BY JEAN ANDERSON

It was of much interest to us then Mr. Wylie G. Borun aid a visit to the Herald office is week. We had read a notice the Press-Scimitar saying that Mr. Borum was at home in Mylie Borum demphis from his work at the merican Embassy in London. he article also stated that he ormerly lived in Collierville. Juite a few of the people here vill remember him and welome him back to Tennessee.

An editorial written by W. I. Nilson. Instructor in Journal-m at the University of Misssippi, has caused much favor ble comment among newspaer people. In it Mr. Wilson peaks of the country weekly a private business of direct public concern. He says that a ive newspaper means a live own, a good place to live in and trade in. He also stated one of the best definitions of news ve have ever heard when he aid, "News is a clear, accurate and interesting statement of hatever the local people are several years serving in Ameritoing, saying, and thinking as to may be of public concern."

Sweden: Berlin Germany Co., Sweden: Berlin Germany Co., His last statement, "as it may e of public concern," indicates the items are to be news and not gossip.

Memphis, formerly the world's largest inland cotton market" has advanced to the ganize the Tennessee National rorld's largest cotton market, title of which she may well be has asked the State Department proud. Those of us who are for an extended leave so he can Memphis' close neighbors are comply with the Governor's reproud of her advancements and quest. achievements.

Thirty million people have ome to our country from foreign lands to gain liberty and security since our constitution FIRE BURNS WOOD SHED was adopted in 1787. America has, so far, lived up to the expectations of freedom and sefaith in these qualities so that was extinguished before the America will always be in the servant room was destroyed. position to offer these to imnigrants.

Last Tuesday we paid our irst visit to the Bookmobile, the library on wheels' which comes to Collierville and neighboring towns each week, and we Detroit, won the National Spellwere delighted with its service. ing championship today, the work sponsored by the Cossitt since 1927. Library of Memphis and the interest in it was proven by the large number of readers who Ohio, who misspelled her 102nd came to choose new books and return those they had read. Reading and enjoying books is first prize a moment later when thing out of life and we should appreciate this service of the Memphis library.

Here is a statement we heard recently which we would like to pass on to you; It is well to remind ourselves that America is not great because of what it has, but because of what it does and the way in which it does it." It sounds like conceit, but it is an expression of the way Americans regard the greatness of this country we will have to

Last year, life insurance comianies paid American families an average of \$7,397,00 a daywhich was twice the average of

In other words, life insurance ayments, each day, would have bought 7,000 automobiles, buil 2,000 homes, or started 700 businesses with a capital of \$10,000 each. Multiply that by 365 and you get an idea of what life insurance means to this country each year.

WEEKLY NEWS ANALYSIS

By Edward C. Wayne

Sinking of Battleship Hood Indicates Failure of British to 'Bottle' Nazi Navv: Germany's Aerial Invasion of Crete Called 'Test-Tube' for Raid on England

(EDITOR'S NOTE—When epinions are expressed in those columns, they are those of the news analyst and not necessarily of this newspaper.)

PACE UP: War Swift

As the United States began to swing into the serious business of getting first-class aid to Britain under the lease-lend bill, though with continued and serious heckling from anti-administration quarters, the Germans suddenly stepped the war up to a furious pace not heretofore dreamed of.

The full-scale aerial invasion of Crete, plainly hailed by the Nazis as a "test-tube" attack for the ultimate invasion of Britain, was the first move, and this was accompanied by news from the ocean lanes that showed the German fleet, instead of being bottled up, was boldly sallying forth not merely into the North Sea, but far out into the Atlantic and near the American zone of protection-Greenland.

The dramatic sinking of H. M. S. Hood came with such unexpected suddenness that it left the world al-

SEN. JOSEPH GUFFEY

In the Hood's sinking he saw that demonstrated immediate "necessity

It was in the Battle of Jutland

that Admiral Horace Hood, name-

sake of the 42-000-ton battle cruiser,

lost his life on the Invincible, a ves-

sel of the same relative class as the

Hood, and destroyed in, oddly

enough, exactly the same manner.

the tale of a sea fight between two

naval squadrons on the broad At-

lantic, both far from their bases.

The Hood was the victim of an "un-

lucky hit" as the British reports

said, a 15-inch shell from the Ger-

man battleship Bismarck striking a

magazine, which caused the main

magazine to let go, blowing the ship

up and sinking her in a matter of

Most of the crew of 1,304 were

drowned, presumably the captain

But back of it all questions were

asked and only some of them had

the answers forthcoming from Brit-

One of these was the query of why

the battle had taken place so far out

on the Atlantic. The British an-

swered this by saying that their

squadron had deliberately let the

German ships get far away from

their base in order to intercept them

where they could not avoid battle.

German vessels were headed for, be-

ing intercepted between Greenland

and Iceland, and nearer to Green-

land. This was of especial interest

to American naval men because

of the fact that the United States

had lately pledged itself to the pro-

tection of Greenland. There was

Naval men in this country imme-

diately, however, were quoted as

saving that the loss of the Hood

showed that it was improper to sac-

rifice strength of armor-plate to

speed, the Hood carrying 12-inch

armor where most vessels took 14-

inch, in order to achieve a 32-knot

American vessels were not so con-

structed, U. S. admirals reported,

especially those now being planned.

But boiled down the news bore a

disastrous note, a power note on the

part of the German assault both in

the battle of the Atlantic and that

of the Mediterranean which gave

general moody outlook on the con-

American backers of aid-to-Britain s

duct of the war.

no immediate answer.

