a certain piquant sort of face. A mother-ofpearl bonnet can, of course, be worn with any color including black.

Evening Pumps Offered

in Variety of Colors Things have been so arranged that it is almost impossible to make one pair of evening slippers go with two or three frocks of different shades. Nevertheless, this triumph can be achieved. Flesh colored shoes go with almost any other color, and so do moire slippers in that new, indeterminate shade which is midway between pink and beige, with the faintest dash of coffee. Various shops give this shade various names, which does not alter its practical beauty.

ringue Pie.-Take one can of shredded pineapple, onehalf cupful sugar, the yolks of three eggs, four tablespoonfuls of cornstarch, one-

third of a cupful of lemon juice, one teaspoonful of the grated rind, onefourth of a teaspoonful of salt, onefourth cupful of pineapple juice, one tablespoonful of butter. Drain the pineapple and stir the juice with the cornstarch and lemon juice, cook until thick. Add the grated rind, the beaten yolks of the eggs, then the pineapple and cook two minutes. Add the butter and pour into a baking shell. Cover with a meringue made with the whites

of the eggs. Molded Vegetable Salad .- Take two bunches of young carrots, scrape, cut and cook until tender in two cupfuls of water. Drain and press the carrots through a ricer. To the water in which the carrots were cooked add salt, paprika, a tablespoonful of worcestershire sauce, one teaspoonful of chill powder, two level teaspoonfuls of gelatin; reheat and dissolve the gelatin, then pour into a ring mold and set away to chill with the vegetable mixture placed in layers with the gelatin. Chill and serve on lettuce with the center filled with cubed pickled beets.

Sauce Tartar .- This is a sauce that makes fish or any shell fish foods more appetizing. Mix one-half teaspoonful of mustard with the same of salt, a few grains of cayenne and a teaspoonful of powdered sugar. Add the yolks of two eggs, stir until thoroughly blended, setting the dish in ice water. Add a drop at a time of olive oil until nearly a half cupful has been used. then it may be added faster. Beat with a whisk or wooden spoon. Add one and one-half tablespoonfuls of lemon juice while beating in the oil; use one-half cupful of the oil. When using add chopped capers, pickles, olives and parsley with a dash of tarragon vinegar.

Sauces and souffles may be quickly prepared with cream of pea or asparagus soup.

Leeie Maxwell

gift that man can afford to man .---Thomas Carlyle.

WOMAN JURIST HAS WON PLACE

By JUSTICE FLORENCE E. ALLEN, Ohio Supreme Court.

Women barristers cannot assume the myriad responsibilities of their profession without suffering penalties in the loss of their private lives. But women lawyers experience tremendous compensation in having the sympathy of their countrywomen behind them. A sense of the increasing fairness of men, too, is most apparent.

The slight hostility I found upon first being elected to the Common Pleas court in Ohio, soon faded away. In this marvelous age women stand equipped to work with men as their intellectual equals. Society stands forth in this age as a mechanical giant, yet we are aware that the great social forces of America have not been co-ordinated. Who is better equipped to lead the way here than the man or woman trained in law to untangle the puzzle of the human equation?

The failure of many states in various governmental problems is that they have slipped back into that Old world way of thinking that the office belongs to the officer rather than to the people from whom the office comes.

NEW SUNDAY-SCHOOL PROGRAM

By EVELYN SPICKARD, Religious Educator (Episcopal).

Stories of Jonah and the whale, Moses and the burning bush, and the seven plagues of the Israelites, which used to make children sit in open-mouthed wonder, no longer hold a place of importance in the modern Sunday school. In the place of these old half-mythical stories are more reliable lessons taken from the New Testament and the lives of the boys and girls themselves. We are trying to make religion a part of the child's life, instead of a side issue based on improbable happenings.

MAKE USE OF THIS DEPENDABLE SERVAN

Mr. and Mrs. J. O. Boatwright of F. M. Sloan visited rela Memphis spent Sunday here with toria Sunday afternoon. Mr. and Mrs. V. D. Brooks and relatives.

Mrs. Kit King and Mrs. C. C. Conner motored to Memphis Friday. On their return home they were accompanied by Miss Maxine Conner, who remained for the week end.

Mrs. N. M. Carpenter and little daughter, Lois, visited in Rossville Saturday evening.

Mr. and Mrs. John Gray of Holly Springs were the guests Sunday of Mr. and Mrs. W. D. Howard. Mrs. M. E. McCandless has gone to spend a few days with Mrs. Emma

McCandless of Slayden. Mr. and Mrs. W. D. Howard were in Memphis one day last week. Mrs. Albert Hammond has returned home after visiting several days in Memphis.

Cleveland Jarvis of Hattiesburg, Callie Osborn, Miss., was a recent visitor here. Mr. and Mrs. George Freeman, Mrs. John Stegnar of Memphis, Mrs. Bazz Moore and son of Collierville. Mr. and Mrs. N. M. Carpenter and most delicious dinner. Dr. and Mrs. C. C. Conner were in Memphis Sunday evening. Rev. and Mrs. Evans made a trip to Holly Springs Friday.

CORDOVA HAPPENINGS

Sunday afternoon. John Armour and son, Morris, of Byhalia were here Sunday. HEARD FROM PIPERTON

Earl were in Memphis Sunday.

