500 LB. BEAR KILLED WITH 1 ARROW

100 Grain 9/32 Hill's Hornet Broadhead
and Forgewood Shaft, by Gust Voorlas
of Racine, Wisconsin.

new working recurve bow-
ultimate in performance

Bear Kodiak II

Kodiak II delivers arrow after arrow with accuracy, speed and smoothness heretofore unknown. With its remarkable cast and almost unbelievable shooting ease Kodiak II is "Bear at its best" -- a custom quality bow you'll be proud to own.

Its exceptional performance is made possible by the use of the working recurve principle combined with correctly balanced handle design. Only by shooting Kodiak II can its extra features be appreciated.

Equipped with luminous compass set into form fitting, saddle-type leather handle of near center shot design, and with double arrow rest.

Kodiak II is made in two lengths:

60" length, 28" draw limit, 35 to 75 lbs. for general hunting use and for those who prefer the convenience of a short bow.

64" length, 30" draw limit, 35 to 75 lbs. for those who like the smoother action of a longer bow.

With double loop bowstring - \$49.50

Kodiak II is also available on special order at no extra cost, in both shorter and longer lengths than those listed:

56" length, 26" draw limit, 25 to 60 lbs. at 26". This bow is designed primarily for draw lengths between 24" and 26" where ultimate cast is desired; its proportions are slightly smaller throughout.

68" length, 32" draw limit, 35 to 75 lbs. at 28". This bow is made expressly for those who like a long bow, and is favored for target and tournament use.

Note: delivery of the 56" and 68" lengths may require 30 days.

HEAVY BOWS: Weights between 76 and 100 lbs. can be obtained ONLY on 64" and 68" bows, on special order and AT \$10.00 EXTRA.

Every re-curved bow purchased from us will be shipped to you equipped with a set of brush buttons -- at no extra charge.

\$49.50

hard-hitting favorite of
those who know bows best

Bear Grizzly

Here is the world's most popular bow -- the model that made the Bear name famous everywhere. This statement is attested by the fact that during the five years since GRIZZLY first appeared, more game has been taken and more top scores shot with it than with any other bow made!

Now, for those who prefer the conventional re-curve and the symmetry of GRIZZLY'S graceful lines, we have added the new form-fitting, saddle-type leather handle with its near center shot design and double arrow rest -- and at no increase in price. This great bow is the reliable companion of thousands who enjoy target, field, roving or hunting. Acclaimed for its durability and glass-powered, hard hitting effectiveness the GRIZZLY is an outstanding value.

Length, 62". Draw limit, 28". Weights, 35 to 75 lbs. Not available in other lengths or in heavier weights. With double loop bowstring \$39.50

Specify bow length, draw weight and draw length. Unless otherwise requested orders may be filled in weights within two lbs. plus or minus, to expedite delivery.

Unless otherwise stated all bows are weighed at 28" draw and are so marked.

Every re-curved bow purchased from us will be shipped to you equipped with a set of brush buttons -- at no extra charge.

\$39.50

the top-quality choice

Bear Polar

A sleek longer-limbed beauty, the POLAR incorporates many of the Grizzly's graceful characteristics but without recurved ends. Exacting tournament shooters and discriminating bow-hunters who prefer the straight bow find that POLAR has been designed to meet their requirements with complete satisfaction.

Like all other Bear Bows, this model is faced and backed with Fiberglas over a weight-saving hard maple core. POLAR is a straight bow having shooting qualities usually found only in re-curved bows, yet with all the inherent accuracy of the straight bow design.

Its new style, form-fitting, saddle-type leather handle includes the double arrow rest and near center shot features.

Length, 64". Draw limit, 30". Weights, 35 to 75 lbs.

With double loop bowstring. \$29.50

Available in 68" length, 32" draw limit, at no extra charge. Both the 64" and 68" models are also available in heavier weights -- 76 to 100 lbs. -- at \$10.00 extra. Every Bear Bow is registered and guaranteed. When ordering, specify length, draw length and weight.

Every re-curved bow purchased from us will be shipped to you equipped with a set of brush buttons -- at no extra charge.

\$29.50

glass-powered action
priced to please everyone

Bear Cub

The CUB incorporates famous Bear glass-powered construction in an all-purpose, moderately priced bow. This feature alone places it far above others near its price, especially when shooting ease, cast and durability are considered.

A rugged bow that will stand up in use under extreme temperature and moisture variations, the CUB is an excellent choice for schools, clubs or public ranges, where its durability, stamina and popularity with users soon becomes apparent. Although a favorite choice of beginners, many top tournament scores have been shot with the CUB.

Length, 62". Draw limit, 28". Weights, 20 to 60 lbs. only. Attractive blond finish, leather handle.

With double loop bowstring. \$22.50

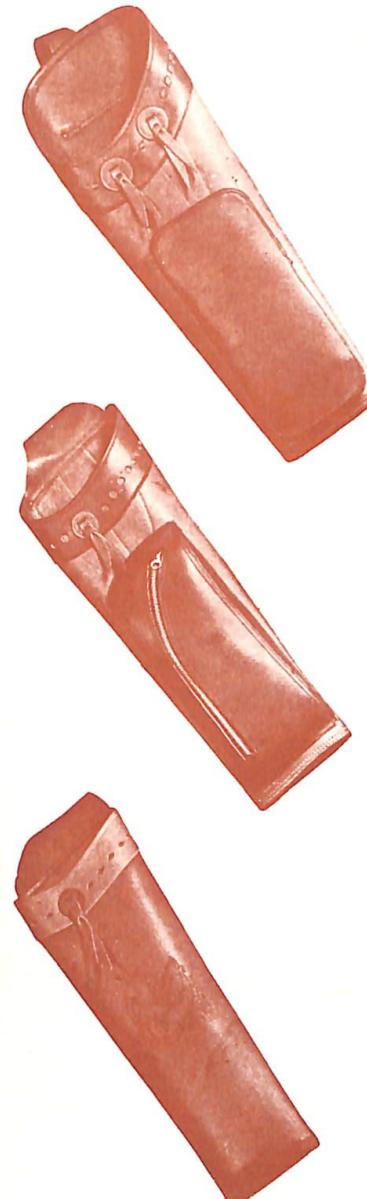

Every Bear Bow is registered and guaranteed. When ordering, specify draw length and weight, and whether you want right hand or left hand.

Specify bow length, draw weight and draw length. Unless otherwise requested orders may be filled in weights within two lbs. plus or minus, to expedite delivery.

Unless otherwise stated all bows are weighed at 28" draw and are so marked.

Every re-curved bow purchased from us will be shipped to you equipped with a set of brush buttons -- at no extra charge.

\$22.50

alaskan

A deluxe shoulder quiver designed for 24 to 30 arrows. Full top grain cowhide in brown and tan combination, with three compartments, large zipper pocket and breast strap.