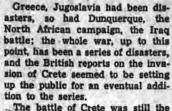

Another question was where the

ish sources.

ship and bore the admiral's colors.

The story was dramatic enough,

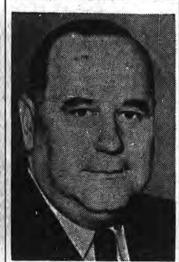

. . utmost aid to Britain."

most exciting news event of the whole war because of the peculiarity of the conditions, paralleling, in way, the expected invasion attempt againsi Britain.

The British were admittedly in good force, with Greek assistance, on the island, and while they had not had much time to prepare its defense, having only lately fied there from Peloponnesus, still the Germans had not had any more time to prepare their offense than the

The campaign resolved itself broadly into two phases—the airborne and the sea-borne. In each

Washington Digest High Wages, Crop Loans Threaten Cost of Living

Price Control Measures Considered Likely: 'Peace - Lovers' Picket White House; Hull Reveals Post War Plans.

By BAUKHAGE

WNU Service, 1343 H Street, Washington, D. C. Dollars!

At last they are beginning to worry Washington. Not the ones going out of the treasury-we can take that in our stride. But the ones rolling into pay envelopes and starting to burst forth again is such excitement that everybody is afraid that the noise is going to scare prices up a tall tree.

Wages today are the highest in history. And as one official remarked to me: "If something isn't done we'll have inflation and a slump that will be streamlined. It will make the old-timers wish they had their old Model T depression back again."

Some people put the blame other places but this is the story that friends of the administration tell. Leon Henderson, price czar, hoped

to keep prices from running away by using moral suasion or legal effort to keep industrial prices from going beyond a certain level. There were two reasons for that: to get down costs in essential defense commodities; to control prices on basic materials like steel which always take other costs up when they rise themselves.

Next, to achieve a balance between agricultural prices and others, the government would support farm prices up to a certain point. Lastly, a certain amount of elasticity in wages would be allowed in order to prevent strikes. But what happened?

Wages Reach Peak.

Workers demanded, and as I stated, are getting, the highest knows of his 34 years with wages in history. Workers wanted Then the friends of the farmer while the cutting was good. And so congress voted an increase in crop loan rates, which the President said might push certain products above

And so the result is more dollars man behavior lying outside and be- for the consumer to spend and less

When the demand is big enough and the supply is small enough it asked at least to try to amend it. In other words some drastic price control measures will be taken. A flat ceiling will be established for certain goods and then, unless a method is adopted for getting folks to lock

'Peace' Pickets Muddy the Water

"Muddying the waters"-it seems to me that I have heard that phrase more and more often recently. There s a good example of it right in front of the White House every day-in fact 24 hours a day while the American Peace Mobilization pickets stroll backward and forward, day and night.

I watched them in the bright sun of noon. And as I looked at each face-we stared brazenly at each other-I felt sure some were sincere believers that war of any kind was wrong-some were fanatics joining a cause for the sake of joining. Some were simply indulging in an exhibition complex and some were cleverly "muddying the waters."

The leader of the line was a girl in a military cut jacket; she was carrying a United States flag. She looked straight at me as she approached and as she drew nearer I noted the strong oriental cast of her features. Next to her was a man carrying

a placard and a lantern (the light of peace). He had deepset eyes that burned with the light of the fanatic. Gray hair, sunken cheeks, the stoop of frustration. You have heard the type rant on any emotional subject. He shuffled past. Man Is Self-Conscious.

Next was a serious-looking, average man in glasses. He was the only one who looked at me a little self-consciously. He carried a banner with the commonplace request

were two of them guarding the pickets who had been attacked at least twice by overpatriotic soldiers. Two more bluecoats stood at the White House gates for when there are demonstrations no one can enter the grounds without proper identification. As I went in I heard one of them reporting at the call-box

to "join the peace movement."

was feeling a little self-conscious

myself, so I grinned at the police

men and they grinned back. There

'everything going fine out here." But I wondered. Hull Tells Plans For Post War Peace

Just a simple bourgeois, I. A thing of shreds and patches, Of fiscal bumps and scratches, And monthly bills to pay.

With apologies to Gilbert and Sullivan, I modernize Nanki-Pooh from the Mikado hoping there will be no reprisals. For sometimes I think it is time the bourgeois who seem to be so unpopular (until the guns begin to shoot and the taxes are levied) deserve a word or two. And so on one Washington sum-

mer day recently when I was wakened by the birdsong in the neighboring invisible elms I had a surprise that pleased me. As I opened the door and reached for the milk, the morning papers and the rent bill, my sleep-dimmed eye caught a cheering headline:

HULL DEFINES OUR POST-WAR PROGRAM WANTS RAW MATERIALS TRADE FOR ALL That was the first hopeful mes-

sage for the average guy, that my weary eye had met in a long time. You may recall that in this year of our discontent, one of these columns began this way: "There is a peace-machine in Washington, all oiled and ready to start the moment the last gun is silenced in Europe. From it may come a plan which the democracies can offer to the world as an alternative to the totalitarian way of life."

And at last the good, gray and stubborn gentleman in the state department trotted it out to hold up to the struggling world; a promise instead of a threat, a hope instead of

Two hours later a philosophical Communist friend was sniffing at it as we walked past the treasury building. "Back to the old order." he said contemptuously.

Half an hour later a genial con servative was laughing at it-"Give me good high tariffs," he said, as if he were contemplating a slice of

uicy roast beef. Perhaps, as an old-style bourgeois, I should have agreed with that, but I am a bourgeois, new style. I don't know anything about economics but I know what I like-I like to think that Secretary of State

Hull is right when he says that the seeds of war take root behind any artificial barriers which keep people from getting their share of the earth's bounty.

