They share small-incision cataract surgery, the South Florida Eye Clinic and the best vision of their adult lives!
 Since 1982, lots of people have come to trust us for their professional eye care...including state-of-the-art cataract and implant surgery. What's more, they enjoy the fact that our professional staff is always available to help them and that we accept assignment on Medicare for all of our services.
 Call us for more information at 434-5664 or 1(800)282-8085. After all, you might have a lot in common with us, also!

RX FOR CONSUMERS:

ASK YOUR PHARMACIST ABOUT GENERICS

If you're looking for a way to cut your medical costs, the Federal Trade Commission suggests you ask your pharmacist about choices in filling prescriptions. These can often include generic drugs: low-cost, effective substitutes for brand-name prescription medicines.

"Potential consumer savings for all multisource generic drugs could reach \$400 million each year," says the FTC.

Forty-eight states allow pharmacists to substitute low-cost generics on brand-name prescriptions, the FTC notes. Generics are usually sold under shortened

chemical names by competing manufacturers.

"About half of all brand-name drugs have a generic equivalent," says the FTC. "And generics can save the consumer up to 50 percent on some drugs."

The Federal Trade Commission, which wants to "inject a little old-fashioned choice" into the health care marketplace, has launched a campaign to encourage consumers to consider their choices knowing that generic drugs are available.

The theme of the FTC's campaign is "Generic drugs... get the facts from your pharmacist."