Q-100 \$17.75

Smaller Model:
Q-150 (Ladies' Size) \$15.75

western

A beautifully proportioned quiver for 20 to 24 arrows, with two compartments and breast strap. Unusual zipper opening makes pocket easily accessible. Top grain leather, two-tone brown and tan.

Q-200 \$14.75

Smaller Model:
Q-250 (Ladies' Size) \$12.75

breast strap

Bear Alaskan and Western Quivers come equipped with comfortable top-grain leather breast strap.

texan

Clean lines bring out the beauty of the fine leather in this quiver for 14 to 18 arrows. Two compartments — brown and tan combination.

Q-300 \$8.75

note:

Bear quivers, armguards and gloves are available in white leather at 10% extra.

bow quiver

This quiver is perfect for hunting — light, quiet, convenient. Attached to the bow by means of one thumb-screw in a threaded brass bushing permanently installed in the bow-handle. The bow quiver can be removed or attached easily. Does not weaken bow — does not affect shooting accuracy. U.S. Patent No. 2,464,068.

Q-1000 \$8.75

champion

Lustrous saddle leather target quiver, with belt hook.

Q-900 \$3.75

keel armguard

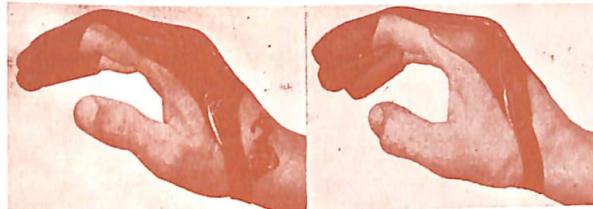

Cordovan leather, fully lined, with concealed spring-steel stays. Brown elastic straps, quick-action hook fasteners.

W-160 \$1.95

northwoods

The famous hunting quiver, designed to carry nine broadhead arrows noiselessly and safely. Dull-finish, best quality brown leather, individual broadhead pockets, bristle insert to prevent arrow-rattle. Pack harness. NORTHWOODS is worn straight down the middle of the back, placing the arrow nocks just behind the neck where they will not catch on brush. The height on the back is adjustable. For exclusive hunting use in typically brushy deer areas, we strongly recommend the NORTHWOODS or the BOW QUIVER.

Q-850 \$16.50
Specify "long" (for 27"-28" arrows) or "short" (for shorter arrows).

gloves

pro glove

Cordovan tips, closed-end style.

G-110 \$2.00

hunter glove

Cowhide tips, open-end style.

G-120 \$1.65

perfect glove

(not shown)

Straight back, no knuckle-pocket. Cordovan tips, open-end.

Sizes:

Men's Extra Large, Men's Large, Men's Medium, Men's Small, Ladies' Medium, Ladies' Small.

G-125 \$1.90

PRO and HUNTER glove backs are brown calf-skin, in exclusive knuckle-pocket design for greater comfort . . . Specify Size:

Men's Extra Large, Men's Large, Men's Medium, Men's Small, Ladies'. Specify right or left.

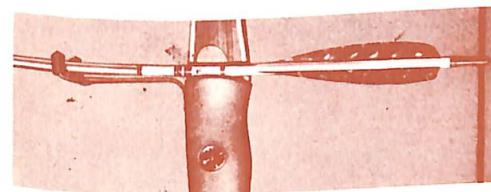

speed nocks

The first open-throat nock, and the most popular with both hunters and target shooters. Shaft sizes: $\frac{1}{4}$ ", $\frac{9}{32}$ ", $\frac{5}{16}$ ", $\frac{11}{32}$ ".

Colors: red, yellow, white, blue, green, black.
SN — \$0.45 dozen \$3.00 hundred \$25.00 thousand

At the hundred-lot price, nocks are limited to one size and color. At the thousand-lot price, nocks are limited to five changes of size or color. Substitutions will be made if colors ordered are not available.

nelson arrow holder

(Can be used right or left hand) \$2.00 each

Heavy saddle leather. DeLuxe model has a quick-action belt flap, and lip to prevent pocket wear.

Q-925 \$1.50

Q-950 (DeLuxe) \$2.50

Q-925

hip pocket quivers

Q-950

fletching cement

2-ounce tube. The right cement for the feathers and nocks.
M-500 25c ea.

line-o-site

"Moves the target from behind the Bow"

The LINE-O-SITE is unique in design and simplicity and incorporates all the features most desired in a bow sight: light weight, easy but positive friction adjustment, no rattle, easily attached, fits snugly to back of any bow, available in plain lens, prism lens or post type sights.

The most revolutionary feature of the LINE-O-SITE is the use of a one, two or three degree prism mounted in such a manner as to project the target image horizontally, thereby compensating for lack of perpendicularity between sight and arrow due to width of bow limb, or to compensate for an anchor position which is not vertically beneath the aiming eye.

When no problem of alignment is experienced, the plain lens or post type sight should be used according to preference. Four, eight and twelve degree prisms are also available for vertical projection when needed for longer ranges.

In cases where both horizontal and vertical projection is desired, prism Sight Lens may be rotated to desired position by removing Lens Frame from Sight Mount and lightly spreading Lens Frame apart to relieve friction on lens.

Prisms are available in 1, 2, 3, degree lenses, mounted to project the target image horizontally; 4, 8, 12 degree lenses for vertical projection.

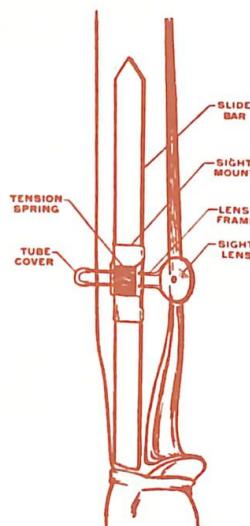

DEFLECTION TABLE FOR PRISM SELECTION

As an aid in selecting the proper prism for your needs the following table gives the distance a prism lens will move the sight (deflect the target image) as compared to a plain lens.

PRISM	DEFLECTION	PRISM	DEFLECTION
1°	1/8"	4°	11/16"
2°	5/16"	8°	1 3/8"
3°	1/2"	12°	2 1/8"

bows

THE CHAMP II

A Straight Limb of Modified Design

\$45.00

An improved, modern design based upon the deflex-reflex principle used in our PRO. The net gain in all around bow performance is astounding in all categories: 1. Cast is substantially increased. 2. Action is extremely soft—lacking any harsh kick or jar. 3. Draw is very smooth—no stack up near full draw. 4. Accuracy is improved through increased stability of deflex design. The CHAMP II is truly a bow for the archer who prefers the straight limb design with a performance increase comparable to most recurves. Handle and center section of the CHAMP II is identical to the PRO. Lengths: 62" length, 30" draw limit; 66" length, 34" draw limit. For heavier weights to 100 lbs. add \$5.00.

