AM

I went out on the road to see the condition of some mud holes. I drained one and found the others pretty well drained up. I filled in some ruts and started back to the station.

I decided to look at the water hole in the pasture on the way in and found the water getting low in it so went to see about the prospects of building a lane to the creek but found no suitable place.

I arrived back at the station and spent the rest of the morning at odd jobs around the station.

My brother Oscar & wife came bringing our mail. They spent the afternoon with us.

People with Model A Ford Oregon license 305-314 stopped and inquired about the stream closed to fishing.

People with Dodge car Oregon 291-567 stopped and inquired about friends who were supposed to come to the Winberry Forest Camp. They planned to spend the day.

I heard the Dodge leave the Camp so I went to see if they had left any firewood at the camp. I found everything all right.

Agent Smith & wife of Springfield stopped for a few minutes. They are friends of ours. Everybody has gone.

Today has been much cooler.