The Piperton Sunday School opened last Sunday, after being closed since December. Thirty-seven enrolled and there are others who will enroll. Plans are being made to have a bigger and better Sunday School than ever before. Come and you will receive a hearty welcome. Mr. Rube Bryant and son, Estes, of Memphis spent Sunday with Mrs.

Hrs. E. B. Baldwin celebrated her seventy-third birthday April the 6th. Her children planned to surprise her by all coming home but she turned Mrs. John Gurkin of Rossville, and the supprise by preparing dinner and sending for them to come and have chfidren spent Sunday on the old dinner with her. There were twen-Pittman homestead and enjoyed a ty-nine children and grand children present-all coming except two who were too far away to come.

Mr. James Person and Mrs. Lottie Dunn enjoyed a drive to Caperville Sunday

The Calder family of Cayce, Miss., spent Sunday in the Hampton home. Misses Frances and Lena Dunn are

Irene As the ever imiliates land waker first syllable in this nam-IR, ready signific

the wakeholiness of urally makes you niost adapted to rity, life of where you will not only be most at home but where your greatest success is

A Typical Irene almost certain to be found. Eye.

Your second syllable, ENE, tells us a lot about singing. This means not only songs of a joyful, happy nature, but the song of triumph, which you will sing because of your watchfulness for opportunity In the city, Only a few people cap succeed, and

then he penceful. You have real abilty here, hecause you avoid the con tinual urge of ambition, the dynamic drive for more of success and of applause.

The whole word trene means peace quietness and rest.

The letter I in your name, like the human eye in your body, is able to radiate great peacefulness among your friends and loved ones. At times this wakefulness may have a dash of fire in it, like that of Irene Bordoni. the French actress and vaudeville artist.

Taking the letters separately in your name I signifies Immaculate. Innocent: R stands for Righeteousness and Restoration; E stands for Entre and Entertainment, while N stands for both Nobility and Novelty.

Whatever advice is given you, you will do as you like about following. but the principal bit of advice that you really need is to be kind to your inferiors.

The reason for this is that you have the tendency to attract around inferiors who grow. These may, quite unexpectedly, catch up with you or even go ahead of you.

To you especially applies the conclusion of the little fable about the grasshopper who spurned the acquaintance of the caterpillar, and was afterwards spubbed by the butterfly who had been the caterpillar.

Grace

Your name begins with G, the seventh letter. To the enumerator this represents God,

but

to everyone

to bring out the

that you will be

deeply religious in

your own way, but not eastly restrained by creeds or dogmas.

The word Grace really means to do things without friction, and you are happiest only when you are doing things that way.

Your deep and studious eyes show the ability to penetrate the thoughts of others. You can mother them, even

Experts Find Early Feeding Is Not Harmful.

(Prepared by the United States Department of Acriculture.) The popular belief that baby chicks should be starved for the first 48 or 72 hours to prevent bowel trouble, has finally given way to scientific knowledge. It is now known that early feeding is not harmful. However, neither does delayed feeding seem to be harmful.

Experiments conducted by Burt W. Heywang and Dr. M. A. Jull, poultry specialists of the United States Department of Agriculture, to determine the effect of early feeding on the absorption of the egg yolk which is usually present in the body of the chick when hatched, show that early feeding actually tends to stimulate slightly the rate of yolk assimilation. Feeding scratch grain caused more rapid assimilation than feeding mash.

As a result of these experiments. Doctor Juli points out, poultry raisers now have unbiased facts to guide them in the management of baby chicks Under normal conditions the best thing to do is feed them early. If there is some special reason for withholding food for the first two or three days, this can be done without running the risk of stunting the chicks. Baby chicks shipped by parcel post or by express probably should not be fed before being shipped, Doctor Juli says.

Blackhead Evaded by

Keeping Poults Alone To prevent blackhead infection in young turkeys, they should not have chicken or turkey hens as mothers. Even though turkeys are put on a clean range, not infested with blackhead, it is likely that they will get the disease from the mother hen, says J. B. Hayes, University of Wisconsin. The practice may be avoided by using a new brooder stove for incubator hatched turkeys. A clean range is also necessary, but old birds should not run with the young turkeys, according to Hayes.

By adhering to a strict sanitation program of this kind, Hayes says that blackhead can be evaded, and there should be no more trouble with tur-

New England Colleges

Formulate Chick Mash A chick mash formulated at the conference of New England colleges calls

else you will need for 200 pounds yellow cornn.eal, 100 God within you. It pounds wheat bran, 100 pounds ground is quite probable oats, 25 pounds meat scrap. 25 pounds fishmeal, 50 pounds dry skim milk, 25 pounds alfalfa leafmeal, 25 pounds edible steamed bonemeal, and 5 pounds salt. The dry milk percentage In this mixture is 71/2 per cent. This mash becomes the regular laying mash by the addition of 25 pounds of dried milk and the substitution of ground oat groats for ground oats.

Poultry Notes

THE COLLIERVILLE HERALD

llonth Holstein-Friesian to be registered by the Holstein-Friesian Association of America. She typifies the surge to the front of youth in the development of modern agriculture, as both her dam and her granddam are calf club calves and all are owned by and two have been bred and developed by Orville Plum, a calf club boy of Walnut, Ill., who has been prominent in calf club work for the past six years. Orville is shown holding the dam of the two millionth Holstein and his friend and mentor, C. M. Hatland, vocational agricultural instructor who has guided Orville to national honors, is holding the calf. Orville led the nation in judging Holsteins at the National Dairy exposition in 1924 and has been a winner in the 4-H club classes himself and with his Holsteins. Orville has owned a total of 21 Holsteins, only 4 of which were purchased. He now has 8 milking cows and 5 helfer calves and the total value of the 21 head, of which 8 were sold, totaled \$3,500. The addition of 8 medals, 100 ribbons, \$780 in prize money, less \$300 paid for the 4 helfers, brings his income to nearly \$4,000 from club work. In addition, the milk from his herd is now worth \$1,000 a year.

