MIDLAND COUNTY, MICHIGAN DEATH RECORDS - 1866-1912

The following compilation of Midland Death Records is a summary of the data and is taken from the original Death Records book (Volume A) at the County Clerk's Office at the Midland County Office Building, 220 W. Ellsworth St., Midland, MI 48640. This record also exists as microfilm at G.A. Dow Memorial Library, 1710 W. St. Andrews St., Midland, MI 48640 and as Family History Library Catalog Film 945355.

The Deaths record book is a State of Michigan record book and each two-page wide record contains the following information: Record Number, Date of Death, Name of the Deceased, Sex and Color, Marital Status, Age, Place of Death, Disease or Cause of Death, Occupation, Parents Names & Residence, Date of Record.

The first date is of March 1866, and the last is of September/October of 1912. The first 19 entries comprising deaths from March, 1866 to May 1867 were not recorded till June, 1867. It appears from the "Date of Record" column, that in general, the county clerk collected records for some time and then recorded them in batches. Sometimes the records are recorded alphabetically by township name, rather than by date or person.

The area was first named Midland County in 1850, but the county was not officially organized till 1855. So the only data before 1866 is the 1850 and 1860 Federal Censuses. Midland was formed from Saginaw County, and Saginaw only started compiling death records in 1866 as well. The 1850 Census for Midland County lists only 10 families, with a total of 65 persons.

In this compilation, the following data have been omitted:

**Sex and Color,
Marital Status,
Place of Death,
Disease or Cause of Death,
Occupation,
Parents Residence,
Date of Record.**

Since the first Obituary Index Records compiled by Midland Genealogical Society for the county start with 1872, this Death Records Index gives an additional six years of early death records (1866-1872). It should be noted that the MGS Obituary Book has a gap of 5 years from the end of publication of the Midland Times in 1875 to the beginning of publication of Midland Republican in 1881. **Also, many persons with no obituaries in the Midland papers are given in this compilation. Comparison of the Deaths Record Book with the Obituaries Index, Midland Cemeteries compilation, and the Census Indexes reveals MANY Deaths Record names missing from the other compilations..**

Many pages of the microfilm are very difficult or impossible to read even with using a magnifying glass. Also the microfilm copy at the G.A. Dow Library is very badly scratched with use. Some of the early county clerks had poor penmanship. A couple of them should never have been let near the records. Many times the capital letters can be confused with one another. Some pages have tears that were repaired with tape that has darkened, and the microfilming was

sometimes poor. **Because of the poor quality of the microfilm, the decision was made to do the extractions directly from new photographs of the original book. Even using the new photographs of the pages, there are many names entered with QUESTION MARKS, due to difficulty in reading the handwriting of some of the clerks. The USER should ALWAYS check the original entry. In general, the entries in the original book are quite readable. The Midland County Clerk's Office was very helpful in allowing use of the original book for this present compilation. The CD-ROM version of this compilation will include photographs of the original Deaths Record pages.**

There are 20 records per page on 227 pages for a total of 4062 deaths as numbered by the County Clerk.. NOTE: at 20 names per page, for 227 pages there should be 4540 names. Actual number of names from the Deaths Index Pages is 4552, so the County Clerk re-used numbers and made many errors as follows:

On page 3 after number 52, numbering resets to number 1 on page 4.

On page 5 after number 20 on page 4, numbering resets to number 1 on page 5.

On page 5 after number 15, numbering skips to 21 and continues to number 25 at the bottom of the page.

On page 6, numbering starts at 16 and continues till number 47 on page 7.

Numbering then skips to number 126.

On page 17, two records are numbered 303 .

Page 17 is a partial page, having only 14 records. Last Record is #327.

On page 18, numbering restarts at number 1 at the beginning of the year 1876.

On page 111 there are 2 records numbered "1865."

On page 115, after Record Number 1954, the next record is numbered 1855 instead of being 1955. So the following records are numbered 100 less than they would have been.

On page 139, numbering skips from 2327 to 2338.

On page 141, numbering regresses from 2390 to 2341.

On page 146, Margaret Carrow, Widow is listed as 8 years old. Obit Index gives age 81.

On page 163, both No. 2768 B.C. Borland & 2769 W.E. Foster are married to Mary Battenberg. Marriage Index has W.C. Foster married to her.

On page 164, both No. 2790 Elmer Peek & 2791 Frank Timmerman are married to Louisa Huggins. Marriage Index has Elmer Peek married to her. There is no marriage given for a Frank Timmerman. However there is a 1902 marriage for Frank Zimmerman to Flossie Cranwell.

On page 175, Number 3019 is skipped

On page 193 there are two records numbered 3370.

On page 203, the clerk managed to squeeze 25 records onto the page and in so doing, gave duplicate numbers to 3563, 3564, 3565, 3566, 3567, and then skipped number 3568 and later 3581 is also skipped..

On page 206, NONE of the names appear in the Deaths Record INDEX.

On page 219, on the second line, a name, Charles Theodore Berthune, numbered 3885A, was interpolated and later crossed out, then added back as the last name at the bottom of the page.

The Death Records Index Entry Pages have three columns of names, approximately 45 names in each column. In this compilation the Index Columns are referenced as "a", "b", and "c." There are 55 pages of these Index Entry pages. In several instances where the county recorder ran out of room, additional names were recorded on inserted slips of paper. The Index Pages have been numbered by the present compiler and referenced in this compilation as, for instance "B2c". Which

is the second page of the “B” names, and the third column of names. A few names appear to have been recorded twice, and some are missing from the Index Pages. Index Numbers for missing names are recorded in this compilation using the initial letter of the surname and “xx” for the Index Page Number and Column number. There are 249 “xx” names that were not in the Index Pages and 120 names in the Index Pages that did not correspond to actual records.

NOTES ON THE TABLES INDEX

The names were first entered from microfilm of the Index Pages at the front of Deaths Book A. The file then consisted of only the names, the page number of the record, and the Index page & Column of the Index. Spaces were left for the later addition of the complete record. Because of the poor condition of the Index Pages, some names and many page numbers had to be guessed at, or estimated, leaving it till later for corrections as the full record was entered.

When the full records were entered, the table was first sorted by page, and the record numbers for all the persons on that page were entered. The file was then sorted again, giving a listing of the names in the order they appear in the original Deaths Book. This allowed the compiler to check that ALL the entries for each page were included. Any missing names were then added. This method found many names that were missing from the Death Book Index pages. This double sorting also made it much easier to enter the data from the second page of the record, since each half of the record was photographed separately.

Entries with appended question marks sort to the end of the list. Example, “Wilson?, James” would sort after “Wilson, William”. There are 1415 question marks in the tables.

Most of the Table Columns are self explanatory. Those that are not, are: ID which is a unique record number assigned by MS Access ® as the data is entered; NMBR which is the record number assigned by the recording clerk; and PAGE which is the page number of the original Deaths Record Book.

Persons with no given names have been entered with “Unknown” in the names columns. Many of these are probably of still-born children. Also many children who died young were entered as “Baby”, or “Infant” by the county clerk. A few adults noted as “Married”, have unknown ages. To differentiate these from the infants, the age has an appended question mark. Example: “00/00/00?” Many parents names are also Unknown, particularly of elderly persons, and those born out of the county and country. Until about 1897, Mother’s Surnames were recorded as the married name, rather than as the Maiden Names.