Five Points in Program.

Mr. Hull's program is the one he has lived by since his early days in congress and the "five points" which he outlined to the world are his credo-no extreme nationalism which would enforce excessive trade restrictions; non-discrimination in international trade relations: raw materials of the world available to all nations; international agreements to protect the consumer countries and their people: international finance run so that all countries can develop their essential enterprises.

If these conditions were explained to the middle-class people of the world today, in Britain and Germany, in France and Italy, in terms of the kind of life Mr. Hull believes his plan would bring, and if those people could be convinced that such a plan would be carried out, I'll wager they would turn their guns and battle for these five points under any honest leader.

Unfortunately there were, once upon a time, 14 points which Woodrow Wilson offered as the basis of peace in 1918. And all those little points were broken off short by the gentlemen in Paris who thought they had a better scheme.

They made a peace which we learned to our sorrow, was just a "thing of shreds and patches."

BRIEFS . . . by Baukhage

One of the diversions of Washington newsmen is listening to verbal exchanges between Joseph Chang, Chinese correspondent, and Mitsui Kato, Japanese correspondent here in the capital. After a recent conversation between the two in which.
Kato assured Chiang that the Chinese were already talking peace, the latter remarked: "It's a good thing I have American training in humor."

The largest telegraph office in the government is located in the de-partment of agriculture. Last year two major telegraph companies did a million dollars' worth of business from this one federal agency.

Kindly Draft is the name of a young man registered for selective service training in Alken county South Caroline.

REFRESHMENTS PLUS!

Summer nears. You think of lots of things-new, crisp, cool clothes . . . vacation trips . . . gardening . . . and yes, even parties, especially gay ones that call for a minimum of "home work."

I think I understand. You love to have people in your home. In spite of the warmness of June days, you want those of your friends who remain in town to drop by often for conversation, relaxation and refreshments. But, of course, you want what you serve to be easy to make, delicious, entirely different from any thing that you've ever served before, and economical. In the last two of these points, I've found homemakers hold a unanimous opinion.

So today I'm going to give you what I think are ace-high ideas on easy entertaining. I'm sure you'll find the recipes worth trying.

Dessert bridge parties will do wonders to round up the "Mrs."
crowd who feel

free, after feeding hubby and the children, to don dress - up frocks and skip out for dessert and an afternoon of fun. If your friends

don't play bridge substitute another hobby, but the serving of dessert upon the arrival of guests can nevertheless be carried out.

Serving dessert when guests arrive gives the hostess lots of lee-She doesn't have to keep in mind that her friends will be going home to dinner soon, as she does with later-on refreshments. And, she can provide a really filling des-

Pictured at the top of the column is a dessert which I'm sure will answer your desires. It's

Tropical Gingerbread.

2 eggs % cup brown sugar % cup pure molasses

cup melted shortening

2 teaspoons baking powder

1 cup boiling water

2 teaspoons ginger 11/2 teaspoons cinnamor

1/4 teaspoon cloves

1/2 teaspoon nutmeg

1/2 teaspoon baking soda

teaspoon salt Add beaten eggs to the sugar, molasses, and melted shortening; then

add the dry ingredients which have been mixed and sifted, and lastly the hot water. Bake in small individual pans, or in a greased pan, in a moderate oven (350 degrees F.) for 30 to 40 minutes. Top with whipped cream and sprinkle with shredded

With this dessert, you'll want to serve a beverage . . . coffee, tea or perhaps an iced drink of fresh fruit mixture.

Vanilla mousse is the basis for a number of appetizing desserts, and is a good party refreshment in itself. Among the many variations are peanut brittle and chocolate fudge mousses.

To make the vanilla mousse, fold one cup of confectioners' sugar and two teaspoons of vanilla into one quart of heavy cream that has been whipped. Fold in four egg whites which are stiffly beaten.

Spread the mousse into two large refrigerator ice trays and place in the freezing compartment of your refrigerator, or, freeze in your ice

LYNN SAYS:

In thinking of party foods, I remembered these few sugges-tions my mother passed on to me. Maybe you'll find them helpful.

To remove pecan meats whole, cover the shells with boiling water and let them stand until cold before cracking them.

Chocolate cakes usually call for unsweetened chocolate. This with the cake mixture much better if it is cut in small pieces and melted, rather than

Rhubarb juice is a good substi tute for iced tea as a basis for iced fruit drinks.

Carol Coburn, Alaska-born daughter of a "bush rat" who died with an un-proved mining claim, returns North to teach school. Sidney Lander, mining engineer, rescues her aboard ship from annoyances of Eric (the Red) Ericson.

CHAPTER XI

Life is like a husky-dog that refuses to be entirely tamed. Quite unexpectedly the old wolf strain breaks

Several weeks ago I'd arranged to have young Olie Eckstrom bring me a quart of milk every morning. And I looked forward to Olie's daily visits. For I liked Olie and Olie liked me. I liked the flash of his boyish wide smile and the friendly warmth in those sky-blue Scandinavian eyes of his. He was always glad to fill my water pail and do some trivial little chore for me.