Making Alfalfa Hay Without Losing Food

Unless Farmer Saves Leaves Cow Is Big Loser.

(By J. C. NISBET, Extension Dairyman, Kansas State Agricultural College.) The ends sought in making alfalfa hay are to secure bright green color, good aroma, retention of the leaves, and freedom from dust, dirt, and rain. Forty-three per cent of the alfalfa plant is contained in the leaves. Twothirds of the entire plant food content of the hay is contained in this 43 per cent.

This fact immediately puts the alfalfa grower face to face with the proposition that unless he gets the leaves to the cow, he is losing considerable food value.

Experiments have proven that when alfalfa hay is exposed to rain it loses 60 per cent of the crude protein, 41 per cent of the nitrogen-free-extract, and 33 per cent of the fat. The total loss amounts to 31 per cent of the total dry matter of the plant. The actual damage is even greater, for the nutrients lost are the most soluble and hence the most digestible part of the food elements.

Early cut hay contains a higher percentage of protein, but the early cutting may impair future stands. Time of cutting deserves much planning so as to get good quality of hay as well as maintain a good stand.

Chicken's Ills Easier

one-half skim milk. At the end of Prevented Than Cured the fourth week only separated milk

Sour milk costs producers thousands of dollars a year, and usually is caused by using unclean utensils or failing to cool the milk properly, says Prof. L. H. Burgwald of the department of dairy technology of the Ohio State university. "A little care on the part of the farmer would avoid this loss," says Professor Burgwald.

"Milk is an ideal medium for the growth of bacteria. All that the bacteria require when introduced into the milk, is the proper temperature, and they will multiply very rapidly. In growing they break down the milk sugar in the milk and convert it into lactic acid which in turn sours the milk. But the bacteria will grow very slowly, if at all, at a temperature below 50 degrees Fahrenheit

"Milk coming from the normally healthy cow is practically free from bacteria, so when large numbers of bacteria are found it means either that they have been introduced after milking, through the use of unclean utensils, or that the milk has not been promptly and properly cooled. and the bacteria have multiplied very rapidly.

"The public judges the quality of the milk by the length of time which it will keep sweet. The milk plant has to use some test which will determine in advance how long the milk will keep sweet. This test takes the form of a bacteria count under a compound microscope, an alcohol test, or a methylene blue test. The blue color of the milk caused by the addition of methylene blue dye, disappears more or less quickly, according to the number of bacteria present. The miscroscopic test, however, an actual count of the bacteria present, is the one most commonly used."

Feeding Calves Three

Times a Day Is Favored Best results can be obtained by feeding calves three times a day, with the periods between feedings as nearly equal as possible. When calves are fed but twice a day the feedings should be 12 hours apart. A calf weighing 50 pounds at birth should be given eight pounds of whole milk a day, while a 100-pound calf should have about twelve pounds. The amount of milk should be gradually increased until at the end of the second week the calf should get from 14 to 16 pounds per day. At the beginning of the third week either skim or separated milk may be given for whole milk, at the rate of one pound per day, and the daily ration increased from two to four pounds, depending on the vigor of the calf. If the calf does not drink eagerly when milk is offered, the quantity should be cut down. At the end of the third week the ration should approximate

A Sour Stomach

In the same time it takes a dose of soda to bring a little temporary relief of gas and sour stomach, Phillips Milk of Magnesia has acidity completely checked, and the digestive organs all tranquilized. Once you have tried this form of relief you will cease to worry about your diet and experience a new freedom in eating.

This pleasant preparation is just as good for children, too. Use it whenever coated tongue or fetid breath signals need of a sweetener. Physicians will tell you that every spoonful of Phillips Milk of Magnesia neutralizes many times its volume in acid. Get the genuine, the name Phillips is important. Imitations do not act the same!

A girl isn't necessarily artful because she paints.

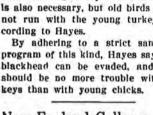

ACHES There's scarcely an ache or pain

that Bayer Aspirin won't relieve promptly. It can't remove the cause, but it will relieve the pain! Headaches. Backaches. Neuritis and neuralgia. Yes, and rheumatism. Read proven directions for many important uses. Genuine Aspirin can't depress the heart. Look for the Bayer cross:

The most terrible of all things is terror.-W. R. Alger.

of Logs' Value Much Timber Sold From

Farm at Less Than Its Worth to Buyer.

Owners Ignorant

Much timber is marketed from the farm woods of Ohio with little idea in the mind of the owners of the real value of the product, according to F. W. Dean, extension forester for the Ohio state university. Saw logs, Dean points out, are the most important item from which the farm wood income is derived, when timber is sold. And there is very great uncertainty and ignorance about the measurement of the board foot content of saw logs.

Inaccurate Scales Used.

The scale which has been used in Ohio for many years, called the Doyle, Doyle-Scribner, or Buckeye log rule, gives two sets of results, both of them incorrect, when applied to large logs and when applied to small logs, Dean says. All other agricultural commodities, as well as manufactured products, are marketed with an accurate knowledge of their volume, and Dean believes more accurate measures should be applied to the timber products.