APOLLO

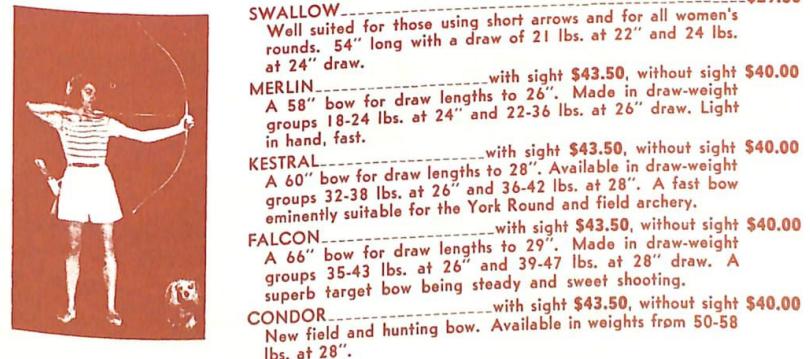

TUBULAR STEEL BOWS

Guaranteed for two years

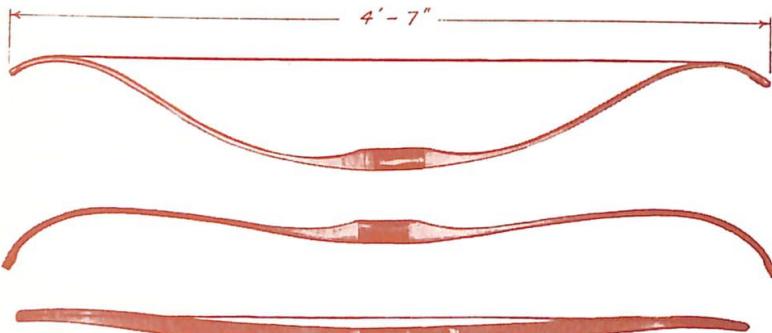

The finest of tubular metal bows yet to be engineered by England's leading manufacturer of tubular sporting equipment.

APOLLO bows are smooth and comfortable to shoot and have extremely flat trajectory. Available in five great models, all have take-apart, right or left handed handle.

SWALLOW	Well suited for those using short arrows and for all women's rounds. 54" long with a draw of 21 lbs. at 22" and 24 lbs. at 24" draw.	\$29.50
MERLIN	With sight \$43.50, without sight \$40.00. A 58" bow for draw lengths to 26". Made in draw-weight groups 18-24 lbs. at 24" and 22-36 lbs. at 26" draw. Light in hand, fast.	
KESTRAL	With sight \$43.50, without sight \$40.00. A 60" bow for draw lengths to 28". Available in draw-weight groups 32-38 lbs. at 26" and 36-42 lbs. at 28". A fast bow eminently suitable for the York Round and field archery.	
FALCON	With sight \$43.50, without sight \$40.00. A 66" bow for draw lengths to 29". Made in draw-weight groups 35-43 lbs. at 26" and 39-47 lbs. at 28" draw. A superb target bow being steady and sweet shooting.	
CONDOR	With sight \$43.50, without sight \$40.00. New field and hunting bow. Available in weights from 50-58 lbs. at 28".	

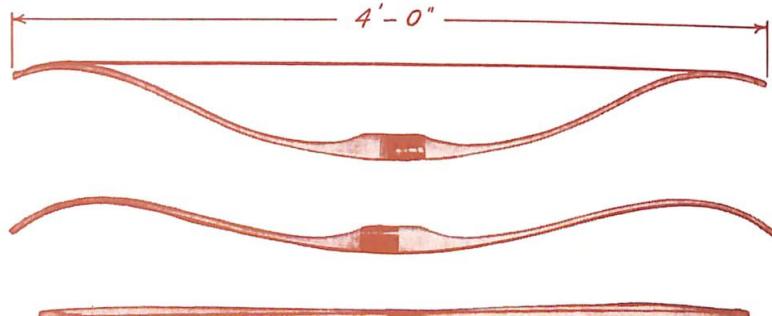

THE BLACK HAWK BEE

The Black Hawk Bee is a bow designed for field and target, for the beginners who want the finest for the least money. It is extremely fast and smooth. The cast of this bow is superb. The speed and trajectory will amaze you when you shoot it. The material and workmanship is of the finest. The composition of this bow consists of glass backing, hickory maple and Tox-horn facing. The handles or risers are made of maple or wild cherry. The bow is unconditionally guaranteed for 90 days. The bows can be had in 2 lengths 4'7" and 4'11". Bows are made in weights from 25-lb. to 45-lb. at 28" draws.

The Black Hawk Bee, either length, List Price \$34.00

THE BLACK HAWK MOSQUITO

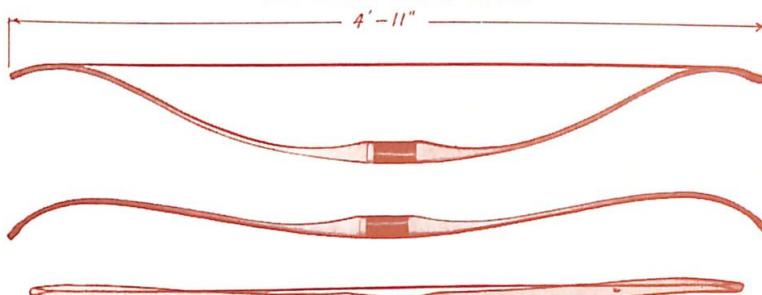

The Black Hawk Mosquito is a bow designed for youngsters who want a bow that looks and shoots like daddies bow. As far as we know we believe this is the only kids working recurve bow being made commercially to sell at this amazing low price. The bow consists of backing, hickory, maple and tox-horn facing. It is designed for 25" draw length.

The Black Hawk Mosquito, List Price \$10.95

Every re-curved bow purchased from us will be shipped to you equipped with a set of brush buttons -- at no extra charge.

THE BLACK HAWK WASP

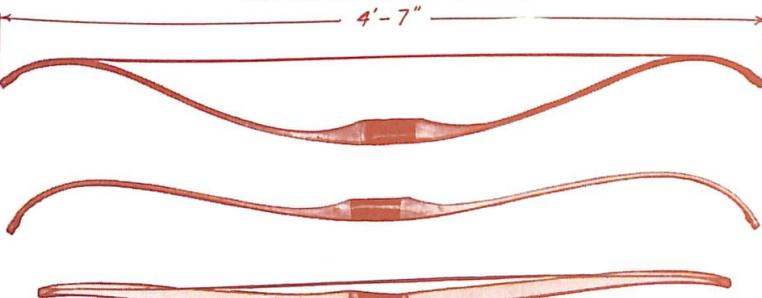

The Black Hawk Wasp is a bow designed for field shooting and hunting. It is extremely fast and smooth. The cast of this bow is superb. The speed and trajectory will amaze you when you shoot it. The material and workmanship are of the finest. The composition of this bow consists of glass backing, maple cores and flight facing. The handles or risers are made of maple or wild cherry. The bow is unconditionally guaranteed for 90 days. The bows can be had in 2 lengths 4' 7" and 4' 11". Bows are made in weights from 25 lb. to 55 lb. at 28" draws.