But one day, instead of the towheaded Olie, it was his little sister Frieda who proudly toddled to my door. She made a funny figure as she stood there in her patched old corduroy trousers (plainly inherited from Olie) and an equally abraded old wolfskin coat that was much too big for her. She buldn't have been more than six years old but she showed an active interest in my school crayons and building blocks. After she'd pored over a picture book or two I tied her up in her wolfskin coat, gave her an apple and started her off for home,

There was a feeling of Spring in the air. I noticed that my shack eaves were dripping and my doorward drifts were diminishing.

But about midafternoon Olie appeared at my door. He stood there sert for your guests, serve peanut with his wide smile.

brittle mousse. To make it, crush "I ban come for Frieda," he an 1/2 pound of peanut brittle with a nounced. rolling pin and fold into the vanilla "But Frieda went home hours mousse before it becomes solid ago," I explained with a faint chill-

ing of the blood. His face, as he stood frowning over that, became suddenly mature. She had, not come home, he said, and his mother had thought that maybe I had kept her for dinner.

We began the search by first look ing through the outbuildings and skirting the clearing edges where the shadows were growing longer. It was foolish, I suppose, but I kept calling out, "Frieda! Frieda!" as I went. And there was, of course, no childish answer to that call.

Then we went back to the road and examined the muddy ruts and the sun-softened snow for any betrayingly small footprints. But there was nothing there we could be sure of. "Perhaps," I told the solemn-eyed

Olie. "she's home by this time." I pinned my faith on that hope But it proved to be a hollow one And the stricken look in Mrs. Eckstrom's eyes did not add to my happiness. She called her husband, who came from the stable with a hay fork in his hand. The smile faded from his wide blond face as Olie explained the situation. The sun, I could see, was already low over the mountain tops. And every hour counted, with night coming on.

"We've got to have help," I told them. "We've simply got to find that child."

Katie's Indian baby, the abandoned little papoose who'd been found in the valley birch grove. And the god from the machine, on that occasion, had been Sidney Lander's sheep dog.

"Olie," I said, "could you get on a horse and hurry over to Sock-Eye Schlupp's? There's a man there named Lander, who has a dog called Sandy. And something tells me Sandy might find Frieda."

It wasn't Sandy I wanted, I'm afraid, as much as Sandy's master. | ended. He was off like the wind.

Lander arrived more promptly than I had expected, with Sandy at his heels. I noticed, as he swung he hurried over to us, was stern but not excited. And he didn't stop to ask many questions.

"I'm having Sock-Eye notify the settlers," he said. "When they get here, tell them to strike north and Make and bake the Cream Sponge south of the trail at fifty paces apart. Let 'em work a half mile each way. Meanwhile, soak And when they've finished their trip gelatin in cold in and out have 'em report at the water 5 minutes. Jansen shack." Place beaten egg

He turned for a moment to the lost child's mother, who was quietly weeping in the doorway. "That's all right, Mrs. Eckstrom. We'll find your girl for you."

There was such assurance in that deep-timbred voice of his that I half-believed him.

Then, for the first time, he looked squarely into my eyes. "It's only trouble," he said in a lowered voice, "that seems to bring

us together." "We haven't seen much of each other." I answered, resenting the quaver in my voice.

"Isn't that what you asked for?" he demanded, almost sharply. "Was it?" I temporized, arrested by the deeper lines in his face.

But Mrs. Eckstrom's wailing call for someone to find her Frieda cut short the answer he seemed about

to make. "You'd better come with me," said after a second brief study of my face. And my heart, at that nd, gave an absurd little leap

Lander is engaged to Barbara Trumbull, whose father is fighting Coburn's claim. Lander breaks with Trumbull and moves to Sock-Eye Schlupp's shack. Carol gets a school job at Matanuska. Barbara visits her and Carol says she INSTALLMENT IX

"And you, Eckstrom," Lander called back over his shoulder, "line up the men when they get here. And you. Olie, ride straight over to the station and tell the agent there to get the marshal. Tell him to wire up and down the line for any

I didn't resent the brusqueness of "How old is that child?" he asked as we reached the open road.

men he can get here. This calls

for fast work. So come on!'

"About six." I answered. And that struck me as such a pitiably small figure that I was prompted to add: "She seemed quite a sturdy little tyke."

"How was the child dressed?" he

I told him about the old wolfskin

"That's in her favor," he said as he hurried on. "And a child of six wouldn't go far in country like this. She couldn't." He glanced about the darkening bowl between the laven-der-tinted hills. "She's somewhere within a mile of us.'

"Won't Sandy help us?" I asked "He hasn't enough to work on," Lander explained. "Or, rather, he has too much, here on the road. He

mile of us."

wouldn't know what's expected of him. A hundred different feet have passed along this trail."

Lander left me and pushed his way in through a tangle of berry canes, with Sandy whimpering at his heels. That, for some reason gave me a flicker of hope. But it resulted in nothing. Man and dog worked their way back to the road again and once more Lander sidled along the ruts. step by step, studying the broken surface. I saw him rather abruptly of last year's fireweed, and drift away across a flattened meadow of wild hay. I thought, for a while, that I was both deserted and forgotten. But he circled back to me, in the end, a little breathless from running.

"Come on," he said. "I've struck a trail."

It was easy to follow him, since the meadow, for all its roughness. sloped downward. But I remembered, with a gulp, where that slope

"Aren't we going toward the river?" I asked.

"Yes," he answered. Lander turned when a scattering down from his horse, that he had a of white birches barred our path, flashlight in his hand. His face, as and veered off to the left, penciling the ground with the ray of his flashlight as he went. He stood in doubt, when we came to a spruce wood, but pushed on again, skirting the gloom of the close-serried trees. Then he suddenly stopped and showed me a mark on a mounded snowdrift. It didn't mean much to me. But the excitement in his voice was unmistakable

"That," he said, "is a child's footprint." He called Sandy to his side and

talked to him. He pushed the dog's nose down in the snow and patted him and started him off with the cry of, "Find her, Sandy!"