Too Much for Small Logs. "One of the chief difficulties with the Doyle rule is that it is based upon a formula which allows too much for slabs from small logs, and too little for slabs from large logs," says Dean. "Consequently, small logs from 8 to 20 inches in diameter yield from 50 to 150 per cent more lumber than the scale shows. Large logs, 30 to 40 inches through, yield decidedly less lumber than the scale calls for. The Doyle rule was fairly accurate when applied to the virgin forests where the saw logs were of a size larger than those usually cut now. Today a large percentage of the saw logs taken from second, growth timber are less than 20 inches in diameter, and the rule is not accurate when applied to these logs."

though you disagree with them.

With an almost unlimited courage you combine a peculiar timidity, a fluttering of heart and mind, like a frightened bird, making almost a paradox in your life.

Taking off the G in your name we find the word RACE. This indicates the speed with which you can accomplish a thing your heart is set upon. It also has a relationship to the pride you take in skill of fingers.

The first three letters of your name, GRA, relate to an old Greek root, to write. In this you will probably find your greatest career. Among the modern Graces who have exem plified this is Grace Coolidge.

Taking off the first two letters of your name gives us the word ACE. This gives you the desire as well as the ability to hold to a single ideal, and to demand the singular possession of what you feel to be your own.

You have one of those peculiar na-tures that gives you access to what you set your mind upon, but this is curiously restrained by the timidity that I mentioned. Ordinarily you are not lonesome even when alone, your mind is so filled with things to learn and to do.

Go dight on courageously then, Grace, knowing that all things, come to him who waits, if you continue to labor while you walt,

(2) 1930. Western Newspaper Union.)

Checkers' Many Names

In England the game of checkers is known as draughts; in France, Jeu des Dames; Italy, das Damenspiel; Holland, Damrod; Poland, Dama; in the Arabic of Egypt, Damah. The recurrence of the forms of "Dame" is attributed to the fact that part of the board and some of the draughts of Queen Hatass, daughter of Thothmes, who lived in Egypt 1600 B. C., have been found.

Copy of Famous Building The Mastbaum Hodin Foundation museum in thilladelphis was designed by Paul Cref of Philadelphin and lacques Greber of Paris. Its a re-production of the Redin musee at Mendon, France. The limentone of which it is built was brought from that country. that country.

Feed grain in troughs each day. Start with chicks from breeding

stock of known merit. Grow chicks separate from old flock

so they will not range on same gound

Goslings cannot live without grass. Dry bread softened in sweet skim milk and pressed quite dry is good for the first feed.

. . .

The ration fed the breeding pens should be complete in every way. In addition to protein, carbohydrates and fats, the ration should contain vitamnes and minerals.

Nothing will take the place of a well-constructed brooder that is prop erly operated. Chicks are not weath erproof any more than they are troubleproof. If they are exposed to extremes of heat and cold they will soon he on the sick list.

When ten days old the ducks can be cut down to three or four feedings dally.

. . .

"A fift breeding hen is not conducive to hatchability in the eggs she produces. . . .

Chickens need minerals both for body maintenance and for shell formation.

. . . Use dependable bronder of propet size for house and number of chicks to be bronded.

. . .

Discard all hens which lay very small eggs, since these eggs hatch poorly and produce pullets that day small eggs. ...

Scrape floor, sweep walls, scrub with hot iye water and spray with dis infectant before moving bouse or put ting in chicks. . . .

Probably the most satisfactory and certainly the easiest and simplest way to mature and condition pullets is to allow them a good ration and keep

them on clean range.

Agricultural Notes *******************

No farm is well managed without record of its business.

When transplanting do not let the roots of plants lie open to the hot sun or to the drying influence of the wind. . . .

When watering the garden artificially, an occasional liberal application is more effective than frequent light waterings. Late afternoon or evening is the best time. . . .

A soil mulch reduces evaporation of soll moisture, but careful tests in both western Canada and the prairie states indicate that a soil mulch retards the penetration of water from rain.

. . . The first thing to do about the 1930

fertilizer order is to think. What do your fields need most, and why, and what can you do to save on the fertilizer bill and still get results?

The American public is eating more vegetables. Proof of this statement is shown by the increase in production of such humble garden crops as carrots, turnips, and beets. Within five years, carrot production has jumped from three to six million bushels.

. . .

Equipment for handling the farm garden has been so much improved. and yet simplified, that one machine may be used to seed all vegetables either in rows or hills, and to weed, mulch and cultivate, simply by using different attachments which fit a wheel and handle frama.

Correct housing conditions and the feeding of eod liver oil will forestall certain common aliments of hens, allments such as colds, roup and laying paralysis, which are much more easily prevented than cured, advises Miss Cora Cooke, extension poultry specialist, University farm, St. Paul.

Having housing conditions right is the most important means of controlling common colds or roup, Miss Cooke says. It is especially necessary to avoid overcrowding. A house 16 by 30 feet is large enough for 160 Leghorns, or 120 Rocks. More than one Leghorn for each three square feet, or one Rock to each four square feet, is almost certain to lead to colds or roup.