The Black Hawk Wasp, either length, List Price \$48.00

(All models of Black Hawk Bows are working recurves)

THE BLACK HAWK HORNET

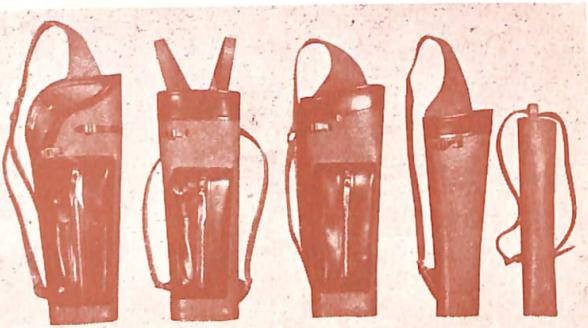

The Black Hawk Hornet is a bow designed for field shooting and hunting, it is extremely fast and smooth, and the cast of this bow is superb. The speed and trajectory will amaze you when you shoot it. The material and workmanship are of the finest. The composition of this bow consists of glass backing, maple and palm or maple and walnut cores and flight facing, the handles or risers are made of maple or wild cherry. The bow is unconditionally guaranteed for 90 days. The bow can be had in 2 lengths 4' 7" and 4' 11". Bows are made in weights from 30 lb. to 70 lb. at 28" draws.

Black Hawk Hornet either length, List Price \$56.00

POPULAR BEAVER-GRAIN high quality at low prices

Here are the favorite styles of King Quivers in heavy Beaver-Grain leather. DeLuxe top-grain elk pocket, trim, and divider straps. Nickeled hardware with Talon zippers. Note the King harness straps on the larger quivers. Secondary strap circles waist and snaps into ring in regular shoulder strap. Securely holds quiver in correct position. Adjustable for individual comfort.

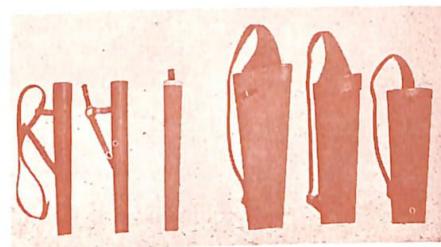

For distinctive styling, for really fine workmanship, and for rich appearance these quivers are outstanding at attractive prices.

Here is the good news on prices on the fine quivers shown above. From left to right:

#430S - DeLuxe design, 3-arrow Division Hunting and Field Quiver with harness-type straps	\$ 14.95
#425S - Center-Back Quiver.	11.95
#420S - Large, 2-Division, with harness	10.95
#410S - 2-Division without pocket . . .	7.50

Yes, our full line carries a "MONEY-BACK IF NOT COMPLETELY SATISFIED" guarantee. When you buy KING you compliment our ability to provide you with good-looking, long-wearing, correctly-designed archery accessories. Your purchase is appreciated and we stand behind our guarantee one hundred per cent to justify your faith in us. Yes, and you will look better, feel better, and shoot better with KING.

Left to right:

#460S - Target Quiver with Belt	\$ 3.00
#470S - Same, but with Ring & Belt Clip	3.00
#450 - Target Quiver in Arrabuk.	1.10
#484 - Large Arrabuk Quiver.	4.25
#483 - Medium Size Arrabuk	3.50
#482 - Small Size Arrabuk.	2.75

BOW CASES

Arrabuk, illustrated, is fleece-backed rubberized suede cloth. Sepia brown. Water-repellent, heavy, yet softly cushions bow. Full top zipper and leather bottom. Wide enough for average re-curves. Canton Flannel is heavy weight in gold color. Leather tie strings.

520 Arrabuk for one bow \$3.50

500 Canton for one bow \$1.65

NOW Fast Servings Are Easy

To start serving, lay about a quarter-inch of thread on string. Take three or four turns back and forth on spool to bring frame against bowstring. String should lie in bottom of "V" with slack in thread.

With server hanging below string, start slow pendulum motion, then when server is at top of back swing away from you, bring down smoothly and around string—and keep on spinning.

Use same procedure with string on bow, but let both hands rotate string and bow as complete unit when spinning. Slide your fingers along bowstring, closely following the server, as shown here.

At end of serving lay a loop of thread along string, make a few more turns, cut off tension, then insert end through loop and pull under. Then trim. Or finish by your own favorite method.

KING Speed-Spin Server

\$1.35

at least 60 one-minute servings
and no annoying bobbin to wind

No more slow, tedious, turn-at-a-time hand labor. Speed-Spin is fast. Just rotate the string and serving is complete in one minute. There's a full spool of thread -- enough for sixty or more servings. No fear of thread running out in middle of the job. When last wrapping on spool is exposed, enough thread remains for another complete serving.

No bobbin to wind. Factory-wound Speed-Spin spools unwind uniformly for smoother servings. If you ever need another spool of thread, we have a large stock on hand.

Illustrations to the left are camera-proof of easy spin-serving. Note how little hand movement is required to keep server spinning speedily along the string. However, for perfect control of Speed-Spin it is important to slide your fingers along bowstring, closely following the server, as shown in illustrations. Note, too, that serving can be applied to string on bow, or when stretched between posts.

Whenever adjusting tension, move wing nut just a tiny fraction of a turn each time to secure tight or loose serving to suit your particular preference.

ARROW CLIPS

The perfect clip for tackle boxes, arrow display racks. Made of finest spring steel, nickel plated over copper and burnished.

No. AC-Arrow Clip & Screw \$5.70 gr.

.45 DOZ.

FOR a good usable substitute for feathers to be developed but now HILL'S offers you the new WONDER-VANE** plastic feather.

What is the new WONDER-VANE? It is a plastic vane that you can shoot exactly as you would a feather. No special attachment or built up arrow rest is necessary. In fact, you can shoot it over your finger if that is the way you shoot. It won't slice them open as it passes by. It gives just like a feather as it passes the bow, and comes back into shape just as fast, and has the additional advantage of being more uniform than feathers ever were.

Archers will find that the new WONDER-VANE feather is more economical than turkey feathers. A kit containing 35 field or hunting size vanes and a half ounce tube of adhesive retails for only \$1.80. Then too, they are more durable. Lose an arrow and leave it out in the weather. Hit it with other arrows. Pull it through bales or target mats. You will find that you still have a perfectly functioning set of WONDER-VANE feathers on your arrows.

While the initial cost of WONDER-VANE to users will be somewhat higher than that of feathers, they will find a saving in using them for the following reasons:

1. Does away with the cost of dyeing or paying extra for dyed feathers. WONDER-VANE costs no more in colors -- and the colors are uniform.
2. Particular users will do away with the cost of grading -- each WONDER-VANE is exactly like every other, and there is no waste.
3. No more burning to shape. WONDER-VANE comes die cut, and the pattern is one that we have found best for both flight and stability.
4. WONDER-VANE attracts no moths or other vermin, so that particular cost is done away with as is also the cost and bother of constant moth-proofing.

