## EVERGLADES CITY

This charming community is one of the last in Florida to remain untouched by large real estate developments and a monumental growth problem. Everglades City is best known as the western water entrance to the Everglades National Park but every year thousands visit the town of some 600 permanent inhabitants to partake of

the finest fishing on the eastern seaboard. The historic Rod and Gun Lodge is situated here; along with a number of other accommodations. Everglades City was once the county seat and has attracted celebrities from throughout the world who appreciate this rare community. It's only about a 40-minute drive on U.S. 41... southeast of Naples.