Good ventilation, without drafts. is a second important condition. The usual straw loft house, or a wellinsulated shed roof house with front ventilation should be satisfactory. However, the conditions within the house should be the test. Unless the air in the poultry house is fresh and free from the odor of ammonia, the ventilation needs correcting. Damp litter is another indication of improper ventilation. Although the litter should be changed as often as it becomes damp, the ventilation should be such that frequent changes will not be necessary.

Legume Hay for Lambs

Is of Big Importance

The Purdue experiment station reports results which show the importance of legume hay for lambs. Two hundred lambs were divided into two lots and turned into a field of well-matured corn which also had a light stand of matured soy beans. One lot was given no extra feed, while the second lot received a pound of soy bean hay per lamb per day. The second lot gained a little over nine pounds in 40 days, while the first lot gained only a little over three pounds per lamb in 40 days. In other words, the second lot returned approximately six pounds of gain for the extra 40 pounds of soy bean hay, which is of course an especially good return for hay. In addition to this, the lambs were decidedly thrifty, while those in the first lot were not at all growthy.

is fed, unless the calf is very delicate. The quantity fed can be increased gradually to 18 or 20 pounds per day. Six months is a good average age at which to wean calves from the milk. When good pasturage is available, the calf can be weaned earlier. If skim or separated milk is available, how-

ever, calves, especially if they are available, may be fed on it with profit until they are eight or ten months old.

Dairy Notes

A cheap bull is about the most expensiv. investment a live stock man can make.

. . .

Sanitation in the ranagement and blood testing are the methods of controlling abortion. . . .

Immediate and adequate cooling of milk is necessary to prevent souring. A temperature of less than 500 F. 1s unfavorable to the growth and reproduction of the injurious bacteria.

With feeding of dairy cows, the question of minerals in the ration receives additional prominence. A cow may produce milk for some time without having sufficient minerals in her ration by drawing on her reserves.

Cleanliness is important in preparing milk for exhibition just the same as in producing milk for sale. Clean cows, clean milkers, and clean utensils and containers keep down bacterial contept and prevent spoiling.

Provide now for a better milk-producing inheritance in your future herd. Get a sire from a line of breeding bette: than your own. . . .

The calves will begin to eat grain after they are a few weeks old, and it is usually profitable to provide a creep where grain can be supplied.

During the cold months the question of water for the producing herd is one that is often given little attention. cow milking heavily requires from T to 150 pounds of water dally.

Don't Risk Neglect!

Kidney Disorders Are Too Serious to Ignore.

WATCH your kidneys! Sluggish kidneys fail to rid the blood of impurities and permit slow poi-soning of the whole system. If troubled with backache; bladder ritations and getting up at night, don't take chances! Use Doan's Pills at the first sign of disorder. Used for more than 50 years. Praised the world over.

50,000 Users Endorse Doan's: Mrs. O. A. Winter, 1145 N. Topska St., Wichita, Kana., saya: "I had such severe backaches I could hardly do my housework. Headaches wers frequent and my kidneys were irregular. Doan's Pills etrengthened my back and regulated my kidneys."

Most statistics used in arguing are utterly worthless.

Vista Along the Midi Canal.

(Prepared by the National Geographic Society, Washington, D. C.) CROSS southern France, where

floods recently devastated a large area, lie the Lateral and Midi canals, connecting the Atfantic and the Mediterranean. unique sightseeing trip through this delightful country can be made along these waterways in a canoe.

The start is made at Bordeaux. With its almost six miles of wharfage, it is among the few big ports which have troubled to beautify their water fronts. Its broad, quay-paralleling thoroughfare with here a tree-shaded promenade, there a public park, and yonder a towering pair of columns dedicated to Commerce and Navigation, illustrates for the benefit of many another slummy water front how seafreighting may bring beauty out of business.

From Bordeaux for 25 miles the Garonne river forms the waterway. The Lateral canal starts at Castets, and parallels the river to Toulouse.

Though navigation hasn't usually much to do with hills and dales, that landsman's phrase aptly describes a canal trip. The 260-mile waterway which stretches from near Bordeaux to the Mediterranean-that is, the conjoined routes of the Lateral and the Midi canals-is regulated by 118 locks. These give a 620-foot drop on either side of Castelnaudary, the highest intermediate point.

Thus, the canoe voyager goes "uphill" to Castelnaudary, then "down dale" to the Mediterannean, averaging 101% feet of ascent or descent each time he passes a lock.

Beautiful Country.

The Lateral canal leads through a smiling countryside of gently rippling hills and of close cultivation, with tobacco plantations and vineyards alternating. Regiments of staked vines align themselves across the fields at the queerest of angles, a planting system aimed at securing the maximum exposure of sunlight.

Here and there some picturesque village, its Fifteenth-century houses dominated by a ruined donjon, mirrors itself in the Garonne.

The canal and its river feeder parallel each other for 120 miles, and it is but a short stroll whenever one glimpse of the latter. Their wants a

reputed founder, Dame Clemence Isaure.

Such is the May day fete of the ancient Academie des Jeux-Floraux. While floral festivals of varying kinds are held at Nice, Cahors, Lyons, Cette, and in Normandy, Catlonia, and Rhenish Prussia, it is only the Toulousian event which represents an unbroken

tradition of six centuries' span. At Toulouse travelers by canal leave the Lateral canal and enter the much older Canal du Midi. Constructed in 1666-1681, this "canal of two seas" represents the earliest step toward the present Atlantic-to-the-Rhone line, Beyond that 20-mile route extend the Rhone's northern canal connections whereby barges can travel inland from Bordeaux to various French channel ports.