WONDER-VANE'S beauty will add to the appearance of any arrow. You will find its colors bright and attractive. Because of the large amount of material which must be made up in each color WONDER-VANE must be limited to red and white to begin with, but other colors will be added as demand warrants them. Target size vanes will be added in the near future.

We take pleasure in announcing that WONDER-VANE'S are now available in target size vanes, 2 and 15/16 inches long by 3/8 inch at the highest point.

We believe that you will find them unbeatable for both accuracy and durability. No extra attachment on your bow are needed to shoot them. Field archers and crossbowmen have for the most part been able to shoot closer groups and higher scores than ever before and we are reasonably certain that WONDER-VANE'S will help target archers at least as much.

Please do not ask for samples. We admit it to be a reasonable request, but the adhesive we package is the only one we have found that will work with WONDER-VANE. We would have to send a tube with each sample and this would be expensive to say the least. We suggest the target kit which retails at \$1.70, containing a half ounce tube of adhesive and 36 target vanes in any combination of red and white.

Prices are as follows:

SIZE 2 15/16" LONG 3/4" HIGH	SIZE - 4 3/4" LONG 1/2" HIGH

THE PROFESSIONALS

In keeping with our policy of continuous and intensive research and experimentation, great strides have been made in the performance of HOYT PROFESSIONAL bows. Through the scientific combining of plastic, fiberglass and wood into bows with sound principles of design plus precision machining and the all important "know how" developed from years of experience, the new PROFESSIONALS are instruments of perfection.

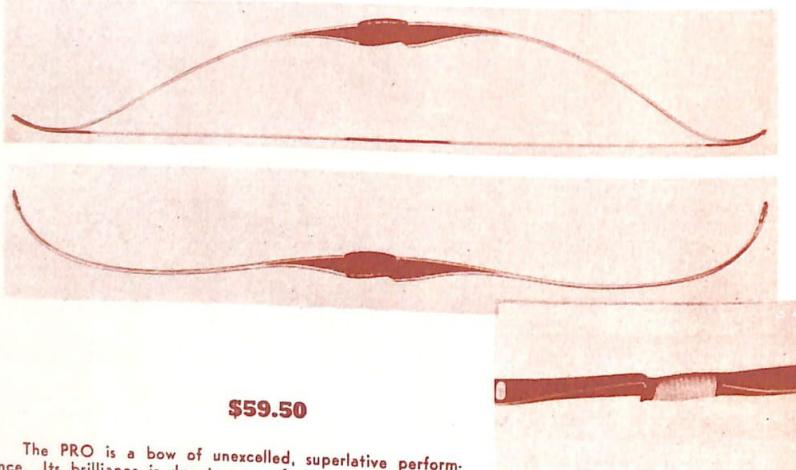

The PROFESSIONALS are custom made to order and undergo rigid testing and inspection before leaving our plant. The PROFESSIONALS have gained for themselves the enviable reputation of brilliant performance characterized by their phenomenal cast, built-in accuracy, smooth draw and soft crisp action. Constancy of cast under varying climatic conditions and rugged durability are additional strong qualities of the PROFESSIONALS. Their beautiful contours lend a pleasingly graceful appearance to the eye.

GUARANTEE: Each Hoyt bow has a serial number and is accompanied by a registration card which must be filled out and mailed by the purchaser within ten days after date of purchase. When so registered each HOYT bow is guaranteed for one year from date of purchase against faulty workmanship and materials. Unless bow shows evidence of misuse, free repair or replacement will be made should failure occur during the first two months after purchase. Thereafter, should failure occur from causes other than misuse, adjustment will be made whereby the owner pays 10% of the purchase price or cost of repair for each additional month he has the bow.

All bows are marked with weight at 28" draw.

THE PRO

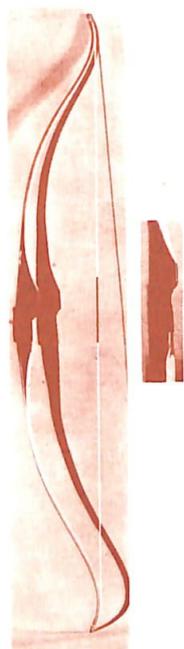

A Working Recurve of Scientific Design

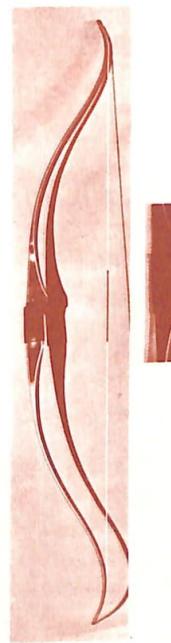

\$59.50

The PRO is a bow of unexcelled, superlative performance. Its brilliance is due to many factors, an outstanding example of which is the achievement of ultimate balance between theoretical and practical design. The PRO, truly the leader in modern bow design, is an exponent of the deflex-reflex principle which produces high efficiency for unsurpassed cast plus lower stress of limb for greater service life. Additionally, deflex design increases accuracy through improved stability in the hand and contributes to greater ease of stringing. The PRO also features near center shot design (full center shot available on special order) with "window" cut away section above arrow rest which permits full range, unobstructed sighting for both sight shooter and instinctor. Contoured for comfort, the pistol grip bow handle properly positions the bow hand and, to provide that "honest" feel, the grip is covered with a new, non-slip, suede leather handle. Lengths: 62" length, 30" draw limit; 66" length, 32" draw limit. Weights to 75 lbs. at 28". For heavier weights to 100 lbs. add \$5.00.

Eddings' Super-Cast Bows

FIREBALL "68" — One of the finest tournament grade bows produced today. Smooth, even draw. No shock at release. Glass back—maple core—PARALLEL glass facing. Black walnut handle section, arrow shelf with sight window. For those who want the finest in tournament bows, capable of shooting the highest of scores, this is it. Weights 35 lbs. to 60 lbs. Length 5' 8". Draw limit 32" 5' 4" length to 45 lbs. on special order at no extra cost. draw limit 28". Price \$68.50

LEFT
SPARTAN "62" — One of the newest creations at Eddings. Hours and hours, weeks and weeks, months and months of research and testing has gone into this model to make it one of the finest in its intended all around use as a target, field and hunting bow. The deflex, reflex working recurve design makes it very smooth shooting, plenty of cast, high durability and ease of bracing (stringing). Glass back, maple core, black walnut handle section—PARALLEL glass facing arrow shelf with high cut-out for those who wish to use a sight to the best advantage. Truly a fine all around bow. Weights 35 lbs. to 65 lbs., standard length 5' 2". Draw limit 28", 5' 6" length on special order at no extra cost. (Order Spartan '66)..... Price \$58.50

