W. R. GRIMSHAW COMPANY *General Contractors, Tulsa, Oklahoma*

W. R. GRIMSHAW COMPANY

General Contractors

The W. R. Grimshaw Company was organized in October, 1925, as a co-partnership. On July 25, 1927, the Company was incorporated under the laws of the State of Delaware. On January 2, 1942, the Company reverted to the co-partnership form of organization. In January of 1950, a separate corporation was formed to the co-partnership.

Principal executive offices have always been located in Tulsa, Oklahoma. Operations have spread over most of the Central States, including Oklahoma, Texas, Arkansas, Missouri, Illinois, Kansas, Nebraska, Colorado, and Wyoming.

Since its organization, many scores of widely diversified projects in the commercial, institutional, heavy industry and utility fields have been executed by the company. Its experience covers factory, store, office, theatre and warehouse buildings, military structures, public buildings, churches, schools, hospitals, and civic centers; hydro-electric and steam generating power plants, heavy duty air conditioning and heating systems, filtration and sewage disposal plants. In power and product distribution, the company has built underground and highline electric transmission systems, heavy piping installations for sewage, water, gas, steam and ammonia, and similar projects.

To include all available illustrations of our work would make the presentation cumbersome. The pictorial pages following illustrate a representative selection of projects which we have constructed.