The most recently completed canal link in southern France has opened a Marseilles-to-Calais line, This is 852 miles long, or considerably shorter than the sea route.

The Canal du Midi is not only an important commerce carrier: It is among the most beautiful of French waterways. Immediately beyond Toulouse it traverses a series of woodland vistas, a ceaseless interplay of lights, shadows and reflections, that change with each turn of this endlessly twisting stream,

The Midi canal's picturesque charac ter is due to the magnificent trees which line its banks for more than 100 miles. Here are venerable oak glades, there alleys of plane trees, and yonder spear-straight pines or somber walls of cypress. Often, indeed, ranks of these different species parallel each other in a multiplied depth of sylvan shelter. The lovely curves and green wealth of foliage are alike due to its planners' method of mitigating, for the benefit of barge traffic, the sweeping winds of the region.

Nothing less than the epithet "fishability" could convey a picture of the Midi's anglers, squatting in endless succession along the canal bank. The approach of boats scarcely stirs them from their piscine dreams.

Beyond Toulouse one has left Gascony behind and is well into Languedoc. Gascony, Languedoc, Provencenames how redolent of history and ronance From many remote blood strains and from constant transpyrenean infiltrations has sprung up the Midi typedark-skinned, glowing-eyed, often Saracenlike.

THE COLLIERVILLE HERALD

COMPANY TRYING TO GIVE AWAY BRIDGE

Two Cities in Quandary as to What to Do.

Omaha, Neb .- The cities of Omaha and Council Bluffs are up against an unique proposition. The street railway company wants to give its big bridge over the Missouri river connecting the two cities to them. There's no catch in the proposition. In fact, the company has placed a deed to the bridge in escrow with the presidents of five Omaha and Council Bluffs banks, to be delivered in six and one-half years, without the payment of a cent by the cities, without the remission of a cent of taxes, or without payment in any way. The only condition is that the cities shall not build a municipal free bridge within one mile of the street car bridge within the six and one-half years.

That bridge is taking in approximately \$40,000 every month in tolls. The company values it at more than \$4,000,000 and it is paying interest on an Investment of over \$6,000,000. The lowest estimate placed on the structure by engineers employed by the city is something over \$2,500,000. Cities Hesitate.

Both Omaha and Council Bluffs hesitate about accepting the offer of the company to give the cities that bridge. For three or four years both Omaha and Council Bluffs have been talking free municipal bridge. Two or three years ago the city tried to buy this bridge, but the company refused to sell at any price. There was an election and the voters refused to sanction bonds necessary to make a purchase by condemnation proceedings. Then question of a municipal bridge died down; but about one year ago it came up again, with more energy than ever. Committees have been appointed by two or three different bodies to dicker with the rallway company for he purchase of the bridge.

The most popular plan proposed is to build a competing bridge across the river one block below the street car company's bridge. Then somebody clogged the wheels by proposing three free bridges, one in the center of the city and on at the southern end, with third bridge at the northern end.

This caught the fancy of the residents of those sections, so that Omaha found itself faced by having to build three municipal bridges if it went into the bridge ownership at all. Council Bluffs went ahead and voted bonds for \$400,000 to pay that city's share of the bridge. Omaha was expected to put up the balance. The Supreme court has declared Council Bluff's bond issue illegal. Omaha has not voted on the proposition but may do so this spring.

Railways Step In.

Then the rallway company threw a bomb by offering to make the city a present of its bridge. It is assumed there will be no toll, if the city takes over the company's bridge, and the company asks that its street cars be allowed to cross the bridge just like other vehicles, the company paying a proportion of the upkeep, but paying no tolls. The \$40,000 monthly collected in tolls would go to the cities until the property is paid for, after which the bridge would be free. The company says no formal action

by the city councils is necessary. The ompany is going to give the bridge to the cities whether the city councils accept it or not. The only way the two citles can keep from accepting is to start building a bridge close to the old structure.

LIGHTS & GRANT of NEW YORK

The True Artist

Happy is the man who has found his work-but one doesn't run across many such, in New York or anywhere else. A young soda hustler, who waited on me the other day, seemed to exemplify the proverb. Business had been brisk and he was kept on the hop. Then came a lull and he paused a moment to talk with a friend who occupied the stool next to mine,

"I'm surprised to see you back at the game, Charley," said the friend. "I thought you had quit it for good." "No," said Charley, who may have been putting over big business mergers or something like that during his absence from the fountain, "I just couldn't be happy at anything else. This game certainly has a fascination all its own. Yes, sir, pineapple soda and no whipped cream."

. . Incongruity

He was six feet six inches tall, if he was a foot. He was broad in proportion. When he walked from the shuttle train to the west side subway platform everybody turned to look at him. The little woman who was walking with him drew the big fellow into a quiet corner, just at the edge of the tides of travel. "Now, honey," I heard her say to

the giant as I passed the couple, "don't forget to bring home a pound of cof-. . .

Bootblack De Luze

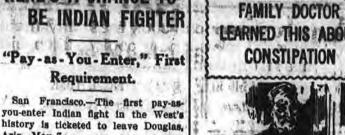

A bootblack of character is Tony, who has his stand on Canal street Tony looks as if he had just alighted from his limousine and was on his way into a Wall street office for a day's session with the stock ticker. He wears a top hat and a cutaway coat with a rosebud boutonnierd, and as he slaps the polish on one's shoes he smokes a big cigar. He adopted the formal costume only recently, and declares that it has increased his business 25 per cent. He uses no push and go to drum up trade. Never does he yell. "Shine 'em up !" as all the other bootblacks do. He inquires quietly, "Will you have a shine, sir?"