RIGHT
SPHINX "66" — Another one of Eddings' custom quality tournament bows. Has glass back, maple core, reinforced Plastic facing, (giving very good lateral stability to the curved tips). Contrasting hardwood handle section, arrow shelf, with sight window. Smooth in action, accurate and dependable. Casts an arrow at very high velocity. Weights 35 lbs. to 60 lbs. Length 5' 6". Draw limit 29". Price \$52.50

Eddings' Super-Cast Bows

SCOUT—The lowest priced in the Eddings line. But don't be misled by the price as this is every bit a top quality bow. The same high grade craftsmanship and material goes into the "SCOUT" as in all our other models. Has glass back, maple core, contrasting face. Also built-in arrow rest and near center cut-out. Reflexed limbs for extra cast. Weights 30 lbs. to 55 lbs. Length 5' 4" only. Draw limit 28". Price \$28.50

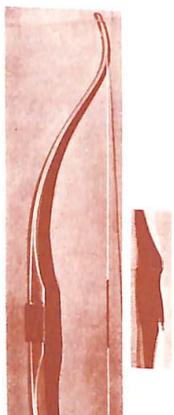

DUO-FLEX—For those desiring a top quality straight model bow, this is another new design in Eddings' that has gone through months and months of research and testing, to make it one of the most accurate, smoothest and fastest designs available. It is comparable to most recurves in cast, has deflex handle section and double reflex limbs for smoothness, with this high cast. Has glass back, maple core, contrasting handle section and parallel glass facing. Truly a fine bow. Weights 30 lbs to 55 lbs. Length 5' 6" only. Draw limit 30". Price \$38.50

RIGHT

CADET—A standard design recurve model with plenty of "Z" and stay — with IT qualities. Has glass back, maple core, contrasting handle section and plastic facing. Comes with arrow shell built-in and near center shot. A good, fast, dependable bow. Weights 30 lbs. to 60 lbs. Length 5' 4". Draw limit 28". Price \$38.50

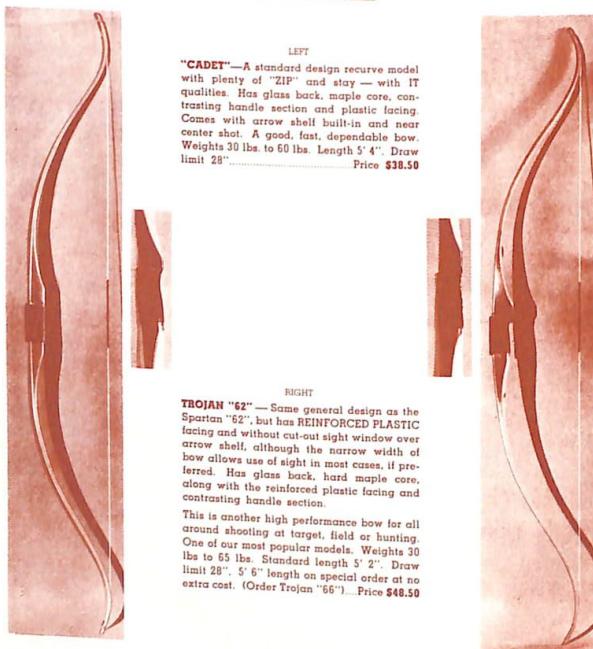

LEFT

TROJAN '62'—Same general design as the Spartan '62', but has REINFORCED PLASTIC facing and without cut-out sight window over arrow shelf, although the narrow width of bow allows use of sight in most cases, if preferred. Has glass back, hard maple core, along with the reinforced plastic facing and contrasting handle section.

This is another high performance bow for all around shooting at target, field or hunting. One of our most popular models. Weights 30 lbs to 65 lbs. Standard length 5' 2". Draw limit 28". 5' 6" length on special order at no extra cost. (Order Trojan '66"). Price \$48.50

FOR EVERY SHOOTING REQUIREMENT FOR EACH PERSONAL PREFERENCE

SHOOTING GLOVES

You will be especially pleased with clean releases and comfortable, long-wearing qualities of King gloves. Leathers are attractive, and of extra strength for extra service. Among the many styles of gloves, you will discover one that, apparently, has been designed just for you. Rights and lefts, and a size to fit your fingers. Three ladies sizes and four men, from small to extra large.

- 230 Closed-end style with Cordovan tips and elastic insert to keep glove back smooth, and finger stalls snug. Relieves wrist strap tension.
- 220 Open-end style. Cordovan tips, elastic-insert back.
- 210 All-leather back with open-end Cordovan tips.
- 210K All-leather back with open-end Cowhide tips.

ARMGUARDS

You will like the comfort and absolute protection of King armguards. All guards illustrated are made of strong, glossy Cordovan leather with sueded leather lining. Concealed reinforcing stays are blued clock spring steel, rigidly sewn in place. Elastic bands and adjustable fittings give secure, comfortable fit at all times. However, 120 guard may be had with either elastic bands or leather straps and buckles.

- 120 Large, extra width hunting guard with one-inch wide steel stay and three elastic bands to provide perfect fit over large area.
- 120B Same as 120, but with three leather straps and buckles instead of elastic bands.
- 110 Full length and wide, with one-inch stay for full protection.
- 100 Our most popular guard. Semi-narrow tapered design provides coolness, yet ample protection.
- 101 Same as 100, but Kip leather, not Cordovan.
- 105 Full length guard, but with extremely narrow design preferred by many archers.
- 100S "Shorty." Only 4 3/4" long. A favorite with many ladies and flight shooters.
- 100K Not shown. An inexpensive all-leather guard with leather lining and straps. For the youngsters.

FLEETWOOD PLASTIC ARM GUARD

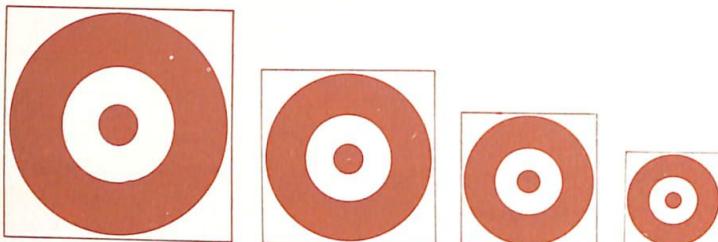

Made of unbreakable flexible plastic in eight beautiful colors. Ladies and men's sizes. Light, cool and comfortable. Shock proof, heavily ribbed to withstand the blow from the heaviest bows.

No. 500 and 501.....\$1.25

No. 501

BLACK HAWK CORRUGATED TARGET FACES

These Target Faces are made in accordance with the N.F.A.A. hand book for field shooting. They are made of heavy corrugated paper and the shooting spot is heavy black with the background in white. These targets will save a club many hours in preparing for a shoot. These targets will outlast most any target on the market because of their heavy construction. During rainy weather these targets can be waterproofed by immersing for a moment in molten paraffine. The targets come in the following arrangements:

A complete 36 Target set consisting of four 24", six 18", eight 12", eighteen 6" Faces — \$8.00 list price.