But Sandy disappointed us. He struck off in the darkness, quivering with excitement, only to circle back to us and whimper at his mas-

Then a cry came from Lander. The beam of his flashlight had fallen on an empty tin pail, lying beside a fallen spruce bole. One glance at it told me it was the pail in which the Eckstrom milk was daily carried to my door. That sent Lander running about in an ever-widening circle, sweeping his flashlight from side to side as he went. I could hear, for the first time, the sullen roaring of the river under its tangle of

ice. And I didn't like the sound of it. He rejoined me, as I stood there with a new chill in my blood, and thrust the flashlight in my hands. "We've got to have help here," be said. "You keep Sandy and the

One of Carol's pupils is Salaria Bry-son, a big, out-doors young woman, also in love with Lander. Salaria can hardly read but she is

flashlight when I go back for the men. And blink the light from time to time, so we can place you." "All right," I agreed, as quietly as I could.

"Can't you find her, Sandy?" I said as I stood with my fingers hooked through his collar. For it would be natural, I knew, for the dog to follow his owner. I let him sniff at the pail as I held him trembling against my knee. Then be suddenly whimpered and broke loose. And I realized, as I staggered after him in the darkness, that I had failed to keep a part of my promise. He was off.
I could hear his bell-like barks in

the cold night air as he quartered off from the woodland and crossed a treeless slope that led to a hayfield as level as a floor. It was a stretch of open land, I could see, where ome homesteader the summer before had cut wild hay for his stock. But Sandy, instead of racing after his master, seemed to be crisscrossing about this open foor windrowed with its sun-shrunken snowdrifts. He came back to me, barked twice in my face, and was off again.

I followed him, as best I could, wondering if his excitement was due to a fox or even some larger animal prowling about in the gloom. But I found him, at the meadow edge, with his nose buried in the tumble of loose hay at the base of a poled stack covered with a faded tarpaulin. His bobbed tail, I noticed, was going from side to side like a metronome.

I dropped down on my knees beside him, pawing away the loose hay. Then I suddenly stopped. I shrank back, with a quick little curdle of nerve ends. For my bare hand, pushing deeper, had come in contact with warm fur.

I was sure of that. And I was equally sure that Sandy had smelled out a sleeping bear.

My one and only aim in life was to get away from that stack and hear the comfortable voices of armed men about me again. I ran stumbling across the drifted hayfield, wondering as I went why I could see no moving lights in the distance.

Then my flight came to an end. For I realized that Sandy, who was following me, did not approve of that retreat. His sharp barks were plainly meant for sounds of protest. He even came and tugged at my parka end, as though to drag me back.

I stood there, in my weakness, and hesitated. I must have stood in the darkness for a full minute, without moving. Then a second wind of courage took me slowly back toward the stack.

It wasn't easy to go back. But I shut my jaw and crept gingerly forward, wondering how I should defend myself if an aroused wild animal lumbered out at me. My hand, I'm afraid, wasn't a very steady one as arm into the little cave under the stack shoulder, the cave where some

been feeding during the deep cold. It was quite a deep hollow. My arm, in fact, went in up to the elbow. Then it went still deeper. It went until I could feel the warm fur again. But, a moment later, I could feel something else. About it, strangely enough, was wrapped a coil or two of rope. And then I realized the truth.

stray deer or perhaps a moose had

It wasn't a sleeping bear: it was the body of a child in a worn wolfskin jacket. It was our lost Frieda. She roused a little and emitted a sleepy whimper or two as I caught her up and held her to my breast.

A great surge of relief swept through me as I heard the sleepy small voice complain: "Ah ban so hungry!"

"Of course you're hungry," I said, little drunk with excitement. And both Sandy and the half-awakened child must have thought that I'd suddenly gone mad, for I managed. in some way, to clamber to the top of the stack and there, standing up in the darkness, I shouted with all my strength. I called and called again, until an answering shout came back to me.

"They're coming, Frieda," I said as Sandy's voice belled out on the cold night air. Lander came first, a little out of breath, pushing Sandy away from him as he stooped over me

"I've found her," I said as I struggled to my feet in the loose hay. "She's all right." But, with Frieda in my arms, I wasn't sure of my footing. And a sudden sense of security went through me as I felt Lander's long arm encircle my waist and hold me up. He held me close in under his wide shoulder, for just moment, in what I accepted as silent gesture of gratitude.

"She's all right," he shouted back over his shoulder. And he took the child from my arms as the twinkling lanterns drew nearer. I could hear a cheer go up from the crowd and a moment later I could hear the saying over and over again: "My leedle Friedal My leedle Friedat" (TO BE CONTINUED)

Space Around Pipes

OUESTION: What do you recommend to close up the space between pipes coming up into a room, and the floor? In our apartment there is a space between the floor and the hot and cold water pipes, also the radiator pipes, wich I would like to seal up. The collars around the pipes are not sufficient

Answer: Because of the varying temperatures and vibrations in the pipes it is not possible to fill these spaces with cement of any kind. A piece of canvas cut to fit around the pipe might help. Tack one edge of it down to the floor, and tie the other edge around the pipe. Coat the canvas with white lead paste. Leaky Cellar