. . . One Way to Put It

A hotel guest recently made up a bundle of linen and sent it to the hotel's laundry. Accompanying it was a list of the articles. The next morning a card was delivered to the guest. It read: "Your list calls for one pair of pajamas. We received one-half pajamas."

. . .

The Sleeper It happened the other night at an uproarious comedy. Someone, somewhere, was sleeping through it all. His snores were far from gentle, and a whole section of the orchestra was first amused, then annoyed. The buzzing of the slumberer caused waves of titters to sweep over the house, and the players on the stage, thinking the applause was for them, redoubled their efforts. Finally, when the house lights went up at the end of an act, the sleeper was located. He was a large, bald, tough-looking man. By common impulse a dozen members of the audience threw their programs at

Ariz, May 7. It's not a private fight, this Fimbres expedition against the Apaches of Old Mexico. According to promotional material, any genuine Injun fighter, amateur or professional, may sign up and go to the war if he is possessed of good moral character and approximately \$210 American gold.

HERE'S A CHANCE TO

The announced purpose of the expedition is to rescue from the Apaches the seven-year-old son of Francisco Fimbres, asserted to have been kidnaped at the time his mother was murdered October 26, 1926.

Regarded With Amusement. The Apaches are camped at the

Canyon of the Caves in the Sierra Madre mountains, 165 miles south of the international line. The expedition is to make a surprise march against them, confident that no Indian chieftain has read the newspapers and complicated the situation by going away from there in the interim.

The international aspect of 125 Americans marching into Mexico in pursuit of Indians who are strictly the property of the southern republic has been neatly taken care of by enlisting the entire company as a volunteer militia unit of the Mexican army. The expedition is regarded along the border both with amusement and interest. The amusement is due principally to the Yankee promotional basis upon which the expedition is being organized and financed, and the interest attaches because of the number of prominent Douglas citizens who head the enterprise.

A Good Vacation.

Mayor A. C. Karger of Douglas is president of the Fimbres Apache expedition, and Chief of Police Leslie Gatliff is in charge of personnel.

Chief Gatliff, asked for details, said : "We have a rather unusual undertaking, but the way enlistments are coming we ought to have between 75 and 100 from the outside and there will be about 20 local men in the organization, it now seems certain." With the true cameraderie of the West, the chief added :

"Why not join us and get the best vacation you ever had, a delightful experience, a fine comradeship, and see some of the most wonderful country God ever made?"

It is officially estimated that the expedition will be active for 30 days after the start, May 7. Best accommodations are offered visiting Indian fighters for about \$7 a day-to be paid by the said Indian fighters, not the expedition nor the Mexican army-and much of the food will be obtained by killing wild game.

More than 140 Douglas business men are listed as sponsors of the expedition, of which number at least 20 will go along, according to Chief Gatliff.

Indians' Unfed Horses **Filch Hay From Cars**

books.

Dr. Caldwell loved people. His years of practice convinced him many were ruining their health by careless selection of laxatives. He determined to write a harmless prescription which would get at the cause of constipation, and correct it.

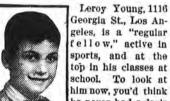

Today, the prescription he wrote In 1885 is the world's most popular faxative! He prescribed a mixture of herbs and other pure ingredients now known as Dr. Caldwell's Syrup Pepsin, in thousands of cases where bad breath, coated tongue, gas, headaches, biliousness and lack of appetite or energy showed the bowels of men, women and children were sluggish. It proved successful in even the most obstinate cases; old folks liked it for it never gripes; children liked its pleasant taste. 'All drugstores today have Dr. Caldwell's Syrup Pepsin in bottles.

'ellow," active in sports, and at the top in his classes at school. To look at him now, you'd think he never had a day's

sickness but his mother says: "When Leroy was just a little fellow, we found his stomach and bowels were weak. He kept suffering from constipation. Nothing he ate agreed with him. He was fretful, feverish and puny.

"When we started giving him Callfornia Fig Syrup his condition improved guickly. His constipation and billousness stopped and he has had no more trouble of that kind. I have since used California Fig Syrup with him for colds and upset spells. He likes it because it tastes so good and I like it because it helps him so wonderfully !"

California Fig Syrup

courses intersect at Agen. One suddenly finds himself cruising between two seemingly endless walls of masonry, and the scenery begins to drop out of sight. First the trees, then the dim hillsides, sink disquietingly away into nether space. It is the canal-carrying aqueduct, which floats barge traffic high in air across the wide valley of the Garonne.

Prehistoric Neighborhood.

From Agen an interesting pilgrimage can be made to Les Eyzles' grottoes where can be seen the habitations of Pielstocene man. It was in the early sixtles that Les Eyzles' grottoes yielded finds of flint and horn implements, human skeletons, and bones of extinct animals. Subsequently these formed a basis for calculating the chronology of the Stone age.

Between the rude representations of animals, scratched by primitive man on his cave's walls, and the art which caused Molssac's cloister columns to bloom with flowenlike beauty, lies all the mystery of the timeless miracle of mental evolution.