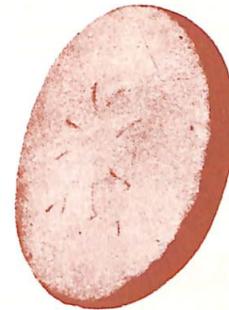

12 - 6" Targets only	\$1.70 per dozen, list price
12 - 12" Targets only	2.90 per dozen, list price
12 - 18" Targets only	4.05 per dozen, list price
12 - 24" Targets only	5.85 per dozen, list price

The New Stream-Eze Glass Bows Revolutionizes Archery

• FIBER GLASS . . . The Miracle of Modern Science . . . Now Brings to the Archer the Proven Qualities of Millions of Longitudinal Glass Fibers Bonded Together Making an Almost Indestructible Material.

A Few of the Many New Features in the STREAM-EZE GLASS BOWS Are:

- SAFETY: Will Not Break Nor Injure You.
- STRENGTH: Impossible to Break by Overdrawing.
- PERMANENCE: Last a Lifetime.
- SPEED: Excels Anything That We Have Seen.
- SILENT: Quiet as a Whisper.
- BEAUTY: A Bow Any Archer Would Be Proud to Own.

After years of extensive Research and know-how, STREAM-EZE offers to the Archery Field an Almost Indestructible Line of Solid Fiber Glass Bows.

Model No. 40 - STRAIGHT REFLEX
Pat. Pending
Draw Weights - 30 to 60 Lbs.
(R. or L. Hand) Length 56" \$29.95 List

Glass Fibers bonded together by the exclusive STREAM-EZE process give strength, terrific cast and the ultimate safety never before offered by any other type of glass bow.

The designing of the STREAM-EZE Bows is the most beautiful we have ever seen. In our opinion they will out-cast and out-perform any bow of like weight and construction. The bows will not take a permanent set or change cast regardless of temperature change.

The hardwood handle and take-down design are features every archer will want . . . A sturdy cloth case included with every bow.

Mere description does not do these fine bows justice. Buy Yours Today and . . . SEE THE DIFFERENCE!

Model No. 35 - STRAIGHT BOW
Pat. Pending
Draw Weights - 40 to 60 Lbs. \$24.95 List
Model No. 30 - Length 54" - To 35 Lbs. \$14.95 List
Model No. 20 - KIDS BOW
Length 48" \$8.95 List

TAKE-DOWN DESIGN

GUARANTEE

- All STREAM-EZE Solid Glass Bows are fully guaranteed for one year and to be free of any bow shown no signs of misuse. They are also guaranteed against breakage from over-drawing.
- ALL CLAIMS AND REPLACEMENTS SHOULD BE MADE DIRECT TO THE FACTORY.

ALL CLAIMS AND REPLACEMENTS SHOULD BE MADE DIRECT TO FACTORY.

ARROW LENGTHS

The following chart will help you order your aluminum arrows or shafts. Please order by bow weight and length, or number, for example: if you want arrows for a 40 to 45 lb. bow at 28" length then you should order No. 1816.

ARROW LENGTHS

Bow Weights	23"	24"	25"	26"	27"	28"	29"	30"
18-20						1616	1616	1716
20-25					1616	1616	1716	1716
25-30					1616	1616	1716	1716
30-35			1616	1618	1716	1716	1816	
35-40		1616	1618	1618	1716	1718	1816	1916
40-45		1618	1618	1716	1718	1816	1916	
45-50	1618	1618	1718	1718	1816	1818	1916	2016
50-55	1618	1718	1718	1818	1818	1820	1918	2018
55-60		1718	1718	1818	1820	1918	2018	
60-65		1718	1818	1820	1820	1920	2018	
65-70					1920	2018	2018	2018
70-75						2020	2020	

Hunting Arrows should take the shaft for the next weight up.

The first 2 numerals in above shaft sizes indicate outside diameter in 64ths. The second 2 numerals in above sizes indicate wall thickness in thousandths.

for example:—

No. 1616 is $\frac{1}{4}$ diameter x .016 wall.

No. 1816 is $\frac{9}{32}$ diameter x .016 wall.

ALUMINUM SHAFTS, ARROWS AND POINTS

Shafts only—without points	\$14.00 per dozen, list price
Shafts with points	17.00 per dozen, list price
Shafts with points and Nocks attached	20.00 per dozen, list price

If shafts are wanted cut to lengths please specify bow weight and length wanted.

Field points are available in some sizes.

Shafts for hunting points with standard taper at no extra cost.

If shafts are ordered in 10 dozen lots deduct 5% from list price.

If shafts are ordered in 25 dozen lots deduct 10% from list price.

If shafts are ordered in 50 dozen lots deduct 15% from list price.

PRICES OF FINISHED ALUMINUM ARROWS

Target Arrows	\$27.00 dozen, list
Field Arrows	28.00 dozen, list
Hunting Arrows	30.00 dozen, list

Our choice of crests and feathers, and we guarantee that you will be pleased. If any custom work is ordered add \$3.00 per dozen.

Hunting heads can be of your choice but they must be of standard taper. Please specify a second choice.

POINTS FOR ALUMINUM ARROWS

\$2.70 per dozen—Specify hole size in shaft and outside diameter of shaft or send sample of shaft to us.

BRUSHPROOF your bow with

Brush Buttons

only 50¢ Per Pair

Does not interfere with bracing!

Does not impair cast or accuracy!

Light weight—mfg. of gum rubber!

Dampens string noise!

Experts agree:

Tracy Stalker writing for "Archery" (Questions and Answers, Nov. 1950).

"Question: Is there anything that can be done to eliminate the twang of the bowstring on a hunting bow?

"Answer: On most bows the little rubber buttons that are sold to prevent brush and grass from catching under the string have a good dampening effect on string noise."

The following listed arrows we believe are the finest you could purchase for the money.

Matched to perfection in spine and very close in weight and sold on a money back guarantee.

Hills double barbed fish point and fiber glass has rubber fletching.

Hills- Hornet arrow heads

The following listed arrow heads are designed and manufactured by archers for archers.

Our big game hunting broadheads have proven their killing power on most big game on the North American continent and several foreign countries. We have proven beyond a doubt that a concave ground broadhead has extreme killing power and penetration for the trajectory or speed that an arrow travels in flight.

Prove this to yourself by having HILLS - HORNET arrow heads installed on your next set of arrows.

No special tools are needed to remove our field points if they are embedded in a tree, etc.

Our small game blunts are all concaved in the nose to avoid slipping off the game on impact.

We try at all times to ship orders out the same day they are received.