Question: In our new house water leaks into the basement from underneath the floor along the joint between floor and walls. Can this be stopped with waterproof cement? If so, will the water spoil the concrete in remaining permanently under the floor and around the foun dation during the wet season? There is no sewer and no place for drain-Answer: If the level of your cellar

floor is below the natural ground water level during the wet season, the only remedy is to apply membrane waterproofing inside the cellar. This consists of a layer or two of waterproof felt, stuck down with liquid asphalt, and held in place by four inches of reinforced concrete. The waterproofing should go up the walls to the outside ground level. Otherwise, lay drain tile under the floor around the edges, ending in a pit from which the water is automatically removed by a sump pump. Paint After Whitewash

Question: A wooden wall in my cellar was whitewashed. I washed off the whitewash, and then, after the wood dried, put on two coats of inside oil paint. The paint softened and would not stay on. What was the reason, and what can I do about

Answer: Although you took off the whitewash on the surface, some of the lime of which it was made, soaked into the wood and remained. This lime affected the oils of the paint and destroyed them. After taking off the whitewash you should have rinsed the wall with a solution of zinc sulphate crystals in water; two pounds to the gallon. This would have neutralized the lime, and the paint would not have been harmed. To apply this solution you must first remove the paint that remains.

Removing Wallpaper

Question: I have been trying to remove wallpaper in my living-room by soaking it with water; but the water seems to have no effect. What else can I use that will loosen the paper and let me take it off?

Answer: Your wallpaper must have a varnished or other waterproof finish. To take it off, go over it with coarse sandpaper wrapped around a block of wood, so that this finish will be cut. Water will then be able to penetrate to the paste. Begin soaking the wallpaper at one end of a wall, using a whitewash brush or large sponge, and work on the other end. Then return to where you began, and repeat. Continue until the water has soaked and the paste has been softened. If the paper sticks, scrape with a broad putty knife.

Wallpapering

Question: My summer cottage is about 60 years old, but in good condition. The living room and lower bedroom need papering. The old paper is quite smooth and tight. Must I remove it, or can the new paper be stuck on over it?

Answer: Yes, you can apply new paper over the old, providing the old paper is in good condition and is on tightly. The old paper will have to be sized first, of course. There is always the slight chance that the paste for the new paper may strike through and loosen the paste of the old paper, in which case both old and new papers may fall off.

Questions on Painting

Question: A correspondent asks if any of the following jobs can be done when temperatures are below freezing: Cold water painting inside of a cabin. Whitewashing outside. Oil painting and puttying inside and out. Outside plastering.

Answer: Any material or paint containing water or mixed with water should not be used when temperatures are at or below the freezing point. Cold water paint or whitewash can be applied when the temperature is above freezing, but oil paint will not give satisfactory re-sults if applied at temperatures be-low 50. The same applies to putty.

Subscription Rate \$1.50 Per Year, In Advance

The agricultural authorities tell us that at the present time we have the best prospects for a huge peach crop that we have had for many years. That is very encouraging as we can certainly take on a big crop of that fine fruit—none better.

The National Union Farmer, official organ of the Farmers Co-operative Union of America, is making a red hot appeal for the production of more food stuff this year. It is argued that with the army condition and millions of people back at work in the factories the home market will call for around 20 per cent more food this year than was consumed in 1940. Then in addition to the domestic de-mands much will be shipped to England and other countries over the sea, if it can be carried across. It is especially desirable that there be an increase in livestock and poultry products. It is logical to expect a better price, while the denfand is urgent. At any rate there ought to be a better price to the farmer who produces the food for the world. The farmer can get a better deal out of the situation if there be an orderly system of marketing, and it would not be necessary for Wednesday Evening Service . . 8:00 P. M. H. J. Rushing, pastor. the farmer's increase to come out of the ultimate consumer. Just give the farmer a reason profit above the cost of producbreaker because he certainly Recedes breaks the farmers. This should be one of the best years the Meeting. farmers have ever had, if they

IS INDIVIDUAL THRIFT OUT OF DATE?

Some people think so. But let's look at the record, Figures recently compiled by the American Bankers Association show that thrift deposits in banks have increased for the seventh straight year! Over 45 million depositors have thrift deposits of more than 25 billion dollars. These figures speak well for the average American's faith and foresight. Our bank encourages thrift and welcomes the accounts of all sincere depositors.

• Talk to any man who handles his harvest with a McCormick-Deering Combine and one fact will stand out above all others:

The savings you make with one of these combines increases your barvest-income, season after season!

In a single, efficient, one-man operation with a 4-foot No. 42 combine you cut out the big cost of paying and feeding extra help. You save on equipment, twine, and threshing expense. And you wind up the work with more grain because the combine does away with grain losses caused by unnecessary handling!

And remember this: you multiply the sum of these savings by all the seasons your combine

Come in and see how to invest now in years of greater earning power by getting the right combine for this year's harvest.

SUNDAY International SCHOOL *LESSON *

HAROLD L. LUNDOUIST, D. D. an of The Mondy Rible Institute of Chicago, sed by Western Newspaper Union.

Lesson for June 1

ets and Seripture texts so-grighted by International Series Education; used by

BROADENING CHRISTIAN HOBIZONS: THE ANTIOCH MOVEMENT

LESSON TEXT—Acts 11:19-30.
GOLDEN TEXT—For I am not ashamed of the goupel of Christ: for it is the power of God unto salvation to everyone that believelt; to the Jew first, and also to the Greek.—Romans 1:16.

