Live Trees Hazard

Natural Christmas trees are not permitted in Ashland College buildings due to fire regulations, according to Ron Baker, Ashland City Fire Department.

These trees are considered a fire hazard because the fire-proofing method commonly used on natural trees is not considered adequate by fire department standards. It is recommended that students use artificial trees instead.

Decorations should be checked to insure that, as in the case of Christmas lights, the wiring is not frayed.

Christmas decorations should be removed prior to the semester break.