Our tournament heads make the finest small game head ever installed on an arrow. The following listed heads all have the same degree tapered hole to the ferrule.

The following listed arrow heads all have the parallel hole in the ferrule:

	Doz.
160 Gr. 11/32" Field Point	\$1.50
160 Gr. 11/32" Concave Nose Blunt	1.50

The New Rohde

SPIRO Fletcher

\$10.50 each

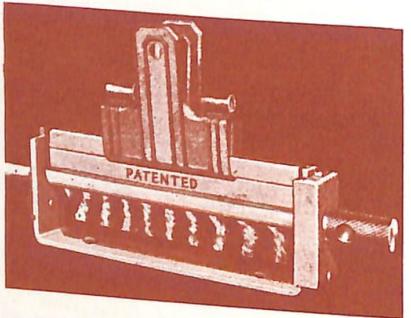

The RIGHT SPIRO CLAMP fletches
RIGHT wing feathers only.

The LEFT SPIRO CLAMP fletches
LEFT wing feathers only.

The Rohde Hunting Jig Frame (old
style) can be used with the NEW
SPIRO FLETCHING CLAMP.

This Fletching Clamp sets the feather
to the shaft with a true helical spiral.
Helical fletching controls the arrow ro-
tation, thereby greatly improving ac-
curacy and flight characteristics.

State if Right or Left wing feathers are
to be used.

The Rohde Hunting Fletching Jig (3FTB)
(4FTB) is available for four
feather fletching.

Conversion Kit "B" -- Changes
from three to four feathers.

Conversion Kit "C" -- Changes
from four to three feathers.

Clamp Repair Kits -- Two springs
and two balls.

\$9.00 each

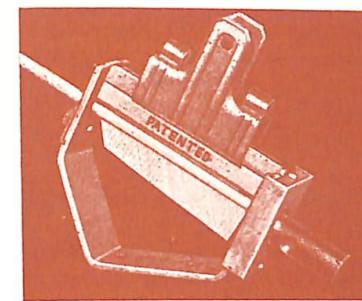

Shipping Weight 2 Pounds

The "Improved" Rohde Target Fletcher

is constructed entirely of brass and all
parts are accurately machined.

The frame accommodates any size ar-
row shaft from 3/16" to 3/8" in diameter
— straight, tapered or barreled and the
feathering clamp will take either right
or left wing feathers up to 3-3/4" in
length. This jig fletches either straight,
right or left slant.

The knurled handle has a hole so that
one can see the arrow nock enter the
nock spring.

THE NA-PO

Price \$55.00

The Na-Po was designed and proved by one of the country's top field and hunting archers. All his knowledge and skill were directed toward a bow that would suit all archers, from top competition shooters to the fellow who occasionally uses a bow to hunt. Ten years experimenting and 2½ years in the hands of the nation's average archer has proved beyond doubt that the Na-Po is IT.

5'4" to 26" 5'6" to 28" 5'9" to 30"

LONG WORKING RECURVES

The pent-up energy of these recurves is transferred smoothly to the arrow to give unexcelled speed.

- **NOTE THE RADIUS OF THE LIMBS**
These limbs are not just set back. They are deflex-reflex design for SPEED and SMOOTH shooting.
- **NEW GLASS FACE AND BACKING**
After long research the Na-Po bowyers have found, and use, the best.
- **DEFLEX HANDLE**
Here is one of the secrets of smooth shooting without the loss of speed.
- **THE NA-PO** has a full view window. There is no chance for game or target to get behind the bow.
- **CENTER SHOT**
The Center shot feature will put more energy into the arrow.
- **THE NA-PO** has a grip that fits the hand in a way that makes the bow feel like an extension of the shooter's hand.
- From its fine maple core to its glass back and face, the material used in the Na-Po is the finest obtainable. The Glasface used is pure white and one of the secrets of its speed.
- **THE WORKMANSHIP** is the best. There is no substitute for experience and the Na-Po bowyers are masters of their trade. Their workmanship is, of course, fully guaranteed.

FEATHER TRIMMER

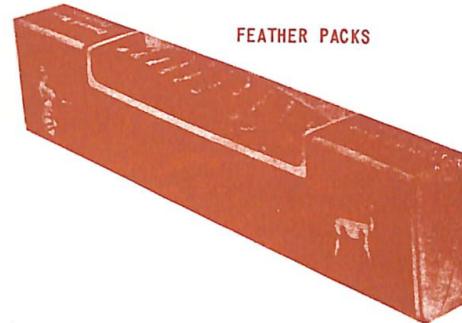

The Young Feather Trimmer with New Klean-Cut ribbon burns arrow feathers to pin-point accuracy. Easy to operate.

Ribbons can be formed to any desired feather shape - hunting or target.

The new (concave shape) Klean-Cut ribbon electrically heated burns faster - cleaner - retains its shape - and will not sag when hot. Equipped with special heavy duty transformer - housed in steel case - bright red finish. Operates on 115 volt A. C.

Complete with three Klean-Cut Ribbons and instructions. \$14.95

CLARK'S

FLEMISH SPLICE BOWSTRINGS

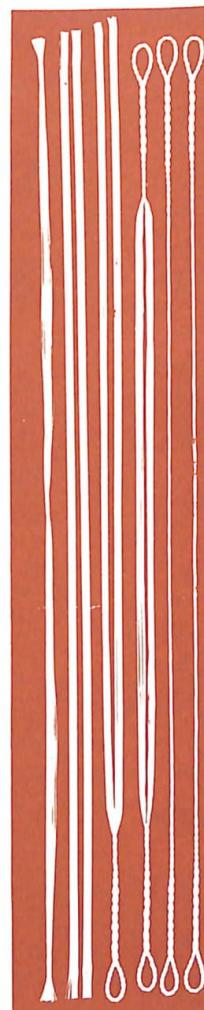

Nine years experience has taught us how to make bowstrings that will improve your score. Their lighter weight increases the cast of your bow thus adding to your accuracy and increasing your scores. Note from the picture how all strands are kept PARALLEL and TENTIONED alike even after the splices and loops are made. This insures that each strand does an equal amount of work, adding materially to the life of the string. Waxing of each strand separately LUBRICATES the string INSIDE and WET-PROOFS it so that no additional waxing is necessary or advisable. CLARK strings are PRE-STRETCHED too, so they will not let down on your bow. Loops and splices are HAND MADE and CUSTOM BUILT to insure you of the best product possible. Users say they're TOPS. \$1.50

*If you can't find it in our catalog, ask for it and we
will try our best to get it for you.*

BEING AN ARCHER DOES NOT NECESSARILY MAKE
YOU A GOOD SPORTSMAN, BUT, "BE ONE"! AND
OBEY YOUR STATE GAME LAWS.

GOOD LUCK, GOOD SHOOTING
With Equipment Purchased From
HILL'S ARCHERY SUPPLIES
BOX 35
MANITOWISH WATERS, WIS.