Scattered abroad! As the flying sparks and embers from a fire which is wildly beaten will light many new fires, just so persecution of the early Christians sent them abroad and astablished new centers for the preaching of the gospel. Verse 19 our lesson connects with Acts 8:4. The ministry by Philip in Samaria was paralleled by that of others in Phenice, Cyprus, and now in Anti-ch. That great city was not far from Jerusalem, but it was far from God. A mighty city, rich in trade, it was also deep in all kinds of sin; but there it pleased God to establish a great center of Christian testimony. God loves to do new things (see, for example, II Cor. 5:17; Isa. 43:19; Ps. 33:3; Rev. 21:5).

I. A New Church (vv. 19-21).

What a splendid church it was! Here in the midst of the most evil ndings the sweet flower of Christian faith grew, as it so often

It was a church built upon a faithful testimony by God's chosen witnesses "preaching the Lord Jesus" (v. 20). Their names are not noted but their message is, and its blessed results. It was a gathering place for all people—Jews and Gentiles. The disciples from Jerusalem preached at first only to the Jews, but God sent others (v. 20), who preached His grace to the Gentiles.

Note also that the Antioch church was a living witness. "The hand of the Lord was with them"-little wonder then that "a great number believed and were turned to the Your church-and minemight learn much by studying the church at Antioch.

II. A New Fellowship (vv. 22-26). The genius of Christianity is fellowship. Those who have a religious belief which makes them exclusive —not willing to fellowship with other Christians-do not truly represent

When the church at Jerusalem heard the good news, they sent Barnabas to help the new converts and establish fellowship. He was the ideal man to send, for "he was a good man.' It is far more important that a man be good than that he be brilliant if he is to edify young converts. He was 'full of the Holy Ghost.' He was also 'full of faith.' and no man that is not, need undertake the work of instructing and the reply. The jeweler waddled to developing young converts, especial his desk nearby and began rumly converts from heathenism so dark maging among papers there. He as that in Antioch. He was free from the love of gold (4:36, 37). He was and returned to quote prices. free from personal ambition and Dot was trying to drive close barjealousy in his work (vv. 25, 26). He gains when Ethel entered with her was very sharp-eyed to see the sin- message and joined Dot in badgercerity and promise of a young con- ing the proprietor for further disvert (9:27). 'When he was come, counts. and had seen the grace of God, (he) Then Joe was back with the sugwas glad' " (John W. Bradbury).

Barnabas brought a new evangelist easy and smooth that he could not -Saul, God's prepared man for this resist an impulse to flash a sly

By JACK RODOLPH (McClure Syndicate-WNU Service.)

"THAT tray of ice is just waitin' to be emptied; it's the easiest tip-over I ever saw." Joe's shifty eyes steadied for a moment with en-thusiasm, as he drove this point home to the two girls on the back seat of his automobile.

"I was in that joint a while back stalling about buying old gold, and I got the layout. It's like this: The man that runs the jewelry store is old and slow. He doesn't de much business out there in the suburbs, and we can pick a time when there won't be customers to gum things up. I haven't figured out why, but he carries a good stock of diamo He keeps 'em in a big safe in the back room. He unlocks that safe in the morning and just keeps the door closed during the day.

"It'll take both you girls," he continued. "We'll all drive up to the front and park. Then Dot and me will go in and tell him we're just married and want to look at some silver. While we're givin' it the once-over, Ethel, you come in and tell me you think gas is leaking out of the car. I go out to see, understand, and you stay to help Dot make up her mind about the silver. It'll be a cinch for you two girls to keep him busy while I slip in the back, and dump that tray of dia-

"Listens good to me," Ethel agreed.

Joe reached into his pocket. "Here are the rings. Got 'em at the department store. Pretty good imita-tions, at that. The old fellow won't know the difference, unless you stick em under his nose."

There was a wistful expression in Dot's eyes, as she slowly slipped the circlets upon the proper finger of her left hand.

"Now, let's get our spiels down pat," the director of the little drama

The trio had parked in front of the jewelry store, and their plan was starting out nicely. The place was deserted, except for the squat proprietor who peered over his spectacles at the boy and Dot as they entered.

Dot made an excellent bride. There was a gentle, dreamy expression in her eyes. "We just got mar-ried," she explained in a sweet lit-tle voice, "and we want to look at some silver."

"That's fine," returned the jeweler, and all the glow of his kindly smile did not arise from the prospect of a sale. "What's your name, now?" he inquired mischievously.

Joe had thought of that, too, and, "Mrs. Samuel E. Henderson," slipped glibly off Dot's tongue.

The newly-weds did not notice it, but the old man suddenly appeared to be a trifle sleepy as he directed them to the cases of silverware.

"What are the prices of this pattern?" Dot inquired.

"I'll have to look them up," was

gestion, "Maybe we had better look Into this new fellowship of life and service the gracious and generous before we buy." It all had been so wink at Ethel.

The first intimation that all was not well came when Joe was forced to modify his swaggering progress to the car in order to pass between two men lounging near the edge of Christian, the beautiful name of the sidewalk. A firm hand dropped

There was a a man has to carry so many things triendliness about the man that held around on him these days that a instantaneous appeal, and when well designed suit of clothes must be passed I asked Harry who he

"Oh, just an old-timer who lives in a shack up in the woods. Like him?"
I nodded, laughing. "Well, I hardly had a chance to study him much, but I must confess there was some-thing about him I liked. He ed strangely satisfied and contented with life."

"That's it," Harry agreed. "When you run across a chap like that you begin to feel good, an' think that things ain't maybe so bad as they

Harry had about hit the nail or the head, so to speak. The angler's attitude had radiated confidence and

The skill with which he handled his fly red pronounced him an angle

good cheer and a bright outlook or things. I would like to have known him better, and instinctively turned my gaze up stream. The old man

heard of Clinton Shepard, of course?"

