Out-of-Town Telephone Rates

The rates quoted below are for an initial period of three (3) minutes, except those for station-to-station calls of 25 cents or less, which are for an initial period of five (5) minutes. Night and Sunday rates apply from 6 P. M. to 4:30 A. M. and all day Sunday. Rates to other points not listed may be obtained by calling "Long Distance."

Rates quoted below do not include Federal Tax.

On calls under 25 cents, the Federal Tax is 15% of the total charges for such calls. On calls of 25 cents or over, the Federal Tax is 25% of the total charges for such calls. On calls paid for by inserting coins in Coin

Box Telephones, the tax is computed to the nearest multiple of 5 cents.

How to Place Out-of-Town Calls

There are two general classes of Out-of-Town Calls, namely Station-to-Station and Person-to-Person, as explained below.

Station-to-Station Calls

(From One Telephone to Another)

A station-to-station call is one when you ask to be connected with a certain telephone in a distant place. However, if you ask for a particular person or for an extension telephone reached through a private branch exchange, as one in some department or hotel room, the call is a person-to-person call.

To Place a Station-to-Station Call

First—Give the operator the name of the place you are calling.

Second—The telephone number you are calling (if known), otherwise, the name and the address (if known) of the party whose telephone you are calling. For example: J. W. Brown's Residence—425 Main Street.

Third—Your telephone number when the operator asks for it.

Features of Station-to-Station Calls

1. A station-to-station call is completed more quickly and the rate is less than for a person-to-person call.
2. The rate is further reduced at night from 6:00 P.M. to 4:30 A.M., and all day Sunday, if the initial day station-to-station rate exceeds 35 cents. The time at the originating point when the conversation starts determines whether the day or night rate applies.
3. The initial period is three minutes when the rate is more than 25 cents, after which charges for additional time apply. The initial period is five minutes when the rate is 25 cents or less, after which charges for additional time apply.
4. Charges begin when the called telephone is answered, provided the calling party is holding the line.
5. Charges may be reversed without any change in rate when the rate is 25 cents or more. A slight additional charge is made when the initial rate is less than 25 cents.

Person-to-Person Calls

(From One Person to Another)

A person-to-person call is one when you ask for a particular person or extension telephone reached through a private branch exchange, as one in some department or hotel room.

To Place a Person-to-Person Call

First—Give the operator the name of the place you are calling.

Second—The name and the telephone number (if known) of the person you are calling, otherwise, the name and the address (if known) of the called party. For example: Mr. J. W. Brown, at telephone 2470, or Mr. J. W. Brown, at J. W. Brown's Residence—425 Main Street.

Third—Your telephone number when the operator asks for it.

Features of Person-to-Person Calls

1. The rate for a person-to-person call is higher than the rate for a station-to-station call.
2. The rate is reduced at night from 6:00 P.M. to 4:30 A.M., and all day Sunday, if the initial day rate exceeds 50 cents. The time at the originating point when the conversation starts determines whether the day or night rate applies.
3. The initial period is three minutes, after which charges for additional time apply.
4. Charges begin when the called person or extension telephone reached through a private branch exchange is obtained, provided the calling party is holding the line.
5. Charges may be reversed without any change in rate.

Collect Calls

If the charges on the call are to be paid at the distant telephone, you should tell the operator when filing the call that it is a "collect" call. The charges, if accepted at the distant telephone, will be billed to that telephone.

General Information

Tariffs

Tariffs which show rates, rules and regulations for telephone service and facilities are on file with the Regulatory Commissions having jurisdiction over such matters, and are available for public inspection at our business office.

Transmitting Messages

Employees of the Telephone Company are forbidden to accept oral or written messages to be transmitted by an employee over the lines of the Telephone Company.

Attachments to Telephones

To render satisfactory service, it is important that the Telephone Company own and maintain all apparatus and equipment connected with its lines. Telephone equipment is designed to furnish the best possible service and the use of attachments, other than those furnished by the Telephone Company, usually impairs the efficiency of the service. The Telephone Company does not sanction the use of any devices in connection with its equipment except those furnished by the Company.

Advertising Telephone Numbers

The advantages of showing telephone numbers on stationery, signs, cards, etc., are recognized, though the growth and changes in the city and the corresponding growth and arrangement of telephone facilities may require the changing of telephone numbers. For this reason, stationery, signs, cards, etc., showing telephone numbers should not be printed in large quantities.

Telegrams by Telephone

You may telephone telegrams, cablegrams or radio-grams to the Western Union Telegraph Co., and have the charges billed to your telephone account if you are a telephone subscriber. Just follow the instructions shown under the listing of this company in the directory.