Long before one enters the Canal du Midi at Toulouse, one realizes how well named is France's "Midi." This is the French word for midday. In summer and autumn it is a country of withering heat, shuttered houses, white roads, and dust-covered follage, under a brilliant, cloudless sky.

Toulouse-alas for the betraving charm of its name !-- sprawls commonplace and disconsolate-looking, as if depleted by centuries of sunstroke. Of the medieval city that was the seat of a powerful countship and the scene of religious wars, little remains but St. Sernin's Romanesque pile, named for St. Saturninus, who was dragged behind the bull he had refused to sacrifice on Jupiter's sitar, to recall Toulouse's architectural past.

Old Custom Retained.

With one other exception what the visitor would expect of that highsounding name is discoverable only in histories.

This exception is the curious spectacle of forty citizen patrons receiving nine gold and silver flowers from La Daurade's high altar, then defiling through Toulouse to award these artificed amaranths, marigolds, and other biossoms in a poetry contest, and final-ly bymning a sulogy on the fest(val's

Busy Market-Day Scenes.

Castelnaudray tempts one ashore for that busiest of sights, a market town on market day. One of its leafy squares is reserved for vegetable sellers, a sec ond for poultry and game, and a third for horse dealing. Down one street come cartfuls of huge hampers containing mixed families of ducks and rabbits. Down another come peasants blcycling into town, with geese sitting sedately arow in trays attached to the handlebars.

Trade is brisk, and by noon the world and his wife are walking home ward with souirming rabbits and cackling chickens under their arms. As for the horse fairs in Rosa Bonheur's native countryside, they are just such animated sights as her famous canvases portray.

Carcassonne, on the Midi canal, is two towns in one. The Cite is com pletely dissociated from Carcassone's Ville Basse, or lower town. The former is a steep hill, its crest encircled with mighty walls, hardly less than a mile around, thronged with tall towers showing candle-snuffer tops-the epito me of high-perched, drawbridge-guard ed medievalism, profiled against fleecy clouds adrift in the blue,

For 15 centuries it has stood thus, The Cite of Carcassonne,

Beyond the fact that the Roman empire gave self-government to Carcaso. as it was then called, and classed it as a "noble" or "elected" city, little of Carcassonne's history emerges until the Fifth century. It was then that the Visigeths fortified this strategic point which commands half a dozen Pyrenean passes, by erecting the Cite on the ruins of Roman ramparts, utilizing their knowledge of Roman fortifica tions.

For 1,500 years these fortifications have been accumulating the cobwebs of history. Here East met West and North met South, in the succession of foreign conquerors who came and went, now besieging the Cite and now modifying it into what was acclaimed by Violiet-le-Duc, its chief restorer, as the most picturesque and most hearly perfect example of a medieval fortress,

The municipalities may try building a bridge only a block from the railway bridge and thus lose the bridge already built, and which would cost the cities nothing at all.

Brest Monument Rises as Tribute to U.S. Navy

Brest, France.-- A monument to the United States navy and its operations during the World war is under construction at a point overlooking the Atlantic ocean near here.

The city of Brest, port of arrival for a majority of the United States soldiers, is assisting the American Battle Monuments commission in the construction, which it is expected will be completed within 18 months. The monument will consist of a polished granite tower 40 meters high, polsed on a base decorated with bronze stars entwined around a giant anchor.

A staircase will allow visitors to climb to the top of the monument, from which point an exceptional view of the Atlantic and Brest may be obtained.

Bodies of Three Indian

Fighters to Be Reburied

Glendive, Mont.-Remains of three ploneer soldiers killed in Indian skirmishes in early days, will be exhumed and placed in a cemetery with proper markers. The Glendive American Legion post has written the War department for the identity of the slain soldiers, and the exact location of their last resting places, believed to be in Yellowstone valley, three miles south of Glendive.

Horse Diets for Years

Westfield, Mass .- A forty-year-old orse, owned by Dr. Eugene Shurtleff of Boston, has died here after living for several years on a specially-prepared diet required after it lost all its teeth. In its younger days the animal used to take the doctor from the railroad station here to his summer home in Blandford.

You Can't Catch Up on Sleep, Tests Show

hoy,

Hamilton, N. Y .- Sleep tests, now being conducted at Colgate university under the direction of Dr. Donald A. Laird, have revealed there is no such thing as "catching up" completely by sleeping an abnormal length of time after a sleepless night.

"Snake Bite" Healthy

Windsor, N. C .- One out of every 133 persons in Snake Bite township. Bertle county, is over eighty years old. The population is 2,000.

Average Man Worth \$1.25 in Chemicals

London.-The average man is worth approximately \$1.25 in chemicals, according to an analysis made by the medical staff of the national health insurance committee.

The analysis shows that the verage man has in his body: Fat enough for seven bars of soap.

Iron enough for one mediumsized nall. Sugar enough to fill a shaker. Lime enough to whitewash a chicken coop. Phosphorus enough to make 2,200 matches.

Magnesium enough for a dose of salts. Potash enough to explode a toy cannon, and sulphur enough to rid one dog of flens.

My Strength

"My little daughter was born on a mestead in northern Alberta. I had four other children and I worked so hard that I suffered a nervous breakdown. The doctor's tonic did not seem to help me and when a friend told me about Lydia E. Pinkham's Vegetable Compound, I began to take that instead. I kept on until I felt well again. It brought back my strength. Today I can do anything. thanks to the Vegetable Compound." -Mrs. William Parent, 1415 W. 6and were, Secule, Washington.