I nodded. "Oil king, wasn't he? Made millions in oil, controlled the Shepard Oil Company and a half dozen others. Ruined his health from overwork, as I remember."
"That's right," Harry agreed.

"Old man Shepard was one of the country's richest men. Made his start in oil and became a power in the financial world. A million or two wasn't enough. He wanted to be the richest man in the world, to have the most power. And he pretty near realized his ambition.

"When the crash came in '29, Shepard lost a pile. His wealth was reduced to about seven million dollars. Tough, eh? Well, it near drove the old boy crazy. He went around like a wild man, earned a nick-name for himself. 'Skinflint' Shep-ard they called him. And the name was appropriate. Shepard was a skunk when it came to a business deal. Some of the things to which he'd resort to make a dollar would put a beggar to shame.

"Well, the pace he was going couldn't last. His health began to give out. One day his physician, a Doctor Harkins, ambushed the old man in his office and talked to him straight from the shoulder.

"You've got to quit,' says the doc. 'You can't last much longer at this rate. You're dying by

" 'Yeah?' says Shepard, 'and what would you suggest, Doc?'

" 'I'd suggest,' says the doc, 'that you go away and rest for awhile.'
"Shepard laughed harshly at this. 'Yeah, that's great advice, Doc,' says he. 'That's great! Go off and forget business—and let the business

go to hell without me, eh? Then where'd I be?'
"The doc colored up a little at this. He wasn't in such good health himself. He was a kindly old coot, had devoted his entire life

"Where'd you be?' says the doc quietly. "You'd be in good health and you'd know what it was to live, to get something out of life. What,"

this life, anyhow, Mr. Shepard? What is it that we're all working for? What is success, anyhow? What is it that we want? Well, I have an idea it's contentment, freedom from worry, peace of mind, appreciation little things, a fine, healthy body-things that money won't and can't buy.'

"Old Shepard went into spasms of laughter at this. He couldn't see the doc's point of view at all. 'Just like a story book, eh, doc?' says he.
'Well, listen, you old pill peddler,
why don't you follow your own advice and see how you like it? It's all very fine for you to sit here in a nice, comfortable office with all the conveniences of modern civilization at your beck and call and tell some poor cuss like me to go up in the wilderness and hibernate for a year or two. Sure, that's easy. Easy for you. Well, how'd you like to have to leave your business flat? How'd you like to have to take your own medicine? Say, I'll bet you haven't been out of the city once in

"Doc Harkins didn't have much to say to this. But he stuck to his point. He was a medical man, and he knew that unless old Skinflint got away from business, breathed in some good fresh air and occupied his mind with something else besides stocks and bonds, he couldn't keep going.

"Secretly, old Skinflint knew it too. He knew the doc was right. Just stubborn, that's all. After the doc departed he sat for a long time thinking. The upshot of it was that he visited three other doctors and was advised by all of them to do exactly the thing that old Doc Har-kins had prescribed. And it wasn't long before his physical machine began to slow down and he realized more than ever the M. D.'s had guessed right."

Harry paused and his gaze drifted up the creek to the spot where the old angler was netting in his catch, a fine twelve-inch trout.

"And so," I said, following Harry's gaze, "Old Skinflint finally gave in, eh? He came up here . . . and liked it? Well, I'd always wondered what became of the old man."

But Harry shook his head and smiled. "You guessed wrong, mister. That ain't Old Skinflint. Skinfint never followed the advice of those doctors. He tried to when it was too late. He's dead. Been dead a couple of years. Guess you don't read the papers much."

"Not much more than the market ews," I admitted. My eyes were still on the figure of the old angler. "So I guessed wrong, did I? Well, who is the old guy? I'd like to meet and have a talk with him. He looks interesting."

"Him?" said Harry. "Who is he? Why, that's old Doc Harkins. Doc. see, had sense enough to follow old Skinflint's advice. And as far as I can figure he's getting a lot more out of life than Shepard an' most everyone else."

Electron Microscope

Magnifies 25,000 Times

Everything about the British air

The greatest extension of human vision since 1677, when Anthony van Leeuwenhoek first focused spermatozoa under his crude lens, is the electron microscope. The electron microscope turns a beam of electrons on a world invisible to light, and in experimental tests, has magnified it 25,000 times, 10 times the top power of the best microscope. First electron microscope available for immediate practical use in scientific research was announced recently by the Camden, N. J. laboratories of the Radio Corporation of Amer-

The 2,500 useful magnification limit of the best light microscopes is imposed by the nature of light itself. Microscopic details smaller than one-half the wave length of visible light are literally submerged from sight. In the RCA electron microscope a wave length 10,000 times shorter than visible light brings these details into sharp defi-

In operation the electron and light microscopes are closely analogous. A magnetic field, instead of a glass lens, concentrates the beam of high velocity electrons down through the specimen. A second series of mag-netic "lenses" steps up the image of final magnification. The image can then be observed on a fluores cent screen or recorded directly on a photographic plate.

'Invisible' Dog Gets License Assured something was there, in spirit, if not in flesh, the San Diego, Calif., police department recently issued a 1941 dog license to "Spook,"

San Diego State college basketball team's famed invisible hairless Mex ican Chihuahua mascot. The license tag was added to the collection of identifications which headquarters was interesting to the "Spook" has acquired in his exist- visitor, and he asked a never-ending