Architects' and Builders' Service

When building or remodeling, you may arrange with your architect or builder to provide telephone outlets while construction is in progress. The Telephone Company will gladly advise with you, your architect or builder. Just call the Telephone Company and ask for "Architects' and Builders' Service."

Calls from a Party Line Where a Crank Is Used to Ring the Operator

Before ringing the Operator, remove the receiver and listen to make sure the line is not in use. To get the Operator, replace the receiver and turn the crank. When through talking, promptly hang up the receiver and turn the crank again so the Operator will clear your line for further use.

Telephone Directories

Loss of time and inconvenience by calling wrong numbers can be avoided if you consult the current directory before placing a call and avoid the use of obsolete directories.

Between directory issues certain numbers do not appear in the current directory due to changes and new installations. These numbers may be secured by calling "Information."

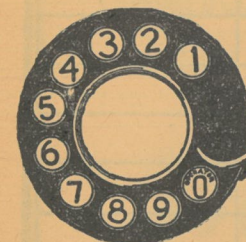

No binder, holder or auxiliary cover, except those furnished by the Company, shall be used in connection with any telephone directory.

Telephone directories of other cities in this and certain foreign countries can be obtained for our customers who need them. Prices, etc., may be secured by calling the business office.

How to Use the Dial Telephone ...

in Bay Minette and Fairhope, Ala.

On all calls, remove the receiver carefully from the hook and *listen for the dial tone before starting to dial a number. The dial tone is a steady humming sound heard in the telephone receiver* indicating that the line is ready for you to dial.

When you hear the dial tone, keep the receiver off the hook and dial each figure of the telephone number. For example, if you are calling 2341, proceed as follows:

1. Place your finger in the opening over the figure "2."
2. Turn the dial around until your finger strikes finger stop.
3. Remove your finger and without touching the dial allow it to return to its normal position.
4. Proceed in the same way to dial the other figures.

If your finger slips, or you make a mistake in dialing, hang up the receiver at once, wait a few seconds and dial again.

Before starting to dial a second call, always hang up your receiver for a few seconds in order to clear the previous connection.

Ringling and Busy Signals

Within a few seconds after you have completed dialing you should hear either the ringing signal, an intermittent burr-rr-ing sound, indicating that the bell of the called line is ringing, or the busy signal, a rapid buzz-buzz-buzz, indicating that the called line is busy. If you do not hear either of these signals within half a minute, hang up the receiver, wait a few seconds and make another attempt.

Obtaining the "Operator"

You can get the operator by placing your finger in the opening in the dial through which the word "Operator" is seen, and turning the dial once only to the finger stop. In a few seconds the operator will answer you.

Coin Box Telephones, or Pay Stations

Instructions covering operation of coin box telephones are mounted on each coin box station.

Calls from a Party Line or from a Line With an Extension Telephone

Always make sure that the line is not in use. If you do not hear the dial tone, ask if the line is being held by someone else on the line. If no response is received, hang up the receiver for a few seconds and make another attempt.

However, should you hear successive clicks indicating that someone on your line is dialing, wait until the dialing stops and then inform him that you have interfered with his call and that it will be necessary for him to hang up and dial the complete number again. Then replace your receiver on the hook.

If, during or after your dialing, you hear another party on your line, tell him that the line is in use and request him to hang up his receiver. If you have not finished dialing your number when the other party comes in on the line, after he hangs up, you should hang up your own receiver for a few seconds, then remove it, listen for the dial tone and, when it is heard, dial the complete number again.

To Call Another Party on Your Line

If you are on a party line and wish to call another party on your line, it will be necessary to dial a special code number instead of the regular number of the subscriber as listed in the directory. All subscriber numbers have four figures. The first three figures will be the same for all parties on the same line. In order to call another party on your line the code number to be dialed is the figure "9" followed by the last figure in your telephone number and then the last figure in the number you are calling—for example, if your telephone is 2214 and you are calling the subscriber whose number 2213, you should dial the code number "943." After you have finished dialing the code number, hang up your receiver. Your bell, as well as the bell of the party you are calling, will then ring at brief intervals. When the called party answers, your bell will stop ringing. You should then lift your receiver and talk to the party answering.

If your bell does not stop ringing in from one to two minutes, it indicates that there is no one within hearing distance to answer the called telephone. You should then stop your bell from ringing and free the line from the connection by removing your receiver from the hook for a few seconds and then replacing it.
